The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 124 So. Fifth St., Marshall, Ill.; Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second-class matter at post-office at Marshall, Ill., June 16, 1930, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

Number 1 | January, 1931 | Volume 9

Important Message Is Expected from Mr. Legge

Farm Board Chairman and Mrs Sewell Will Speak at Banquet.

ALEXANDER LEGGE, the courageous, outspoken chairman of the Federal Farm Board who is honestly and sincerely trying to make the Marketing Act work for the best interests of the farmer, is expected to make some new and important pronouncements in his banquet address on Thursday night, Jan. 29, at the coming I. A. A. convention, Springfield.

Mr. Legge is not an orator. He is not flowery. He wastes no time slapping his audience on the back. He talks facts, hits hard, and wraps up much thought in few words. He says what he thinks whether you like it or not. He is no politician, in the popular meaning of the word. Many of us like that kind of a man.

Mrs. Chas. W. Sewell, home and community chairman of the American Farm Bureau Federation, will have a place on the banquet program with Mr. Legge. Her address will be devoted to the influence of co-operative efforts among farmers on community and home improvement.

Marketing Prominent

Co-operative marketing will be given prominence at the various meetings and sessions on January 28 and 29. John Brandt of St. Paul, president of Land O'Lakes Creameries, Inc., and Tom A. Borman, Chicago, manager of the Beatrice Creamery Co., will address the annual meeting of the Illinois Produce Marketing Association on Wednesday afternoon, Jan. 28.

George S. Milnor, Chicago, general manager of the Farmers National Grain Corporation and president of the Grain Stabilization Corp., will talk to the Marketing Conference Thursday afternoon. Other group conferences to be held simultaneously with those mentioned are Organization-Information, Business Service, and Home and Community. Mrs. Henry J. Mies of Pontiac, president of the Illinois Home Bureau Federation, is arranging a program for the latter conference of special interest to women attending the convention.

Grimes to Speak

One of the outstanding speakers of the three-day session will be J. Frank Grimes of Chicago, the aggressive president of the nation-wide Independent Grocers' Alliance of America, a chain of more than 11,000 independently-owned grocery stores. How these stores are succeeding through co-operative effort and good business administration is a colorful story of particular interest to organized farmers who are working toward similar ends. Mr. Grimes, who has addressed some of the largest conventions in the country during recent years, is known widely as a forceful, vigorous speaker. He is scheduled to

(*Continued on page 6*)

Banquet Speaker

HON. ALEXANDER LEGGE

Governor Emmerson Is Friday P. M. Speaker

Questions of Public Policy Affecting Farmers to Have Consideration.

QUESTIONS of public policy including taxation, good roads, reapportionment of the legislature, the gas tax, drivers' license law, rural school improvement and other will be considered both at the Public Relations Conference on Thursday afternoon and at the afternoon session on Friday, January 30.

Governor Louis L. Emerson wil speak at the luncheon on Friday, where representatives of state-wide organizations and others will be guests. Resolutions defining the policies of the organization to be followed in the coming year will be threshed out and adopted at the close of this session.

First Appearance

The governor's appearance at the annual luncheon will be his first since taking office, before a meeting of the association. In his recent biennial message to the legislature, Governor Emmerson touched on many important issues. He made a definite recommendation on the reapportionment issue, suggesting representation by population in the state senate, and territorial representation in the house. This is a plan similar to that in use in most states having large metropolitan areas, namely New York, Pennsylvania and California, and one favored by farmers. He asked that the present plan of distributing gas tax money be left undisturbed so that the state-wide road building program now underway can be completed.

The present depression in the field of agriculture, according to Dr. W. J. Spillman of the U. S. Department of Agriculture, will continue as long as acreage of wheat and cotton continues to expand at a rate faster than the increase in the demand.

TENTATIVE PROGRAM

SIXTEENTH ANNUAL MEETING OF ILLINOIS AGRICULTURAL ASS'N.

HOTEL ABRAHAM LINCOLN, SPRINGFIELD, ILLINOIS

JANUARY 29-30, 1931

Thursday Forenoon—January 29, 1931

Majestic Theatre

9:00 a. m. Community Singing.

9:15 a. m. Invocation - *Rev. H. H. Pittman*
Springfield.

9:30 a. m. Address of Welcome - *A. W. Hillier*
President Springfield Chamber of Commerce
Pawnee Quartet.

9:45 a. m. President's Address - *Earl C. Smith*

10:45 a. m. Report of Secretary - *G. E. Metzger*
Appointment of Committees.

11:30 a. m. Report of Treasurer - *R. A. Cowles*
Report of Credentials Committee.

Thursday Afternoon—January 29, 1931

1:15 p. m. Organization Conference — Banquet Room, Leland Hotel.

Public Relations Conference — Y. W. C. A. Building.

Marketing Conference—Ball Room, Abraham Lincoln Hotel.

Speaker, Geo. S. Milnor, Chicago, General Manager, Farmers National Grain Corp.

Financial Business Service Conference—Sangamo Club.

Home and Community Conference —Palm Room, Abraham Lincoln Hotel.

4:00 p. m. District Caucuses and Conferences.

11th District — Nominate member of I. A. A. Board to succeed H. C. Vial.

12th District—Conference.

13th District — Nominate member of I. A. A. Board to succeed C. E. Bamborough.

14th District—Conference.

15th District — Nominate member of I. A. A. Board to succeed A. N. Skinner.

16th District—Conference.

17th District — Nominate member of I. A. A. Board to succeed Geo. J. Stoll.

18th District—Conference.

19th District — Nominate member of I. A. A. Board to succeed C. J. Gross.

20th District—Conference.

21st District — Nominate member of I. A. A. Board to succeed Samuel Sorrells.

22nd District—Conference

23rd District — Nominate member of I. A. A. Board to succeed W. L. Cope.

24th District—Conference.

25th District — Nominate member of I. A. A. Board to succeed Fred Dietz.

Thursday Evening—January 29, 1931

Annual Banquet—Arsenal, 6:30 P. M.

Music by Orchestra and Pawnee Four.

Presiding - - - - - *President Earl C. Smith*

Introduction of Guests.

Address - - - - - - - *Alexander Legge*
Chairman of Federal Farm Board

Address - - - - *Mrs. Chas. Sewell, A.F.B.F.*

Business Session.

Election of Officers.

Friday Morning—January 30, 1931

Majestic Theatre

9:30 a. m. Music.

Report of Convention Conferences.

Reading of Resolutions.
(Action deferred.)

11:15 a. m. Address—"Business Administration" - - - *J. Frank Grimes*
Chicago, President Independent Grocers Alliance

Friday Afternoon—January 30, 1931

Annual Luncheon—Arsenal

Presiding - *President Earl C. Smith*

Music—Orchestra.

Introduction of Guests.

Address - *Gov. Louis L. Emmerson*

Business Session of Delegates.

New Business.

Adjournment.

Who Paid the Hotel Bill? Farmers Ask

Commenting on the "rump meeting" held in the Great Northern Hotel early in December (see December RECORD), Bill Stahl of the Farmers National Grain Corp. observes that:

"While the Farmers National Grain Dealers' Association was meeting in one Chicago hotel, another meeting was being held at another Chicago hotel. It was significant that those who called this meeting had abandoned the use of the letterheads of the Farmers Grain Dealers' Association of Illinois and described themselves as the Farmers Elevator General Committee.

"Presumably to attract a crowd which failed to materialize, the Farmers Elevator General Committee announced that Senator Norbeck of South Dakota and Senator-elect Lewis of Illinois had been invited to speak. Neither appeared. A third expected speaker, Will Zurbucken of Dodge City, Kansas, also failed to appear. And thereby hangs a tale.

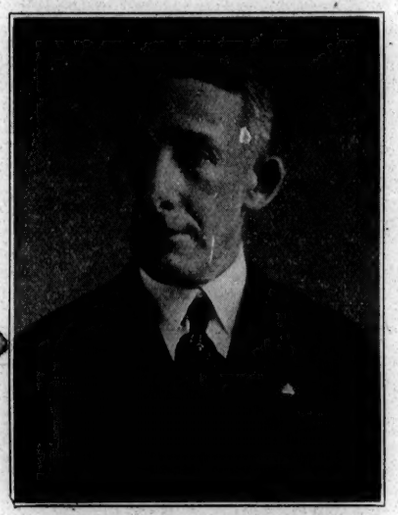
"Mr. Zurbucken attended a meeting of the same group at Mason City, Ia., a few weeks ago. He now makes affidavit that he was invited to attend the Mason City meeting by an employe of an independent grain commission firm in Kansas, with the assurance that all his expenses for the trip would be borne by the old-line firm. He states further in his affidavit that the promise was kept and that he has been reimbursed in cash for all his expenses on the trip from his home to Mason City.

"Prior to the Chicago meeting Mr. Zurbucken received a letter from one of the spokesmen for the Farmers Elevator General Committee inviting him to speak at the Chicago meeting. In this letter it was suggested to Mr. Zurbucken that 'I hope you will be able to stir up some interest and make a survey by telephone or otherwise, to get in touch with *some of the right kind of fellows* who will be coming up to the Live Stock Show, and who no doubt would be interested in attending our afternoon and evening session on Monday.'

"Included with the letter was a suggested outline for the speech that Mr. Zurbucken did not make. It is reported that such a speech was delivered at the meeting, but Mr. Zurbucken neither delivered it nor authorized it.

"It is reported also that ten rooms were reserved at the Chicago hotel for expected guests that did not arrive.

"Who paid the hotel bill?



"Who maintains the offices of the Farmers Elevator General Committee at Bloomington, Ill.?

"Who pays for the mailing and printing of propaganda?

"Who pays the salaries, if any, of the active office and field staff?

"None of these expenses are paid by the Farmers Grain Dealers' Association of Illinois, according to its officials. Nor is the program sponsored by the Farmers Elevator General Committee in line with the resolutions adopted as set out above by the Farmers Grain Dealers' Association."

Luncheon Speaker

HON. LOUIS L. EMMERSON

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL HOLDING COMPANY

Take notice that the annual meeting of the stockholders of Illinois Agricultural Holding Company will be held on Wednesday, the 28th day of January, 1931, at the hour of 11 o'clock a. m., at the Abraham Lincoln Hotel, Springfield, Illinois, to elect directors, receive, and, if approved, confirm the report of the board of directors of the company for the fiscal year ending December 31, 1930; and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, Jan. 1, 1931.

GEORGE F. TULLOCK, *Secretary.*

Dr. Craig Speaker For Serum Ass'n. Meet

The Illnois Farm Bureau Serum Association announces that Dr. R. A. Craig, veterinary from Purdue University, will be the principal speaker at its coming annual meeting at Springfield, Wednesday, January 28. Dr. Craig will discuss "Swine Diseases."

The meeting is called for 10:00 a. m. The business session will be held in the afternoon.

900495

"Tug" Wilson Speaker State Baseball League

KENNETH L. "TUG" WILSON, director of athletics at Northwestern University and one of the leading college coaches in the middle west, will address the annual meeting of the Illinois Farm Bureau Baseball League at Springfield Wednesday morning, January 28. Mr. Wilson telegraphed his acceptance of the engagement from Florida.

"Tug" Wilson has many friends in downstate Illinois. His former home was at Atwood in Piatt county. Wilson attended the University of Illinois, where he won high honors in track. He was named the best all-around man in sports during his senior year in 1920.

After graduating from the College of Agriculture he took coaching work and assisted in the U. of I. athletic department for several years before going to Drake University, Des Moines, where he held a position similar to the one he now holds at Evanston.

Delegates, players, managers and fans from the 31 counties having organized Farm Bureau baseball teams will gather for the annual convention.

A Good Year

The I. A. A. finance department reports that more members of the Illinois Agricultural Association paid their dues during 1930 than in any year since 1923. The net increase in membership for 1930 over 1929 was 4,519.

The Rock Island County Farm Bureau recently passed a resolution favoring a permanent 4-H boys' and girls' club building on the State fair grounds.

FARM BUREAU BASKETBALL

A State Farm Bureau Basketball League with inter-county games leading to a state championship tournament has been suggested as a means of providing sport and recreation for farm boys and men, entertainment for young and old, during the winter.

High school and community gymnasiums can be obtained for regular practice and play. The cost of running County Farm Bureau teams will be light. Expenses can be met by charging small admission fees to games.

Iroquois county is ready to go, providing other counties will bring out teams to furnish competition.

Eligibility rules similar to those used in the Farm Bureau Baseball League are contemplated.

Get in touch with your County Farm Bureau office if you want a team, or write Department of Information, Illinois Agricultural Association, 608 S. Dearborn St., Chicago.

Competition Between Meetings Wed., Jan. 28

Suggest County Delegations Arrange for Representation at Each.

THERE will be plenty of competition between the many allied organizations and companies holding annual meetings and conferences on Wednesday, January 28. Most of the sessions on that day will be going on simultaneously and the delegate or visitor will be busy if he hopes to keep up with them all.

Produce Meeting

In addition to the annual meetings and conferences held last year, the Illinois Produce Marketing Association, organized in 1930, will hold its annual convention at 1:00 P. M. on this day. It is making a bid for a large attendance, and to that end has definitely scheduled Tom A. Borman, Chicago, the aggressive manager of the Beatrice Creamery Co. as one speaker, and tentatively scheduled John Brandt of St. Paul, president of the famed Land O' Lakes Creameries, Inc. to address the meeting.

The annual meeting of the State Farm Bureau Baseball League will hear K. L. "Tug" Wilson, popular athletic director at Northwestern University, and former University of Illinois athlete. Tug was reared in Piatt county, Ill., graduated from the agricultural college at Urbana, and is well known to many downstate people. The baseball meeting will begin at 9:30 A. M. in the Abraham Lincoln Hotel.

Serum Meeting

The State Farm Bureau Serum Association meeting which opens at 10:00 A. M. will hear Dr. Craig, chief veterinarian at Purdue University. The Illinois Agricultural Co-operatives Ass'n. has invited E. E. Crabtree, Jacksonville banker to address its meeting scheduled for 10:00 A. M.

The annual meeting of the Illinois Agricultural Mutual Insurance Co., announced elsewhere, is scheduled for this day. A general conference for Country Life Insurance Co. agents will be held in the morning, the annual meeting of the auto insurance company in the afternoon.

The Illinois Farm Supply Co. will hold a conference for county supply company managers at 10:00 A. M. to which directors and county advisers are invited. Sam Miller, Chicago, an experienced oil man will discuss "Controlling Shrinkage of Volatile Fuels." Fred Ringham is expected to talk on accounting and explain the federal income tax law.

MRS. CHAS. W. SEWELL

Mrs. Sewell will speak at the annual banquet Thursday night, January 29.

There is somewhere between one million and two million dollars in the banks in New York State awaiting rightful claimants, according to a recent statement by the State Department of New York.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL ASSOCIATION

Notice is hereby given that the annual meeting of the members of the Illinois Agricultural Association will be held at the Majestic Theatre, in Springfield, Illinois, on the 29th day of January, 1931, at 9 o'clock a. m., for the following purposes:

For the consideration and vote upon approval and ratification of the reports of the president, secretary and treasurer of the association, and the acts of the board of directors and officers in furtherance of the matters therein set forth, since the last annual meeting of the members of the association.

To approve, ratify and confirm the several purchases heretofore made by this association of stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein.

To secure consent and authorization to acquire on behalf of this association, by purchase, certain stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein.

To elect eight members to the board of directors for two-year terms.

To elect a president and vice-president.

To consider any proposed amendment of the articles of association or of the by-laws of the Illinois Agricultural Association as may be properly submitted.

For the transaction of such other business as may properly come before the meeting.

GEO. E. METZGER, *Secretary.*

Chicago, Illinois, Jan. 1, 1931.

MAKE YOUR RESERVATIONS NOW

Send in your reservations for rooms, banquet and luncheon tickets at once if you have not already done so. Members may get in touch with their local Farm Bureau offices, or else write direct to the Sangamon County Farm Bureau, Springfield.

Ask for Reduced Rates of Fare and One Half

The I. A. A. Transportation Department has secured special rates of fare and one half for the round trip on nearly all the Illinois railroads, including the Illinois Traction System.

The special rates are good from any point in Illinois, also from St. Louis, Mo., to Springfield. The New York Central Lines and the T. P. & W. alone stated that they didn't secure enough traffic in former years to warrant making any concession.

If the station agent refuses to sell a cut rate ticket, get a receipt when you pay your fare and then see a representative of the I. A. A. transportation department when you arrive at Springfield.

Legge Banquet Speaker

(Continued from page 3)

appear on the program at the general session Friday morning.

The opening business session of the I. A. A. meeting, as in past years, will come on Thursday morning, Jan. 29, where the president, secretary and treasurer will report on the state of the association. Election of a president and vice-president, and of directors to succeed those whose terms expire, viz., H. C. Vial, C. E. Bamborough, A. N. Skinner, Geo. J. Stoll, C. J. Gross, Samuel Sorrells, W. L. Cope, and Fred Dietz, will take place after the banquet on Thursday night.

Await State Commerce Commission Decision

As we go to press the Illinois Commerce Commission has not yet handed down its decision as to whether or not the Panhandle Illinois Pipe Line Company is a public utility and therefore subject to the Illinois Public Utility Act.

The Illinois Agricultural Association some time ago filed a brief with the Commission holding that the business proposed to be transacted by the Company does not constitute a public utility service.

Knox County Reports Large Membership

"At this, the thirteenth annual meeting of the Knox County Farm Bureau, I am glad to report that the year 1930 has been one of our most successful years and shows the largest membership at 1,360 of any since the war period," said Harry Gehring of Altona, president of the Knox County Farm Bureau, when he called the meeting in Galesburg to order recently.

"In reports that are to follow you will find that great progress has been made in co-operative marketing; that several new projects have been added to our program and which have been carried through to a successful completion. You will find that the finances of the organization are very satisfactory," said Mr. Gehring.

"Your association is stronger today, as to membership, finances, loyalty and ability to do the jobs for which it was created than it has ever been before," said Secretary Ira Moats of Maquon. "More things are being accomplished each year and an increasing number of members are doing constructive work. Your organization has been especially favored through the years in its leadership. Your president, who occupies the chair today, has served faithfully during a long period of years, in fact, records show that he has not missed a meeting of the board of directors since 1923."

"In submitting my second annual report as your treasurer, I am pleased to announce that the organization is in the strongest financial condition that it has ever been during its thirteen years' history," said T. J. Sullivan of Galesburg. "This is a result of the economy plan and the budget system followed by your board of directors."

His report showed that the net worth of the Knox County Farm Bureau is $15,667.01.

Open Offices for Drouth Loans

Field offices for handling loans to farmers in drought and storm areas will be established by the U. S. Department of Agriculture at St. Louis, Memphis, Grand Forks, North Dakota, and Washington, D. C.

The interest rates on all loans will be 5 per cent. Notes given by borrowers will be payable next fall when the 1931 crops mature and are marketed, the date of payment varying according to the marketing season in the different sections. Each borrower will be required to give a first lien on his 1931 crops.

J. FRANK GRIMES CHICAGO

Freeport-Dixon High Line Cases Settled

AN amicable settlement of claims for easements to land traversed by a high line between Freeport and Dixon was effected between officials of the Illinois Northern Utility Company and landowners represented by the Stephenson, Ogle and Lee County Farm Bureaus and the I. A. A. in Chicago on January 2.

E. D. Alexander, president and general manager of the utility company, and Earl C. Smith, president of the I. A. A., were the principals in negotiating terms of settlement.

Compensation for easements and actual land covered by towers or structures varied according to the location of the land in question. A greater allowance, for example, was made where a line cut diagonally across a field than where the power line straddles or runs parallel to fences.

John C. Watson, statistician for the I. A. A., was named by both parties to appraise the land involved. Farm improvements will be taken into consideration in valuing the land. Eighty-two landowners in the counties of Lee, Ogle and Stephenson were involved in the settlemet.

Logan Farm Supply Company recently announced a 6% patronage refund to Farm Bureau members.

NOTICE OF ANNUAL MEETING ILLINOIS PRODUCE MARKETING ASS'N.

Notice is hereby given of the first annual meeting of the Illinois Produce Marketing Association to be held in the Sun Room of the Leland Hotel, Springfield, Illinois, 1 P. M., January 28, 1931.

This meeting is called for the purpose of electing a board of directors of fifteen members and transacting such other business as may come before the meeting.

(Signed) Claude J. Martin, Secretary.

Jan. 2, 1931.

The daily farm program of the Illinois Agricultural Association is broadcast from the I. A. A. offices over Station WJJD (274 meters), Chicago, between 12:15 and 12:30 P. M., Monday to Friday inclusive. Tune in and get the live stock markets, farm news, and economic information.

"A Marketing Program for 1931" will be the subject of an address from station WLS, Chicago, at 12:05 noon, January 26, by Secretary George Metzger. This talk will be one of a series on the subject of co-operative marketing.

"Co-operative Marketing in Illinois" was the subject of a radio address by George Thiem, editor of the Illinois Agricultural Association RECORD, over the Columbia Broadcasting System through Station WBBM, Chicago, at 12:45 p. m. Friday, January 16.

"New Ideas in Marketing Farm Produce" and "What Farmers Are Thinking About" were subjects of 10-minute talks by Frank Gougler and George Thiem, respectfully, on the noon farm program from Station WGN, Chicago, recently.

Tentative Program

ILLINOIS PRODUCE MARKETING ASSN.

ANNUAL MEETING

SUN ROOM, LELAND HOTEL

SPRINGFIELD, ILL., JANUARY 28, 1931

1:30 P. M.

Singing—Led by J. H. Checkley.
Roll Call—Delegates.
Nomination of Nominating Committee.
Reading of Minutes of First Annual Meeting.
Secretary-Treasurer's Report — Claude J. Martin.
Progress Report—F. A. Gougler.
Address—John Brandt, Pres., Land O'Lakes Creameries, St. Paul, Minn.
Travelogue—Nancy Carroll, Menard county, Ill.
Address—Tom Borman, Manager, Beatrice Creamery Co., Chicago.
Eulogy on the Dairy Cow—Clem Garton.
A Dutchman's Patriotic Speech—Uriah Lendrick.
Report of Nominating Committee.
Election of Officers.

Senator Arthur Capper of Kansas announced recently that he would introduce a bill providing for the regulation of the natural gas industry, including pipe lines, their rates, services, valuations, earnings and financing, and the quality of the commodity sold to the public by the Interstate Commerce Commission.

204 Attend State-Wide Grain Meeting, Peoria

Report Progress Made by Farmers Elevators in Co-Operating to Build Grower-Owned Marketing Agency

A ROUSING meeting of 204 farmers' elevator officers, directors, managers, and grain producers gathered at Peoria, December 29 for the first state-wide meeting of the member elevators of the Illinois Grain Corporation.

It was the first opportunity any elevator officials had had to meet the personnel of the Mid-West Grain Corp. and the Farmers National Grain Corp., who are actively engaged in selling grain on the terminal markets at Chicago, St. Louis, and Peoria. D. P. Moore of the Farmers National grain sales department, Chicago, and W. J. Niergarth, manager of the Farmers National St. Louis office, represented that organization. General Manager Charles P. Cummings of Chicago, George Martin of St. Louis, and John Benson of Peoria represented the Mid-West Grain Corporation.

Chas. Cummings

Lyle Johnstone Opens Meeting

G. C. Johnstone, president of the Illinois Grain Corp., opened the morning session. Harrison Fahrnkopf, secretary of the Illinois Grain Corp., cited the progress that had been made in building the Illinois regional during the summer and fall. He said that 31 elevators had been fully certified and qualified for membership, and that 8 to 10 more had applied for membership, but had not yet qualified under the Capper-Volstead Act.

After a brief discussion of grain handling problems, Mr. Cummings presented D. P. Moore of the Farmers National, a man long experienced in the grain business.

Farmers National Man Speaks

"The Farmers National controls 20,000,000 bushels of storage space and now has headquarters and facilities established on the principal grain markets of the country," said Mr. Moore. "We plan to get into every grain market eventually, prepared to offer bids to consumers.

"There are many conscientious and sincere old-line commission men in the grain business," said Mr. Moore, "who have sought to give the producer a fair price for his grain. But there are some things the old-line commission men cannot do and the Farmers National is organized and prepared to improve conditions from the standpoint of the producer, that the individual commission man cannot improve. Honest commission men recognize that there are conditions existing in the present system of handling grain that need correcting if the farmer is to get the most out of his grain, yet he recognizes that it is up to the farmer himself, through organization and co-operation, if these conditions are to be corrected for the benefit of the producer of grain."

Sell 12 Months a Year

Mr. Moore called attention to the fact that frequently the first movement of the crop following harvest sells at a discount, that much of the first grain coming to market fails to bring what it's worth. Grain is sold and used 12 months of the year, he said, and often there is too great a spread between the cash and future price. The larger terminal elevators make money because they are equipped to handle the grain and merchandise it orderly. This is exactly what the farmer must do for himself through co-operation to get all that the market affords for his produce.

The opportunity of the grain producer lies in concentrating enough grain in the hands of his own agency, said the speaker, to place him in a position to ask for a price instead of accepting a price bid by the buyer. The millers and processors of the country are in sympathy for the most part with co-operative grain marketing because they want to see a stabilized price throughout the year. The flour mill doesn't make money on low-priced wheat. It is chiefly interested in securing a satisfactory return for processing the grain. In fact a more stable price would eliminate the speculation in the business for the processor and in turn benefit both the producer and the consumer.

Earl Smith in Afternoon

In the afternoon Earl C. Smith, president of the Illinois Agricultural Association, gave an interesting discussion reviewing the long continued pressure brought on the I. A. A. to become active in fostering a definite and effective grain marketing program in Illinois. He told of the study and consideration given the problem over a period of years, and of the opportunity finally afforded through the Agricultural Marketing Act to present a definite recommendation which finally resulted in the Illinois Grain Corp.

Earl Smith

Mr. Smith charged that enemies of co-operative marketing in Illinois apparently were deliberately misrepresenting the plan and set-up of the Illinois Grain Corp. to head off progress toward the concentration of volume in farmer-owned and farmer-controlled agencies.

"There is nothing in the plan or program of the Illinois regional which takes control of a local elevator away from its directors and stockholders," he said. "The plan merely provides for the concentration of volume in the hands of the farmer's own sales agency. And if that feature is removed from co-operative marketing you have nothing left to justify its existence."

Round Table Discussion

Technical problems involved in the buying and selling of grain were discussed by Mr. Moore, Mr. Cummings, and others later in the afternoon. Mr. Moore stated that the visible supply of wheat was only 138,000,000 bushels, which is the lowest in the past 10 years.

The meeting was thrown open to discussion and many elevator managers took an active part in the program. Thirty-two elevators were represented by 28 elevator managers.

J. C. Sailor, a director in the Cissna Park elevator, stated that the Mid-West Grain Corporation had obtained for him a price of 3½ cents per bushel over the best bid the local elevator had at that time on a carload of wheat. "I realize," said Mr. Sailor, "that our main objective is not to get for the farmer only a few cents more a bushel, but nevertheless I want to testify to this experience which indicates that our own organization can bid as much, or more than other handlers of grain."

NOTICE
ELECTION OF DELEGATES
ILLINOIS AGRICULTURAL ASSOCIATION

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the month of January, 1931, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureaus and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of Association, including the election of officers and directors as provided for in the by-laws of the Association.

The following counties hold annual meetings during the month of January: Carroll, Cook, Douglas, Franklin, Whiteside, Greene, Fulton, Knox, Lake, McHenry, Woodford, Macon, Mercer, Peoria, Sangamon, Tazewell.

Signed: G. E. METZGER, *Secretary.*

Jan. 1, 1931.

Smith Tells of New Year's Opportunities

Sees Possibilities for Improvement to Agriculture in Price Leveling Trend.

"I NOT only hope, but believe that 1931 will offer those engaged in the farming industry an opportunity for constructive advancement," President Earl C. Smith declared in a recent New Year's address from Station WLS, Chicago.

"While 1930 has witnessed conditions that test the stamina and try the souls of men and women," he continued, "yet the developments of the past year largely constitute the basis for such optimism as I hold for the early future.

"Just now farm prices are low, unprofitable to all except to the lowest cost producers. The industrial depression, the weakened buying power of people in our consuming centers, the drastic decline in farm exports, excess production at home, increased production abroad, the continuing excessive costs of processing and distributing many farm products, high taxes, high-priced credit and lack of organized farmer bargaining power have all contributed to our present situation. Some of these we cannot help—others we can correct by working together.

Disparity Is Cause

"It is a well known and accepted fact that the difficulties of agriculture were largely caused by the disparity in exchange values between the products of the farm and those of other industry.

"Throughout the years of effort put forth by agricultural organizations, the farm press, and others speaking for agriculture, it was repeatedly asserted that unless immediate and effective measures were enacted that were necessary to raise American agriculture to the artificial levels being enjoyed by other economic groups, the nation would soon witness the equalizing of its respective conditions by developments similar to those realized during 1930. Economic laws cannot long be ignored or thwarted, and seem even now to be operating in that direction.

"Although most agricultural commodities have declined during 1930, I could quote a list of non-agricultural commodities that have declined a much greater percentage in price. While no constructive thinking citizen wants to see other interests in the throes of economic distress, yet after the many years of effort put forth by farm people to secure equality of opportunity, there is a certain amount of satisfaction in the realization that to a very large extent agriculture, other industry, and labor

T. A. BORMAN
Tom Borman, the genial but aggressive manager of the Beatrice Creamery Company, Chicago will address the annual meeting of the Illinois Produce Marketing Ass'n. the afternoon of January 28 at Springfield.

are fast reaching a common level.

"When such a basis is reached, much of the strife and misunderstanding that have existed between groups throughout recent years will be automatically removed. All interests can and should then direct their forces toward a revival of interest and constructive effort that should and will result in the early restoration of prosperity throughout the United States." . . .

Relief Through Taxation

"Possibly the greatest opportunity for immediate relief to agriculture lies in the field of taxation. The 57th General Assembly of Illinois is convening today. Farm and home owners of the state have for years been carrying a very unjust portion of the cost of government. . . .

"It is my belief that a very large portion of this unjust burden can be removed if those same farm and home owners will unite in and behind a constructive tax measure designed to relieve this situation. While not at liberty to go into any details, I am glad to be able to say that important conferences have been and are taking place to this end and now seem certain to result in combined effort of constructive interests to bring this about.

Commodity Organization

"Farm people are fast learning of the benefits that result from real commodity organization. While many of these organizations are in their infancy, yet much could be said relative to the increased income being realized from the sale of farm commodities and reduced costs of commodities purchased by farmers—all brought about by centralization of effort resulting in increased bargaining power.

"In closing, may I again repeat that such optimism as I hold for the immediate future lies mostly in the field of opportunity for farmers. Results will be obtained just to the extent farmers have and increasingly become organization conscious and through organization take advantage of their opportunities."

Henderson Bureau Honors C. W. Cooper

C. W. COOPER, president of the Henderson County Farm Bureau for the past 10 years, and active on the board for the past 13 years, was guest of honor at a luncheon in Monmouth, December 20. Forty-seven of his associates, including directors, Farm Bureau members and their wives, assembled to honor Mr. and Mrs. Cooper and express the gratitude of the organization for their faithful service. Mr. Cooper was presented with a Hamilton watch and chain, and Mrs. Cooper a leather purse and basket of roses.

Carl A. Johnson, Henderson County Farm Bureau president, served as toastmaster. R. J. Hamilton, district organization manager, gave a short talk complimentary to Mr. Cooper and his work. Farm Adviser Ernest D. Walker led in group singing, Mrs. Walker gave a reading.

"Mr. Cooper was a member of the original organization committee of our Farm Bureau," writes Mr. Walker, "and has served continuously as a director since its organization 13 years ago. For the past ten years Mr. Cooper has acted as president and despite the fact that there are 25 miles of dirt road between his farm and the office, during that time he missed but two directors' meetings—once on account of jury service and once when snowbound.

"In that time Mr. Cooper estimates that he drove 7,000 miles to attend regular meetings to say nothing of special sessions and extra work. His faithfulness has been an inspiration to the other board members and of great value to the Farm Bureau."

Two-Day Conference Of Agents, Feb. 9-10

A state-wide two-day conference for Country Life Insurance Company agents has been scheduled for February 9 and 10 at Bloomington.

A full two-day program of business, instruction, and entertainment in the general Farm Bureau insurance program is being arranged.

Uncle Ab says books have some advantages over persons; one can always shut up a book.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Editor, George Thiem

Ten Years From Now

A GOOD place to get an estimate of the accomplishments and value of your organization is at its annual meeting. The coming I. A. A. convention at Springfield, Jan. 28-29-30 will present a cross section of the work of organized farmers in Illinois. It will reflect the interests and thinking of that portion of the state's agricultural population which believes that organized effort is the way to economic and social progress.

Your elected officers and directors who are charged with responsibility for carrying on the varied activities authorized by you, want to make the organization responsive to the will of the membership. Ample opportunity will be offered at the coming meeting for every member to voice his opinions and convictions, to help direct the future policies of the association.

Vision balanced by sound thought must always precede achievement whether the enterprise is private or co-operative. If the Illinois Agricultural Association has more accomplishments to its credit than most organizations of like nature, a large part of the credit rightfully goes to the foresightedness and courage of those who more than a decade ago gave it a sound set-up, character, and momentum.

The degree of courage, the kind of thinking, and the type of co-operative action shown by the membership today will largely determine the kind of an organization you will have five or ten years from now.

Irrigation Farming Declines

REPORTS from the Department of Commerce on irrigation in the western states reveal interesting trends during the past 10 years.

As a result of the widespread agricultural depression which began in 1921, many of the irrigation enterprises, which were initiated before, during, and directly after the war, show a decided decrease in the area irrigated. The figures indicate that because of low farm prices it became unprofitable to farm much of this semi-arid and arid land in the western states.

When farm prices become high literally millions of acres of western land can be brought into production and farmed to swell the surplus. This is exactly what happened as a result of the unusual price stimulation brought on by the world war. Moreover once new areas are brought under the plow they are allowed to go back to pasture or waste land very slowly. This is one of the reasons production has been maintained on a comparatively high level during the last decade.

Editorial of the Month

Made a Mistake

We believe that the city council made a mistake Monday evening in joining the cities that are demanding one-third of the gasoline tax. The governor of the state has requested that the present distribution of the tax be not disturbed. To give the cities what they demand will upset the entire program of road improvement and may seriously affect contracts already entered into with the idea that the tax will stand.

Furthermore, we believe that the business interests of Galesburg demand better roads from the country into the city, and it was the design to give the unpaved country roads the benefit of the tax until such time at least as there is a reasonable amount of improvement. There are in this county hundreds of farmers who are still remote from paved roads and who find entrance to the cities and towns of the county hard when the roads are muddy and bad. It is to the business and commercial interest of the city that it be as accessible as possible.

We were hoping that the city council would show a more friendly and generous spirit toward the country community than is manifested by many of the cities of the state. The demand for a part of the tax is based largely on selfish motives, and we do not believe that the council really deliberated much over the spirit of the formal resolution that was evidently sent here from outside for it to pass on.—Register-Mail, Galesburg.

Chicago Milk Shippers Take Reduction in Price

Quart Charge Drops to 13c, Producers Realize Necessity for Checking Production.

CHICAGO milk shippers will receive a cut in price from $2.67 to $2.32 per 100 pounds f. o. b. country points for all fluid milk sold in Chicago, according to a decision announced by Dr. Clyde L. King of Philadelphia who was called in by officials of the Pure Milk Association and the organized dealers.

Dr. King, who is official arbitrator recognized by the Pure Milk Association and Chicago dealers announced his decision following a reduction from 14 to 13 cents per quart for retail milk. Pint bottles remain at 8 cents. It is calculated that the reduction, effective on New Year's day, will result in a loss of more than $15,000 a day to the milk industry at Chicago.

"Surplus milk" will be computed on the basis of current Chicago butter quotations with an allowance for skim milk as heretofore announced.

Labor Takes No Cut

No portion of the expense of reducing the Chicago milk price is assumed by the wagon drivers, according to Union officials, since their contract providing for a minimum wage scale of $51 a week does not expire until May, 1932. It is reported that other cities close to Chicago are following the retail price cut of one cent a quart.

The spread between what the farmer gets and what the consumer pays on the Chicago market is greater than at most markets of the country. Part of this is due to the fact that union labor in Chicago is highly organized, also to the fact that Chicago is a high-priced city with proportionate high costs for service.

Misleading newspaper reports stated that at the Milwaukee market farmers receive $2.50 per 100 pounds for their milk, although the retail price dropped on January 1 to 10 cents a quart. The $2.50 price, according to officials of the Pure Milk Association, is a delivered at Milwaukee price for only about 50 per cent of the milk going to market. The country price for this portion is $2.25 per cwt., and the surplus is computed on its butterfat content. Thus the pool price to the Milwaukee shipper is considerably less than $2.25, lying somewhere between $1.60 per cwt. and $2.25.

Members of the Pure Milk Association are accepting the cut realizing that it was necessary to take drastic measures to reduce the ever-growing surplus.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL MUTUAL INSURANCE COMPANY

Take notice that the annual meeting of the members of Illinois Agricultural Mutual Insurance Company will be held on Wednesday, the 28th day of January, 1931, at the hour of 1 o'clock p. m., at the Abraham Lincoln Hotel, Springfield, Illinois, to elect directors, receive, and, if approved, confirm the report of the board of directors of the company for the fiscal year ending December 31, 1930; and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, Jan. 1, 1931.

GEORGE F. TULLOCK, *Secretary.*

A Reply to Dr. Poole

"I note in the December number of I. A. A. RECORD a letter from Dr. Poole of Missouri which has some very good suggestions in it. Farmers have purchased too many tractors, it is true, but Doctor, do you think you got the best diagnosis of your case? Don't you think you should have given the high-powered salesman the combing he deserves, and manufacturing brains credit for the construction of machinery that has relieved millions of doing hard labor. If farmers follow your advice we will soon be back to tallow candles and mud roads, and we all say never again.

"If you are an up-to-date physician, as I am sure you are, you have changed with progress, as we have.

"You speak about our Farm Supply Co. advertisement, 'Know Your Oil as Well as Your Soil.' All our petroleum products are purchased direct from the refinery in such quantities as to get very lowest prices consistent with high quality. Now here is the point I want you to get and I am sure you will think we are doing just what should be done for Farm Bureau members.

"Every dollar of net profit made from co-operative purchasing of petroleum products belongs to the Farm Bureau member, and this is retained in the county and placed in circulation at home. Most other companies take their profits out of the state. We procure home men as managers, and truck drivers, and while many counties now operating are making 100 per cent net profit on capital stock each year, we keep this profit at home.

"You mentioned you were asked to buy our preferred stock. Those who have purchased know they always get their interest promptly and now prefer it to bank stock or even stock in Wall Street, and so our preferred stock is always at par."

C. E. CARRIER,
Piatt County, Ill.

Soybean Ass'n. to Hold Annual Meeting in Feb.

THE annual meeting of the Soybean Marketing Association will be held Wednesday, February 25, at Decatur, announces President John W. Armstrong.

In a recent letter to leaders in the soybean co-operative, Mr. Armstrong requested the various county units to hold their local annual meetings where the advisory councilmen (five councilmen to be elected by the members, and two appointed by the County Farm Bureau) and the delegate or delegates to the annual meeting should be elected.

The Committee on Arrangements for the annual meeting of the Soybean Association is composed of J. F. Probst, chairman; Harry E. Pickrell and V. C. Swigart. The Credentials Committee consists of Dwight Hart, chairman; John Albright and M. D. Tomlin.

Ask for Boys' and Girls' Club Building

"Because of the constant growth and interest in 4-H boys' and girls' club work in the State of Illinois, whose members are the future farmers of tomorrow," the Macon County Farm Bureau Executive Committee recently voted their endorsement of the following resolution:

"We, the officers and members of the Macon County Farm Bureau, would like to see a permanent structure erected at the State Fair Grounds to take care of the housing of these members and their live stock exhibits.

"As it now is, they have no permanent quarters for their animals or permanent living quarters for themselves. They are, therefore, greatly inconvenienced from the standpoint of housing animals, from showing, from the social and educational activities which accompany 4-H club work at the State Fair.

"In the past ten years the 4-H clubs have shown a most remarkable growth in the State of Illinois and we feel that due to the fact that they have not had permanent quarters, that in the coming year consideration should be given to the erection of permanent housing quarters for this fast growing division of the Illinois State Fair.

"Respectfully submitted by the

"MACON COUNTY FARM BUREAU,

"Signed, A. P. McIntosh, Sec'y."

Wisconsin dairy herd improvement association members mark the cows that prove unprofitable in their herds by a triangular ear mark. They want to avoid buying the animals back when the cow should be slaughtered.

Hope for Reassessment Personal Property in Cook

Local Real Estate Taxpayers Fight to Make Personal Property Carry Part of Tax Load.

A STATEMENT declaring that the Illinois Tax Commission will exercise every power it has under the statutes to bring about an adequate assessment of personal property for 1930 in Cook county, was issued by Chairman William H. Malone recently.

The commission denied the request of the Association of Real Estate Taxpayers in Cook County for a reassessment of personal property as of April 1, 1929, on the ground that such an order would cause a breakdown in local government, since 1929 taxes are collectible on April 1. Sufficient time does not remain to complete a reassessment by that date, the commission said.

Wm. H. Malone

Legislation Needed

"It is apparent to the commission and to its advisory committee," the statement continued, "that additional legislation will be necessary in order to make this result possible; and the commission and its advisory committee will give its assistance in the preparation of the necessary bills to be submitted at the present session of the legislature."

It is understood that Hayden Bell, attorney for the Cook County Board of Commissioners, and I. T. Greenacre will assist in drafting the necessary bills for this legislation. In the meantime, the tax commission and its advisory committee will immediately begin the work of mapping out steps that can be taken toward bringing about an equitable reassessment of personal property in Cook county.

Ohio Makes 'Em Pay

Part of the legislation desired is a modern assessment blank for personal property, such as is used in Ohio. In Cincinnati and Cleveland about 25 per cent of the total tax revenue is obtained from personal property. Only half that percentage is obtained in Chicago.

At a recent hearing before the state tax commission Harry C. Cutmore, director of the Cook county real estate reassessment, charged that personal property in Cook county is now assessed by payrollers and job holders who make their appraisals while sitting on their stools in the county building. "If anyone set out deliberately to do the worst kind of a job of assessing personal property, he would arrive at something like the present situation we have in Cook county," said Cutmore.

It is urged by tax students that the board of assessors and board of review in Cook county be abolished, that an expert appraiser be employed to make original assessments, and that a reviewing group having well defined and limited powers be selected.

Wm. H. Malone Quits As State Tax Chief

AS we go to press newspaper dispatches announce the resignation of Chairman William H. Malone of the state tax commission.

Illinois farmers will regret the loss of Mr. Malone's services to this important office. He made a record for fairness and honesty in administering the tax laws of the state. Orders of reassessment issued by the tax commission during recent years have been effective in equalizing property values in many downstate counties. The courageous order of reassessment issued in Cook county was credited with smashing the tax fixing racket which had held full sway for many years. Chairman Malone and his associates invariably gave the Farm Bureau tax committees and I. A. A. representatives a courteous hearing.

Omer Custer, former state treasurer from Galesburg, is being prominently mentioned as Mr. Malone's successor.

More Dividends Paid To Bureau Members

The Tri-County Oil Company, Monmouth, recently paid a 10% patronage dividend and declared a special 5% patronage refund to be paid at a later date. Five hundred and thirty-nine Farm Bureau members received an average of $22.66, or a total of $12,215.27.

The Peoria County Service Company paid an 8% patronage refund to Farm Bureau members and has declared another special patronage refund of 8% to be paid in the future. More than $12,000 will be returned to Farm Bureau member patrons of this company.

The DeWitt County Service Company recently declared an annual patronage refund of 5% to be paid during the present fiscal year.

A bill was recently introduced in the Massachusetts legislature providing for an automobile insurance company managed and controlled by the state in competition with private companies.

Too Much Local Gov't. Held Cause High Taxes

Tax Commissioner Tells How New York State Equalized Tax Load

"IN my opinion we have too much local government — too many units of local government—and too many local officials spending our money." This is the way Mark Graves, New York state tax commissioner summarized his reasons for high taxes in a recent address before the American Farm Bureau Federation at Boston.

"Just because our forefathers a few generations ago established a certain system of local government constitutes no reason why it should therefore remain unchanged," he said. "We perform no part of the work on our farms today as our grandfathers did. Times have changed. Methods of transacting business have changed and methods of farming have changed.

Pure Extravagance

"Just as certainly then methods of transacting governmenal business should change, and the machinery of government should be altered accordingly. Specifically I wish to be understood as saying we have many small, poor, insignificant units of local government—towns, villages, and especially school districts and some counties—which we can ill afford to maintain and which it is pure extravagance to continue. It is not too early to give heed to this condition. It is the duty of the state to equalize taxes to meet the necessary cost of government. No obligation rests upon the state to pay any part of the cost of an unnecessary agency or unit of government."

Mr. Graves discussed in detail the measures taken by the New York state legislature to make possible the equalization of rural and urban taxes. A review of a period of 12 years in selected typical counties revealed, he said, that the increase in the tax load has been two and one-half times as great in the purely rural communities as in wealthy populous counties.

Highways and Schools

"We found that most of the increase was due to highway and school expenses," he continued. "Having localized the cause we then proceeded to devise methods of securing a better equalization of the cost of highways and schools. This program embraced several pieces of legislation."

Uncle Ab says that persons who differ with us may be just as good as we are, at that!

EARLY DIVIDENDS TO POLI

THE outstanding success of Country Life Insurance Co., now only two years old, warranted the directors to vote a dividend to policyholders one year earlier than the policy provision for dividends. This year, beginning in February, 1931, every policyholder that pays his third premium will receive a special dividend. The regular policy dividend will be paid at the end of the third year.

Courage and Intelligence Succeed

This achievement is a tribute to the effectiveness of organized agriculture in Illinois. No small amount of courage and intelligence is required to step into a field of finance and underwriting such as life insurance and succeed. Particularly does it require courage when you expect to pioneer in this field and reform certain practices in vogue for many years. Directors of the Illinois Agricultural Association over a period of two years investigated the need for life insurance service before starting Country Life Insurance Company.

Dependable Insurance at Low Cost

Discoveries resulting from those investigations showed the opportunities for service in lowering rates, cutting overhead expense and acquisition costs, and giving a needed dependable life insurance protection at a saving. After final approval of the membership the company was launched December 28, 1928. Its accomplishments since then are well known to all.

ICYHOLDERS DECLARED

THAT our policyholders are proud of Country Life's record of achievement, confident of its future, is seen in our very low lapse rate. More than 95% of the 1929 policyholders paid their second year premiums promptly. Faith of this kind in a company is bound to mean dollars saved and paid to policyholders.

Helping to Create An Estate of Gold

Building Country Life Insurance Company aroused justified enthusiasm . . . drew competent leadership and talent from county and community to spread enlightenment and help create estates of gold for Farm Bureau families.

These men who comprise Country Life's agency force are aware of the company's great opportunity. They know of its co-operative set-up, its ideals of placing the interests of the policyholders first. They have helped build confidence not only in your and their company, but also have given wholehearted support to all Farm Bureau projects.

Millions for Policyholder Benefits

We have trained these leaders. They have attended schools and meetings and carried back to their counties information and enthusiasm with the result that thousands of dollars have been saved to their counties—many millions of dollars in estates created for paying off mortgages, educating children, for retirement incomes, and for old age comforts.

A Monument to Co-operation

WITHOUT this leadership and support no such enterprise could have succeeded. Country Life is a monument to effective co-operation.

Life Insurance a Guaranteed Estate

Twenty-five thousand policyholders in Illinois have demonstrated their faith and appreciation of Country Life for providing a certain way of realizing their ambitions, protecting their dependents.

Today Illinois farmers are informed about the benefits of life insurance as they never have been before. No one can say now that lack of knowledge and information is preventing our people from creating estates with old line legal reserve life insurance.

A life insurance policy in Country Life
IS AN ESTATE OF GOLD.

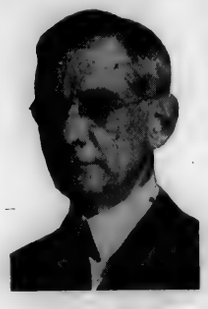
Success Measured By Service

MORE than 25,000 farmers in Illinois now boast of a part in making Country Life Insurance Company and its record accomplishments. The Company has paid out nearly $80,000 in death claims in two years, but because of its impressive volume of business already secured, this rate is only 36% of the expected. Country Life selects its risks with care to protect the policyholder and keep costs low. The important thing is that the beneficiaries of these 25,000 policyholders are protected, that each premium paid adds to their estates of gold. In all the history of life insurance no other such record of constructive achievement and unselfish building can be found.

A Tribute To Member Loyalty

Country Life is a tribute to the loyalty of Farm Bureau members in responding to the call to co-operate in building a Company offering protection at rates that can never be raised and at cost unequaled heretofore. Loyalty and co-operation made possible Country Life's remarkable growth and financial achievement in its first two years, the most expensive years of a company's development.

The Goal of Country Life



Our Company occupies an important position in the bright rays of the sun of the life insurance world. All eyes are watching this unprecedented example of successful farmer co-operation. It means millions of dollars kept in Illinois for investment, millions paid to beneficiaries on the farms of Illinois. It means greater stability of farm and home ownership, farm mortgages lifted instead of sacrifice sales, education funds for the children of farmers. Let us go on to greater future accomplishment. Let us encourage all who are not participating in Country Life's benefits to get a policy in this Company.

Country Life Insurance Company.

Sec'y. Hyde Comments On Corn Sugar Ruling

Modification Removes Stigma from Corn Product.

THE recent ruling by Secretary Arthur M. Hyde regarding corn sugar removed a discrimination against the use of this product, which has too long been permitted. In a recent statement Secretary Hyde said: "The requirement heretofore that the presence of corn sugar as an ingredient in prepared foods be declared on the label was not a matter of law, but was a matter of administrative interpretation of the law. This ruling therefore involves no change in the Federal food and drugs act; nor does it change the rules with reference to labeling of harmful or injurious ingredients. Labeling of such ingredients still is required.

Sec'y. Hyde

"When the Federal food and drugs act was passed 23 years ago corn sugar was a muddy, brown product less than 50 per cent sweet. Under conditions existing then, a prejudice existed against it. As a matter of administrative procedure, this department ruled that its presence in a prepared food must be declared on the label.

Now Clean White Product

"In the last 10 years great progress has been made in refining corn sugar. It is now a clear, clean, white, granulated sugar. It is a wholesome and healthful food. It is now about 75 per cent as sweet as cane sugar. It has some properties more valuable than cane sugar. It has no qualities which are in any wise harmful to health. The reason for the old departmental ruling has disappeared. It is high time that the discrimination against it, based on an ancient prejudice should disappear also . . .

"I cannot agree to the proposition that the purchaser of prepared fruits or other foods in which sugar is an element expects or believes that such sugar will always and everywhere mean sucrose. The purchaser of canned peaches, for instance, expects to buy primarily canned peaches. There is no declaration on the label that they are sweetened at all, the label declares only peaches. He looks to the manufacturer to guarantee that they will be tasty and appetizing. He expects the Federal food and drugs act to insure their wholesomeness. If those requisites are fulfilled he is far from being deceived. He is entirely satisfied.

No Danger to Manufacturer

"Nor is there any danger whatever to the manufacturer of special brands whose formulas call for sucrose and whose brands are a guarantee of quality. This ruling cannot affect them. If, on the other hand, its use is beneficial and wholesale without adversely affecting the appearance or taste of the product, the fact that corn sugar is cheaper ought to commend it to the consuming public who are entitled, as a matter of right, to demand food products on the most economical basis.

"There is also an affirmative economic reason for this change in departmental rulings. American agriculture is overproduced. The fact that production runs ahead of consumption is responsible for most of the ills of agriculture. The Federal Farm Board, farm organizations, many of the state colleges, and this department are striving to re-establish the economic balance of agriculture. The control and limitation of acreage planted is one method of re-establishing that balance. Finding new uses and new outlets for crops is another method.

Potential Market Opened

"We produce annually about 2,700,000,000 bushels of corn. Only about 275,000,000 bushels of this ever reaches primary markets. The sale price of this small amount fixes the farm price for the whole crop.

"There exists a potential market for corn through corn sugar variously estimated at from 5,000,000 to 100,000,000 bushels per annum. The smaller figure represents about 2 per cent of the cash corn reaching primary markets. The larger figure represents about 35 per cent. It is not likely that the larger figure will be realized for many years. Be the per cent large or small, the opening of this potential market for additional corn is a step in the right direction. If we fail to use all available methods of restoring agricultural balance, whether those methods represent great and spectacular gains, or merely short and unnoticed steps, we shall be derelict in duty.

"I believe that this modification removes an undeserved stigma from corn sugar; that it harms or deceives no one; that it weakens neither the Federal food and drugs act nor its administration; that it is a just recognition of modern progress in refining; and that it will aid in some degree in re-establishing the economic balance of agricultural products."

Board of Trade Pres. Issues a Statement

"I REGARD the Agricultural Marketing Act with its resultant Farm Board and Stabilization Corporation as an expression of Congress in its effort to provide relief to agriculture," James C. Murray, the new president of the Chicago Board of Trade, said in a recent statement.

J. C. Murray

"The success of the venture depends on the results accomplished. Present facilities should not be discarded or restricted before better facilities are provided. There can be no objection to farmers soundly engaging in the business of handling grain or other commodities. Many of those now engaged in the commercial handling and processing of grain started life on the farm and their sympathy naturally lies with the farmer. Care must be taken in the using of Government funds to treat all interests with justice and consideration."

Mr. Murray, who is vice-president of the Quaker Oats Company, passed upon the advantages of a free and open market such as the Chicago Board of Trade.

A. F. B. F. Proposes Federal Legislation

Further regulation of grain exchanges, opposition to a special session of congress in the spring, and a recommendation for permanent funds for agricultural extension work are part of several legislative proposals urged by the American Farm Bureau Federation for enactment before congress adjourns on March 4.

The proposal for further regulation of grain exchanges is embodied in the Capper-Dickinson bill which follows recent recommendations made by Secretary Hyde and Chairman Legge of the Farm Board.

Federal Reserve Board

President Hoover faces the task of selecting a successor to the late Edward H. Cunningham of Iowa, former member of the Federal Reserve Board, and one time secretary of the Iowa Farm Bureau Federation. Among those mentioned for the post are Frank H. Funk, former congressman from McLean county, Illinois; Governor Arthur J. Weaver of Nebraska, and Ernest Moore, banker-farmer of Cedar Rapids, Iowa.

A Monument to Co-operation

WITHOUT this leadership and support no such enterprise could have succeeded. Country Life is a monument to effective co-operation.

Life Insurance a Guaranteed Estate

Twenty-five thousand policyholders in Illinois have demonstrated their faith and appreciation of Country Life for providing a **certain** way of realizing their ambitions, protecting their dependents.

Today Illinois farmers are informed about the benefits of life insurance as they never have been before. No one can say now that lack of knowledge and information is preventing our people from creating estates with old line legal reserve life insurance.

Funk, former congressman from McLean county, Illinois; Governor Arthur J. Weaver of Nebraska, and Ernest Moore, banker-farmer of Cedar Rapids, Iowa.

Boycott Case Reviewed At E. St. Louis Meeting

Kirkpatrick Says Defense Testimony Mostly Chaff to Becloud Real Issue.

"PROGRESS put liverymen out of business. Co-operative marketing is not designed to put anybody out of business, but it gives the live stock farmer the opportunity to direct the marketing of his own products," J. R. Fulkerson, president of the St. Louis Producers Commission Association, declared at a meeting in East St. Louis on December 23, called to give live stock farmers in that territory first-hand information about the boycott case.

Sam Sorrells

The meeting was called by the Illinois Agricultural Association and was presided over by Sam Sorrells, chairman of the I. A. A. Marketing Committee. Two hundred and ten live stock producers from 30 Illinois counties attended the meeting. It was suggested by E. A. Downey of Jersey county to hold similar meetings in southwestern Illinois tributary to the St. Louis live stock market.

Business Picks Up

"During the boycott hearing receipts of the Producers at St. Louis increased from 22.4 per cent to 24.9 per cent," H. D. Wright, manager of the Producers Association, said. "There are 25 firms buying regularly from us," he continued. "Thus our outlet has been affected very little by the boycott. Last year the Producers at the National Stock Yards saved its patrons more than $129,000, and their total savings since 1922 have exceeded $908,000."

Donald Kirkpatrick, legal counsel for the I. A. A., declared that of the 2,900 pages in the boycott case more than 2,800 are chaff. The defense testimony was devoted to an attack on co-operative marketing policies in general and upon the constitutionality of the Packer and Stock Yards Act and the Agricultural Marketing Act in particular. Apparently the attacks were made in an attempt to becloud the real issue in the case, namely, that there was a conspiracy on the market to deny the farmer the right to market his own product. All of this, in spite of the fact that seven years ago the late Chief Justice Taft of the Supreme Court, in rendering a decision upholding the constitutionality of the Packer and Stock Yards Act, said: "The entry of producers of foodstuffs into the market places of the country lends purity to those markets, and is the indisputable right of the producers of any class of commodity."

Too Many Office Holders

Editor, I. A. A. RECORD:

THERE are hundreds of columns being printed about the unemployed, and how the other fellow should help them, but very little pertaining to the cause. The big idea seems to be to have the employed laborers give of their reduced wages.

Would it not sound much better, be better, and make everyone think and feel better, if our big office holders would follow the example set lately?

If 12 to 35 per cent cut on the salaries of the office holders of Italy would save the taxpayers there $42,000,000 per year, a like cut in the United States should run into billions of dollars.

Hard times benefit most office holders by enabling them to buy more with their money, while their salaries remain the same. Are not the mistakes of our high-up office holders more to blame than any other one cause for depressing times? Do they not make our laws, and are they not supposed to see that law is enforced, or have they passed three-fifths of our laws to only make more office holders to help the politically inclined?

Including our police, is not there about one office holder for every eight or ten taxpayers, to say nothing about the assistants, secretaries, auditors, solicitors, inspectors, overseers, commissioners, committeemen, detectives, testers, stenographers, janitors, office rooms, heat and light, automobiles, etc.?

I saw where a senator said our national, state, county, city and town taxes in 1913 were about two billion dollars, while now they are about fifteen billion. Is it any wonder that there is not much money left to do improving or employ labor? Would like to ask here if, outside of the office holder, there is a man in the United States who thinks he is one cent better off for helping pay fifteen billion dollars in taxes than he was to only help pay two billion.

Is not real estate taxed to death until only a few want it? And to improve it only means more tax burdens. If I cannot dispose of a piece of property for a small part of what I should get for it, I will not lose still more by putting more taxes on it, so will let it sell for the taxes this year. I am only one of thousands, so are not the thousands of banks failing and thousands of men taking the bankrupt law from the same cause?

The greater part of all farmers and common laborers and their commodities have taken big cuts and drops—not the case with our office jobs. Do they not keep getting higher and more? This being the case, where is there any incentive for a thinking man to want to own or improve property?

I have heard it said it was hard to get men to fill our offices at the salaries they were paying, yet every election there are many wanting every office. It might be best for the country if half our offices were closed for this reason.

We read and hear many views as to how to stop this racketeering by taking the big profits out of their business. Would not the same rule apply to a great many of our high offices?

Therefore, I think to get quick relief to our business depression is up to our high office holders, changing their old established methods to new, helpful methods for all proper business.

I think if it's possible to get our press to give the public something to think on along these lines, it will help business many times more than many things they are carrying in the papers.

Here's hoping to see you start the ball rolling.

S. S. BAUGHMAN,
Christian county, Ill.

Livestock Marketing

THE Indianapolis Producers announces that a 25 per cent patronage refund of commission charges during the nine months from April 1 to December 31, 1930, will be paid back to patrons this year. Payments next year will be based on the full 12 months' calendar year.

The board of directors recently changed the fiscal year, which previously ended March 31, to end December 31 so as to correspond with the calendar year and the membership year of the Farm Bureau.

Manager Scott Meiks states that during 1930, 63.39 per cent of the Producers' receipts came in by truck, 36.41 per cent by rail. At this market more than 76.23 per cent of the market receipts last year came by truck.

The association held its annual meeting on December 30 where three directors were re-elected for a term of three years, namely, Murray S. Barker of Thorntown, Indiana; Albert M. Engle of Shelbyville, Indiana; and Orion B. Goble of Charleston, Illinois.

The meeting was one of the best in the history of the organization.

During the week ending December 19, Producers' commission associations handled the following percentages of total market receipts at the respective markets as noted: Buffalo 35.6%, Chicago 9.88, Cincinnati 33.2, Cleveland 30.5, Detroit 58.3, Evansville 21.3, Fort Worth 9.0, Indianapolis 31.5, Kansas City 3.1, National Stock Yards 23.0, Pittsburgh 27.2, St. Joseph 3.0 and Springfield 31.7.

In every case the Producers were first on the market except at Evansville, Ind., where they were second.

During 1930, 49 cars of live stock were consigned to the Producers at Indianapolis by the Farmer City Association. This represents 100% of the association's business to the Indianapolis market. Harve Ijams is manager.

Showing Manager Alfred Sutton and Will County Farm Supply Co.'s salesmen and fleet of trucks that deliver SERVICE quality Petroleum Products to an ever growing number of satisfied patrons.

KEEPING WELL

By Dr. John E. Boland

DO many people ever have a yearly physical examination at their own expense, just to see if everything is all right? No. They have their cars overhauled, but the numerous physical faults in their own bodies that might be taken in time and corrected, are scarcely ever attended to.

"Your little girl is very thin, isn't she?" says a neighbor. "Yes," says mother, "she doesn't seem to do well, but I guess she'll come out all right." Underweight has a reason behind it. Malnutrition, improper assimilation, diseased colon, tuberculosis, diabetes, a hundred things can cause underweight. Why not take the child to a good doctor and have a thorough examination made. It may be an infected lung, which, taken in time, could be corrected or arrested. Hundreds never have urine tested until diabetes has become chronic. Annual or shorter period urine tests would avoid serious trouble.

Dr. J. E. Boland

Sanitation on farms should have more attention. It is still too common a sight to see farm yards improperly drained, and drinking water used untested for years, with seepage from barn yards contaminating it. Surely there are thousands of careful farmers, and sanitary farm houses, but appreciation of health is often lacking. I am concerned about the easily corrected wrongs of health that every farm home could take part in overcoming. To be ever watchful of clean bodies, of fresh air and good food is commendable, but this is not sufficient. Check up on physical condition, and let's study the great science of keeping healthy, of raising families, and of living together.

Thousands of people have never had their blood pressure taken. A blood pressure reading is as simple as taking a thermometer reading. It is a barometer of your physical condition. The first inkling of numerous dangerous ills are discovered by blood pressure readings.

Prompt treatment of goitre prevents serious trouble. The thyroid gland is the governor of your body engine. When it is off, trouble is at hand. Mineral starvation is a common cause of goitre. Proper diet often regains normal action of this thyroid gland and prevents the need of operation. In any event, this marvelous machine, the human body, must have its governor in good order, and only good advice can help you to keep it so.

Bad breath is not a matter to gargle about or spray about—it is an indication of a diseased condition. Bad teeth, infected tonsils, congested bowels, congested lungs, sinuses that need attention, or a hundred diseased conditions may be indicated by foul breath. Nature gives warnings. Headaches are not ills of themselves, but warnings that trouble is at hand in the human machine. So with bad breath, it is a warning of trouble that can lead to great danger.

In all I have said, my aim is and has been to prevent trouble. Seek advice early. Seek information regularly, and let it be competent information. Worry doesn't help. Being wary does. Check and double check your body for trouble. To be wary is to be wise about your body. Don't laugh at overweight. It is serious. Do something about it. Drinking booze may seem smart to some people. But it's dangerous.

The Will County Farm Supply Company operates oil bulk storage stations at Joliet, Monee, and Plainfield. Since the fiscal year of the company closes January 31 figures are not available concerning the business except that a recent comparison of the gallonage of petroleum products sold the past year far exceeds previous sales. The gain will be close to 20% in gasoline, 40% in kerosene and distillate, and somewhat similar gains in lubricating oil and grease. The 10 trucks operated by this company serve farm trade in Will County and parts of DuPage and Cook counties.

Oil Companies Return Substantial Dividends

THE fiscal year of the Knox County Oil Company closed on November 30. A 10 per cent patronage dividend has been paid and a special 5 per cent dividend has been declared, payable at a later date. The largest refund check was $108.23 and forty-four farmers received more than $40 each. The total amount to be returned in the form of patronage refunds for the year will be approximately $18,750.

The Kane County Service Company of Elburn closed its first fiscal year November 30 after eight months of operation. A 7 per cent patronage refund has been paid to Farm Bureau members.

The La Salle County Farm Supply Company closed its third year on October 31. A total of $29,350.87 was returned to the stockholders of the company in the form of preferred stock dividends and patronage refunds. An 8 per cent patronage dividend was paid on the past year's patronage, 9 per cent from the surplus on the 1929 business, and 2.4 per cent from the surplus of the 1928 business. Seventy-three of the 1,243 Farm Bureau members in La Salle county received patronage refund checks.

The Macon County Supply Company recently declared a 7 per cent patronage refund which will be paid back to Farm Bureau members in good standing.

After four months of operation the Livingston Service Company paid 7 per cent dividends on preferred stock and a 7 per cent patronage refund after setting aside $6,576.16 to reserve and surplus.

THE Indianapolis Producers announces that a 25 per cent patronage refund of commission charges during the nine months from April 1 to December 31, 1930, will be paid back to patrons this year. Payments next year will be based on the full 12 months' calendar year.

The board of directors recently changed the fiscal year, which previously ended March 31, to end December 31 so as to correspond with the calendar year and the membership year of the Farm Bureau.

Manager Scott Meiks states that during 1930, 63.39 per cent of the Producers' receipts came in by truck, 36.41 per cent by rail. At this market more than 76.23 per cent of the market receipts last year came by truck.

The association held its annual meeting on December 30 where three directors were re-elected for a term of three years, namely, Murray S. Barker of Thorntown, Indiana; Albert M. Engle of Shelbyville, Indiana; and Orion B. Goble of Charleston, Illinois.

The meeting was one of the best in the history of the organization.

During the week ending December 19, Producers' commission associations handled the following percentages of total market receipts at the respective markets as noted: Buffalo 35.6%, Chicago 9.88, Cincinnati 33.2, Cleveland 30.5, Detroit 58.3, Evansville 21.3, Fort Worth 9.0, Indianapolis 31.5, Kansas City 3.1, National Stock Yards 23.0, Pittsburgh 27.2, St. Joseph 3.0 and Springfield 31.7.

In every case the Producers were first on the market except at Evansville, Ind., where they were second.

During 1930, 49 cars of live stock were consigned to the Producers at Indianapolis by the Farmer City Association. This represents 100% of the association's business to the Indianapolis market. Harve Ijams is manager.

KEEPING WELL

By Dr. John E. Boland

DO many people ever have a yearly physical examination at their own expense, just to see if everything is all right? No. They have their cars overhauled, but the numerous physical faults in their own bodies that might be taken in time and corrected, are scarcely ever attended to.

"Your little girl is very thin, isn't she?" says a neighbor. "Yes," says mother, "she doesn't seem to do well, but I guess she'll come out all right." Underweight has a reason behind it. Malnutrition, improper assimilation, diseased colon, tuberculosis, diabetes, a hundred things can cause underweight. Why not take the child to a good doctor and have a thorough examination made. It may be an infected lung, which, taken in time, could be corrected or arrested. Hundreds never have urine tested until diabetes has become chronic. Annual or shorter period urine tests would avoid serious trouble.

Dr. J. E. Boland

Sanitation on farms should have more attention. It is still too common a sight to see farm yards improperly drained, and drinking water used untested for years, with seepage from barn yards contaminating it. Surely there are thousands of careful farmers, and sanitary farm houses, but appreciation of health is often lacking. I am concerned about the easily corrected wrongs of health that every farm home could take part in overcoming. To be ever watchful of clean bodies, of fresh air and good food is commendable, but this is not sufficient. Check up on physical condition, and let's study the great science of keeping healthy, of raising families, and of living together.

Thousands of people have never had their blood pressure taken. A blood pressure reading is as simple as taking a thermometer reading. It is a barometer of your physical condition. The first inkling of numerous dangerous ills are discovered by blood pressure readings.

Prompt treatment of goitre prevents serious trouble. The thyroid gland is the governor of your body engine. When it is off, trouble is at hand. Mineral starvation is a common cause of goitre. Proper diet often regains normal action of this thyroid gland and prevents the need of operation. In any event, this marvelous machine, the human body, must have its governor in good order, and only good advice can help you to keep it so.

Bad breath is not a matter to gargle about or spray about—it is an indication of a diseased condition. Bad teeth, infected tonsils, congested bowels, congested lungs, sinuses that need attention, or a hundred diseased conditions may be indicated by foul breath. Nature gives warnings. Headaches are not ills of themselves, but warnings that trouble is at hand in the human machine. So with bad breath, it is a warning of trouble that can lead to great danger.

In all I have said, my aim is and has been to prevent trouble. Seek advice early. Seek information regularly, and let it be competent information. Worry doesn't help. Being wary does. Check and double check your body for trouble. To be wary is to be wise about your body. Don't laugh at overweight. It is serious. Do something about it. Drinking booze may seem smart to some people. But it's dangerous.

The Will County Farm Supply Company operates oil bulk storage stations at Joliet, Monee, and Plainfield. Since the fiscal year of the company closes January 31 figures are not available concerning the business except that a recent comparison of the gallonage of petroleum products sold the past year far exceeds previous sales. The gain will be close to 20% in gasoline, 40% in kerosene and distillate, and somewhat similar gains in lubricating oil and grease. The 10 trucks operated by this company serve farm trade in Will County and parts of DuPage and Cook counties.

Oil Companies Return Substantial Dividends

THE fiscal year of the Knox County Oil Company closed on November 30. A 10 per cent patronage dividend has been paid and a special 5 per cent dividend has been declared, payable at a later date. The largest refund check was $108.23 and forty-four farmers received more than $40 each. The total amount to be returned in the form of patronage refunds for the year will be approximately $18,750.

The Kane County Service Company of Elburn closed its first fiscal year November 30 after eight months of operation. A 7 per cent patronage refund has been paid to Farm Bureau members.

The La Salle County Farm Supply Company closed its third year on October 31. A total of $29,350.87 was returned to the stockholders of the company in the form of preferred stock dividends and patronage refunds. An 8 per cent patronage dividend was paid on the past year's patronage, 9 per cent from the surplus on the 1929 business, and 2.4 per cent from the surplus of the 1928 business. Seventy-three of the 1,243 Farm Bureau members in La Salle county received patronage refund checks.

The Macon County Supply Company recently declared a 7 per cent patronage refund which will be paid back to Farm Bureau members in good standing.

After four months of operation the Livingston Service Company paid 7 per cent dividends on preferred stock and a 7 per cent patronage refund after setting aside $6,576.16 to reserve and surplus.

23 MILLION GALLONS

IMAGINE a train of more than 2,700 cars, or ninety 30-car trains loaded with Aladdin gasoline and Radiant kerosene and fuel oils. Add to these figures 666,500 gallons of Penn Bond and Blue Seal motor oils, and 461,000 pounds of grease and you have the volume of organized purchasing by Illinois farmers in 1930.

These impressive totals reveal the growing popularity of SERVICE quality petroleum products. This business grew from nothing to the present volume in less than four years. There's a reason!

TWENTY-THREE MILLION GALLONS handled in one year places your company, the Illinois Farm Supply Company, in the front rank as one of the largest independent distributors, the only co-operative of its kind in the state.

More than 50,000 Illinois farmers, most of them Farm Bureau members, co-operated to make possible this outstanding record. Through organized intelligent buying they secured for themselves:

1. **Top quality, tested lubricating oils, greases, and motor fuels.**
2. **Substantial cash savings in the form of patronage refunds.**
3. **Longer life to motors and power machinery.**
4. **Escape from the dangers of inferior fuels and lubricants.**

SERVICE quality petroleum products serve you well, save you money. Boost your local company and order your spring requirements now.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 124 So. Fifth St., Marshall, Ill.; Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second-class matter at post-office at Marshall, Ill., June 16, 1930, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

Number 2 | FEBRUARY, 1931 | Volume 9

President's Address Covers Many Problems

Smith Outlines Accomplishments, Discusses Policies in Annual Report to Membership

FOR the fifth time it is my duty and privilege to report to an annual meeting of the Illinois Agricultural Association on the development, progress and problems of the organization. It is a pleasure to be able to say that the past year has witnessed real and tangible accomplishments for a steadily increasing membership; yet the year has also brought greater and more complex problems confronting the institution than any previous year. That these problems have been met and either solved or are well on their way to solution is shown, and can best be understood by reading and digesting the annual report of the Illinois Agricultural Association and its associated companies.

I. A. A. Program

"This report discloses in a limited way the development and progress of the organization's program for improving the economic welfare of Illinois agriculture. That program embraces:

1. **Representation of the rightful interests of the farmer in legislation, taxation and other public matters.**
2. **The building of more effective marketing machinery designed to return to the producer the maximum amount for his products.**
3. **Lower cost production of farm**

CONVENTION NEWS

This issue of the RECORD contains a major portion of the news, addresses, and proceedings of the 16th annual meeting of the I .A. A. held recently at Springfield. The overflow will be published in following issues of the RECORD and Bureau Farmer. The President's address is reproduced in a series of articles which members should read to gain significant information about their organization.

EARL C. SMITH
President

A. R. WRIGHT
Vice-President

Smith And Wright Are Re-elected To Office

THE election of a president and vice-president and directors of the I. A. A. for 1931, as in previous years, followed the speaking program at the banquet on Thursday night, Jan. 29, Springfield.

President Smith and Vice-President Wright retired from the platform after the speeches when speakers and guests left the banquet hall.

Geo. F. Tullock of Rockford called the delegates to order and recognized John P. Stout of Sangamon county. Mr. Stout in a brief nominating speech appropriately did honor to Mr. Smith for his ability, untiring efforts, and devotion to the best interests of the organization before nominating him for

Record Attendance At State Convention

Business Sessions and Banquet Draw Capacity Crowds During Three Days' Meetings

THE sixteenth annual meeting of the Illinois Agricultural Association held together with meetings and conferences of associated companies at Springfield, Jan. 28-29-30, established new records in attendance, interest and enthusiasm for I. A. A. annual conventions. The great meeting held last year makes this statement seem almost unbelievable.

Not only were there more delegates and members at the recent convention than ever before as revealed in heavy registrations, packed rooms and assembly halls, but there were undoubtedly more visitors and guests than at any previous annual meeting. The crowd was conservatively estimated at 4,000 to 5,000 people for the three days.

Many Turned Away

Attendance at the banquet on Thursday night, Jan. 29, was estimated at 1,700 people by Mr. Chesebro, custodian of the armory, who knows the capacity of the building. The luncheon drew a crowd estimated at from 1,100 to 1,200 in addition to hundreds who gathered in the balcony. The Majestic Theatre, where sessions were held Thursday and Friday mornings, was not only crowded but hundreds seeking entrance were turned away through lack of standing room. Several of the five sectional conferences on Thursday afternoon drew upwards

ONLY two changes were made in the board of directors of the Illinois Agricultural Association in the election Thursday night, January 29, at the recent annual meeting in Springfield. The directors re-elected were Harold C. Vial, Downers Grove, 11th district; C. E. Bamborough, Polo, 13th district; C. J. Gross, Atwood, 19th district; Samuel Sorrells, Raymond, 21st district; W. L. Cope, Salem, 23rd dist.; Fred Dietz, De Soto, 25th dist.

A. N. Skinner, Yates City, 15th district, and George J. Stoll, Chestnut, 17th district, retired voluntarily.

Bates and Schofield

The 15th district chose Charles L. Bates of Browning, Schuyler county, as its representative on the I. A. A. Board. Mr. Bates was born 54 years ago in Browning township, Schuyler county, on the farm where he now resides. He attended country school in his community, high school in Browning, and later, two years in business college, after which he returned to the farm where he is engaged in dairying and general farming.

Mr. Bates is a charter member of the Schuyler County Farm Bureau, served six years on its executive committee and four years as president. He is now serving on the board of the Schuyler Service Company. Mr. Bates has five married daughters, and two sons 20 and 10 years of age. Both of the boys are at home.

The 17th district chose as its director A. B. Schofield of Paxton, Ford county. Mr. Schofield was born at El Paso, Woodford county, where he began farming in 1919. A year later he moved to Jackson county, where he operated a 1,280 acre farm for seven years. In 1926 he bought the 160 acre farm southwest of Paxton, where he now resides. His crops are marketed in the form of whole milk and hogs.

Mr. Schofield served several years on the executive committee of the Ford County Farm Bureau, the past two years served as president. He also served as president of the Ford County Service Company. The new member takes an active interest in directing local school and community affairs.

President's Address

(Continued from page 3)

crops aided by savings resulting from the organized purchasing of necessary commodities and services.

4. **The maintenance of a strong and active organization to protect and speak for the farmers of the state.**

"I do not claim that we have succeeded in accomplishing all the things that we set out to do since our last annual meeting. There have been discouragements, which at the moment may have loomed large, because of the perspective from which they were viewed, but a survey of the year's accomplishments in those fields covered by a large part of the Association's program justifies and encourages moving forward with more determination in that portion of the Association's program, where there are yet obstacles to overcome.

Expansion in 1930

"A year ago it was recommended and the delegates directed that the program for 1930 provide for expansion and intensive attention to the development of co-operative marketing in its various branches. The Marketing Committee, the Board of Directors and the Officers of the Association have put forth their best and combined efforts to carry out these instructions.

"The results of the year disclose that approximately $77,064.00 have been expended or advanced in a sincere endeavor to provide farmers producing various major cash crops with the opportunity to centralize control of each commodity within their own hands, and thereby and therein have the power to feed the particular commodity into the channels of trade in such manner as would best influence and stabilize the price of such commodities. Varying degrees of success have been attained. Aided by the Agricultural Marketing Act and the Federal Farm Board, co-operative marketing of farm products has easily dominated the attention of the Association during the year just closed.

Marketing Progress

"It is a credit to past achievements in this field that few of the co-operative associations successfully launched by the Farm Bureau and the Illinois Agricultural Association during recent years have found it necessary to go to the Farm Board for loans and assistance. Only our newer projects, which, by their very nature required unusually large funds, found it necessary to seek governmental assistance.

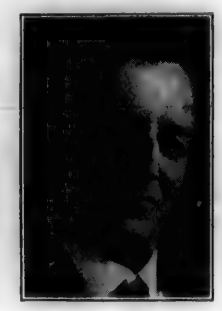
"A survey of what Illinois farmers have accomplished in building a farmer-owned and farmer-controlled system of marketing reveals that nearly one-third of Illinois live stock, more than 70 per cent of the state's milk production, approximately 5,000,000 pounds of butterfat, together with an ever-increasing percentage of poultry and eggs, are now marketed co-operatively. Fruit and vegetable growers are well organized, but because of the past season's limited production, found it unnecessary to expand their activities.

"An important beginning has been made in selling grain co-operatively through the Illinois Grain Corporation and its subsidiary sales agency, the Mid-West Grain Corporation. This promises much for the future. The Soybean Marketing Association not only handled more than 1,100,000 bushels of beans within a few weeks, but I believe played an important, if not a controlling part, in preventing a drastic price recession considerably below the initial advance of $1.00 per bushel made by the Association to its members.

"Each marketing activity deserves mention and may be considered by the producers it affects as the most important development meeting the needs of the farmers; yet, I am sure that in the field of live stock, dairy, produce and fruit and vegetable marketing, the policies of each are well understood by the membership throughout the state and by those engaged in the production of such commodities.

"For real achievement and constructive advancement, the 12 service departments of the I. A. A. have been more outstanding than in any previous year. It being the secretary's duty to report on these departments, and for fear of repetition, I will not deal further with their activities.

"Because of the scope of territory served, their respective importance to producers and their recent development, I feel it my duty to discuss at some length the principles and policies of the Illinois Grain Corporation and the Soybean Marketing Association. This is particularly timely, as we find many well meaning farmers confused by opponents of these activities and whose support and identity are rarely disclosed.



Illinois Grain Corp.

"The Illinois Grain Corporation was launched in February of last year. It was incorporated for the purposes and within the principles adopted at the last annual meeting. Its Board of Directors was and is constituted of organization-minded members of farmers' elevators from the main grain-producing counties of the state. Its affairs are not managed by the Illinois Agricultural Association, although the Association has rendered, is rendering and will continue to render every possible assistance to its program and development. The I. A. A. is its most substantial stockholder and in addition has assisted in financing its organization program.

"The Illinois Grain Corporation is the result of years of desire and effort on the part of the I. A. A. to respond to the repeated requests and urging of its grain producing members. It recognizes the farmers' elevator as its local unit and is founded upon, owned, controlled and directed by such member elevators and grain producers. It does not seek control of the local elevator or any of its policies, which are and should be controlled by its member grain producers. The Illinois Grain Corporation does insist, however, that the grain handled by its member elevators be sold in and through the Mid-West Grain Corporation, which is the sales agency provided by the Illinois Grain Corporation for its members on the Chicago, St. Louis, Peoria and Indianapolis markets. The Illinois Grain Corporation offers to the truly farmer co-operative elevators of Illinois an opportunity to extend the economy and efficiency they have provided farmers

A. N. Skinner

Geo. J. Stoll

A. N. SKINNER of Yates City and George J. Stoll of Chestnut, the retiring members of the 1930 board of directors, served their respective districts with ability, integrity and faithfulness during their years on the board.

Mr. Skinner was a member of the important Finance Committee. Mr. Stoll served as the grain member on the Marketing Committee and took an active part in the formation of the Illinois and Midwest Grain Corporations.

Mr. Skinner will direct the Farm Bureau insurance program in Knox county in addition to managing his farm. Mr. Stoll is actively engaged in farming near Chestnut in Logan county and is well known throughout the middle west as a breeder of purebred Shire horses which have carried off many honors at the International and other live stock shows.

locally to that broader and greater field where alone they can influence and stabilize the price of grain.

Member of National

"The Illinois Grain Corporation is a regional member of the Farmers National Grain Corporation, which was established by the Federal Farm Board in an effort to merge the largest possible volume of grain in a national way. It must be apparent to all that only by and through such volume control can farmers expect to influence or stabilize price.

"I submit that if the theories upon which the Farmers National Grain Corporation is builded are realized in a practical way by farmers, results can and will be obtained. Especially is this true of corn. A survey shows that approximately three-fifths of all, corn which finds its way into the channels of trade originates in Illinois, Iowa and Nebraska. The merging of farmer elevator interests of each state into a regional agency and of the three regional agencies, thus establishing sales control of their total volume in a central unit such as the Farmers National Grain Corporation, would immediately make it possible for those guiding the policies of the central unit to influence, if not control, price.

Possibilities in Corn

"As a nation, we import very little corn. Tariff protection has been only partially effective and can easily be made more effective. Those controlling such a tremendous volume of corn could easily stabilize its price at the highest level that demand would allow, which in turn, would be controlled only by supply and by general economic conditions of the nation. Wildly fluctuating markets in this basic commodity have been made possible, first, by millions of farmers competing with one another in limited periods of time to sell it; next, by elevators competing with one another in the markets to sell it; thus making it possible for a very few men or interests to gain control of the commodity at low prices and later to secure varying margins of profit through such control.

"I know of no way whereby farmers can build, own and control their marketing system except, first, by building, owning and controlling the local elevator to which they deliver their grain; second, by combining the interests of all such elevators through ownership and control of a regional agency; and third, by the merging of regional interests and of their volume of grain in a central or national unit through which all farmer-owned and controlled grain of the system would enter the channels of trade.

Opposition Active

"So far as I have learned, no one has yet offered a constructive criticism of such a farmer-owned and farmer-controlled marketing system, although much opposition has appeared. It was only natural to expect opposition from what is commonly known as the grain trade. No one had a right to expect, however, that men supposedly working for farmers' interests and even under the guise of so-called farmers' organizations, would attempt to defeat the purposes of such a farmer-owned and farmer-controlled agency as is intended in the Illinois Grain Corporation.

"I would not be understood as denying anyone, whether within or without farmers' ranks, the right to point out weaknesses in a new co-operative effort. The I. A. A. has always courted constructive criticism. A sounder and more efficient program is often the result of such expression. I do deny, however, to anyone, and especially one sailing under false banners, the right to resort to innuendo and false propaganda in an effort to destroy the confidence of farmers in a program being developed in their behalf. Especially is this true when not a weakness has been pointed out or a constructive suggestion made as to how the program might be strengthened.

"The Illinois Grain Corporation has been confronted with some opposition of this kind which has somewhat slowed its development. Many farmers' elevators, as well as farmers, are becoming awake to the motives and purposes of this opposition. I see no permanent injury in such propaganda, for if our projects are sound and right, they will eventually succeed in spite of all opposition. If they are not built on a firm foundation and are not answering a real need, nothing we say or do will make them succeed.

Farmers Hold Key

"As I view the situation, farmers hold the key to the extent results will be obtained. They certainly have the opportunity to collectively control the policies of their local elevators and through their local elevators, to control their regional units, such as the Illinois Grain Corporation. Through the regional units they can control their central or national machinery.

"The Illinois Agricultural Association has discharged its duty and obligation to its member grain producers of the state by the development of Illinois Grain Corporation. The machinery is set up and is functioning smoothly. It is set up in such manner that only grain producers can control or dictate its policies. The extent of its success or failure to serve farmers' needs will be determined by the manner in which farmers take advantage of their opportunity to direct their grain in and through truly co-operative channels.

"We have all witnessed the continued and ever-increasing opposition being developed in a national way. We recognize it in our own state. We hear of it in other states. May I again repeat—farmers alone have within their control the answer to this challenge. The Illinois Agricultural Association will continue as in the past to assist the grain producers of Illinois to the full extent such assistance may be desired by those whom the grain producers elect to guide the affairs of the Illinois Grain Corporation.

Soybean Marketing

"In the fall of 1929, the Farm Bureaus of the main soybean growing counties of central Illinois organized the Soybean Marketing Association. With the advice of the Legal and Grain Marketing Departments of the I. A. A., it was incorporated on a capital stock basis. Membership contracts were acquired covering an aggregate of one and a quarter million bushels.

"In the summer of 1930, the Illinois Agricultural Association was asked by its Board of Directors to assume management of its affairs. It was found that very little capital stock had been sold, in fact, only limited efforts had been made to do so. The harvest season was fast approaching. Although fully recognizing the difficulties of the situation, the Board of Directors of the I. A. A. responded to the above mentioned request and consequent responsibility. Personnel was retained and employed and in a few weeks handled 1,130,000 bushels of beans.

"It was early recognized that unless substantial credit and storage facilities were acquired, the price of soybeans would decline to unheard of levels. To secure proper storage facilities as well as to be enabled to make advances to growers, credit running into the hundreds of thousands of dollars had to be secured. Although successful in this instance, largely because of the friendly attitude of governmental credit agencies and the co-operation of Mr. George Jewett, one of the heads of a Chicago commercial bank, no one is justified in either seeking or expecting a repetition of this experience. Through the splendid co-operation of these credit agencies, the Association has marketed over 700,000 bushels of its beans on a basis that allowed an advance of $1.00 per bushel to its members. It has in bonded storage approximately 425,000 bushels.

Capital Stock Basis

"The Board of Directors of the Soybean Marketing Association is now giv-

ing its attention to placing their organization on a substantial paid-in capital stock basis. Only by so doing can they feel secure and assure their membership against the possibility of assuming substantial losses. No individual or institution is justified in depending upon the charity of his or its creditors. I know of no Illinois commodity co-operative, volume being considered, that has rendered a greater service to its members during 1930. I know of no other that offers greater opportunity for continuing service, if placed on a substantial capital stock basis and efficiently managed.

"It has been suggested that possibly this effort to sell capital stock in the Soybean Marketing Association was to get itself in position to meet deficits. I am sure the policy of the Board is prompted only by an attempt to do what should have been done at the time of the organization of this newest commodity association. With substantial paid-in capital, the Board will be in a postion to ask for an extension of credit if they care to do so. We all recognize the unstable condition of commercial America. It is merely a position to justify credit or should leave itself in a position wherein it might be required to dispose of any given part of a commodity on short notice."

SMITH AND WRIGHT

(Continued from page 3)

re-election for the sixth successive year. Seconds to the nomination were offered by J. L. Whisnand of Coles county, and W. H. Moody of Rock Island county. In the absence of other nominations, Mr. Smith's election was declared unanimous.

A Great Ovation

On his return to the platform the president received a great ovation to which he responded expressing his appreciation for the tribute, and briefly emphasizing the fact that farmers will succeed in solving their problems to the extent that they take advantage of their opportunities through organization.

"I know of no greater honor that could be placed upon the shoulders of an Illinois farmer, an American farmer, than to be asked for the sixth time to act as president of the Illinois Agricultural Association," he said.

"There is no influence; there is no power within the State of Illinois that could have caused me to remain available for service another year except the splendid morale, and I might say, almost 100 per cent co-operation we have had from the farm people and Farm Bureau members of Illinois through the period of development thus far attained.

100 Per Cent Support

"We have had splendid support from the Board of Directors. It has been absolutely 100 per cent. If there has been any factionalism within the institution itself, the Board of Directors or the staff, if there has been any lack of sincere intent to co-operate to do everything within their power to serve the farmers who constitute the members, I have never been apprised of, nor suspected its existence.

"I want to thank you for this great honor. I know of no group of men who are entitled to the same extent of constructive advancement as the farm people of this state and nation. Our problems are many; they are tremendous in character. The opportunity for service is only limited, as I stated this morning, by the extent to which farmers stand together and take advantage of their opportunities."

Wright Nominated

The name of Mr. Wright was placed in nomination for vice-president by A. J. Plapp of DeKalb county who called attention to the candidate's long record of faithful service on the Board of Directors, as chairman of the important Finance Committee. The nomination was seconded by J. W. Robins of Ogle county. In the absence of other nominations Mr. Wright was declared unanimously re-elected. He was greeted with applause as he came to the platform and thanked the delegates for the honor and vote of confidence.

The election of directors from the odd-numbered congressional districts then followed in rapid order with the results noted on page 4.

RECORD ATTENDANCE

(Continued from page 3)

of 500 people. The accommodations provided by Springfield, as good as those to be found in any downstate city, were taxed to capacity.

Reporters Cover News

Nine reporters, including representatives of the Associated Press, United Press, International News Service, Chicago Tribune, Chicago Herald and Examiner, Chicago Journal of Commerce, Prairie Farmer, Springfield Journal and Springfield Register broadcast news of the convention which was published not only in Illinois dailies and weeklies but also in newspapers throughout the United States.

The local committees sponsored by the Sangamon County Farm Bureau and the Springfield Chamber of Commerce deserve great credit and thanks of the 60,000 members of the Association for the able manner in which they provided for the assembly. The wide advance publicity given the annual meeting not only at Springfield, but in newspapers throughout Illinois, was instrumental in making it the greatest convention in point of attendance ever held in the history of the organization.

Business Session of Delegates on Jan. 30

FOLLOWING the entertainment and addresses at the noon luncheon, the Board of Delegates went into a business session Friday afternoon for the consideration of resolutions and other business matters that might properly come before that body.

Immediately after convening the business session, John P. Stout, delegate from Sangamon County, arose to a point of personal privilege and among other remarks asked for an explanation and re-statement of the stand of the I. A. A. on the Proposed Revenue Amendment defeated in the general election last November.

Mr. Stout raised the specific question as to whether or not the amendment submitted by the special session of the General Assembly to the people was the same amendment that was recommended by the Governor's Revenue Investigation Commission to the General Assembly. President Smith who was presiding, in responding to Mr. Stout, stated that he had covered the subject matter of the question in much detail in his address which was delivered to the Convention Thursday morning, but in specifically answering the question, did not hesitate to say that the amendment submitted to the people was not the amendment recommended by the Revenue Investigation Commission which had received the support of the I. A. A.

The delegates adopted the report of the Resolutions Committee without change, although a number of amendments were proposed from the floor.

Resolution seven (see pages 8 and 9), which favors legislation providing for the pasteurization of all fluid milk distributed in cities with a population of 5,000 or over, did not meet with the approval of all the delegates. An attempt was made to amend it, but the amendment lost 143 to 34. After being favorably voted upon a motion was made to reconsider the vote, but this also failed to carry.

An effort was made to amend resolution 15 which placed the Association on record in opposition to a drivers' license law, but this also was voted down. A proposed amendment to Article 17 met the same fate.

The board of delegates later went on record as opposed to any sale of common stock of the Illinois Agricultural Holding Company unless authorized at an annual meeting of the board of delegates.

A further resolution was adopted authorizing the Board of Directors of the I. A. A. to purchase $10,000 worth of stock in a proposed publishing company set up to circulate an official organ of the A. F. B. F. among members of the various state federations, when and if the I. A. A. Board of Directors takes favorable action to do so.

An amendment to the by-laws passed by the delegates gives the Board of Directors of the I. A. A. power to appoint directors to fill vacancies in the board. Such directors appointed are to hold office until the following annual meeting of the Association.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Resolutions Adopted Jan. 30, 1931

RESOLUTIONS adopted by the Board of Delegates at the 16th annual meeting of the Illinois Agricultural Association, Springfield, Jan. 30, 1931, are as follows:

I

REAFFIRMATION OF PREVIOUSLY ADOPTED POLICIES

Experience has justified nearly all the policies previously adopted by the Illinois Agricultural Association. Except in those cases where new conditions have arisen or where it has seemed advisable to make some changes, we hereby reaffirm all previous pronouncements of the Association.

II

NATIONAL LEGISLATION

Government statistics show increasing importations of tapioca and sago products, now representing an equivalent of five or six million bushels of corn per year, seriously and adversely affecting our farmers, and particularly by the substitution of these products for corn starch.

We respectfully urge upon our United States Senators and Representatives immediate need for the enactment of truly protective tariff rates applicable thereto, or resort to temporary embargo against importations.

III

We urge upon Congress the further strengthening of the Butter Substitute Laws, so that the manufacturers using unbleached palm oil cannot avoid the tax on colored oleomargarine and the color of yellow be reserved for pure butter only.

We urge the withdrawal of the recent ruling of the U. S. Commissioner of Internal Revenue as submitted on November 12, 1930, with reference to the use of refined palm oil in margarine.

IV

The office of Chairman of the Federal Reserve Board of the United States is a position of far-reaching importance to American Agriculture. The record of Hon. Eugene Meyer in directing the work of the War Finance Corporation and the Federal Farm Loan system fails to inspire the confidence of the farmers of Illinois.

The delegates of the Illinois Agricultural Association in this the 16th annual convention do hereby request the two United States Senators from Illinois to consider his record toward agriculture when his appointment is considered by the Senate for confirmation.

V

We extend our appreciation to Chairman Alexander Legge of the Federal Farm Board, Secretary of Agriculture Arthur M. Hyde, and other members of the Farm Board for the courageous and fully justified position they have taken and maintained on many occasions throughout 1930 in behalf of the best interests of farmers.

We pledge our continued assistance to the Federal Farm Board in efforts they are putting forth to build a farmer-owned and farmer-controlled marketing system.

VI

We insist that state institutions should use Illinois grown products in so far as is possible and practicable. Therefore, we urge legislation requiring that the purchase of fat requirements used for the feeding of inmates in state institutions be at least 75 per cent in butter and 75 per cent in lard instead of substitutes therefor.

VII

We favor legislation providing for the pasteurization of all fluid milk distributed for human consumption in cities with a population of 5,000 or over, except such milk as may satisfy the requirements of health authorities and be approved by the Department of Agriculture as eligible to be classified as certified milk.

VIII

We protest against any regulation requiring vaccination by a licensed veterinarian before swine can be exhibited at the State Fair or at any County Fair.

IX

We declare our oppostion to any legislation which proposes to substitute a single school district in each county in place of all elementary and high school districts therein until such time as local highways are sufficiently improved to make it possible at all times for children to be conveyed to central or consolidated schools and until the revenues for supporting the public schools are levied on ability to pay rather than upon the ownership of property.

X

We declare our opposition to any legislation which proposes to increase the State School Fund unless any increase in funds for such purpose is collected from sources other than property.

XI

We favor the enactment of a personal income tax law with moderate exemptions and with progressive rates, sufficient with funds from other sources, to enable the state to

dispense with all taxes upon property for all state purposes. We urge the Fifty-Seventh General Assembly to enact such a law and pledge our united support thereto.

XII

We are opposed to the diversion of any portion of gasoline tax funds to cities, towns and villages, but favor amendment of the Acts relating to hard roads through or within cities, towns and villages in such a way as will authorize and direct the Department of Public Works and Buildings to maintain and when necessary to reconstruct hard surfaced roads on streets or roads within such cities, towns and villages which have previously been designated as state highways.

XIII

We favor and pledge our support to amendment of the Motor Vehicle Act:

1. To exempt farm tractors and any farm implements and machinery drawn by tractors from the requirement of motor licenses when such tractors, implements and machinery use the highways only in moving between fields or farms for the purpose of carrying on farm operations.
2. To establish a more equitable schedule of license fees with different rates for trucks having a combined weight and rated capacity of less than 4,000 pounds, between 4,000 and 8,000 pounds, and between 8,000 and 12,000 pounds.

XIV

The question of reapportionment has for years been a disturbing political and sectional element in Illinois. Until it is settled, it appears that much needed and constructive legislation will be held in abeyance and section strife now in existence will become more serious.

While it is recognized that the present Constitution provides for representation in our legislative body according to population, yet certainly no one could successfully maintain that the framers of the Constitution did or could foresee the great centralization of people that has come in Cook county, where the population is larger than it is in the rest of the state.

A solution of this question which would be fair both to Cook county and to the rest of the state would give representation in one House on the basis of population and limit representation in the other as to territory.

The principles embodied in this solution are in keeping with the fundamentals of representative government as exemplified in the Constitution of the United States.

We favor settlement of this question on the basis here outlined and pledge our support thereto.

XV

We authorize and direct the officers and Board of Directors of the Association to give further study to the operation and effect of drivers' license laws in other states and to advise the County Farm Bureaus of their findings and their conclusions as to the advisability of such a law in Illinois.

XVI

In the absence of a showing of negligence on the part of the owner of live stock where such live stock has strayed upon the highway and accidents have occurred because of such live stock being on the highway, there should be no liability against the owner and the Legislature of the state should guarantee such protection by statutory enactment.

XVI—a

We authorize and instruct the officers and Board of Directors of the Association to prepare such legislation as they may deem proper and necessary to relieve farmers from liability to prosecution and to suits for damages for killing stray dogs upon their premises.

XVII

The constant growth of and interest in boys' and girls' 4-H club work in the State of Illinois has made inadequate their present living quarters and the facilities for housing their animals and other exhibits at the Illinois State Fair.

The members of these clubs will constitute the leading farmers of Illinois in a few years.

Recognizing the importance and value of this work, the Farm Bureau movement of the state has always encouraged and supported its development in every possible way.

We favor providing boys and girls so engaged with adequate commodious and permanent quarters to the end that added impetus and encouragement be offered those responsible for this fast growing division of the Fair.

We urge the officers and Board of Directors of Illinois Agricultural Association to use their influence in such manner as will best accomplish this result at the earliest possible time.

XVIII

Appreciation of Courtesies

The delegates and visitors of this sixteenth annual meeting of the Illinois Agricultural Association held in Springfield, January 29 and 30, 1931, hereby express their grateful and hearty appreciation for the cordial welcome and for the unfailing courtesy and co-operation shown them by the state officials, the Sangamon County Farm Bureau, the Mayor, the Chamber of Commerce, and the organizations of the City of Springfield, and the citizens of the City of Springfield and Sangamon county who have contributed so effectively to the comfort, convenience and success of this annual meeting.

The Resolutions Committee which submitted the report is as follows:

A. R. Wright, *Chairman.*
Harold C. Vial
Geo. J. Stoll
W. A. Dennis
M. G. Lambert
Chas. Marshall
C. J. Gross

Echoes From The Annual Meeting

I. A. A. Meeting

THE annual meeting of the Illinois Agricultural Association held at Springfield last week was impressive evidence of the achievement that has been made in organized agriculture since the war. This was a business meeting, where business farmers listened to reports and laid down policies for future action. Agriculture is not prosperous, but efficient organization is the only thing that can make it so. The Illinois Agricultural Association is making a record that entitles it to the support of every farmer in the state. Its influence will grow with the size of its membership.—Prairie Farmer.

The I. A. A.'s Mission

THAT thousands of enthusiastic delegates are attending the sixteenth annual meeting of the Illinois Agricultural Association in Springfield this week is a gratifying augury.

At this convention representatives of many groups are brought into close co-operative contact. The broad scope of the Association is indicated in the fact that among the various groups actively represented are the Agricultural Co-operatives Association, the Agricultural Holding Com-

Echoes from Annual Meeting

pany, the Agricultural Mutual Insurance Company, the Farm Bureau Baseball League, the Farm Bureau Serum Association, the Produce Marketing Association, the Country Life Insurance Company, and the Farm Supply Company.

The presence of Chairman Legge of the Federal Farm Board, as we stated in an editorial Wednesday, focuses national interest upon this gathering, but the collective objective transcends the views, activities or ambitions of any individual or sectional group.

Agriculture has entered upon a new era of economics and now faces new problems. The day when agricultural bodies like this great association could be manipulated politically is past. It is accepted as an insult for any party leaders or partisan organization to assume that they can now "deliver" the agricultural vote to promote partisan ends.

The welfare of the farmer is an economic and not a partisan political problem. True, if political parties are to survive they must determine the needs of agriculture and frame their platforms and policies accordingly.

More important than partisan ambitions are the policies of such organizations as the Illinois Agricultural Association.

The keynote of this great meeting now and throughout the coming year should be united demand for legislative action in state and nation which will supply practical farm relief.

An uncompromising campaign must be carried on to see that more such frauds as were perpetrated in 1928 shall not be repeated to the disadvantage of agriculture.

If such a powerful organization as the I. A. A. exercises its prestige unitedly and aggressively along this line it will rescue agriculture from its present depression and give the farmer that which he has consistently been denied —a fair share in national prosperity.—Illinois State Register.

Annual Convention of I. A. A.

Substantial and practical suggestions for agriculture's recovery from the situation in which it finds itself should come from the three-day convention of the Illinois Agricultural Association opening in Springfield today.

Five thousand farmers are expected from all corners of the state for the series of meetings and conferences. The local committee plans to accommodate 1,600 at the annual banquet Thursday evening at which the principal speaker will be Alexander H. Legge, chairman of the Federal Farm Board.

Springfield's guests today are practical farmers. They know conditions on the farms, not from reading tables of statistics, but from wrestling with the soil and trying to outwit the weatherman. Theory will be tempered with fact in the exposition of the situation and in recommending remedial action.

From the doleful tales one hears of agriculture's plight, there might be an excuse for believing that the farmer has thrown up his hands in surrender. Such a notion will be blasted by a thousand motor horns as the farmers arrive today.

They are gathered, not for a post-mortem, but for a clinical consultation, determined to put their ailing patient back on his feet and back to work.—Illinois State Journal.

GOV. EMMERSON'S TAX-REFORM VIEWS

In a speech before the Illinois Agricultural Association, Gov. Emmerson, after reviewing the revenue and tax situation in the state and in Cook county, urged, in addition to necessary reforms in the assessment and equalization of taxes, an earnest restudy of the ways and means of complete and permanent improvement of the revenue system of Illinois. He bespoke the cooperation of all civic and other organizations.

It serves no useful purpose now to complain of the opposition to the revenue amendment submitted last fall and rejected by the voters. That amendment lacked merit, and certainly did not embody the complete and permanent reform of taxation which Gov. Emmerson recognizes as indispensable. A new revenue and tax amendment should be drafted, and every legitimate interest should be given adequate opportunity to contribute to the right solution of the problem.

The next amendment submitted should be frank, comprehensive and free from all ambiguities and jokers. It should permit classification of property for purposes of taxation, the levying of different rates on different types of property, the exemption of personalty from taxation, and the imposition of a fair tax on incomes.

Gov. Emmerson should urge that sort of amendment. It could be defended successfully in a campaign of education, and would deserve popular approval. Its chance of adoption would be excellent.—Chicago Daily News.

Hitting the Nail

The governor struck the nail on the head in addressing the Illinois Agricultural Association in state convention assembled at Springfield, today, where he said there "had been no apportionment for thirty years and it would be thirty years more before the 101 down-state counties would turn the state government over to one county—Cook." In his biennial mesage he suggested an agreement with Chicago whereby Cook County should be given full representation in the senate but that its membership in the house be forever limited to one-third.

With the session only a month old the Chicago members are more insistent in the demands for control of both branches than ever before, and are telling their constituents that the executive is substituting his own ideas for the state constitution—the sacredness of which they repeatedly point out in their demands for their pound of flesh. The statement of the governor today will strike a responsive chord in every fair-minded man. Many of the Chicago delegation privately admit that their demands for control of both branches are unreasonable and would be for the best interests of neither down-state nor Chicago, but that they are powerless to express publicly their real sentiments because of the attitude of the metropolitan press.

A commission is in the making to study this situation, and it is not unlikely it will in the end recommend a limitation for Cook County in one house at least. It means nothing to Chicago that the voting strength of every other large city in the nation is limited in its general assembly.

Young as is the present session it is not too early to predict that there will be no apportionment by the Fifty-seventh general assembly nor its successor either, unless in the meantime Cook County consents to and helps put over a constitutional amendment limiting its voting strength. Chicago makes the noise but down-state has the votes. It is ready and willing to deal fairly with Cook, but Cook is not yet ready to enter into a give and take proposition. Its attitude is to take all or nothing, and nothing is just what it is going to get. Down-state would be in a fine pickle with Chicago in control of both branches of the general assembly.—Peoria Star.

Only two cancellations out of 8,300 members of the Sanitary Milk Producers, St. Louis, at the close of the year, is reported by Manager A. D. Lynch.

Governor Discusses Two State Problems

Reapportionment and Tax Reform Covered in Address Before I. A. A. Convention

TAXATION and reapportionment of the legislature were the two subjects discussed by Governor Louis L. Emmerson before 1,100 to 1,200 delegates, members and visitors in the State Armory following the Friday luncheon at the I. A. A. annual meeting Jan. 30.

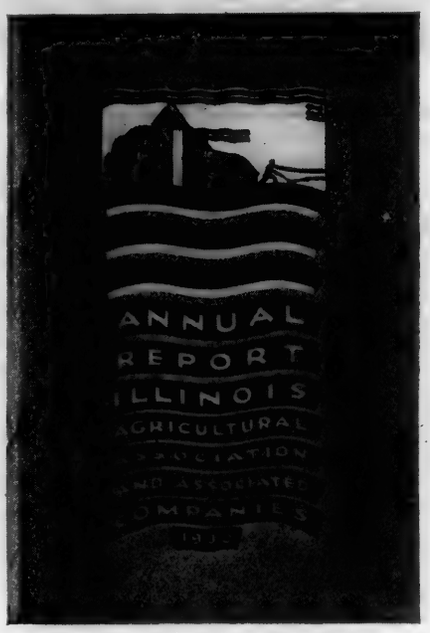
Applaud Statement

The audience liked the governor's analysis of the reapportionment question. Spontaneous applause followed his words, "To reapportion the state under the terms of the present constitution would give to Cook county a majority in both branches of the General Assembly. Right or wrong, downstate members of the legislature have not been convinced in thirty years, and they are not likely to be convinced in thirty more years, that complete control of the legislature should be given without check or hindrance to one county out of the 102 counties of the state. It is not done in any other state of the Union and it is not likely to be done here, no matter whether we want it or not."

Tax Situation

The governor asked that all interests unite to bring about equitable tax reform, criticized opponents of the defeated revenue amendment, called attention to the fact that tax delinquencies are mounting, that property owners are rebelling at bearing nearly all the burden of government.

"Let us look for a moment at Cook county," he said. "I do not want to hold it up as a horrible example, but it just happens that because of its very bigness, conditions there are more apparent.



"It was stated in the Chicago Tribune the other day that more than $51,000,000 of 1928 taxes have not yet been collected. Of this amount, 70 per cent is in real estate taxes. It is estimated that these taxes are due on real estate worth more than $2,000,000,000, which is more than one-fifth of the total real estate of the county.

"Is it not quite evident that real estate taxes are becoming confiscatory?

Delinquent Taxes

"A large part of the $37,500,000 due in real estate taxes, it is asserted, will never be paid. For much of it taxpayers have declined to pay and there is no apparent indication that the county can collect in these instances.

"Just consider these figures for a moment, you who think this talk of tax reform is uninteresting and unimportant. More than $37,500,000 of taxes due on real estate in Cook county for the year 1928 still is uncollected and much of it is uncollectible.

The Annual Report, 1200 Copies of which were Distributed Thursday Morning, Is a 112-page Illustrated Booklet Complete with Financial Statements.

"Then look at this other situation for a moment for it is nearer home to you. Cook county owes the state approximately $17,000,000, which, under ordinary conditions, should have been paid over long ago. The unpaid balance of 1928 taxes due by the middle of 1929, but still not received by the state, amounts to a total of approximately $4,000,000. Of the 1929 taxes, which should have been collected and paid in by the middle of last year, a total of $13,000,000 is due.

Funds Are Short

"What does this mean to the state of Illinois?

"It means that the General Revenue Fund as short $6,182,015.

"It means that the University of Illinois fund is short $1,546,895.

"It means that the money paying interest and retirement of the Soldiers' Bonus Bonds is short $2,533,788.

"It means that the money for the payment of interest and retirement of Waterway Bonds is short $730,669.

"It means that the Blind Relief Fund is short $464,668.

"Without special appropriation from the General Assembly, and special legislation, the state would have to default on its obligations on Waterway and Soldiers' Bonus bonds. The work of the university and the activity of state departments are threatened by the shortage of funds resulting from the failure of Cook county to turn in the amount of money due from it."

During the course of his remarks the Governor took occasion to criticize the Association for its refusal to support the proposed tax amendment after it had been seriously amended in the House.

Reapportionment Plan

After discussing the plan of representation in the legislature followed in such states as New York, Pennsylvania, Maryland, Delaware, New Jersey, Montana and South Carolina where the populous counties have limited representation in one house or the other, the governor said:

"The suggestion is made, therefore, that full representation be allowed Cook county on the basis of population in one House of the General Assembly and that the number in the other House be limited to approximately its present membership in that House. This could in no way injure Chicago, for Cook county members would always be in control of one branch of the legislature and could thus check any legislation which was not considered best for the city or county. At the same time, Cook county members could not force on the state any measure which downstate members felt was unjust or unwise for the communities outside of Cook county. It is a balance of power which seems reasonable and just.

"Chicago members cannot be expected to be conversant with conditions on the farms and with the smaller communities throughout Illinois. It is not reasonable to suppose that the welfare of the entire state would be advanced by permitting Cook county members of the legislature to decide every question which came before the General Assembly, regardless of its interest or lack of interest to Cook county.

Amend Constitution

"It seems to me, therefore, that the way to settle the reapportionment question is by a constitutional amendment which will make possible this balance of power. I am in favor of Chicago having the greatest possible measure of home rule. I recognize that its problems in many instances are quite different from the problems of the downstate and that wherever possible the people of Chicago should be permitted to decide these questions themselves without downstate interference.

Consider Fairly

"On the other hand, I do not believe that the people of Chicago can reasonably expect the downstate to turn over to them all of the functions of state government.

"As in the case of revenue reform, this serious question of proper representation must be considered fairly and justly. As long as Chicago and downstate leaders continue to be arbitrary, no solution is possible and Chicago will continue to have only one-third of the representation in the two Houses of the General Assembly. This is a mere statement of fact and not an expression of opinion.

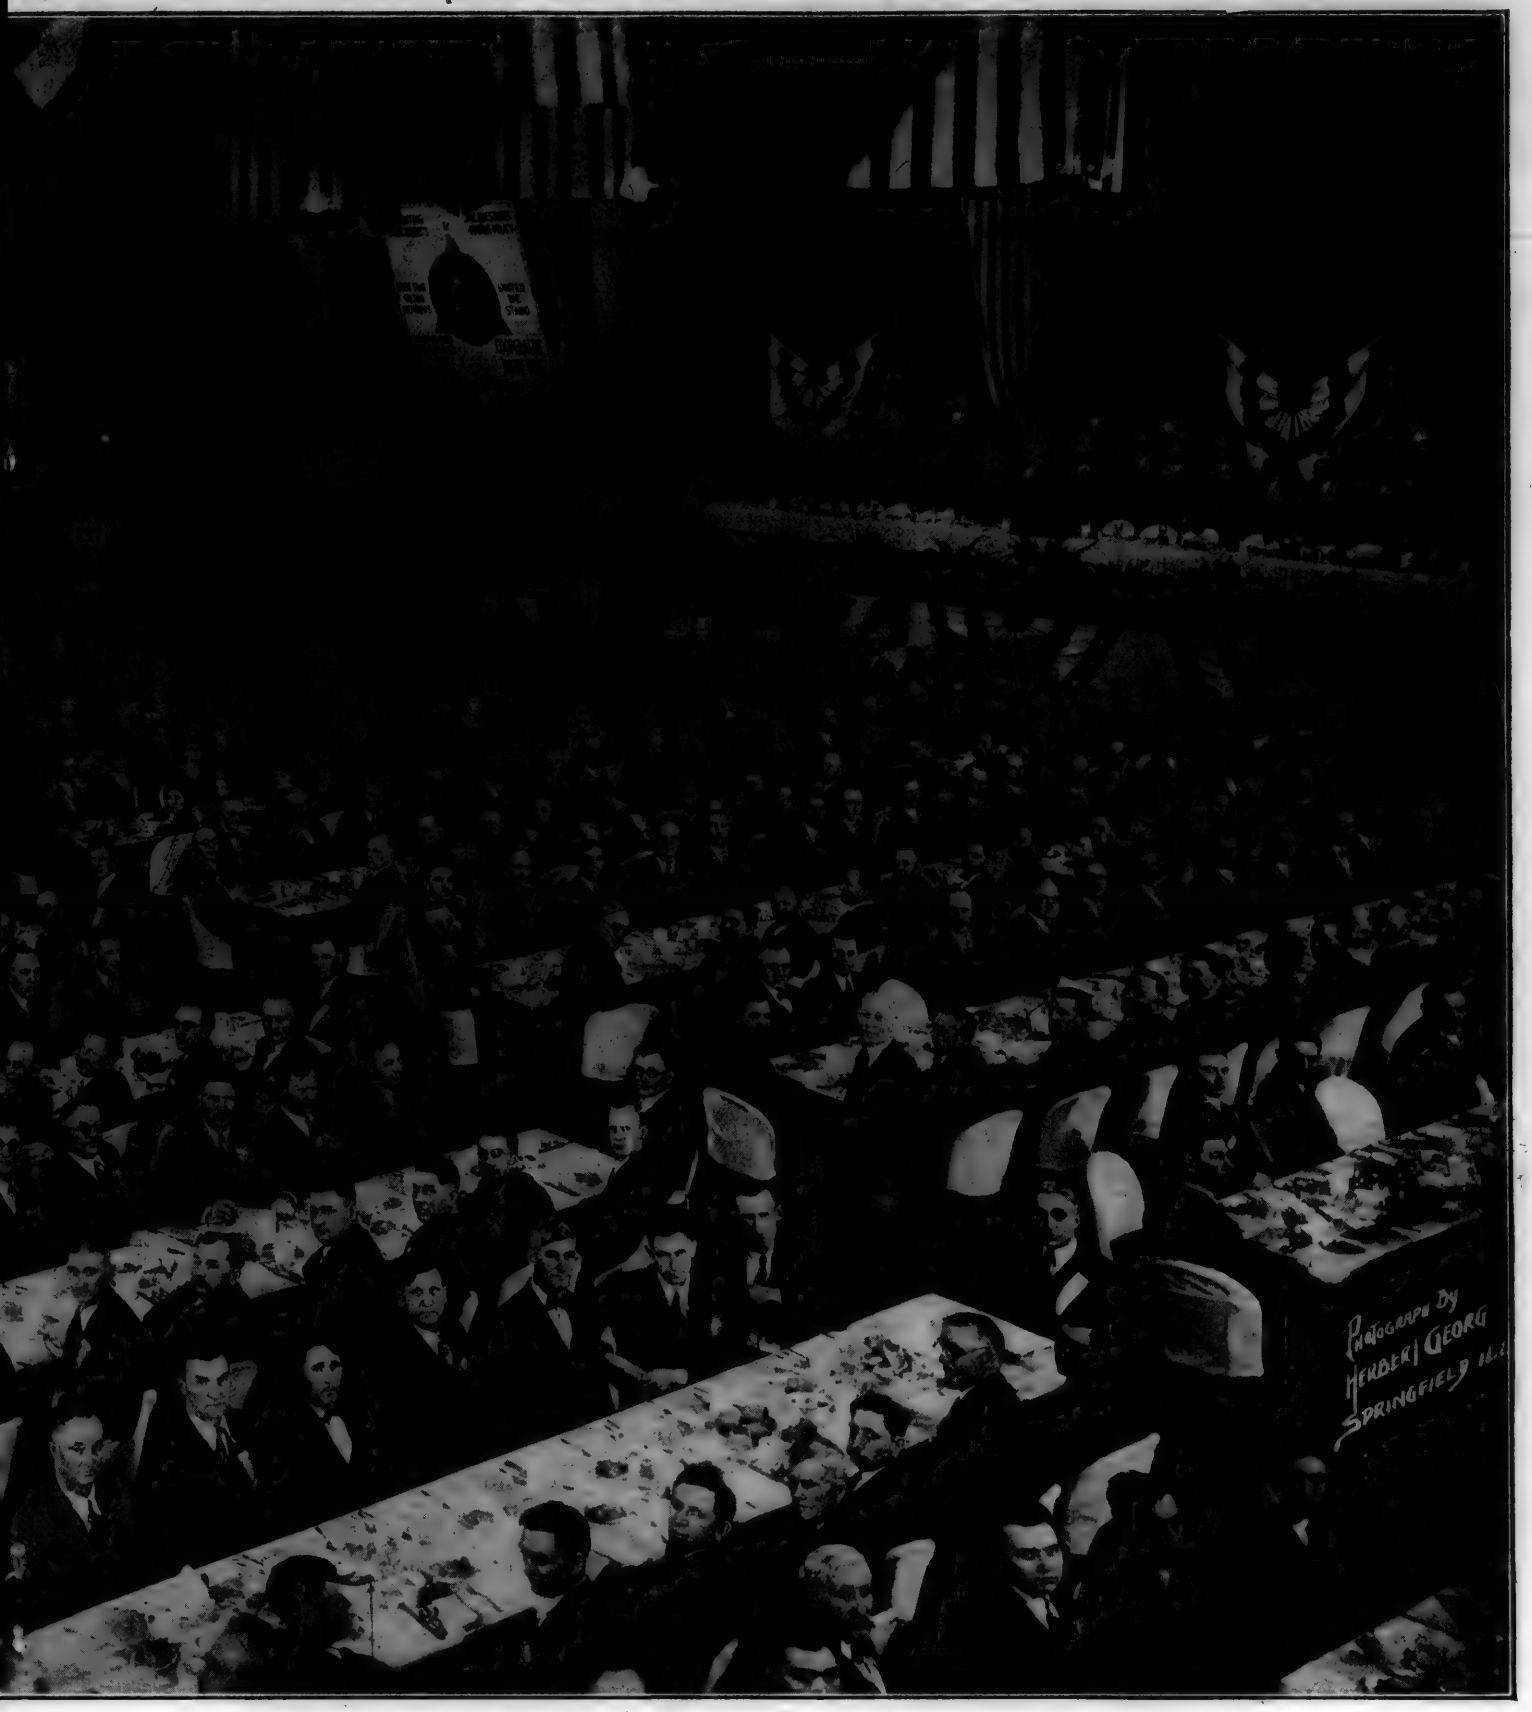
"With sound tax reform, we can do justice to the property owner and with the solution of the question of reapportionment, the principal bone of contention between Chicago and the downstate will have been removed."

NOTICE
ILLINOIS AGRICULTURAL
ELECTION OF DELEGATES
ASSOCIATION

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of February and March, 1931, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureaus and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of Association, including the election of officers and directors as provided for in the by-laws of the Association.

During February annual meetings will be held in Mason, Tazewell, Will, and DeKalb counties.

During March annual meetings will be held in Kankakee, McDonough, Boone, and Winnebago counties.



Signed:
G. E. METZGER, Secretary.
February 9, 1931.

2700 HEAR PROGRAM FOLLOWING BANQUET IN STATE ARSENAL AT SIXTEENTH ANNUAL I. A. A. MEETING, SPRINGFIELD, JANUARY 29, 1931

AMONG the guests seated at the speaker's table at the banquet where Mr. Legge and Mrs. Sewell spoke were: Gov. Louis L. Emmerson; David Shanahan, speaker, state house of representatives; Dean H. W. Mumford, College of Agriculture, University of Illinois; A. W. Miller, president, Springfield Chamber of Commerce; Simon E. Lantz, chairman, Agricultural Committee, State Senate; V. Y. Dallman, editor, Illinois State Register; Stuart E. Pierson, state director of agriculture; James L. Donnelly, executive vice-president, Illinois Manufacturers Ass'n.; Geo. C. Jewett, vice-chairman, Congress Trust and Savings Bank; J. Paul Clayton, president, Illinois Chamber of Commerce; Oscar E. Carlstrom, attorney general of Illinois; Logan Hay, of Springfield; J. C. Spitler, state leader of farm advisers; Homer J. Tice, chairman, Approprintions Committee, State Legislature; R. G. Soderstrom, president, Illinois Federation of Labor; Mrs. Henry J. Mies, president, Illinois Home Bureau Federation; Milton E. Jones, manager, State Fair; J. M. Chilton, assistant general manager, Farmers National Grain Corporation; E. E. Crabtree, banker, Jacksonville; T. A. Borman, vice-president, Beatrice Creamery Co.; Charles Ewing, president, National Live Stock Marketing Ass'n.; Hal Smith, mayor of Springfield; Floyd Keepers, Prairie Farmer; Roy Corsine, chairman, House Committee on Agriculture State Legislature; former Lieutenant-Governor John G. Oglesby, Elkhart; Louis Fitz Henry, Federal District Judge, Peoria; Samuel Burnett, Federal Circuit Clerk.

Among the officials of Illinois co-operatives who sat directly in front of the speakers' table were: J. R. Fulkerson, president, J. R. Montgomery, vice-president, H. D. Wright, manager, St. Louis Producers Commission Ass'n.; H. H. Parke, president, D. L. Swanson, manager, Chicago Producers Commission Ass'n.; G. C. Johnstone, president, Illinois Grain Corporation; Carl A. Neureuther, secretary-treasurer, LaSalle-Peru Producers Ass'n.; E. W. Tiedeman, president, Sanitary Milk Poduces Ass'n.; J. F. Greenwood, president, I. A. Madden, manager, Producers Dairy Company, Springfield; John B. Peters, president, Jack Connery, manager, Quincy Co-Op. Milk Producers; Ryland Capron, president, Wilfred Shaw, manager, Illinois Milk Producers Ass'n., Peoria; D. J. Blickinstaff, president, Archie McIntosh, manager, Decatur Milk Ass'n.; Ewald S. Diemer, secretary-manager, Pontiac Milk Producers Ass'n.; W. C. McQueen, Chicago, president, Pure Milk Ass'n.; Fred Shipley, manager, Champaign County Milk Producers; Harold Enns, president; Forrest Fairchild manager, McLean County Milk Producers; O. B. Goble, president, Illinois Farm Bureau Serum Ass'n.; A. J. Gilfillan, president, F. E. Bingham, manager, Illinois Agricultural Co-Op. Ass'n.; E. D. Lawrence, president, L. R. Marchant, manager, Illinois Farm Supply Co.; Ed Oelze, manager, Egyptian Seed Growers Exchange; R. B. Endicott, president, A. B. Leeper, manager Illinois Fruit Growers Exchange; John Armstrong, president, J. H. Lloyd, manager, Soybean Marketing Ass'n.; Sam Elkins, president, Illinois Produce Marketing Ass'n.; C. P. Cummings, manager, Mid-West Grain Corporation; W. J. Niergarth, manager, Farmers National Grain Corporation, St. Louis; George Wilson, president, Peoria Producers Commission Ass'n.

Legislative Work of Association Reviewed

I. A. A. Stand on Revenue Amendment and Other Measures Explained

(Excerpts from address of President at I. A. A. annual meeting.)

"THE Association's legislative activities during 1930 were largely confined in a national sense to matters relating to and affecting agricultural tariffs and in state legislation to matters of taxation.

"During consideration of the provisions of the Hawley-Smoot Tariff Bill in 1929, the Association filed a brief setting forth its position in favor of increased agricultural tariffs affecting Illinois and surrounding territory. Not only were the suggestions contained in this brief followed through and supported by the Association in the further consideration of this tariff legislation during 1930, but were the cause of amendments to the bill when under consideration by the Senate Finance Committee, wherein a tariff of $6.00 per ton on soybean oil meal and 3½ cents per pound on soybean oil were adopted. This was done at the request of the soybean growers of the state, speaking through their organization, the Soybean Marketing Association.

Senator Deneen Helps

"It is only due United States Senator Charles S. Deneen, a member of the Senate Finance Committee, to say that he is entitled to a large part of the credit for the adoption of this amendment.

"In May, 1930, Governor Emmerson called a special session of the 56th General Assembly. By the very nature of the call, consideration of legislation was restricted to matters affecting the financial condition of Cook county and the City of Chicago, and a report of the Revenue Investigation Commission which had been authorized during the regular session of the 56th General Assembly. The Revenue Investigation Commission's report dealt only with recommendations relating to the amendment of the Revenue Article of the State Constitution. ***The Association's interest in behalf of a constructive amendment to the Revenue Article has covered a period of ten years, and is well known. Representatives of the association had appeared before the Revenue Commission during its consideration of the tax conditions of the state and of needed remedial legislation.***

"As was announced to its members, the Association was in agreement with the spirit, intent and purposes of the Commission's recommendations and gave its support to the suggested revenue amendment when under consideration in the State Senate. The recommendations of the Commission were adopted by the State Senate by a very substantial majority. In the House, it was amended even to the point of emasculation, and put into such shape that the Association could not become a party to it or support the proposal during its consideration by the people previous to the election.

"The Board of Directors made available to all members of the Association the reasons for the position it was forced to take. The consideration by the General Assembly of the constructive report and recommendations of the Revenue Investigation Commission and its amendment by the House certainly furnishes convincing evidence of the impossibility of submitting a proper amendment to the people at a very early date, to say nothing of constitutional restrictions which make it impossible to re-submit any kind of an amendment for four years. The election disclosed the fact that nearly two-thirds of those voting last fall failed to show any tax consciousness as they failed to take any position on the amendment under consideration. This discloses the futility of looking to the voters for tax relief in the form of an amendment to the Revenue Article of the State Constitution.

Taxation Work

"For ten years the Association has maintained a Department of Taxation and Statistics. I could speak at length upon the work of this department and its achievements. The director has become generally recognized as one of the best authorities of the state in the field of taxation. Especially is this true as regards the effect of present laws on different classes of property. As a result of the study of this department, the Association has twice sponsored an income tax bill in previous sessions of the General Assembly. It has both times passed the State Senate by a substantial vote, but has met defeat in the Lower House, the last time by only a few votes.

"We are confronted with a situation wherein values of tangible property are declining and taxes steadily advancing, even approaching the point of confiscation on both urban and rural real estate. It is well known that the ownership of intangibles within the state now approaches, if not exceeds, the total value of all real estate in Illinois. Federal income tax returns disclose that Illinois residents are receiving annually from interest and dividends at least $600,000,000. Estimates by the National Bureau of Economic Research indicate that the net income of Illinois residents from wages and salaries alone approximates $3,000,000,000 per year. This is about 60 per cent of the estimated total net income of the population derived from all sources.

Property Pays 90%

"Nothwithstanding these outstanding facts, tangible property from which is derived not more than 15 per cent of total income still pays more than 90 per cent of the total general tax bill of the entire state.

"It is my belief that the field of taxation offers the most immediate opportunity for real and tangible relief to farmers.

"The Board of Directors has authorized the Public Relations Committee to present for discussion and recommendation to the Public Relations Conference this afternoon rather important changes in the provisions of income tax legislation from those previously adopted by the association. In effect, the changes are such as would provide the State of Illinois with all necessary revenue to carry on its present functions and in addition thereto to discharge more fully other obligations that clearly rest upon the state under the provisions of the State Constitution. All such revenue would be used in lieu of and to replace the present state tax on property. This would relieve property of about $33,000,000 of present taxes annually, and it is carefully estimated would bring direct relief of approximately $8,000,000 to agricultural property. In addition, it would make it possible for the state to assume certain obligations and functions of government clearly placed upon it by the State Constitution, such as providing every child in Illinois with equal opportunity for education. It would also provide sufficient revenue so that the state might assume certain obligations now placed upon the counties, such as blind pensions and mothers' pensions.

"I urge the careful consideration of this recommendation on the part of the delegates in attendance at the Public Relations Conference, and hope the discussion this afternoon will fully justify that conference in recommending to the Board of Delegates in business session tomorrow the favorable consideration of the recommendations of the committee.

"Other matters recommended for consideration in the Public Relations Conference include the question of a re-distribution of the gas tax. Strong forces are insisting that one-half of the

state's present quota of the gasoline tax be allocated to the cities of the state for construction and maintenance of city streets. Such action, if taken, would seriously hamper and delay the completion of the state's magnificent highway system. We recognize, however, the injustice of present laws which in effect force the property owners and cities along designated state highways through such cities to build and maintain such highways. In recognition of this injustice, it is believed the Association should express its willingness to support a change in the present law, which would place upon the state responsibility for the maintenance and rebuilding, when necessary, of all city streets which have previously been designated as state highways. Such action by the General Assembly would remedy the injustice of present laws and at the same time would not seriously interfere with the completion of the highway system of the state.

Motor License Fees

"It is believed there should be some revision in the license fees on trucks, especially in the lower brackets. We should also seek exemption for farm tractors from the requirement of licenses when being moved from farm to farm, and for farm purposes.

"We should seek a statute protecting farmers from responsibility for injuries caused by live stock on highways where reasonable care has been exercised in the control of such stock by its owners.

"The question of reapportionment has for years been a disturbing element in the political and sectional life of this state. It is believed that the Association should take a constructive position on this question. While it is recognized that the present constitution provides for representation in our legislative bodies according to population, yet certainly no one could successfully maintain that the framers of the constitution did or could foresee the great centralization of population that now exists in Cook county, which is larger than the balance of the state.

Reapportionment Plan

"In his recent message to the General Assembly, the Governor of Illinois has recommended a solution to this question, which would give representation in one House on a basis of population and limit representation in the other as to territory. The principles embodied in this recommendation are in keeping with the fundamentals of representative government as exemplified in the Constitution of the United States.

"I recommend careful consideration on the part of the delegates assembled to this important question, believing that its proper solution would greatly influence and encourage a better understanding between the metropolitan and rural interests of Illinois.

"Solutions to all of these important questions call for the most careful and constructive thought on the part of the citizens of the state, regardless of their business associations or connections. Agriculture is one of the foremost industries of the state. Those engaged in the industry, constituting a substantial portion of its population, must not fail to state their position. There was a time when farmers being in the majority could feel secure in their rights. As time moves on, farmers are becoming more and more in the minority. If their interests are to be protected, they must give careful study to the more important questions of public policy and after such consideration, stand together in protection of their rights. I know no way for farmers to speak or act effectively, except through organization.

Organization Needed

"Effective organization of agriculture was never more needed than it is today. If humanity were actuated by the golden rule, organization, except for social purposes and perhaps for the promotion of more efficient production, would be unnecessary, but humanity does not act in that way. Selfishness is a human frailty, groups and classes are self-seeking and seem to be bent on securing preferment and advantage. The continuous economic struggle demands strengthening the organization. Apparently many farmers fail to realize this fact. It is every member's business to take information to and promote intelligent thought among those outside the ranks of organized agriculture, that further strength may be added to efforts being put forth in behalf of their industry.

Membership Increases

"It is pleasing to report a steadily increasing membership and a very large percentage of membership dues paid during the year; yet the imperative need of strengthening the ranks of agriculture causes one to feel that there are still entirely too many Illinois farmers who have not been enlightened about the needs and opportunities of membership in the Farm Bureau movement of the state.

"The auditors' report, which will be presented by the treasurer, discloses that the income of the association was larger during 1930 than in any of recent years, and although the program of the Association has been greatly expanded, it has been carried on well within the Association's income.

No Immediate Expansion

"Looking to the future, I do not hesitate to recommend that there be no further expansion in the Association's program during 1931. I believe that the full time and attention of the Association should be given to strengthening activities now embodied in the program. In making this recommendation, I do not underestimate the value and merit of many suggestions that are coming forward, which call for further expansion and development, but I cannot be unmindful of the fact that the present manpower of the Illinois Agricultural Association and associated companies does not justify increasing present responsibilities.

Develop Personnel

"Attention should be given to providing and developing understudies to those who are carrying some of the chief responsibilities of the institution. This is a safeguard that should never be overlooked by successful business enterprises. Further expansion should be held in abeyance, pending substantial increase of membership and resultant increased income, and until such time as the many projects now under way are all well established.

LaSalle's Record

The story about LaSalle County Farm Supply Co.'s distribution of patronage refunds published in the January RECORD should have stated that 908 of the 1,243 Farm Bureau members in the county (73%) received patronage refund checks, writes Manager M. H. Comisky.

A total of $29,350.87 was returned to stockholders in the form of preferred stock dividends and patronage refunds.

Delegate Representation

The number of I. A. A. members within a county in good standing on the last day of the calendar month next preceding the day of any annual or special meeting of members of the Association has been fixed as the day for determining the representation each county is entitled to at the annual or special meeting next succeeding such day.

A resolution to this effect was passed by the I. A. A. Board of Directors at its January meeting. Each organized county is entitled to at least one delegate, and additional delegates for each 500 members or major fraction thereof.

Capital Stock Policy, Commercial Services

Review of Business Service Projects Discloses Growth and Progress

(Note: Following are excerpts from the President's address at the recent annual convention, Springfield.)

"OCCASIONALLY we hear that there is either lack of understanding or some uneasiness among the membership regarding the extent of capital stock organizations in the farm field. There is, no doubt, justification for some concern on the part of those who do not thoroughly understand the underlying reasons prompting a policy of this kind.

"The policy of the I. A. A. throughout recent years has been to develop commodity organizations as separate and distinct institutions. This is prompted first by the belief that each commodity organization should be under the control of its members. It should provide its own capital and participate in all of its own profits and losses.

Policy Is Sound

"Experience of the Association justifies ever-increasing confidence in the soundness of that policy. It is true that the capital requirements of different commodity interests vary widely. While a nominal amount of capital stock is needed in some cases, very substantial amounts are needed by others. Regardless of credit facilities that may now be or may hereafter be made available, any co-operative corporation that may be or is usually called upon to carry substantial portions of its commodity for varying periods of time should in all cases have paid-in capital stock equal to ten per cent (10%) of the normal total commodity handled. Such safeguards not only make available credit easily accessible, but removes the danger of being called upon by creditors and forced to sell a commodity at a time that might defeat the very purpose of the organization.

Some Grave Problems

"As farmers move forward in the field of commodity marketing and the development of other services, they must expect to meet opposition. We have less to fear from those outside our ranks than from friction, misunderstanding, wasteful competition and false doctrine within. The elimination of competition between farmers' organizations and co-operatives, and consequent duplication of effort constitutes one of our gravest problems. The establishing of too many organizations may become a discouraging influence impeding worthwhile accomplishment. The reluctance of a minority to abide by the ruling of a majority for the common welfare is often a stumbling block to achievement. The betrayal of the farmer and his best interests by those who pose as his friends, while secretly working for his economic enemies is a danger constantly lurking in the path to success.

Commercial Service Corporations

"Although marketing activities have held a dominant position in the year's program, yet the so-called commercial service organizations have in no wise been neglected, as is shown by their continued development and achievement.

"While to the membership belongs a large portion of the credit for the very substantial and continuous growth of these business activities, yet we are not unappreciative of the devoted loyalty and outstanding ability of the active management of these various service organizations.

"On former occasions I have dealt at some length as to the reasons prompting the development of the various service corporations. I shall, therefore, not take your time for a repetition of previous statements.

Illinois Agricultural Co-op. Assn.

"The value of the service rendered by the Illinois Agricultural Co-operatives Association is becoming increasingly apparent. The association had its best year in 1930. It completed 303 audits for 285 co-operative and farm organizations, and closed the year with a net increase of 54 members.

Farmers Mutual Reinsurance Co.

"Considering the abnormal fire losses experienced in Illinos during 1930, the Farmers Mutual Reinsurance Company had a good year. The company shows steady, but substantial growth, having in force about $41,000,000 of insurance, which shows an increase of about sixty per cent (60%) during the year.

Illinois Farm Supply Company

"The Illinois Farm Supply Company enjoyed by far the best year in its short history. From an organization four years ago consisting of six (6) charter members with less than a dozen bulk storage stations, it has grown to 38 companies with 95 stations operating 250 trucks and serving approximately 50,000 farmers in 60 different counties.

"Membership applications have been received and accepted from 17 companies within the year. The petroleum products purchased during the year exceed 24,000,000 gallons, which is a gain of 73 per cent over that of 1929. Fifty-two per cent (52%) of the gross income of the Illinois Farm Supply Company was returned to its members in the form of capital stock dividends and patronage refunds, and 16 per cent of its gross income was added to its surplus.

Illinois Agricultural Mut. Ins. Co.

"The Illinois Agricultural Mutual Insurance Company has also had a splendid year. On December 31, approximately 25,000 policies were in the hands of Farm Bureau members of Illinois, an increase of over 30 per cent for the year.

The admitted assets of the company increased $188,882.00 and at the close of the year aggregated $615,760.00. All funds of the company are invested in the highest grade securities, and the company operates so smoothly as to very seldom call for any particular attention of its executive officers.

Country Life Insurance Company

"Approaching the close of its second year, the Country Life Insurance Company is far in advance of the fondest expectations of those responsible for its development. At the close of business for the year, 22,047 policies were in force aggregating $35,251,250 of insurance, showing an increase of 83 per cent of paid-for business put in force during the year.

"The fast development of the company justified its board of directors in authorizing the payment of a policy dividend upon the payment of the third premium by its policyholders, which is one year in advance of any obligation embodied in the policy contract. The company paid to its owner, the Illinois Agricultural Holding Company, sufficient dividends to justify the Holding Company in declaring and paying a dividend of seven (7) per cent on all of its outstanding stock.

"In addition thereto, the company has placed in policy reserve during the year $321,213.00 and added to its surplus $81,224.22. The total admitted assets of the company at the close of 1930 were $644,758.46, an increase of 163 per cent over the total a year ago.

"I cannot speak too highly of the conservative manner in which the Finance Committee has handled investments for the company. Everyone recognizes the manner in which securities have declined throughout the year; yet investments of Country Life Insurance Company show the total market value of its bonds on December 31st as $5,757.34 over the amount paid by the company for such securities.

Illinois Agricultural Service Co.

"The general management of the various business service corporations which

Six Million Dollar Turnover Last Year

Growth of I. A. A. and Associated Companies Revealed in Figures

(Note: Following are excerpts from the recent annual address of President Smith before delegates and members at Springfield.)

"THE Illinois Agricultural Association with its associated companies has for several years been the largest trade organization in the state. Its growth and development along practical lines now entitles it to rank among the leading business institutions of Illinois. During 1930, the activities of the Association and corporations directly controlled or managed by it called for a financial turnover of approximately $6,429,078, or $21,430.00 per working day. These figures do not include the business operations of the many co-operative organizations which have received supervisory management service from the Illinois Agricultural Association.

"The figures also disclose in a measure the tremendous responsibility carried by the Board of Directors. That they have measured up to this responsibility is best attested by the splendid condition in which the association closed its fiscal year.

"To you who are charged with the real responsibility of leadership in the Farm Bureau movement, may I suggest that agricultural leadership must consecrate itself anew to the tasks which lie ahead. Petty selfishness, jealousy and jockeying for personal position and power have no place in any efficient farm organization or co-operative. History records more failures of farm organizations due to the shortcomings of leadership perhaps than to the thoughtlessness of unenlightened members.

"While we naturally take pride in the achievements of the past, yet we must not be unmindful of the many dangers or pitfalls that lie ahead, unless we keep our heads clear, our feet on the ground and steer a straight and unerring course. I have said before and I say again, that agriculture is entitled to and must maintain one dominant farm organization, always responsive to the will of its members and through which farmers can speak with one powerful voice in their own behalf.

Growing Personnel

"The present standing and position of the Illinois Agricultural Association in the affairs of state and nation are the result of a loyal and enduring membership. The active personnel of the association and associated companies now consists of 53 men and 80 young women. Its authority for further service is limited only by the extent of its membership and the personnel it now has and may develop in coming years.

"Results will be attained just to the extent farmers have and increasingly become organization conscious and through organization take advantage of their opportunities."

(Continued from previous page)

I have referred to is vested in the Illinois Agricultural Service Company, commonly termed the Corporate Management. Its board of directors have not only given close attention to the policies and finances of each business activity, but have provided each with full time, able and active management and other personnel necessary to keep pace with the ever-increasing business and responsibilities of the several corporations.

"I have repeatedly explained the corporate set-up of the Service Company and urged its continuance as the necessary integral unit to guarantee not only balance to the institution, but assurance of successful business management. Although passing through a year unparalleled in history for bank and business failures and depression on every hand, it will be noted that each and every one of these corporations have moved steadily forward and close the year in splendid financial condition. This fine showing certainly confirms the confidence I have previously expressed in the soundness of the corporate management provided by the Board of Directors of the Illinois Agricultural Association."

Right-of-Way Proposed In Rock Island County

More than 40 interested landowners attended a meeting at Edgington in Rock Island county recently where L. J. Quasey, director of transportation for the I. A. A., discussed the rights of landowners in public utility right-of-way cases. It is reported that the Continental Construction Company intends to build a pipe line across five townships in this county.

The Farm Bureau and the I. A. A. have been asked by a group of landowners along the proposed right-of-way to offer advice toward securing a fairer contract than the one now proposed. Mr. Quasey and S. R. Kenworthy, Moline attorney, are working together on a new contract that will protect the rights of the landowners involved.

NEW BOOKS

"THE Farm Board," by Stokdyk and West, presents a clean-cut analysis of the Agricultural Marketing Act, a brief and accurate summary of the agricultural situation before and after the world war, a review of efforts at farm relief leading to the passage of the Act, and a sketch and criticism of the Farm Board's work during its first year of operation.

This book, written by two men connected with the Division of Agricultural Economics and the Giannini Foundation, University of California appears to be an intellectually honest approach to the much discussed farm problem which is refreshing in view of the many volumes, articles, and pamphlets inspired and paid for by enemies of agricultural co-operation.

In approximately 150 pages of easy reading the authors cover a great deal of ground in simple, straightforward, understandable language. The book is more an explanation than a criticism of the Marketing Act, although the authors do not hesitate to give their opinions regarding some of the early operations and activities of the Federal Farm Board.

The opening chapter discusses such questions as land utilization, the growth in efficiency of the farmer, population and food supply, effect of the war, the tariff, taxes, transportation, Federal Reserve Board's deflation policy in 1921, high wages, etc.

Chapter two discusses the drive for farm relief, sets forth advantages and criticisms of the McNary Haugen and Export Debenture plans. And in chapter three the various provisions of the Marketing Act are taken up one by one and explained in detail.

A complete analysis of the Farm Board's operations, through the Stabilization Corporations in wheat and cotton, are presented in the later chapters. The details of the highly interesting California Grape Control Plan also are given.

The appendix in the back part of the book reproduces the Agricultural Marketing Act as signed by President Hoover, the proposed agreement with millers to dispose of the Grain Stabilization Corporation's wheat, the California Grape Control contract, and brief biographical sketches of the various members of the Farm Board.

"The Farm Board" is a valuable contribution to recent literature on the agricultural situation and for those interested in gaining a better understanding of the Marketing Act and its possibilities, we recommend this book. Write to The McMillan Co., publishers, Chicago, price $2.00.—E. G. T.

2700 Hear Legge at I. A. A. Annual Meet

Farm Board Chairman Gets Great Ovation from Large Audience

IN an informal talk in which he discussed economic factors affecting the agricultural situation, Alexander Legge, chairman of the Federal Farm Board, addressed perhaps the largest audience ever gathered at an annual I. A. A. convention. Seventeen hundred people sat down to dinner in the big arsenal at Springfield, Thursday night, Jan. 29, where Mr. Legge spoke. One thousand more assembled in the gallery of the huge building. The Farm Board chairman received a great ovation when he arose to speak. Plainly the speaker had a sympathetic audience, a group that was for and with him.

His talk contained little that was new, little that he had not said before. He complimented the association on the progress it had made, first, in building and maintaining a strong organization, and secondly, in developing co-operative marketing in Illinois.

Alexander Legge

The chairman began with a sketch of conditions that obtained a hundred years ago when barter and trade were the order of the day, when little money changed hands, and when the farmer received 90 per cent of the value of his wheat from the miller in the form of flour and by-products, while the miller received 10 per cent of the wheat delivered for his work.

Now Gets Only Half

"Now the farmer gets only 50 per cent of the value of the flour and the by-products in a bushel of wheat," he said. "The high cost of labor and various services take the rest."

Mr. Legge paid his respects to the opponents of the Agricultural Marketing Act and the Farm Board who declare that nothing is wrong with agriculture. "If that's true," he said, "why is it that the farmer does not have credit in the big banks of Chicago and other cities? You won't find a single farmer's note in the richest and strongest banks."

Complimenting the delegates and members the speaker said, "You have one of the greatest and most representative organizations of agriculture anywhere. We need more organizations like yours. You can do almost anything when you are properly organized. If farmers don't organize, others will, and they'll take care of their own interests first.

"The agriculture of other nations has gone down largely because it lacked organization. If you are unorganized you must take what you're offered."

Wheat Situation

Then the chairman launched into a discussion of the wheat situation. He stated that wheat from an export standpoint is hopeless. "Wheat production in this country," he said, "has increased regularly, month by month, for the past five consecutive years. The wonder is that the wheat crash did not come sooner. You can't compete with the wheat growers of Russia and Argentine in the world markets and live the way you want to and have a right to live," he continued. "You are living in a high tariff country. Your labor and other costs are high.

"Some people think we can get rid of the surplus in a mysterious way, but there is no hope along that line. Other countries have farmers, too. Germany has a tariff of $1.62 a bushel on wheat. The United States has had similar laws against dumping. We're in the same position on corn. The price of corn in Buenos Aires is 27 cents a bushel. Our South American neighbors can lay this crop down on our sea coast cheaper than we can deliver from Illinois.

"The world war is the remote cause of the present depression. Every time a shell exploded somebody's labor and efforts were blown to atoms. At the present time the price of wheat in Liverpool is the lowest in 337 years.

"I am glad to see the change in the policy of this association in its efforts toward solving the farm problem. The biggest part of your problem is marketing. Emphasize that."

Getting back to the wheat situation, Mr. Legge explained the stabilization operations of the Farm Board. "We can do some good in taking care of seasonal surpluses," he said. "Stabilization won't work on surpluses that accumulate year after year. Unless the wheat acreage is reduced our efforts in this direction will be in vain."

Cheap Russian Wheat

The speaker asserted that over in Russia the farmers have to give 25 per cent of all the wheat they grow for taxes. "They are using conscript labor," he said. "The wheat that the government gets for export costs it nothing. Their cost starts when wheat is loaded on the cars. You can't compete with them. You might as well make up your minds to produce only for your own market and let the foreign market go."

The chairman denied that the Farm Board advocated corporation farming. He discounted the advantages in co-operative buying. "The savings are inconsequential," he said. "Concentrate on co-operative selling.

"The manufacturer quits production when the selling price goes below cost," he continued. "Farmers will have to learn to do the same thing. You have an advantage over most manufacturers because your market is steadier. We've got to eat every day. A man can wear old clothes and drive an old car if he has to, but he has to eat three times a day. Under proper control your problem of producing to meet market demands should not be so hard. To get fair returns you've got to work together, not alone, as six and one-half million factories.

Centralize Marketing

"It has been our policy to centralize marketing operations in one agency. Most commodities now have such a co-operative. Our critics have accused us of being responsible for private enterprisers losing $30,000,000 in the poultry and egg business. Up to this time we have loaned only $35,000 to poultry and egg co-operatives."

The chairman stated that the opportunity for organizing the poultry and egg business seems hopeless because "everybody grows poultry." "Even if all the farmers who produce poultry and eggs could be gathered in one organization a large part of the country's production would still be outside," he said. Referring to small town people and residents of suburbs who produce poultry and eggs, he said that a recent check-up by a manufacturer in Oklahoma City revealed that 42 of his employees grew chickens and sold eggs.

Oil Dividends

Farm Bureau members of Ford County have received $10,962.93, or an average of $25.73 each, in the form of patronage refunds from the Ford County Service Company. A 7 per cent patronage refund was paid October 1 and an additional 5 per cent special refund declared by the board of directors to be paid later. This county has 426 members and 1,070 customers.

A total of $8,380.38 was paid back to the Farm Bureau members of Jersey County by the local supply company on January 8. This amount represents the regular patronage refund of 7 per cent and an additional 8 per cent. Three hundred ninety-five Farm Bureau members received patronage refund checks; the total number of customers is 593.

Women Discuss Living Standards at I. A. A. Meet

143 from 33 Counties Attend Conference in Charge of Home Bureau

A DISCUSSION of how the woman in the home can help in maintaining an adequate standard of living under present economic conditions was featured at the women's conference held during the I. A. A. convention at Springfield, January 29. "This is a harder job today than ever before because of low farm prices," declared Mrs. Henry J. Meis, president of the Illinois Home Bureau Federation, who presided.

Miss Fannie M. Brooks, health specialist for the University of Illinois, stressed the importance of individual and community health in maintaining a high standard of living. "Give me a good digestion, Lord, and something to digest . . . give me a mind that is not bored . . ." she quoted in bringing out the importance of mental as well as physical well-being. "Millions for prevention and not one cent for pills and cod liver oil," she recommended as a fitting slogan for American housewives and mothers. "Visit your doctor once a year and be ever alert to the needs of your eyes, ears, and teeth if you would keep fit," she said.

Produce Market

Mrs. T. E. Newby, Arcola, Illinois, told how the Coles County Produce Market has brought income and comforts to farm homes in that community.

"The Coles County Market was organized a year ago last October," she said. "When we began, gross sales for the month were $625, for November $1,225, for August, 1930, $1,027; for November, 1930, $1,300; for December $1,135, and for January to date $847.

"The market provides an outlet for some things we couldn't sell otherwise such as skim milk, corn meal, mush, cooked pumpkin, and garden surplus. We also sell chickens, eggs, hominy, veal, pork, beef, etc. We pay booth rent, for our own supplies, and contribute 1 per cent for running expenses which include heat, light, and advertising.

"Going to market is a family enterprise. It enriches our lives, teaches us co-operation, gives us business experience, brings us in contact with new methods and shows us the value of a schedule.

"A market should benefit the consumer as well as the producer. Make fair charges giving consideration to cost of production (including time and labor).

Women Control Cash

Women spend 85 per cent of the money that goes into retail trade, according to Anna Searl, Livingston County home adviser. "Woman's job always has been to provide food, shelter, and clothing for the family," she said, "but today she goes about it differently than her mother did; she made her clothes, you buy them; she made her bread, you buy it. Eight hundred women in Livingston county were asked if they made their own bread. Two replied in the affirmative.

"Woman's job is harder today than ever before. It takes more training to spend a dollar wisely than to earn it. We continually train people to make more money, but we have neglected to teach them how to spend the added income properly.

"What your mother and my mother knew will not serve today. What we know will not do tomorrow. Since spending is our job, let's find out as much as we can about it. We need to keep open and informed minds to get as much as possible from our dollars."

Home Accounts

Mrs. Clyde J. North of Winchester explained the system of keeping home accounts recommended by the University of Illinois. "It is a revelation to many to see just how much of our living we produce on the farm," she said. "Foods raised at home are valued according to their cash value if sold in town. One family found they produced 65 per cent of all the food they ate. Another found they were spending more than $50 per month on gas and oil.

"Home account keeping will tend to maintain our present standard of living and to raise it," continued Mrs. North. "As we see one expenditure against another we can plan for the future and double our efforts at right economy."

C. E. Hopkins of Pontiac explained briefly why married women should carry a reasonable amount of life insurance. He gave a resume of the aims and reasons for the organization of Country Life Insurance Company and the cost of policies therein.

At the close of Mr. Hopkin's talk the following resolution was adopted: "That we as an organization recommend to the Illinois Agricultural Association that it give more consideration to the homemaker as a prospective buyer of life insurance."

One hundred and forty-three women from 33 counties attended the meeting. Only 98 were present the previous year.

Whiteside Sets New Record Raising Cash

Whiteside county is to have a new co-operative oil company. One hundred and eighty Farm Bureau members who attended a meeting in Morrison, Feb. 7, to launch the project, broke all records when they raised $11,550 to erect bulk stations and get the company under way.

L. R. Marchant, manager of the Illinois Farm Supply Co., who attended the meeting, states that so far as he knows this is a record accomplishment for capital funds raised in a single meeting for such a project. "I think this was made possible through the eagerness on the part of those present to do better than any other county in the state," he said.

Membership in the Whiteside County Farm Bureau is gaining steadily. Within the next year or two it promises to be up among the leading counties of the state again with well over 1,000 members.

Fifteen members subscribed for 10 shares each in the new company at $25 per share, three members for eight shares each, 15 members for five shares each, 43 members for four shares each, 19 members for two shares each, three members for one share each. Ninety-eight members subscribed for a total of $11,550.

The subscriptions followed opening talks by President A. L. Goodenough of Morrison, and Farm Adviser Frank Shuman.

Oil Companies Report Dividends to Members

The Christian County Farmers Supply Company, which became associated with the Illinois Farm Supply Company during the past summer, declared its first patronage dividend at the close of its fiscal year, November 30. Six per cent on sales was paid Farm Bureau members in good standing.

The Fulton Service Company, after a few months operation, declared an 8 per cent patronage refund to the Farm Bureau members holding preferred stock and gave other Farm Bureau members credit to be applied on one share of preferred stock in the company.

The Henry County Supply Company closed its second year September 30, declaring a 10 per cent patronage refund and setting aside a reserve from which an additional refund can be paid at any time the directors desire to do so. The total business of the company for the period was slightly less than $100,000.

Soybean Growers to Meet Decatur, Feb. 25

Annual Convention of Growers Expected to Bring Out Large Gathering

OFFICIAL notice of the second annual meeting of the Soybean Marketing Association was sent last week by Secretary W. G. McCormick to 2,909 members of the association in the 26 organized counties of Illinois.

Arrangements for the annual gathering of the leading growers of Illinois' soybean belt, which centers around Champaign, Decatur, Taylorville, Springfield, Jacksonville, and Carthage are in the hands of the Committee on Arrangements, composed of J. F. Probst, Harry E. Pickrell, and V. C. Swigart; the Credentials Committee including Dwight Hart, John G. Albright, and M. D. Tomlin; and the Program Committee, President John W. Armstrong and Manager J. H. Lloyd.

Speakers scheduled include Samuel R. McKelvie, grain member of the Federal Farm Board; Earl C. Smith, president of the Illinois Agricultural Association, and Lacy F. Rickey, grain marketing specialist, University of Illinois, who will discuss "Commercial Soybean Grades."

McKelvie Accepts

Mr. McKelvie's acceptance came just as the RECORD went to press. The Farm Board in conjunction with the Federal Intermediate Credit Bank, loaned the funds for the operation of the association's 1930 marketing deal.

Soybean Association officials point out that notwithstanding the severe drouth last year, there was an increase of more than 100 per cent in bushels of commercial soybeans grown in Illinois in 1930. The large increase in production coupled with a limited demand for high protein supplement feeds, and heavy importations of cheap soybean products created an unfavorable market situation.

Reports of growers obtained through a questionnaire sent out by the University of Illinois, and from growers in attendance at 21 county meetings addressed by Manager J. H. Lloyd, indicate the intention of farmers to increase Illinois' commercial soybean acreage in 1931.

Under existing conditions many Illinois farmers will probably find it more profitable to utilize a considerable percentage of the 1931 soybean acreage for feed production, both hay and grain, than for marketing through commercial channels.

Higher Tariff Needed

In a statement before the Marketing Conference at Springfield, Jan. 29, Manager Lloyd explained the need for an increase in the present rate of duty of $6 per ton on soybean oilmeal and the immediate need for a wider market for this high-grade protein supplement.

Fifty-three thousand tons of soybean oilmeal, amounting to approximately one-half the entire domestic production from the 1930 crop, was imported into the United States during the first eleven months of 1930. Importations also include palm kernel meal and peanut meal, which compete directly with the soybean product.

Heavy Importations

Importations of soybean oil during the year ending September, 1930, amounted to 5,615 tons, or about one-third the domestic production for the past calendar year. Practically all the imported soybean oil is processed and re-exported, thereby returning to the importer the drawback of 99 per cent of the rate of duty on the imported oil. Creation of demand for the domestic soybean oil in the paint trade and for use as an edible oil are other projects receiving the attention of the association.

Manager Lloyd states that appreciation by growers of the valuable services performed by the association during the 1930 season in receiving and handling more than 1,130,000 bushels of the commercial soybean crop and in maintaining the relative high price of $1.00 per bushel, is responsible for the aggressive action of grower members in subscribing capital funds for financing the Association's future marketing operations.

The DeWitt County Service Co. recently declared its regular 10% patronage dividend to Farm Bureau members, and also a special 5% dividend. This corrects the statement in the last issue of the RECORD which mentioned only the 5% refund.

Wants Farm Manager

"I am in need of a competent man to operate 250 acres of rich level land.

"I want a good farmer and stock man and I have a good proposition for the right kind of a person.

"If you know of anyone that you can recommend I shall be pleased to hear from you."

Jesse E. Miller,
Cairo, Illinois.

Black and Stout Head Baseball League

Big Turnout at Annual Meeting, Springfield, Jan. 28

CHARLES S. BLACK of Jacksonville was elected president and John P. Stout of Chatham vice-president at the annual meeting of the Illinois Farm Bureau Baseball League, Springfield, Jan. 28. Mr. Black succeeded Geo. L. Clarke of Downs, McLean county. Mr. Stout succeeded Black, who was promoted to the presidency. More than 125 directors, managers, players and fans from 28 organized counties attended the meeting in the Palm Room of the Abraham Lincoln Hotel.

Kenneth L. "Tug" Wilson, athletic director of Northwestern University, who spoke before the morning session, declared that the future hope of baseball lies in its further development in rural communities. Commenting upon the Olympic games in which athletes of all nations compete annually, he said: "The annual competition between athletes of all nations is doing more to build international good will than the numerous peace conferences and diplomatic discussions."

Should Be Encouraged

Wilson, who was born and reared on a farm near Atwood in Piatt county, believes that recreation among farm boys such as that afforded by the Farm Bureau Baseball League should be encouraged. College coaches, he continued, like to see the big, husky farm boys come out for sports because nothing is too big for them to tackle.

A new constitution and by-laws was adopted which provides among other things for limiting eligible players to young men actually engaged in farming who are members of the Farm Bureau or who are dependent sons of Farm Bureau members.

Play 117 Games

The report of the secretary revealed that 31 County Farm Bureau teams competed last year in approximately 117 games; that McDonough county won the state championship by defeating Logan; that the league had gained nine new teams during 1930.

He advocated home rule in the administration of the League whenever practicable, modifying this policy only in such instances where local administration becomes unworkable. He cautioned against allowing professionalism and all its evils to creep into the organization, against the use and employment of professional pitchers and play-

ers which contributed to the downfall of town lot baseball. "When such a situation is fostered," he said, "baseball becomes a contest of money, not one between the youth of one community or county and that of another section.

Your Responsibility

"To keep the sport clean that it may teach honesty and sportsmanship while providing wholesome recreation is of far greater importance than the results of any one game or series of games," he continued. "The future of the league lies largely in the hands of you men who make up this group. Unless you who are charged with the leadership and management of the teams follow a high code of ethics; unless you decide controversies fairly and on their merits alone; unless you practice the golden rule in dealing with rival teams, certainly nothing more than that can be expected of the younger players."

The treasurer's report showed receipts during 1930 of $220, disbursements of $217, and a balance on hand of $318.17.

Representatives from Douglas, Kendall and Will counties who attended the meeting expressed interest in bringing Farm Bureau teams from their respective counties into the League in the coming season.

Delegates present who represented the various counties entered in the League are as follows:

William Taylor, Carroll county
Guy H. Husted, Cass county
Victor Hershbarger, Champaign Co.
R. P. Cothern, Ford county
R. H. Clanahan, Greene county
E. W. Matteson, Grundy county
Otto Steffey, Henderson county
J. R. Johnson, Henry county
H. K. Johnston, Iroquois county
H. R. Brunnemeyer, JoDaviess Co.
T. J. Sullivan, Knox county
Charles Wilson, LaSalle county
Kelsye Baylor, Lee county
Roy McKettrick, Livingston county
Ross Quisenberry, Logan county
Melvin Barclay, McDonough county
W. B. Fitzgerald, McLean county
Floyd Holmen, Macon county
E. C. Mieher, Jr., Macoupin county
L. J. Hager, Marshall-Putnam Co.
Elmer Bradley, Menard county
Gus Sammons, Montgomery county
Harry Kumle, Morgan county
Wm. Greenfield, Peoria county
Harry D. Sweet, Sangamon county
Tom Sager, Stark county
John White, Tazewell county
Theodore Stimpert, Woodford Co

Uncle Ab says that whether old times or new ones are best, the only time we can do anything about is the present.

Tells Producers to Eat More Dairy Products

Tom Borman Speaks Before Annual Produce Association Meeting

THE agreement between the Illinois Produce Marketing Association and some 20 creameries of the state provides for profit sharing on an equal basis which marks a relationship between co-operatives and private business of great significance, T. A. Borman, vice-president of the Beatrice Creamery Company, Chicago, said in addressing the annual meeting of the Illinois Produce Marketing Association, Springfield, on January 28. About 200 attended the meeting in the Leland Hotel.

"How far the undertaking will prove successful cannot be determined after only eight months of operation," continued Mr. Borman. "The year 1930 was the most difficult year in the history of the creamery business, and this fact alone will prevent the realization of the fullest benefits contemplated.

Have Under-Consumption

"We have not heretofore in the history of this country produced so much of all products of the dairy as during the last few years. We have more than can be used under conditions prevailing. It is alleged that our over-supply is the result of under-consumption.

"Under-consumption arises from two causes, first, diminished buying power; and secondly, we who produce do not consume as much of the products of the dairy as is necessary for our best bodily and intellectual welfare, nor do we consume as much as we should in the interest of our industry. In other words, producers are not doing their share in providing a market.

To Teach Public

"The National Dairy Council has undertaken a tremendous task in showing the consuming public the health benefits from increased usage of dairy products. Its endeavor is through all educational sources. Its foundation is the work of the most eminent physiologists. The producers of cream for butter in Illinois are contributing one penny per delivery to the support of this work. In this respect, Illinois is a proving ground for the plan. It has already been undertaken in several other states. This penny per delivery check-off will cost the average cream producer not to exceed 75 cents a year and will produce a vast sum for the education of our people.

"The producer of cream for butter is suffering from surpluses for which he is in no wise responsible. The production of whole milk has been overstimulated in every milk shed. For example, the Dairyman's League of New York a few weeks ago was churning daily, cream from 5,000 cans of surplus milk. Chicago is swamped with whole milk and one city of 50,000 souls in Illinois has 80,000 pounds a week surplus of whole milk. So it is in every milk-condensing territory and the surplus from this milk finds its way into butter, as does the surplus from cheese factories, and utility milk products plants.

Oleo Ruling a Blow

"A serious factor confronting the dairy industry is the threat of oleomargarine. The Internal Revenue Department ruling that oleomargarine may be made yellow by the use of palm oil and soybean oil and thus escape the tax of 10 cents per pound on colored margarine, is the most terrific blow the dairy industry has had from that quarter. There is pending in the lower house of Congress the Brigham Bill, which is designed to tax yellow oleomargarine irrespective of how it is made yellow.

"The problem ahead of us is that of producing at a profit even though prices are low. It is our obligation to keep our market in the best shape possible and it is our further obligation to produce butterfat at prices which will return a profit at the prevailing prices. In other words, we must study the economies of milk production. Much cow milking has been done on an average Chicago standards market of 29 cents, which was the average 1910 to 1916 inclusive. The 1930 market which we look upon as a low year was 34.75, or 5¾ cents in excess of the six year average mentioned above.

"There are no better creameries than those to which you have access. They make the best butter it is possible to make from the raw materials received and it is good butter. They do as good a job of selling the finished product as can be done. So—finally, our hopes for improvement lie in a normal buying power, the consumption of more dairy products at home and the production of cream through better and fewer cows, at a price which will leave a profit between cost of production and the price at which we sell the butterfat."

Among the new companies which have been in operation for less than one year are the Woodford, Adams and Fulton Service Companies. All three of these companies paid an 8% patronage dividend to Farm Bureau member patrons and declared another special 8% patronage dividend to be paid later.

Mrs. Sewell Pleads For High Standards

Eulogizes Farm Home in Entertaining and Impressive Speech at Annual Meeting

NEITHER America nor the world can go far on low standards of homes, whether rural or urban, Mrs. Charles W. Sewell, director of the Home and Community work of the American Farm Bureau Federation, declared in her address before a capacity audience at the banquet Jan. 29 in the State Armory during the I. A. A. annual meeting. Mrs. Sewell preceded the Farm Board chairman on the speaking program. Her address eulogized the farm home, analyzed its functions in relation to the life of the nation, made a plea for building its foundations firmly and outlined the Farm Bureau's program for advancing the welfare of rural living.

"The welfare and the perpetuation of the American farm home is not only the business of the Farm Bureau but of all farmers and of the nation as well," she said. "As goes America so goes the world, has long been a recognized fact, but neither America nor the world can go far on low standards of homes, whether rural or urban."

Farm Home First

Apropos of corporation farming, Mrs. Sewell remarked, "At the present time we hear a great deal about cooperative farming, but all the reasons and suggestions have fallen short and the generally accepted idea of farm dwellers is to continue to make the farm home and the community a pleasant, attractive place in which to live."

Continuing her eulogy of the American farm home she touched on the employment problem, saying, "Our nation has been shaken to its very foundations lately because of the overwhelming problem of unemployment. The dwellers on our farms are never out of a job, but perhaps this fact possesses saving grace, for one of the things which has been wrong with this country as a nation for the past several years has been that all too many people did not want to work. Everyone, old and young, has been tryng to get in on the ground floor of a snap, trying to get something for nothing.

"In our cities with the divergent activities and interests of average families, there is very little of family life. Social workers in the cities go to a great deal of trouble to arrange annual banquets between fathers and sons and mothers and daughters. In the farm home mothers and daughters meet regularly at the dish pan, while fathers and sons have tacit understanding that there will be a daily meeting along about 5 A. M. in the cow barn.

Local Committees Did Splendid Job At Meeting

Convention Draws Largest Crowd In Recent Years, Accommodations For All

THE 16th annual convention of the I. A. A. held recently in Springfield was greater in point of attendance than any held in recent years.

The fact that everything went off smoothly and that ample accommodations were provided for all is due in no small measure to the untiring efforts of Edwin Bay, farm adviser; C. R. Carpenter, president; other officials of the Sangamon County Farm Bureau, and C. G. Kohler, convention manager, Springfield Chamber of Commerce.

Edwin Bay

The following committees did a splendid job of taking care of the delegates and visitors, decorating the armory, and performing the many details connected with entertaining the crowd of 4,000 to 5,000 people:

Don't Thrive Here

"Recently we have been stirred by the activities of the Soviet government in the United States, but let me remind you that bolshevism and communism do not thrive in a nation of home-owning, home-loving men and women.

"In order to promote such a home-owning, home-loving nation, the American Farm Bureau Federation has undertaken a constructive educational program which depends upon the farmers themselves. Probably farming will never pay big money returns, but we believe it is true that farmers as a whole can get just as much as they are willing to demand. We call these demands standards of living and we consider it a good omen that we have within our ranks men and women who have decided to hold fast to a high standard of living. In the years of development this may include a shorter working day, the full education of all children, an auto, an airplane if necessary, music, heat, light and water in well-built farm homes, good roads, good churches, good schools, the proper facilities for play and recreation, attention to health and adult education.

Only Square Deal

"These take time and education and depend upon the farmer himself for their acquisition. If all the farmers in the U. S. A. were united in a determined, well-defined attempt to secure for themselves and their posterity standards such as these, there is no power in America that could withstand them.

"I hold no brief for the lazy, inefficient farmer, but I do ask for a square deal for the land-owning, land-loving men and women who wish to secure for themselves and their posterity an adequate standard of living. The farm home is the foundation on which our civilization and our future progress rest. The foundation must be substantial if the super-structure is to endure."

General Arrangements committee: A. F. Shepherd, chairman; R. C. Graham, Frank McKelvey, E. C. Coulter, John P. Stout, R. W. French, George B. Mayol.

Reception Committee

Reception committee: C. R. Carpenter, W. S. Nottingham, George B. Mayol, R. A. Jones, J. R. Christopher, O. S. Rogers, J. C. Quisenberry, G. S. Hatfield, L. C. Smith, R. C. Graham, Fred Davey, Jr., L. A. Carswell, William Kessler, Elmer Johnson, J. F. Bomke, O. J. Waddell, J. Brown Hitt, George Hemp, J. F. Greenwood, J. L. Smetters, Evan Taylor, Charles McTaggart, Milton Green, Robert Rhodes, C. R. Malsbury, A. B. Constant, Alfred Odiorne, John Renken, John E. Dodds, M. D. Colean, Roy C. Downing, C. M. Hinkle, G. A. Wolford, L. I. Lehmann, S. G. Jones, S. J. Snell, David Evans, J. F. Thornton, W. S. Miles, G. T. Hickman, Charles Dozier, Carl Ostermeier, J. W. Stroub, L. E. Bird, E. P. Hall, Harry Happer, Mark Cooper, Garrett Tolan, Everett Theobald, R. F. Constant, Harry E. Pickrell, George Bell, A. D. Van Meter and Edgar Boynton.

Women's reception committee: Mrs. J. P. Stout, Mrs. A. B. Constant, Mrs. Earl Coulter, Mrs. A. D. Van Meter, Mrs. S. J. Snell, Mrs. Sidney Roberts, Mrs. McConnell, Mrs. L. E. Bird, Mrs. Floyd Bricker, Mrs. Susan Bridges, Mrs. D. Y. Langley, Mrs. Carter Curtis, Miss Grace Foutch, Mrs. Frank McKelvey, Mrs. R. W. French, Mrs. Edwin Bay, Mrs. George B. Mayol, Mrs. L. L. Lehmann, Mrs. John Klor, Mrs. O. B. Wheeland, Mrs. Garrett Tolan, Mrs. Roland Stone, Mrs. J. C. Quisenberry, Mrs. John Anderson, Mrs. Alfred Odiorne, Mrs. M. A. Cooper, Mrs. I. A. Madden, Mrs. Fred Davey, Mrs. R. C. Graham, Mrs. A. F. Shepherd, Mrs. Roy Downing, Mrs. David Evans, Mrs. Evan Taylor, Mrs. C. R. Carpenter, Mrs. H. E. Pickrell, Mrs. Helen Hall, Mrs. O. L. Frazee, Mrs. R. D. Berry, Mrs. R. A. Jones, Mrs. Meade Colean, Mrs. L. A. Carswell, Mrs. Ernest Davis, Mrs. Bert Weber, Mrs. Chester Baker, Mrs. George Witty, Mrs. W. S. Nottingham, Mrs. Scott Irwin.

A Great Armory

J. S. Chesebro, custodian of the arsenal where both the banquet and luncheon were held, is also deserving of great credit for his assistance in getting the armory ready. Mr. Chesebro estimates that 1,700 sat down to the dinner, and that 1,000 more were seated in the balcony during the speaking program.

"It was one of the largest crowds ever gathered in the armory since I have been connected with it," he said.

The inside dimensions of the armory are 220 feet long, 132 feet wide. The speakers' table was 106 feet long. The dining room itself where the tables were placed measured 180 feet by 98 feet.

The I. A. A. Board of Delegates on Jan. 30 authorized the directors, when and if it appears desirable to purchase stock in an agriculturally-owned-and-controlled radio station, to invest not to exceed $2,500 in such a project. Authorization also was given to advance a total of $8,000 to the Soybean Marketing Association, the money to be paid back out of earnings.

"Stick---the Farm Board Will Back You"

Ex-Gov. McKelvie of Nebraska Gets a Hand at Annual Soybean Marketing Association Meeting

"IF you soybean growers will stick to your organization the Federal Farm Board will stand back of you," Samuel R. McKelvie, grain member of the Federal Farm Board, told 500 members of the Soybean Marketing Association at their annual meeting in Decatur, February 25. Gov. McKelvie's words were enthusiastically applauded. The demonstration is indicative of the determination shown by nearly 3,000 Illinois soybean men to carry on in their co-operative effort.

"We're not so concerned about the immediate outlook for the soybean industry nor the repayment of our loan," said Gov. McKelvie, "we are concerned about whether you men will back up your association through fair weather and foul. This is not a one-year proposition. It's a long-time program. Patronize your organization and patronize it well. Prices will not always be as low as they are at the present time. You couldn't have started your organization at a worse time from the standpoint of getting a favorable price for your products. The industrial depression, the crop surpluses in this country and throughout the world have resulted in low prices for farm products almost unprecedented in American history. Prices can't go much lower and they are very apt to go up, so keep up your faith and courage and we'll win out in the end."

Strong Financial Set-Up

The same principles of success governing private business also govern co-operatives, the speaker told his audience. "Your organization must have a strong financial set-up and ample reserves if it is to operate for your best interests. Get in position to run your own business, be independent, and build your marketing institution until it has sufficient money reserves to take care of

SAMUEL R. McKELVIE

any emergency. Just remember this: that when your co-operative puts money in reserve it still belongs to you and you will get it eventually. Whereas, the earnings you contribute to a private concern marketing your products, you will never get back."

Referring to the buyer who occasionally offers a bigger price for a carload of soybeans, or any farm commodity, than the co-operative is able to pay members, McKelvie said: "Frequently such offers are made to weaken your faith in your own organization. A greater price for a carload or two of beans is of small consequence. What you want to know is who is going to buy 1,140,000 bu. That's what you must consider if you are going to succeed.

Emergency Existed

"The Farm Board has received more publicity in the newspapers for its help given the cotton and wheat farmers than for aid given other commodities," said McKelvie, "but remember that much more money has been loaned and more attention given to other commodities than to these two. When the Board saw that an emergency existed in both wheat and cotton it acted promptly. We did not want to wait a whole year before we took a chance. We supported the market and got plenty of wheat—about 100,000,000 bu. in fact. You know the results. The American price is considerably higher than the world price for the first time in history. The wheat grower was benefited.

"Stabilization operations, however, are only temporary. The Farm Board furnished the umbrella for the 1930 crop and now we're asking the wheat growers to furnish their own umbrella after July 1. And the only way to do it is to cut acreage and allow the accumulated surpluses to be used up."

McKelvie expressed the belief that all other things, including labor, must become readjusted to the new low scale of prices. The farmer has taken his cut, he said, and now it's up to the others to follow suit if we are to work back successfully toward general prosperity.

Compliments I. A. A.

Governor McKelvie complimented the Illinois Agricultural Association and the management of the Soybean Marketing Association for the way they handled the 1930 soybean pool. "We were glad to loan money on the soybean crop to an organization (the I. A. A.) that never had a failure," he said. "Your management is to be complimented for selling the greater portion of bushelage pooled when there was a good market for the beans. Too many times farmers fall in love with their crops and refuse to sell," he said. "Your beans in storage are dry and in good seed condition. The Farm Board is not worried about its loan if you men will carry on."

Earl C. Smith, president of the Illi-

nois Agricultural Association, who followed Gov. McKelvie, explained why the soybean growers were being asked to subscribe for capital stock to finance their organization. "It is not contemplated that the money so obtained will be used to reduce loans on beans in storage," he said. "Last year your organization carried on all its operations with borrowed capital. It's asking too much of your creditors to have them finance you for clerical help, postage stamps, train fares, stationery and other incidental expenses.

"Your organization ought to have enough capital for at least a year's operations. And for this purpose it is recommending that every member buy at least one share of 6 per cent preferred cumulative stock of $25 par value. In recommending the capital stock plan we are not asking you to invest money that you hope to get back in a year or two as in the case of investors in some of our co-operative oil companies. You have already had the benefit, and got your money back in an increased price for your beans.

Members Profit

"I can say without fear of contradiction that most of you would have gotten only about 85 cents a bushel instead of $1 for your beans had not the Association pegged the price by offering $1 per bushel on delivery.

"We were fortunate to get credit to carry on our operations last year," he continued. "It's too much to ask that this be continued. Your organization will be far stronger if at least 2,500 of you will subscribe to at least one share each in your organization.

"The biggest problem ahead is for farmers to get control of their marketing machinery, and you can succeed in doing so if you will give the same support, enthusiasm and co-operation you gave in building your various insurance and commercial projects."

Manager Reports

In his annual report to the members, Manager J. H. Lloyd reviewed marketing operations having to do with the sale and storage of 1,140,000 bushels pooled from the 1930 crop. Loans from government agencies permitted an advance to the grower of $1.00 a bushel for No. 2 soybeans consigned to the Association's pool. The first sales of 140,000 bushels were consummated at the premium prices of $1.25 and $1.26 per bushel delivered. These two sales represented more than one-third of the bushelage expected. The members already signed and nearly 700 who joined later more than trebled the 350,000 to 400,000 bushels expected.

"The summary of our operations up to date records the sale of a large percentage of the pooled beans, with a balance on the right side of the ledger," stated Manager Lloyd. "The remainder of the soybeans consigned are being held in storage for later sale."

The leading counties which pooled beans are Christian with 276,826 bushels, Champaign 110,244 bushels, Moultrie 101,199 bushels, Macon 89,860 bushels, and Douglas 79,469 bushels. More than 57 per cent of the beans pooled graded No. 2, over 38 per cent No. 3, the rest graded No. 4 and sample.

Market Declined

Reviewing the market conditions obtaining during 1930, the manager's report stated: "During the brief harvest season the soybean market declined along with other commodity prices until the price was reduced to or near the Association's advance of $1.00 per bushel to growers. It is generally acknowledged that the Association pegged the soybean price at 20 to 25 cents per bushel higher to all growers not only in Illinois but also in neighboring states.

"The 1930 commercial soybean crop was very much underestimated. It produced far above expectations. More than 650 names were added to the membership roll during the harvest season. Because farmers need cash and the relative high price of soybeans, a larger than usual percentage of the threshed crop moved into commercial channels.

"Since the close of the harvest season soybean oil meal and soybean oil declined further because of competition from cheap imports, also because competing feed prices were lower and farmers lacked buying power. Finding an outlet for the portion of the crop in storage and the financing of our Association's future operations are the immediate problems."

Treasurer Reports

The report of Robert A. Cowles, treasurer, showed the Association to be in satisfactory financial condition.

Prof. L. F. Rickey, University of Illinois, spoke on the afternoon program. He discussed the grading of soybeans, told and demonstrated how samples were taken from the cars and bins.

The convention unanimously voted to increase the authorized number of 6 per cent preferred shares of stock from 4,000 to 8,000, and to reduce their par value from $50 to $25.

The following resolutions were unanimously adopted:

1. That the Board of Directors of Soybean Marketing Association be commended for their unselfish efforts in directing the policies and business affairs of the Association during the past year.

2. That appreciation be extended to the Illinois Agricultural Association and County Farm Bureaus of Illinois for the fine co-operation and service rendered the Soybean Marketing Association and its members during the past year, and the promise of continuing support and co-operation during the coming year.

3. That appreciation be extended to the Federal Farm Board, the Intermediate Credit Bank of St. Louis, and the Commercial Depository of the Association in Chicago for the active support, advice and liberal extension of lines of credit necessary to facilitate the marketing of the 1930 crop of soybeans.

4. That we solicit the American Farm Bureau Federation and the Illinois Agricultural Association to use their legislative contacts to effect just and equitable increases in the Agricultural Tariff schedules so that soybeans and soybean products will be adequately protected and that the Board of Directors of Soybean Marketing Association be instructed to use every reasonable effort to secure the tariff protection needed by the soybean industry.

5. That the Executive Officers of Soybean Marketing Association be instructed to immediately communicate with the Senators and Representatives from Illinois, urging the President to increase tariff duties on soybean products and competitive commodities under the flexible provisions of the Tariff Act.

6. That the Board of Directors and Executive Officers of Soybean Marketing Association use every reasonable effort and such portion of the corporate funds of the Association as financial condition of the Association would warrant, to develop and increase the uses of soybean products, and that the co-operation of soybean processes be solicited in such endeavors.

Respectfully submitted,
RESOLUTIONS COMMITTEE,
FRANK S. GARWOOD,
C. C. RAYBURN,
G. W. LENHART,
BURTON E. KING,
EDWIN BAY.

Directors elected were: Adolph Gehlback, Logan county; D. D. Hill, Shelby county; Lester A. Reed, Morgan county; Burton E. King, Hancock county; John W. Armstrong, Champaign county; M. D. Tomlin, Mason county; W. J. Sandusky, Vermilion county; Sam Scrrells, Montgomery county; J. F. Probst, Macon county; T. H. Lloyd, Macoupin county; V. C. Swigart, DeWitt county; John G. Allbright, Moultrie county; Dwight Hart, Christian county; Edgar Boyton, Sangamon county, and W. G. McCormick, Douglas county.

President John W. Armstrong presided.

I. A. A. Board Meetings

The following resolution designating future meeting dates was passed by the I. A. A. directors at a recent meeting:

RESOLVED, That, until otherwise ordered, regular meetings of the Board of Directors be held at the office of the Association at 608 South Dearborn Street, in the City of Chicago, State of Illinois, on Friday following the second Monday of each month, at 10 A. M. on the following dates:

Friday, March	13, 1931
Friday, April	17, 1931
Friday, May	15, 1931
Friday, June	12, 1931
Friday, July	17, 1931
Friday, August	14, 1931
Friday, September	18, 1931
Friday, October	16, 1931
Friday, November	13, 1931
Friday, December	18, 1931

Legislation Considered at Springfield

I. A. A. Representatives Watch Measures Before General Assembly

ACTION on the first of a number of legislative measures sponsored or endorsed by the Illinois Agricultural Association was secured at Springfield on March 4 when a bill making it mandatory that at least 75 per cent of the fat requirements at Illinois charitable and penal institutions supported by state or county taxes be purchased in the form of butter and lard rather than oleo and other substitutes was reported out favorably by the House Committee on Efficiency and Economy. Rep. Sol Handy of Clark county will sponsor the measure.

Organizations for Bill

The action followed a hearing in which members of the committee, representatives of the I. A. A., Pure Milk Ass'n., Prairie Farmer, Illinois State Dairymen's Ass'n., Ill. Butter Mnfrs. Ass'n., Illinois State Grange, and the oleomargarine association took part.

Earl C. Smith, I. A. A. president, who spoke first for the farm interests, cleared up misunderstanding about the contents of the bill, told what the measure proposed, cited the condition of the butter market and farm prices in general, emphasized the need for broadening the outlet for Illinois farm products, of putting into force in state institutions the "Buy Illinois Products" campaign adopted by the last general assembly.

Brandon and Pierson Speak

Rodney Brandon, director of public welfare for the state, expressed his interest in doing everything possible to help agriculture. He stated that about 2,000,000 lbs. of fats are used in the state institutions annually, that half of this has been supplied by purchasing oleo and substitutes, that if the bill becomes law approximately 500,000 lbs. more of butter and lard will be bought for the 43,000 inmates of the state institutions than heretofore.

Stuart Pierson, state director of agriculture, spoke effectively for the measure, pointing to the fact that oleomargarine is made largely from imported vegetable oils, that it is no more than right that the greater portion of the fat requirements used in the state institutions supported largely by farm taxes, be the product of Illinois farms. "The state has been sponsoring a 'Buy Illinois Products' movement," he said. "To be consistent we ought to put it into practice in our state institutions and patronize our own butterfat producers."

Stanard and McQueen

S. J. Stanard, secretary of the State Dairymen's Ass'n., produced evidence showing that 11 other states have prohibited the use of oleo in state institutions. "Twenty thousand northern Illinois dairymen want this legislation," said W. C. McQueen, president of the Pure Milk Ass'n.

F. R. Baer of River Forest represented the oleo interests. Illinois produces more butter substitutes than any state, he said; why take a crack at an Illinois industry? He failed to state that most of the oils used in making margarine are imported from the Philippine Islands.

"The farm organizations ought to raise hell with farmers who eat oleo and fail to patronize their own industry," said Chairman Claude L. Rew of the committee.

Rep. Handy, who had previously introduced a measure similar to the one sponsored by the I. A. A., showed his good faith by withdrawing his own measure in favor of the new one.

Live Stock on Highways

A bill sponsored by the I. A. A. to amend Section 1 of "An Act in relation to domestic animals running at large within the State of Illinois," was introduced in the House by Representative Hugh Luckey of Vermilion county on March 4.

The bill provides that "Hereafter, it shall be unlawful for any animal of the species of horse, ass, mule, cattle, sheep, goat, or swine to run at large in the State of Illinois: Provided, that no owner or keeper of such animals shall be liable for damages in any civil suit for injury to the person or property of another caused by the running at large thereof, without the knowledge of such owner or keeper, when such owner or keeper can establish that he used reasonable care in restraining such animals from so running at large."

State Income Tax

The state income tax measure which has the support of the I. A. A. is Senate bill No. 138 introduced by Senator Simon Lantz of Congerville. The bill now rests in the Committee on Revenue awaiting a hearing.

The bill provides for an exemption of $1,000 for a single person, $2,000 for the head of a family or a married couple, and $500 additional for each dependent. The tax on the first $2,000 of net income is 1%, 2% on the next $3,000, 3% on the next $5,000, 4% on the next $5,000, 5% on the next $10,000, and 6% on all amounts of income in excess of $25,000.

The term "net income" means gross income of the taxpayer less deductions allowed by the Act. The usual credits allowed in the federal income tax are allowed in this measure.

Companion Measures

Seven companion bills to make effective important provisions of the proposed state income tax were introduced on March 4. An eighth bill will be introduced next week.

"These bills," said Senator Lantz, "provide for the repeal of Acts for the State School Fund, University of Illinois Fund, and reimbursement of the counties for one-half of their payment of blind benefits. In addition, they amend certain other acts referred to these funds. Lastly, they provide for the substitution of net receipts from the income tax by direct appropriation from the state general fund for the purposes named.

"In case net receipts from the income tax are not sufficient to provide for all the appropriations for such purposes, the Act provides that the sttae levying board shall compute the tax rate on property necessary to make up the deficiency between appropriations for such purposes from the state general

(Continued on page 7)

SUMMARY

Handy bill restricting oleo in state institutions reported out. I. A. A. and other groups take part in hearing.

Lantz state income tax measure awaits hearing in Senate.

Many bills amending motor vehicle act before Assembly.

Bill covering liability of farmers for live stock on highways introduced by Rep. Luckey.

Bill for free limestone from Chester penitentiary tabled. Other measures await action.

Sportsmen Want to Lease Uncultivated Lands

Uniform Agreement with Landowner Proposed for Hunting and Fishing Privileges

THE Public Relations Committee of the I. A. A. at its meeting on February 12 gave careful consideration to the proposal of the Sportsmen's Mutual, Incorporated, an Illinois sportsmen's club, providing for a uniform lease of farm lands by members of the sportsmen's organization for fish and game propagation and conservation, and for fishing and hunting.

After studying the proposed contract and lease, the committee deemed it worthy of consideration by members of the I. A. A. where large tracts of uncultivated lands are available and where agents employed by the sportsmen's organization are detailed to supervise hunting and fishing by its members so as to protect the farm owner and his property against damage.

What It Proposes

The proposed uniform agreement between the Sportsmen's Mutual and landowners or groups of landowners provides that members of the organization shall have the exclusive shooting, trapping, and fishing rights on the lands described in the contract in accordance with federal and state laws except that the owner of the land, tenant, and immediate family of the occupant of the premises shall have the right to hunt, trap, and fish on the land controlled by him or them.

It is contemplated that the Sportsmen's Mutual shall plant, propagate, and grow game and fish of its selection and have the privilege of declaring any part of the tract a sanctuary for the raising and protection of game against hunting.

Will Post Preserves

The Sportsmen's Mutual proposes to post the preserves with appropriate signs; agrees to assume responsibility for any injury or damage done by its members to any property of the landowner; agrees that members of the organization shall register in and out with the owner or game protector on the described premises, and that it shall pay the farmer or landowner for the privilege of hunting on said lands on the following basis:

5 cents per rabbit
10 cents per quail
25 cents per pheasant
30 cents per duck, where not fed
60 cents per duck, where feed pens and decoys are maintained

it being understood and agreed that the owner or tenant shall limit the kill of any, and all native game to the amount of his determination, except where game is by the second party or its members planted, propagated and grown, whereupon the second party and its members shall have the privilege of killing not less than 50 per cent per annum of the game planted and grown.

May Terminate Lease

It is agreed that no member of the second part will hunt or shoot in any field where stock is found, or where men or teams are working without the special permission from the then present owner, or tenant or their servants.

The landowner may terminate the lease or agreement at any time if the Sportsmen's Mutual or its members violate any terms of the lease. The length of the lease is for two years and the lease renews automatically for one year until notice of termination is given by the owner or the Sportsmen's Mutual.

If the land so leased changes ownership, the lease is automatically cancelled so that it is not a cloud on the title.

Committees Appointed

Sub-committees and advisory committees for 1931 appointed by the President at the February meeting of the I. A. A. Board of Directors are as follows:

Finance Committee

A. R. Wright ..... Varna
M. G. Lambert ..... Ferris
C. J. Gross ..... Atwood

Organization and Information Committee

C. E. Bamborough ..... Polo
Frank Oexner ..... Waterloo
W. A. Dennis ..... Paris
Otis Kercher (Farm Adviser) Danville

Marketing Committee

Samuel Sorrells ..... Raymond
Harold C. Vial ..... Downers Grove
A. B. Schofield ..... Paxton
W. L. Cope ..... Salem
R. A. Doneghue (Farm Adviser) ..... Macomb

Public Relations Committee

Chas. S. Black ..... Jacksonville
Geo. B. Muller ..... Washington
Chas. L. Bates ..... Browning
Edwin Bay (Farm Adviser) Springfield

Financial Business Service

Geo. F. Tullock ..... Rockford
Fred Dietz ..... De Soto
Charles Marshall ..... Belknap
E. C. Secor (Farm Adviser) ... Sparta

Geo. E. Metzger was elected secretary, Robt. A. Cowles treasurer of the I. A. A. for the year 1931 at the February meeting of the Board of Directors

I. A. A. Active in Support of Brigham-Townsend Bill

Dairy Industry Threatened by Cheap Imported Vegetable Oils Used in Making Butter Substitutes

OFFICIALS of the Illinois Agricultural Association were recently assured by members of congress from Illinois that the Brigham-Townsend bill, H. R. 15934 Senate 5745, will have their support when it comes up for vote. This proposed measure seeks to restore the 10 cent per pound tax on colored oleomargarine.

A recent ruling by Commissioner Burnet of the Internal Revenue Bureau was to the effect that oleomargarine colored by natural oils, such as imported palm oil, need not pay the federal tax of 10 cents a pound.

As we go to press, word comes from Washington that the Brigham-Townsend bill passed both the House and Senate in the closing days of the 71st Congress.

The vote in the House yas 302 aye, 101 no; in the Senate, 68 aye, 9 no.

The proposed bill will restore the 10 cent tax by changing the wording of the present law which now assesses only oleo "not free from artificial coloration which causes it to look like butter of any shade of yellow." Commissioner Burnet construed this provision in such a way as to exempt manufacturers of butter substitutes from the 10 cent per pound tax. He held that palm oil which gives the oleo a yellow color was not "artificial coloration."

The Brigham-Townsend bill changes the wording so that any oleo "yellow in color" must pay the tax. The measure also contains provisions relative to packing and marketing oleo which specify weight contents of from one-fourth to five pounds, and opaque material for wrapping purposes.

Under the bill, wrappings must remain unsealed and unbroken until in the possession of the consumer. The present law allows oleo to be sold in tubs, buckets, etc., with no restriction relative to breaking packages before retailing them.

The Illinois Agricultural Association is not only co-operating with the American Farm Bureau Federation and the dairy interests in supporting this measure but I. A. A. officials also have written the Illinois members of congress and conferred with the Secretary of Agriculture on several occasions apprising

(*Continued on page* 12, *col.* 1)

LEGISLATION CONSIDERED

(*Continued from page 5*)

fund and reasonably expected net receipts therein from the income tax.

Senator Lantz expressed the opinion that the income tax bill and the companion bills will make it possible for the state to dispense wholly with any levy of taxes on property for the various purposes referred to above and other general purposes, at a saving of approximately thirty million dollars per year to property owners of the state.

Motor Vehicle Bills

Other measures in which the I. A. A. is interested and is watching closely are those amending the motor vehicle Act so as to exempt farm tractors from paying a state motor license fee; and to change the classification of trucks in the levying of fees.

Senator Henry M. Dunlap of Champaign and Rep. Henry C. Allen of Lyndon have introduced practically the same bill in their respective Houses which fixes a fee of $8 for trucks weighing less than 4,000 pounds, $12 for trucks of from 4,000 to 8,000 pounds, and $22.50 for trucks of 8,000 to 12,000 pounds. Trailers and semi-trailers weighing 2,000 to 4,000 pounds are assessed $12, and those of from 4,000 to 10,000 pounds $25.

Senator Mason introduced a bill to exempt tractors, traction engines, etc., from the payment of motor license fees whether used by owners or in behalf of others; provides that vehicles of less than 7,500 pounds (now 5,000) shall pay the minimum fee of $12.

Senator Mills has a bill in the hopper providing for a license fee of $17.50 for vehicles of 5,000 to 8,500 pounds (present fee $22.50 for 5,000 to 12,000 pounds). Another bill introduced by Mills seeks a $200,000 appropriation to build a 4-H Club building at the State Fair Grounds.

Representative Hunter has introduced House Bill No. 228 which provides that threshing machines, clover hullers, corn shredders, and similar vehicles used primarily for agricultural purposes shall not be subject to the payment of vehicle license fees.

Another Oleo Bill

Representative J. R. Thompson of Bridgeport has introduced a bill to license all handlers of oleomargarine charging a fee of $250 per quarter for a license to sell it wholesale, and $75 per quarter for a license to sell it retail. The State Director of Agriculture is authorized and empowered to supervise the Act.

Free Limestone Bill

A bill to distribute agricultural limestone produced at Chester Penitentiary free of charge to southern Illinois farmers in the vicinity of the prison failed to secure favorable action of the House Committee on Efficiency and Economy on March 4.

The bill introduced by Rep. Davis of Murphysboro was criticized first on the ground that it is illegal for the state to give away its property; secondly, because only a few citizens would be benefited; thirdly, because it would furnish unfair competition to limestone companies operating in that territory.

President Earl Smith, who happened to be in the committee room when the measure came up, was called on to express his views. He stated that the bill as a temporary relief measure to benefit drouth stricken southern Illinois farmers had merit, but as a permanent program thought it unwise.

Sixteen inquiries in one mail were received by Country Life Insurance Co. in response to the "Family Income Rider" advertisement in the February I. A. A. RECORD.

Observations

Can a man earn $1,000,000 a year?

This is the controversial issue stockholders of the Bethlehem Steel Company will decide at their coming annual meeting on April 14 when the company's bonus system initiated years ago by Charles M. Schwab, chairman of the board, will come up for consideration.

The target of attack by a group of minority stockholders is the cash paid President Eugene G. Grace, No. 1 employee, who for the past 13 years has received a bonus averaging $814,993 per year. During 1929 his bonus amounted to $1,623,753, during 1930 $1,015,591. He draws the nominal salary of $12,000 per year. The bonuses of a number of other employees have averaged between $100,000 and $230,000 annually during the 13 year period.

Stoutly defending the company's bonus plan in a recent letter to the stockholders, Chairman Schwab presents all the facts and asks for favorable action at the coming meeting to continue the profit-sharing system.

"I personally have fixed the percentages of the payments made under this system to the principal executives of the corporation since it was inaugurated," he writes. "I assume full responsibility for these payments and I am quite prepared to support them in principle in detail. The directors of the corporation share with me the belief that our bonus system has been one of the principal factors in the success of the corporation . . .

"I believe now as I have always believed that a liberal reward for unusual effort and ability on the part of an officer or employee is returned many fold to the stockholders of a corporation. It is as true of men of great ability as of those of lesser capacity.

"But the value of a liberal bonus system is not confined to the direct incentive offered to the particular recipients. There are collateral advantages. Chief among them is the fact that such a system attracts to the corporation men of exceptional ability.

"The hope of attaining an important position in the corporation is the best possible incentive to the younger men to work hard and thus win recognition and promotion. The results accomplished under the Bethlehem plan are the best evidence of the stimulating effect upon the entire organization of compensating effort on an incentive basis. The average administrative, selling, and general expense of Bethlehem, *including all bonuses*, in the six years ending December 31, 1929, was less than that of United State Steel Corp., or the Youngstown Sheet and Tube Company both in terms of cost per ton of steel sold and in relation to the percentage of gross sales."

R. W. Hebard, New York engineer and a stockholder in Bethlehem Steel, expresses his disagreement with Chair-Schwab thus: "I consider that the stockholders who propose to put a stop to the present bonus system, or at least modify it to one within reason, are on very solid ground and deserve the support of the other stockholders.

"It is preposterous to claim that any such reward as the company paid Mr. Grace and others is indispensable to obtaining 'unusual effort and ability on the part of our officers and employees.'

"If this were true, it would be a forcible indictment against the policy in this respect of hundreds of American corporations wherein only salaries are paid or salaries plus a small bonus. There is no convincing evidence at hand that Bethlehem is any more efficently managed than innumerable other companies." Hebard contends that the fairest method of rewarding effort is to permit employees to acquire stock in the company (such as in American Telephone & Telegraph) and then employ all their ability to make the stock valuable, or that the bonus be paid after depreciation and dividends on common stock, rather than before, as is now the case.

Farmers who are members of cooperative associatons managed and operated largely by employees will be interested in the question raised in the Bethlehem Company which has been and is being widely discussed. The same principles which govern the success or failure of large corporations apply to the operation of farm cooperatives and agricultural associations with perhaps one exception. In the latter there are men whose zeal and untiring effort is not prompted so much by the compensation they receive, which invariably is small, as by their belief in and devotion to the principle that agriculture as an industry has not had a square deal and is entitled to a better income for the service it renders.

—G. T.

February, 1931, was the largest February in three years for the Indianapolis Producers. A total of 853 carloads of live stock was handled, representing 35 per cent of the market receipts. This was an increase of 77 cars over February last year.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*

Before the General Assembly

SINCE our recent annual meeting, representatives of the Illinois Agricultural Association have been in Springfield each week conferring with state officials and members of the General Assembly regarding legislation affecting farmers' interests.

The reason the Association was not represented at the state capitol in January is obvious. The legislative program of the I. A. A. for 1931 was outlined in the resolutions adopted by the official delegates who represented the 60,000 members. Now the Association's legislative committee can confidently go to the legislators with that program knowing that the prestige of 60,000 organized farmers is behind it.

Agriculture is well represented at Springfield. Farm groups and organizations in Illinois are co-operating most harmoniously. This fact was well illustrated at the recent hearing before the House Committee on Efficiency and Economy when the Handy bill to restrict the use of oleomargarine and lard substitutes in state institutions was considered.

Joined in support of the bill were the I. A. A., Pure Milk Association, Prairie Farmer, the state Grange, the Illinois State Dairymen's Association and the Illinois Butter Manufacturers Association.

The rights of agriculture can be protected and its interests best served by such unity of action. Much good can be accomplished when those charged with responsibility forget personal credit and think only of results.

Mr. Legge Retires

ILLINOIS farmers have reason to be grateful to Alexander Legge, who recently retired as chairman of the Federal Farm Board. The qualities of frankness, courage, and sincerity he brought to the Farm Board inspired confidence and gave heart to farmers' efforts in helping themselves through co-operative action.

Mr. Legge did more for the co-operative cause than most people realize. Some of his blunt statements would have been dubbed socialistic and radical had they not come from a responsible man identified with big business and capitalistic enterprise.

During his two years of service he proved a worthy champion of agriculture before those who would deny the farmer the right to organize for the effective marketing of his own products.

Mr. Legge's successor, James C. Stone of Kentucky, has the courage and sincerity of his predecessor with the advantage of long years' experience in the co-operative marketing movement. Mr. Stone is favorably known to many Illinois farmers. He has announced that the policies followed during Mr. Legge's incumbency will be continued. Under the leadership of "Jim" Stone we have every confidence that the Agricultural Marketing Act will be applied for the best interests of the American farmer.

42 Suspended

SUSPENSION of 42 live stock commission companies at E. St. Louis by order of the Secretary of Agriculture should have a wholesome influence in maintaining similar public exchanges as free and open markets where farmers as well as others may do business unhampered by boycotts and restrictions.

The notorious case at the National Stock Yards is only another illustration of the belief held by certain middle men that they have a God-given right to handle the farmer's products for him; that the profits from trading in agricultural produce under no consideration should go to the farmer.

Dr. Cyril G. Hopkins preaching the gospel of Limestone, Legumes, and Permanent Soil Fertility on Poorland Farm, Tonti in Marion County. Who knows the approximate date of this picture?

"Intelligent permanent soil improvement on land that must be or will be farmed is both the safest and the most profitable investment open to the farmer and the landowner."

Dr. Cyril G. Hopkins.

LIMESTONE —the safe investment

DR. HOPKINS' gospel of limestone, legumes, and permanent soil fertility is just as applicable today as it was before the war. High yields, fertile soil, and low cost production is the formula for success on the farm in periods of low prices.

Limestone and legumes will pay your taxes—lift the mortgage. Now is a good time to order your requirements at your County Farm Bureau office.

Buy limestone from producers co-operating with your Farm Bureau and the Illinois Agricultural Association. This is your guarantee of quality at a discount to members.

◆◆ The I. A. A. Is a Service Organization ◆◆

Grain Producers Meet at Peoria

Alexander Legge, Farm Board Chairman, Is Unexpected Guest at Illinois Grain Corp. Annual Stockholders' Meeting

ALEXANDER LEGGE, chairman of the Farm Board, who happened to be in Peoria to address the Creve Coeur Club, was an unexpected guest at the annual meeting of the Illinois Grain Corporation held Monday, February 23, at the Jefferson Hotel.

Mr. Legge made a brief address to the 154 delegates, officers and visitors who represented all except three of the stockholder members.

G. C. Johnstone

The Farm Board chairman complimented the organization on its progress. "You're a live organization," he said. "Keep up your courage and carry on. You can't go down stream all the time. You have to go up some time and that's the difference between a dead fish and a live one. There are certain individuals and organizations who apparently believe they have a God-given right to handle your grain for you. I don't see it that way. Some of these people are actively working against you, so you have obstacles to overcome."

Commodity Control

Earl C. Smith, president of the I. A. A., in an interesting address devoted to the broader problems of building an effective co-operative marketing organization stressed the importance of volume control of farm commodities if the producer is to realize the full benefit of the co-operative system. He pointed out the weaknesses in the operation of co-operatives where a minority of the directors control the policies.

G. C. Johnstone of Bloomington, president of the corporation, in his annual address told of the progress of the organization since it was incorporated early in 1930.

"It was expected that much opposition would come from private interests which had been receiving the profits from marketing the farmers' grain," he said. "But no one anticipated that the most insidious and unfair propaganda would come from those who were supposed to be leaders in the farmers' elevator movement. However, today many more farmers are doing their own thinking, and are not being influenced by the propaganda of selfish subsidized interests.

"You already have a membership of 33 fully qualified co-operative farmers' elevators. The fact that our sales agency, the Mid-West Grain Corporation, already has handled a million and a quarter bushels of grain is a complete answer to the enemies of co-operation who are seeking to prevent farmers from developing their own marketing agencies in the terminals.

"The strength of our organization is based on the fact that farmers themselves are the real owners of this co-operative machinery set up to market and merchandise their grain. Farmers themselves own stock in the local elevators, and the local elevators in turn own stock of the regionals which in turn own and control the Farmers National Grain Corporation. Through these same local units grain producers will participate in the savings and profits from the state and national grain marketing agencies.

Producer at the Terminals

"Through the local, state and national co-operatives the producer has a voice at the terminal markets where prices are made and with increased volume will come bargaining power to stabilize prices, and obtain all that the market affords for his grain.

"While it is true that the development of the Illinois Grain Corporation was only made possible by the support given it by the Boards of Directors and stockholders of member elevators, who had a vision of the possibilities in collective action, I am satisfied that this unity of effort could never have been brought about without the services and finances made available by a strong general farm organization such as the Illinois Agricultural Association.

I. A. A. Aid Helpful

"It has contributed liberally of its finances, counsel, man power, and last but by no means least, its prestige. The high esteem in which the Illinois Agricultural Association is held in business, agricultural, and financial circles, and the success which other projects it has promoted have attained, have all been valuable assets to the Illinois Grain Corporation. I am also convinced that in order that co-operative efforts among farmers in the future maintain the stability they should, a strong general farm organization should be maintained, to work in harmony with them.

"A very small amount of the subscribed capital investment has been used in organization work, the Grain Marketing Department of the Illinois Agricultural Association having spent practically its entire allotment of funds for 1930 upon this project, and expects to do so throughout 1931.

Opportunity for Elevators

"Each day I am more convinced of the enlarged opportunity each member elevator has in securing reliable information which should be helpful in the conduct of its business affairs. In the past the only source of information was through privately-owned commission firms which were interested in your affairs only to the extent of the profit which they were able to secure from each bushel of grain they purchased. It made no difference whether the price was high or low.

"During the coming year by working together we should be able to profit by our past experiences. While constructive criticism is always welcomed by the board of directors it is each member's duty to be loyal to his own selling agency and not allow untruthful propaganda to circulate unchallenged. The coming year should show an increased membership and it is to the interest of every stockholder that this should be. It is only by the control of a large volume of grain that we can gain the end sought.

"The machinery is set up and functioning, we as grain producers will approach the objective of our plan just to the extent that interest and support is given to our own marketing agency, the Illinois Grain Corporation."

Other Speakers

Fred E. Ringham told of the success of many farmers' elevators and how careful audits were helping them to operate on a sound financial basis. Harrison Fahrnkopf, I. A. A. grain marketing director who has directed organization work among elevators, spoke briefly, modestly gave way to other speakers.

Charles P. Cummings, general manager of the Mid-West Grain Corporation, introduced the branch managers at St. Louis, Peoria, Jacksonville, Decatur, and Pontiac, discussed technical problems in selling grain.

The Farmers National Grain Corporation was represented by N. T. Nelson

of Chicago and Joseph Dickson of St. Louis.

Directors elected for 1931 are as follows:

Name	County
*G. C. Johnstone (president)	McLean
*J. C. Sailor (vice-president)	Iroquois
*E. E. Stevenson	LaSalle
*J. P. Stout	Sangamon
*A. R. Wright	Marshall
O. G. Anderson	Ford
B. L. Baird	Knox
Oscar Combrink	Greene
C. P. Griffiths	Hancock
Byron Miller	DeWitt
Ralph P. Mills	Vermilion
J. Fred Romine	Douglas
Charles Schmitt	Logan
E. H. Williams	Whiteside
Albert C. Kolmer	Monroe

*Member of Executive Committee.

Senate Committee Airs Milk Prices

At a recent hearing held by a special committee of the United States Senate charged with investigation of food costs, news dispatches state that Chairman Arthur Capper of Kansas introduced statistics to show that the Borden Milk Company, which distributes approximately 40 per cent of the retail milk and cream in Chicago, averaged profits of about 20 per cent on its common stock during the last five years.

"So certainly the Borden Company has been doing very well," said Senator Capper.

"That is a larger profit than the farmers who produce the milk get," commented Senator Frazier of North Dakota.

"It's about 10 times the profit the farmers in Kansas get," Capper replied.

The committee learned from the Bureau of Labor Statistics that the average price for milk of 51 cities is 13.3 cents a quart and the farmer is receiving an average price of a little less than 4.5 cents.

Dr. F. B. Walmsley, president of the Borden Farm Products Company, produced figures which he said showed the consumer had received the full benefit of reduced prices to the farmer. His company, he testified, reduced its price at Chicago from 14 to 13 cents a quart at the beginning of the year, and the farmer's price was cut .8 of a cent per quart.

A temporary embargo of not more than one year's duration on wheat and other farm products from foreign countries was recently urged before the House Ways and Means Committee by Chairman Alexander Legge.

A POLICY

WE must sow in order to reap. We must surround ourselves with good men and guide them wisely—letting them bear responsibility for detail, and giving them credit for results.

Confidence in ourselves and our policies is imperative. We must not merely have a stiff upper lip, but also a stiff backbone. We must believe in our plan and have the courage to stick to it, even when discouraged by temporary set-backs.

—William Feather.

Investments for Farmers

Farmers should never buy securities with high yields because such yields are a danger sign that something is wrong with the stock, Prof. F. A. Pearson of Cornell University recently told New York farmers in a talk on investments.

"Always investigate the company thoroughly before investing in its common stock," he said. "Generally, the farmer who has been sufficiently successful to save money for investment has been too busy to study the business conditions and the affairs of the company; therefore he should not invest in this type of security.

"Mortgages on farms, investments in local enterprises with which they are acquainted in their community should be bought in preference to investments in other communities," he continued.

"In general, the risk which goes with securities bearing a high yield should be carried by the man of much greater means than the farmer."

236 Attend Bureau President's Banquet

Two hundred and thirty-six County Farm Bureau presidents, county advisers, I. A. A. officers, directors and staff members attended the annual Farm Bureau presidents and farm advisers banquet the night of Wednesday, Jan. 28, Springfield.

The banquet, which as in past years was a closed session, brought out the largest representation of any held in recent years.

The dinner and entertainment held in the St. Nicholas Hotel was donated by the Springfield Chamber of Commerce. C. G. Kohler, chairman of the Convention Bureau, deserves much credit for its success.

The fellow who waits until conditions are just right before he starts, never starts.

50 Illinois Counties To Organize This Year

COUNTY Farm Bureaus in 50 Illinois counties will re-sign their members during 1931, states George E. Metzger, secretary and director of organization. Organization work is well in hand and adequate preparations have been made in the majority of counties for the coming membership drives.

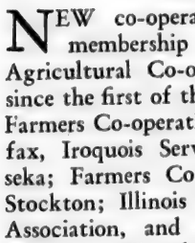
Commenting on the volunteer solicitor plan followed in Illinois, Metzger said, "The Illinois Farm Bureau member is maintaining his organization largely through his own efforts. The reason Illinois farmers have the greatest state farm organization in America is that they put more effort into its maintenance and its many activities and enterprises. They have great pride in the accomplishments of their organization which reflect the work they have done in years past through co-operative action."

Geo. Metzger

Membership in the I. A. A. passed the 60,000 mark the first of the year when 60,076 members were on the roll. By. Feb. 1 this number had crept up to 60,500. Membership in the state organization has been on the upgrade ever since 1926.

The annual meetings of County Farm Bureaus and various companies and organizations affiliated with the I. A. A. have had greater attendance during the past winter than any time in history. Illinois farmers appreciate the fact that during business depression they need their organization more than ever before. As a result the morale of the membership was never better than it is today. A substantial increase in membership is confidently expected.

Four new district organization managers will be employed by the I. A. A. within the next few weeks; one in southeastern Illinois, one in southwestern Illinois, and two in the northern part of the state.



At a recent meeting directors of the McLean County Farm Bureau passed a resolution urging that volunteer organization forces make every effort to break the state record for the most Farm Bureau members signed in a single day. Their drive will be held in May. They hope to sign 2,000 Farm Bureau members within a 24-hour period. Tazewell county now holds the record with 1,288 Farm Bureau members signed in a single day. LaSalle county is second with 973.

Auditing Association Adds Five New Members

Annual Report Shows Steady Progress with 54 New Members During 1930

NEW co-operatives added to the membership roll of the Illinois Agricultural Co-operatives Association since the first of the year are as follows: Farmers Co-operative Company of Colfax, Iroquois Servce Company, Watseka; Farmers Co-operative Exchange, Stockton; Illinois Farm Bureau Serum Association, and the Monroe Service Company, Waterloo.

These new members bring the total membership of the auditing association up to 290. Contracts from additional co-operatives now being organized are expected within the next few weeks.

Fred Ringham

Delegates at the recent annual meeting of the Association on Jan. 28 in Springfield voted unanimously to reorganize under the 1923 Co-operative Act of Illinois and to change the name from the Illinois Agricultural Co-operatives Association to the Illinois Agricultural Auditing Association. Incorporation papers will be filed shortly.

Officers Elected

Directors elected were A. J. Gillfillan, Watseka, president; Jesse L. Beery, Cerro Gordo, vice-president; Henry H. Parke, Genoa; Albert Heckle, Quincy; and Byron DeBord, Princeville. George E. Metzger and Robert A. Cowles were chosen secretary and treasurer respectively.

Action was taken to place all membership contracts on a one-year continuous contract under which any member will have the privilege of cancelling the contract on due notice, as provided in the by-laws, at the end of the year.

It was voted to refund that portion of the capital reserve amounting to approximately $1,800 (collected in 1924 and 1925) to member companies which have continued in good standing since that time. Hereafter the Association will refund each year the reserve collected in the fifth preceding year.

E. E. Crabtree, banker of Jacksonville, who was the principal speaker, emphasized the need for adequate audits in operating a business efficiently and in establishing credit with banks. Co-operatives must adopt the same business practices as successful private enterprises if they are to succeed, he said. He pointed to the fact that adequate capital funds are necessary to operate a co-operative successfully. He told the delegates that financial audits are the best means for keeping directors informed about the business of the enterprise they are directing.

54 New Members

In his annual report to the delegates, Manager Fred Ringham stated that the business investments of agriculture in Illinois continued to grow during 1930 in spite of the depression. Fifty-four new members came into the organization during the year, the largest acquisition of any year since the first membership campaign was conducted.

No promotional or field organization service was maintained, although a double-spread advertisement was published in the April, 1930, issue of the Illinois Agricultural Association RECORD. This advertisement was helpful in explaining to the Farm Bureau members and managers and directors of Illinois co-operatives the auditing service available through the Association.

Among the Membership

The membership of the Illinois Agricultural Co-operatives Association as of December 31, 1930, was made up of 76 farmers' elevators, 69 County Farm Bureaus, five County Home Bureaus, 25 live stock associations, 30 dairy and produce associations, 47 co-operative oil companies, 14 mutual insurance companies, five seed companies, six mercantile companies, and eight miscellaneous organizations—all hold membership on a co-operative basis. Charges for the auditing service are at cost, although a small percentage is added to each bill for reserve, which eventually will be returned to the members.

The cost analysis of 292 audits billed in 1930 reveal a total service charge of $32,615.64. Approximately $20,000 of this charge was for accountants' salaries, nearly $4,500 for traveling and field expense, and a little over $8,000 for office expense. To this amount was added $3,217.07 for capital reserve, making the total charge $35,832.71.

Total assets of the Association at the end of the year were listed at $21,609.20, total net worth $21,337.83. Net income for the year was $2,435.20.

(Continued from page 6)

them of the Association's wishes that this measure be passed.

The fact that the butter market has been demoralized in the last few months is due in part to the recent ruling of the Internal Revenue Bureau. If this ruling is allowed to stand it will mean that producers of butterfat throughout the United States will be subjected to the unrestricted competition of cheap, imported vegetable oils from foreign lands. It is estimated that the market for millions of pounds of butter will be taken away by butter substitutes made largely from and colored by imported oils.

Oil Companies Plan To Open About Apr. 1

The Monroe Service Company, one of the newer members of the Illinois Farm Supply Company, is erecting bulk station equipment and will be ready to handle petroleum products within the next few weeks. At the initial organization meeting Albert C. Kolmer was elected president, F. G. Oexner, secretary, and W. L. Meyer, treasurer. These men will serve along with Geo. Niebruegge, Wm. F. Schwarze, Hy Rosenberg, Jr., and Elmer Stumpf as directors until a permanent board is elected.

More than $15,000 was raised through the sale of preferred stock to furnish capital for necessary equipment and supplies. All of the stock was sold by volunteer solicitors and much of it came in as a result of an effective publicity campaign directed from the Farm Bureau office.

Whiteside county raised more than $25,000 at two meetings held within a period of 10 days. No farm to farm solicitation was necessary. More than 150 who came out to the initial organization meeting pledged over $11,500. At a meeting the following week additional subscriptions increased the capital stock outstanding to more than $25,000.

The Whiteside Service Company is expected to be in operation shortly after April 1.

Urge Uniform Banking Laws

Uniform banking laws for all the states were recommended by many prominent bankers who appeared recently before the sub-committee of the Senate Banking and Currency Committee.

Melvin C. Traylor of Chicago stated that he would like to see a uniform law developed with minimum capitalization as one of its features. He opposed the idea of all banks belonging to a national system and considered it unnecessary for all banks to belong to the federal reserve system. Mr. Traylor would permit branch banking within the state, but for the first five years would limit it to the county.

The Farmers Union Live Stock Commission Company of South St. Paul, Minn., was recently admitted to membership in the National Live Stock Marketing Association. St. Paul is the last of the large markets to be served by a member of the national co-operative.

In 1930 the St. Paul co-operative handled more than 8,300 carloads of live stock.

Illinois shipping association managers who increased their business to the Indianapolis Producers during the year 1930 over 1929 are: Carl Smith, Champaign; Frank Kettering, Danville; L. R. Rardin, Rardin; C. M. Weller, Tuscola; W. Lester Ramp, Newman; Orville Wood, Isabel; Ivan Clouse, Chrisman; Albert Libkie, West Salem; Henry Volle, Mt. Pulaski; Fred M. Stoll, Beason; W. E. Leischner, Deland; William Fulk, Decatur and Cerro Gordo; D. H. King, Olney; H. H. Richards, Parkersburg; F. H. Galster, Tower Hill.

Fred Gumm, manager of the Paris, Illinois, Shipping Association led all others again for the year 1930 with a total of 140 cars consigned to the Indianapolis Producers. W. J. Richey, Palestine, was second with 84 cars and Carl Smith of the Champaign County Live Stock Marketing Association third with 80 cars; C. M. Weller, Tuscola, fourth with 76 cars; W. H. Honnold, Kansas, fifth with 71 cars; Charles Ekiss, Bethany, sixth with 68 cars, and E. C. Cavins, Charleston, seventh with 67 cars.

Bill Kurtz, rounding out eight years as manager of the Tabor Shipping Association in Dewitt county, reports that he has handled over a million dollars worth of live stock during that time. In 1930 he shipped 62 cars to the Indianapolis Producers and 3 cars of lambs to Chicago. The membership, now 220, nearly doubled during the period. Before Kurtz became manager, the association never shipped over 23 cars, but shipments since have ranged from 56 to 74 cars per year. He keeps a close check on the stock fed by his members and makes it a point to get in touch with them several weeks before they are ready to ship.

Farm price levels in mid-January were the lowest since January, 1912.

Oil Company Returns

The Marshall-Putnam Oil Company, state, closed its most successful year on August 31 with 1,528 customers. In addition to the payment of 8 per cent on preferred stock, the board of directors declared the regular 8 per cent annual patronage dividend and two special refunds of 6 per cent each to be paid at some future date. The 851 Farm Bureau members who have patronized the company during the past fiscal year will receive $26,978.70. This amount, together with the regular patronage refunds declared annually since the organization was established four years ago makes a total of $58,812.68 returned in cash to Farm Bureau patrons.

The McDonough Service Company, after a few months' operation, has declared an 8 per cent refund. Some 425 Farm Bureau members will share in this distribution of earnings.

Ninety-five per cent of the paid up Farm Bureau members in Tazewell County patronized their own local service company during the first eight months of operation. Approximately one thousand Farm Bureau members will share in the 8 per cent patronage refund declared, payable at once, and the 8 per cent special refund which will be payable at a later date.

McLean County Service Company, one of the charter members of Illinois Farm Supply Company, closed a most successful year November 30. This organization has 2,700 patrons, 1,588 of which are Farm Bureau members who participated in the distribution of $62,000.00. In addition to the regular 10 per cent annual patronage refund another 10 per cent was declared on a patronage basis. Four hundred twenty-four Farm Bureau members received more than $50 each, 95 more than $100 each, 12 more than $200 each, and two over $300 each.

The Menard County Farmers Supply Company and the Morgan Farmers Oil Company each declared a 5 per cent patronage refund to all Farm Bureau members recently. The Montgomery County Farmers Oil Company paid 5 per cent patronage refund on six months' business, ending August 31.

Ill. Agr. Mutual Ins. Co.

I hereby acknowledge receipt of your check for $17.60 covering accidental collision occurring December 19, 1930.

May I say that your prompt and courteous attention to the matter in hand has completely sold me on Farm Bureau insurance.

Clara L. Daily,
Wayne County, Ill.

Accident notice received Dec. 23, 1930. Check sent out Dec. 29, 1930.

Hunting and Fishing Measure Fails to Carry

Closed seasons on all game in Illinois will have to be established unless the 1931 session of the general assembly submits to the people a constructive program for sanctuaries and breeding grounds and the people approve such a program at the 1932 election, C. F. Mansfield, secretary of the Uniform Conservation Laws Commission, predicted in a recent statement.

"The greatly reduced supply of all kinds of game in Illinois," Mansfield said, "cannot much longer withstand the inroads of hawks, owls and other predatory birds and animals, as well as the kill by the ever-increasing army of hunters unless a definite program is adopted for the establishment of closed sanctuaries in every county, such as was planned under the bond issue submitted to the voters at the last election," he said.

"The fact that the total vote on this proposition was 150,000 greater than on any other of the eight propositions submitted to the people at the November election shows the tremendous interest in conservation that is being awakened in Illinois today. While this question received a majority of the votes cast upon it, it failed to receive a majority of the votes cast for members of the legislature."

Knox County Annual Passes Resolutions

Resolutions passed at the recent annual meeting of the Knox County Farm Bureau (1,360 members).

1. Pledged co-operation and support to the I. A. A. and A. F. B. F. in their efforts to improve the economic position of farmers;
2. Approved of the Marketing Act, and the Farm Board "for their efforts to build securely on a firm foundation and accomplish something of lasting value to agriculture";
3. Approved of the present district organization plan; suggested better co-ordination "which can only be done by the employment of a state organization director on full time";
4. Favored a fair and equitable taxing system through a state income tax;
5. Opposed attitude of cities in Illinois asking for portion of gas tax for city improvements, commended editorial in Register-Mail.

A little nonsense now and then will undo the best of men.

Red Top Exchange Seeks More Members

Manager Oelze Makes Known Plans for Great Service to Southern Illinois Farmers.

A MEMBERSHIP campaign throughout the red top growing area of southern Illinois will be inaugurated within the near future, according to Manager E. J. Oelze, who made known his and the directors' plans while conferring at the I. A. A. offices recently.

"It is our purpose," said Mr. Oelze, "to bring the service of the red top seed co-operative to other growers in the territory. We have an unusual opportunity before us. Within a comparatively small territory embracing such counties as Cumberland, Jasper, Effingham, Fayette, Bond, Marion, Clay, Richland, Lawrence, Edwards, Wayne, Jefferson, Clinton, Washington, Franklin, Hamilton, White, Williamson and Crawford, approximately 90 per cent of the red top seed of the world is produced. Through the Exchange we intend to organize the bargaining power of the growers in this area and merchandise their product in an orderly manner so that they will get all that the market affords.

No False Promises

"We are not going to promise anything impossible of accomplishment. We do not promise to fix prices, nor to sell for more than the market affords. We do propose to avoid market gluts and prevent wide fluctuations and unnecessary spreads in the price received by the producer and that paid by the consumer. I believe this can be done successfully by concentration of volume through one large efficient co-operative organization such as ours.

Over 2,000 Members

"The fact that we now have more than 2,000 members and that we successfully merchandised some 30,000 pounds of fancy red top seed last season at favorable prices, indicates that farmers of southern Illinois are backing this project. We have the support of the Federal Farm Board, the Intermediate Credit Bank of St. Louis, the Illinois Agricultural Association, and the County Farm Bureaus throughout the territory. I believe we have enough intelligence in our ranks to perform a satisfactory money-saving service, and we appeal to the red top growers not yet affiliated with us to come in and help realize on the opportunities made possible through organization."

The Egyptian Seed Growers' Exchange is now having its accounts audited regularly by the Illinois Agricultural Co-Operatives' Association of Chicago. A policy has been adopted of keeping the members informed at all times about the condition of the organization, financially and otherwise.

The Seed Growers' Exchange has an authorized capital stock of $250,000, $25 par value.

New Plant

The co-operative recently erected a modern 60x90 ft. steel and concrete warehouse containing strictly up-to-date offices and directors' room. The old warehouse, which contains the seed cleaning equipment, will be used by the feed grinding and mixing department of the Egyptian Service Company, for which the latter will pay rent to the Exchange.

The new services all of which will be under the management of Mr. Oelze, are expected to have a favorable influence on the future of the Seed Exchange.

N. Y. College Advises Audits for Co-Ops.

THE charge made for auditing a firm's books may seem high, but so is insurance, says F. A. Harper of the New York state college of agriculture in warning officers of farm co-operatives of the dangers that may come from lack of an audit. Too often the audit is done by an auditing committee of members who are likely to be incapable of auditing, and it is little more than signing the manager's report, he says.

"Auditing is necessary to local associations as a protection against dishonesty or carelessness. Carelessness is the most subtle and dangerous of the two and probably causes far more loss to co-operatives than downright dishonesty—but that makes the loss no less costly. The audit serves to protect the members against dishonest management or officials and serves also to protect honest management and officials against suspicions of dishonesty. Both members and officials are served.

"A competent auditor does more than make an annual statement. He can advise as to improving accounting methods, the financial position, the credit policy, and point out weakness in the operation of the co-operative."

The Illinois Agricultural Co-Operatives Ass'n. specializes in auditing accounts for co-operative associations on an "at cost" basis. If your local co-operative doesn't have a competent audit regularly find out why. The I. A. C. A. service safeguards the investments of farmer stockholders in its member co-ops.

Secy. Hyde's Annual Report Is Delivered

Urges Land Utilization Policy Be Adopted and Production Adjustment.

PRODUCTION adjustments and a more rapid development of a national land utilization policy are two remedies for the agricultural depression, Secretary Hyde declared in his annual report to President Hoover. Secretary Hyde also urged the necessity of organizing agriculture into effective co-operative groups for collective action, of changing the present tax system to lighten the farmers' tax burden, and of improving rural credit conditions.

Income Down

Gross farm income for 1930 will probably be about $9,950,000,000, or 16 per cent less than for 1929, Secretary Hyde reported. After noting the reduced world demand for farm products, he emphasized the importance of production adjustments as one factor in improving the relationship of the agricultural industry as a whole with its market opportunities.

He advocates acreage reduction, states that dumping of surpluses abroad is not feasible, that the indefinite storing of surpluses tends to prevent, rather than to cause, a rise of prices, that tariff duties are not effective on commodities produced largely for export, and that subsidies would increase rather than restrain production.

Cut High Cost Acres

He declares it does not follow because some farmers can produce at a lower cost than others, that the low cost farmers should do nothing to prevent overproduction. Wise acreage adjustments, he added, can help to decrease the unit cost as well as the volume of production. He suggests the elimination of higher cost acres, and the concentration of remaining production on the more productive land.

"Commercial racketeering" was the term applied by Governor Christianson of Minnesota to the practice which he said was disclosed "in an unguarded moment" by a representative of the chain stores, of offering standard, trademarked merchandise at cost or less, and recouping losses by marking up other lines.

The concentration of ownership and control of business, "unprecedented in the history of the world," bodes no good to the country, he said.

A lot of good times are ruined by excessive anticipation.

Old Line Legal Reserve Protection at Low Net Cost

42 Commission Companies Suspended at E. St. Louis

Forty-two commission companies, located at St. Louis National Stock Yards, Ill., were "suspended from registration" February 25 by order of C. F. Marvin, acting Secretary of Agriculture, as a result of evidence showing violation of the packers and stockyards act which the U. S. Department of Agriculture administers.

A hearing resulted in testimony that the commission companies, in question, refused to sell or buy live stock or have any business relations with two other market organizations. The suspension becomes effective March 16 and continues for a period of 90 days, except that the Secretary of Agriculture may modify or set aside the provisions of the order if the suspended firms cease the discriminatory practices.

The decision of the acting secretary, based on voluminous testimony, stated in part, "The evidence in this case clearly discloses a general widespread attempt to deny the advantages of an open competitive market to an agent for the farmer or shipper and to an order buying company as agent for various members of the packing industry. This is a grave injustice to their principals. . . . The record discloses nothing to excuse the conduct and actions of the respondents toward the National Order Buying Company and the Producers Live Stock Commission Association, legally registered and with the legal right to operate at the stock yards. The establishment of an open competitive market is one of the prime essentials which the packers and stock yards act of 1921 was designed to accomplish and perpetuate."

In the course of the hearing, during which more than 2,800 pages of testimony were taken, the evidence dealt with the various ramifications of live stock marketing including the provisions of the agricultural marketing act which is administered by the Federal Farm Board. Referring to objections on the part of the old-line commission firms to Farm Board policies, the decision stated, "However much objection the respondents or any of them may have to the agricultural marketing act or the policies of the Federal Farm Board, the same cannot constitute any excuse or justification to a boycott or unjust discrimination or unfair practice under the packers and stock yards act."

The Mid-West Grain Corporation handled 135 carloads of grain, or more than 200,000 bu. in the week ending Feb. 28.

Soybean Ass'n. Officers

The following officers were recently elected by the new board of directors of the Soybean Marketing Association: John W. Armstrong, president; Dwight Hart, vice-president; W. G. McCormick, secretary; R. A. Cowles, treasurer; J. H. Lloyd, assistant secretary.

The Board named the following members as its Executive Committee: John W. Armstrong, Dwight Hart, W. G. McCormick, Samuel Sorrells, W. J. Sandusky.

Chicago Producers Do Big Business

During 1930 the Chicago Producers handled about $30,000,000 worth of live stock, 60 per cent of which came from Illinois farmers.

The National Live Stock Marketing Association last year handled approximately $175,000,000 worth of live stock.

Dixon-Kewanee High Line Case Is Settled

Rates of compensation to farmers for land traversed by the Dixon-Kewanee high line of the Super Power Company were agreed upon at a conference between officials of the Illinois Agricultural Association, the utility company, and the Farm Bureau land owners committee, held in the I. A. A. offices on March 6.

Twenty-five farms in Lee and Whiteside counties were affected by the settlement. This case has been in controversy more than a year. Both the interests of the utilities and the land owners were served by settling out of court.

Vermilion Service Co.

Six thousand dollars have been subscribed by Vermilion County Farm Bureau members for a co-operative oil company. The new organization will be known as the Vermilion County Service Company. When $20,000 is raised, the company will buy equipment and start operating.

Crawford-Jasper Shipping Association (Joe Brown, manager) held its annual meeting at Oblong February 26. Manager Scott Meiks of Indianapolis and Ray Miller of the I. A. A. were the speakers.

Uncle Ab says there is one hard-working committee from which every member should resign—and that's the Rumor Committee.

B. F. Beach of Michigan Speaker Peoria Meeting

FLUID milk producers can, if they work together within any marketing area, exercise more control over their marketing than almost any other group of farmers, B. F. Beach. manager of the Michigan Milk Producers Association, told members of the Illinois Milk Producers at their recent annual meeting in Peoria.

Mr. Beach stated that the depressed automobile industry in southeastern Michigan resulted in a decline of 25 per cent in local milk consumption in and about Detroit. At Flint the market suffered a 50 per cent decrease in milk consumption.

He believes that the base and surplus plan of milk prices is the best yet devised for controlled production and seasonal surpluses. The educational value of the plan is important because every member knows that his average price per 100 pounds declines when he increases production where there already is a surplus, he said.

Beach expressed the view that lack of consumer buying power is the principal reason for low farm prices. The Michigan Milk Producers has been operating about 15 years. The speaker stated that the Association has overcome a condition in which farmers formerly underbid each other in the market and reaped lower prices. "Through organized effort they are now working together using their bargaining power to obtain a fair price," he said.

$110,000,000 Loaned On Farm Crops

The 12 federal intermediate credit banks during 1930 loaned approximately $110,000,000 to farm commodity marketing associations. The law specifies that not more than 75 per cent of the value of the products in storage can be loaned.

The intermediate credit banks are further protected by the privilege of calling for a reduction of their loans should the market price reach the level where the loan exceeds 75 per cent of the value of the crop in storage.

Edgar county, Illinois, led all others in consignments to the Producers during February. A total of 24 cars received represented an increase of eight cars over February a year ago.

Vermilion county was the next largest consignor with a total of 20 cars, representing an increase of 15 cars over February, 1930. Other counties showing increases were Effingham and Iroquois.

"Organize to Get What You Want," Says Grimes

Tells Story of Co-Operation Among Independent Grocers

CHAIN organizations which mobilized the buying power of millions of people have changed the farmers' market from a seller's to a buyer's market, J. Frank Grimes, Chicago, president of the Independent Grocers' Alliance of America, said in addressing the annual meeting of the I. A. A. at Springfield, Friday morning, January 30. Mr. Grimes spoke before a capacity audience of close to 1,000 people in the Majestic Theatre.

"The unorganized group is an easy victim to organized business," he said. "The only way the farmer or the small business man can meet modern conditions is through powerful organization. Through organization alone you can demand and get a fair price for your products."

Mr. Grimes pointed out that the large chain organizations are constantly hammering down prices and wages. "I wonder if it is a coincidence," he said, "that the agricultural depression with low farm prices came simultaneously with the growth of chain stores. Profit in the rural community is necessary if it is to grow, and profit is being taken from rural communities to the big cities through chain organizations. Our organization," he continued, "has adopted a policy of co-operating with producers' organizations.

Less Food Consumed

Mr. Grimes spoke of the changing trends in food consumption, called attention to the fact that many luxuries such as automobiles, radios, as well as college educations for children compete with food in the family budget. He stated that the housewife of today is the cleverest shopper the world has ever seen, that women save on the food bill that they may have more money to spend for other things. He presented figures showing that average consumption of food is declining because of the slim figure fad followed by many women, the desire aroused for luxuries through advertising, less food required by workers because machinery is doing much of the heavy work formerly done by men.

"One chain organization boasted that it saved $350,000,000 to consumers in one year," he said. "But at the same time it took $350,000,000 from the income of the producer and $300,000,000 more from employees and workers by constantly pounding down prices to the grower and wages to the employee.

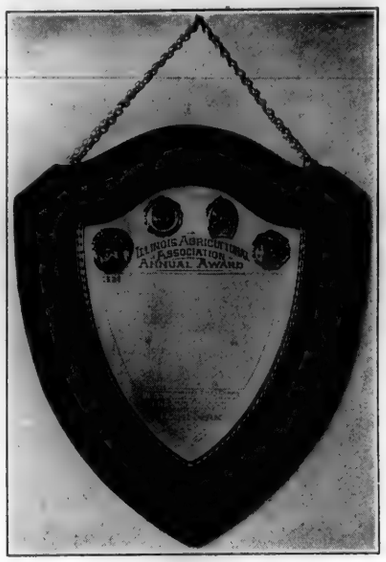
"Farmers need a powerful organization to advertise their efficiency, to demand for the grower a fair share of the national income. You can get anything you want," he continued, "if you organize right to get it.

"Probably the greatest difficulty that confronts independent business, and co-operation among farmers' local business associations, is the peculiar individualistic ideas and ideals that have developed around the individual business," he said. "Men who own their own small business somehow seem to inherently resent taking suggestions and following the example of anyone else. How often we hear the statement made by an individual: 'I own my own business and I am going to run it to suit myself. If I go broke it's nobody's business but my own.' And it is because of these impractical and peculiar ideas that the independent businesses of this country have failed to use the enormous power that lies within their very grasp.

Not Good Business

"It is only within the last four or five years that definite steps have been taken toward harnessing this power and combining together great numbers of individuals to do things that could not possibly be done by the individual working alone. The agitation looking to the organization of independents in business is at last beginning to have its affect. Men are beginning to see that it is not good business to be so independent in their own thought that they refuse to co-operate with their fellow men and go down into bankruptcy and oblivion as far as their business is concerned. They are now beginning to learn that it is far better to co-operate with others within their industry thereby harnessing its power, bringing to themselves greater advantages, perpetuating their own business, and producing greater net profit.

"It is this unused power of the independent in business that is at last beginning to awaken consciousness of the enormous possibility that lies within their hands if they will utilize it.



"I am very happy to state that in the grocery business this awakening has taken on definite shape and at last the grocers of this country who have been considered the weakest type of independent are now enjoying benefits and advantages equal or surpassing that of their great powerful competitors. They have awakened to what they can do when they play ball together.

Had a Weakness

"For years efforts were made to bring them together and harness this power. Associations were formed. Various buying exchanges and advertising clubs came into being, all of which had one fundamental unsolvable weakness. They lacked directing organization powerful enough to draw to itself keen minds, the finest talent, best brains, and to evolve a program complete in every detail that would match or excel that of the strongest competition.

"In the grocery business disaster seemed to be overtaking the independent. This new competition which puzzled the independent began to get stronger and stronger. Its growth was very rapid. Its success was staggering. The profits it made drew unlimited financial support. It expanded with great rapidity and completely overwhelmed the individual. It looked as though, as far as the grocery business was concerned, any fight the independent put up would be hopeless and useless.

"About four and one-half years ago, after much experimenting and after repeated failure, there came into being what is now known as the Independent Grocers' Alliance of America (I. G. A.). In the early experimental days the grave mistake was made of leaving to the individual retailer and wholesaler the complete execution of whatever plans were formulated.

I. A. A. SHIELD AT URBANA

Karl Adams of Moweaqua, Shelby county, was the high man on the Illinois livestock judging team in the last college judging contest at the International Livestock Exposition, Chicago.

Adams will have his name inscribed on the shield donated by the Illinois Agricultural Association which hangs in the New Agricultural building in Urbana.

Twenty-three teams competed in the contest. Illinois placed 10th. The name of the high man on each Illinois team will be placed on the shield annually.

42 Commission Companies Suspended at E. St. Louis

Forty-two commission companies, located at St. Louis National Stock Yards, Ill., were "suspended from registration" February 25 by order of C. F. Marvin, acting Secretary of Agriculture, as a result of evidence showing violation of the packers and stockyards act which the U. S. Department of Agriculture administers.

A hearing resulted in testimony that the commission companies, in question, refused to sell or buy live stock or have any business relations with two other market organizations. The suspension becomes effective March 16 and continues for a period of 90 days, except that the Secretary of Agriculture may modify or set aside the provisions of the order if the suspended firms cease the discriminatory practices.

"It is this unused power of the independent in business that is at last beginning to awaken consciousness of the enormous possibility that lies within their hands if they will utilize it.

"I am very happy to state that in the grocery business this awakening has taken on definite shape and at last the grocers of this country who have been considered the weakest type of independent are now enjoying benefits and advantages equal or surpassing that of their great powerful competitors. They have awakened to what they can do when they play ball together.

Had a Weakness

"For years efforts were made to bring them together and harness this power. Associations were formed. Various buying exchanges and advertising clubs came into being, all of which had one fundamental unsolvable weakness. They lacked directing organization powerful enough to draw to itself keen minds, the finest talent, best brains, and to evolve a program complete in every detail that would match or excel that of the strongest competition.

"In the grocery business disaster seemed to be overtaking the independent. This new competition which puzzled the independent began to get stronger and stronger. Its growth was very rapid. Its success was staggering. The profits it made drew unlimited financial support. It expanded with great rapidity and completely overwhelmed the individual. It looked as though, as far as the grocery business was concerned, any fight the independent put up would be hopeless and useless.

"About four and one-half years ago, after much experimenting and after repeated failure, there came into being what is now known as the Independent Grocers' Alliance of America (I. G. A.). In the early experimental days the grave mistake was made of leaving to the individual retailer and wholesaler the complete execution of whatever plans were formulated.

"In early days plans were presented but each individual member could co-operate to any degree he saw fit. Plans were placed before them and thoroughly explained and co-operation urged. Some would—some 100 per cent—some 50 per cent—some 25 per cent—some 5 per cent—and some no per cent. It was soon found if any plan was to succeed it could only be done by having all members agree to follow in every detail all the plans formulated by headquarters organization—and failing to follow such plans they automatically excluded themselves from the benefits and could not remain a member. Once the idea was established of having a powerful headquarters organization which all would respect and whose plans would be put into effect 100 per cent, success became apparent immediately.

"By actually pooling their buying, in the truest sense of the word, they suddenly found that from the point of buying they had equal advantage with their most powerful competitor. When it came to the identification of their stores and the type of store that would meet with public favor, they discovered that by having complete identification on a uniform basis throughout the country—both inside and outside the store—they immediately began to secure advantages and benefits equal to that of their strongest competitor in this respect. People began to say:

" 'Why, Frank Smith must have great buying power—I see stores like his everywhere.'

Advertising Helps

"Soon powerful advertising was engaged in. No single individual retailer could possibly hope to present his case to the public in a strong enough manner with constant continuance that would eventually work its way into the consciousness of the people, but banded together it was possible with small income from each one to begin that powerful advertising which today stands as a miracle in our modern merchandising. Further, because of this co-operation of thousands of independent merchants funds are available in such amounts that full page advertising in national magazines is now being engaged in to top off the complete advertising program.

"This organization has grown until last year sales of independent retailers in the I. G. A. exceeded five hundred million dollars. It is operating in 37 states with thousands of retailers following most carefully all the plans worked out for their benefit. Increase in membership is growing at a rate that is hard to believe.

"Advertising is conducted in over 350 newspapers weekly. Every member mails out a miniature newspaper containing specials, new ideas on foods for the family's use and household hints, recipes, and other matters of interest to the consumers—and the circulation of this medium, which is issued twice a month, is approximately two and one-half million copies per issue.

Uniform Sales Methods

"Window display experts are engaged at headquarters to work out displays. These are photographed, reproduced and sent to every member, and windows are changed every week. Many have marveled that in a small store they could engage such expert window trimming service, but it is easy when great numbers are co-operating together. Posters, price tags, and every conceivable device that is necessary for the store in present-day merchandising, are furnished."

In closing, Mr. Grimes told his audience that farmers' local co-operative marketing enterprises were comparable to the local independent grocers'; that their hope for gaining control of their products lay in merging their resources and strength through larger centralized organizations which could do for them what they never could do working alone.

By L. A. "Larry" Williams

Women in Life Insurance

MRS. MIES of Livingston county, president of the Illinois Home Bureau Federation, read a very interesting resolution at the annual meeting which has caused me to give some thought to the subject of life insurance for women. Although our agents have never solicited farmers' wives particularly, their selling nevertheless has been consistent so far as that sex is concerned.

On the farm a wife is really a partner with her husband in the farming business. It, therefore, should be considered as a partnership affair. Partnerships usually protect each other. In the event of the death of one partner, the other is left the insurance to help maintain the business or to clear up the estate without too great a loss.

I have always maintained that the man should carry the greater proportion of insurance on his own life. I feel that it would be more difficult for the woman to get along after the death of the husband than it would be for the man to get along after the death of the wife even though there be children.

This, however, is not exactly true in farming. There is a greater need of the farm wife to protect the interests of her family with insurance than there is for the city wife. The standard of living in many farm homes is noticeably lowered upon the death of the wife and mother. Proper care and schooling require funds. Many of the finer things in life are overlooked because of the need for money and it is reasonable to assume that the plans of a mother for her children will at her death have to give way to the more important plans of making the farm go even to the sacrifice of proper education.

A woman may take a policy and specify in that contract that in the event of her death so much a month shall be paid to her children for the purpose of education. By this method she can see to it, even after her death, that some of her dreams and hopes are realized. A portion of her insurance may be made payable to her husband. The proper insurance program will give her a greater feeling of satisfaction as well as a greater confidence in the partnership which is too frequently a real partnership so far as work is concerned but not when the cash returns come in. On many farms, however, the woman spends the greater share of the money; she is the shopper, the planner, and the budget maker.

I am grateful indeed to the women of the past convention for their resolution and I am hoping that Home Bureaus will work with the General Agents in trying to bring about a more successful distribution of information on the matter of life insurance. I am suggesting to General Agents that they set aside two weeks or a month out of the year for the purpose of specifically bringing the advantages of life insurance before women. It is my further suggestion that they appoint sub-agents for that two weeks' period during which every policy written will bring a commission to the Home Bureau. Also that these women agents solicit only women and children, and that the General Agent and all regular agents co-operate during that two weeks' period to make possible the greatest success.

Illinois Agricultural Mutual Ins. Co.

"Your check for $66.48 in re my claim received January 11 and I am acknowledging same in the spirit of a satisfied policyholder and happy in the knowledge that the truth prevailed regardless of the strange attitude of the bus driver. Strange to relate that we never carried any insurance on cars owned by us previously and never had an accident of account. However, I will be doubly cautious in future and hereby tender my thanks for your business-like and courteous treatment."

The farmer employer is subject to the common law rule of liability for injuries to his employees.

Are You Protected Against Farm Labor Accidents?

THE National Safety Council reports that farm accidents are more numerous than factory and industrial accidents for the number of men employed..

A team may run away . . . fly wheels, belts, and moving parts catch clothing, injure and maim fingers and limbs . . . a fall may break an arm or leg . . . nails, pitchfork, and other sharp instruments may lead to blood poisoning and lockjaw. Would you be protected against liability if one of your men were so injured?

Following are a few of the accidents reported by Farm Bureau members who have taken advantage of Illinois Agricultural Mutual low cost employers' liability insurance:

MAR.-PUT. CO.—Hired man slipped on wagon wheel and fell on edge of wagon box injuring side.

HENRY CO.—Fork slipped out of bale of straw, emloyee fell through hole in mow, dislocating collar bone.

RICHLAND CO.—Employee's hand caught between two heavy timbers on a truck.

DE WITT CO.—Hired man caught finger between belt and pulley on gas engine, seriously injuring hand.

McLEAN CO.—Team of mules ran away, seriously injuring hired man.

FULTON CO.—Employee cranking truck—result, broken right arm.

Other injuries reported resulted from: Kick by horse, ladder falling, sudden starting of team, wagon running over feet, starting pump engine, key press flew out while starting combine, ensilage cutter injured hand, 14 foot fall from hay mow, fingers caught in gears, etc.

EMPLOYERS' liability insurance also covers accidents to employees in threshing rings, corn shelling, hay baling, and other group operations on the farm. The policy provides insurance up to $5,000 for one person, and $10,000 for any one accident, pays court costs, lawyers' fees, hospital bills, medical attention, etc.

Since the Company started, cost has averaged only $8.54 a year for one employee. The service is limited to Farm Bureau members.

Legislation—57th General Assembly

A Review of Bills Your Organization Is Supporting at Springfield

TAX revision based on ability to pay, clarification and improvement of our state co-operative laws, needed amendments to the motor vehicle act, and a series of minor bills to correct injustices or aid the farmer in one way or another comprise the legislation sponsored or supported by the Illinois Agricultural Association in the 57th General Assembly of Illinois.

The bill of outstanding importance to Illinois farmers and property owners is Senate bill 138 (Lantz) which provides for a state income tax. The companion bills, 164-170 inclusive, and S. B. 200 provide for the administration of the income tax and for using the revenue so derived to replace state taxes now levied on property.

The state income tax bill imposes a tax upon the net income of all residents of the state including fiduciaries for persons or estates, also income of non-residents derived from sources within Illinois.

Only Personal Incomes

The bill does not apply to corporations or partnerships as such, the income from which is taxed only after it reaches the individual.

All ordinary business expenses including general taxes on property may be deducted from gross income in computing the amount of net income. No personal or living expenses are deductible.

Personal exemptions are as follows: $1,000 for each single person, $2,000 for each married couple or head of a family, and $500 for each child under 18 years of age or other dependent person.

Killing the Goose

ABOUT three-fourths of all net income produced or received in Illinois is now derived from personal industry, which is wholly exempt from taxation under the present taxing system.

Only about one-fourth of all net income is derived from the ownership of property, which is still compelled to assume the entire burden of general property taxes.

The burden on real estate and easily visible personal property is made much heavier by the almost complete evasion of taxes by all intangible property except bank stock.

The situation is gradually growing worse because of the increasing percentage of net income derived from personal industry and tax-evading property.

The only way to reach with direct taxes the majority of our population which is now virtually exempt therefrom is through an income tax.

"Every legitimate tax is either directly or indirectly a tax on income," says Prof. John E. Brindley of Iowa State College. "By this we mean that it is paid out of the income of the taxpayer. When the tax is greater than the income, the balance must be paid out of capital. In this way we kill the goose that lays the golden egg of future tax paying ability. In a word, 'we dry up the source of future income,' to use the well known statement of Adam Smith written in 1776."

The moderate tax rates after deductions and personal exemptions are applied on net income as follows:

1% of the first $2,000 of tax. income,
2% of the next $3,000 of tax. income,
3% of the next $5,000 of tax. income,
4% of the next $5,000 of tax. income,
5% of the next $10,000 of tax. income,
and
6 per cent of all taxable income in excess of $25,000.

Examples are given on page 4 showing how personal exemptions are deducted from different amounts of net income and how the several tax rates are applied to different amounts of *taxable* net income in computing the amount of income tax in each case.

Not an Additional Tax

Taxes collected under this act will be paid into the General Revenue Fund of the state to replace the tax on property levied for all state purposes except for payment of interest and retirement of the principal of the Waterway Bonds and Soldiers' Compensation Bonds.

The bill provides for administration by a Department of Income Taxation, co-ordinated with other departments under the Civil Administrative Code of the state; for the requirement of information from employers and others as to any taxable sums amounting to $700 or more paid to any individual in any taxable year; for exchange of information with the Commissioner of Internal Revenue of the United States or administrative officers of income taxes in other states; for suit by the Attorney General for the collection of taxes; and for prosecution by the Attorney General for fraud.

The bill provides that the act shall be in effect January 1, 1932, and that the first returns shall be made and taxes paid April 15, 1933, on net income received in the calendar year 1932 or in any fiscal year ending in 1932. Any taxpayer using a fiscal year is required to make returns and to pay taxes on the 15th of the fourth month following the close of his fiscal year.

Companion Bills

The companion bills accompanying Senate bill 138 are necessary to insure that the net proceeds of the income tax shall not be *"just another tax"* in addition to present taxes on property, but shall be substituted for and reduce general property taxes for state purposes.

This is accomplished by bills repealing acts or portions of acts providing for the levy and collection of taxes on

Examples Showing the Operation of the State Income Tax

I. Single person with no dependents. Exemptions and tax rates on three different amounts of net income are shown in the following table:

	A	B	C
Net income	$1,000	$2,000	$10,000
Exemption	1,000	1,000	1,000
Net taxable income	None	$1,000	$ 9,000
taxable at—			
1 per cent on first $2,000	None	$ 10 (on $1,000)	$ 20
2 per cent on next $3,000	None	None	60
3 per cent on next $5,000	None	None	120 (on $4,000)
Total income tax	None	$ 10	$ 200

II. Married couple with three children under 18 years or other dependents. Exemptions and tax rates on three different amounts of income are shown in the following table:

	D	E	F
Net income	$3,000	$5,000	$50,000
Exemptions ($2,000 plus $1,500)	$3,500	3,500	3,500
Net taxable income	None	$1,500	$46,500
taxable at—			
1 per cent of first $ 2,000	None	$ 15 (on $1,500)	$ 20
2 per cent of next $ 3,000	None	None	60
3 per cent of next $ 5,000	None	None	150
4 per cent of next $ 5,000	None	None	200
5 per cent of next $10,000	None	None	500
6 per cent of all over $25,000	None	None	1,290 (on 21,500)
Total income tax	None	$ 15	$ 2,220

NOTE: The above examples show the virtues of a system of taxation based upon ability to pay taxes. They also show that the proposed income tax bill with its moderate exemptions and tax rates imposes a very light burden upon taxpayers as compared with the oppressive burden now imposed upon owners either of real estate or of any other property taxed on its value.

property for the University of Illinois Fund (Senate Bill 164), for the State School Fund (165), and for the State Blind Fund (166); by amendments to other acts removing any references to the three funds named above and providing that money appropriated for any of the special purposes named shall be payable out of the General Revenue Fund of the State (Nos. 166, 167, 168, 200).

Amends Code

Senate Bill No. 170 amends the Civil Administrative Code, creating a Department of Income Taxation and the offices of Director and Assistant Director for the administration of the Income Tax Act.

The necessary delay in the first collection of income taxes until 1933 requires that the tax on property for the State General Revenue Fund be continued for the year 1931 payable in the year 1932. This is done in Senate Bill No. 169.

This bill also provides for the possibility that receipts from income taxes in 1933, together with revenue from sources other than property, may not be sufficient to pay all appropriations from the General Revenue Fund. For this reason the State Levying Board is given power and is directed to lexy a tax on property also for the year 1932, payable in 1933, sufficient to pay any difference between reasonably expected receipts therein and all appropriations therefrom.

Produce $30,000,000

It is believed that receipts from the income tax will make any levy on property needless, but it is necessary to give the State Levying Board authority to make it in order to save the state from possible embarrassment.

It is conservatively estimated that an income tax act with the provisions of Senate Bill No. 138 will produce at least $30,000,000 in any year, at least $40,000,000 in prosperous years, and possibly $50,000,000 in a highly prosperous year.

The Income Tax Bill and its companion bills cannot interfere in any way with the amount of money appropriated by the state for the University of Illinois, the common schools, or blind relief, all of which are now provided for by special levies on property. Even now no special levies are available for the purposes for which they are collected unless they are appropriated therefor by the General Assembly.

The income tax and its use as proposed in the companion bills, with revenues from other non-property sources, will probably supply all of the funds now collected from property taxes not

(Continued on page 7)

Let's Put the Other Horses to Work

WORKING A GOOD HORSE TO DEATH

The farmer must have a new deal in taxation

¶ Illinois property produces less than one-fourth of the total income of the entire population but pays all direct general taxes.

¶ Illinois tangible property produces about one-seventh of total net income of the entire population but pays about 95 percent of all direct general taxes.

¶ Intangible property owned by residents of Illinois produces at least nine percent of total net income of the entire population but pays less than five per cent of all direct general taxes.

¶ Productive intangible property owned by residents of Illinois now amounts to at least $12,000,000,000 in value, of which only a small amount is assessed.

¶ Personal industry produces at least three-fourths of total net income of the entire population but pays no direct taxes.

A tax on net income is the answer to the problem

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb, 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for missent copy please indicate key number on address as is required by law.

Pass the Income Tax

WITH the legislatures of Vermont, Massachusetts, Oklahoma, Georgia, Iowa, Indiana, Missouri, Utah, Pennsylvania, and other states making more effective, passing, or now seriously considering income tax legislation, this just and equitable method of raising revenue for government purposes is fast gaining the recognition it deserves.

The antiquated property tax, largely a real estate tax, is on the run. It is breaking down under the crushing load of ever-increasing government expense. Property tax delinquencies are mounting everywhere because property in itself does not represent tax-paying power. Fair-minded citizens, and statesmen charged with the responsibility of administering government affairs see the necessity of developing sources of revenue based on ability to pay.

The Lantz state income bill (S. B. 138) now before the Illinois General Assembly offers the legislature an opportunity to take a constructive step toward correcting an unfair taxing system under which more than half the population of the state pays nothing directly to support government. The proposed measure is not an additional tax. It is a lieu or replacement tax designed to defray nearly all the costs of state government and relieve property to that extent. No person can object to the measure on the ground that it adds to the tax burden. It merely distributes the present load more evenly over the people having ability to pay.

Spreading the taxes over a larger number of voters is bound to exert a wholesome influence on future government. With more tax consciousness on the part of those who now pay nothing, there will be more interest and attention by voters to state, county, and municipal bond issues, appropriations, and expenditures. Good government demands that each voter make some direct contribution no matter how small the amount in return for the rights, benefits, and privileges of citizenship. The enactment of Senate Bill 138 will help bring about this desired result.

Under False Colors

AMONG the statutes of Illinois is a law popularly known as the "Co-operative Act of 1915" under which a number of farmers' elevators are organized. As amended in 1923, this Act is co-operative in name only. Corporations organized under it may or may not be co-operative. There is nothing in the Act limiting the return of companies so organized on capital, nothing to compel a distribution of excess profits to patrons after reserves and a maximum of 8 per cent is paid on capital stock.

Under it a co-operative association may be owned by comparatively few stockholders, the business of the association may be thriving, the profits large, but the farmers who patronize it and make possible its success may share no more in its profits than they do in the earnings of any private corporation.

House Bill 466 before the Illinois legislature, which has the support of the Illinois Agricultural Association, seeks to amend the 1915 Act so as to make it truly co-operative, limit return on capital stock, make mandatory the distribution to patrons of excess earnings, when and if distributed, on the basis of business done with the company.

There is nothing illegitimate about a company owned by one, two, or a half dozen stockholders retaining all the earnings for the benefit of the owners. Private corporations do this and no one objects. The objection lies in associations that parade under false colors, basking in the sunlight of favor and partiality which most farmers rightfully show toward real co-operative enterprises.

House Bill 466 seeks to strip away the sham and camouflage, and require associations organized under this Act to be truly co-operative.

ABOLITION of the Farm Board is advocated by Senator Reed of Pennsylvania, high-tariff-protection-for-industry champion. The senator objects to the Grain Stabilization Corporation maintaining a higher than world price for the American farmers' grain, deplores the $500,000,000 revolving fund appropriation.

On the other hand, Senator Couzens of Michigan has discovered that the steel companies are charging the railroads the same price for rails, that rail prices have not come down. Price stabilization of steel, aluminum, and other products of organized industry will not be denounced by Senator Reed and other eastern industrialists. Only price stabilization and protection for agriculture, in their estimation, is economically unsound.

57TH GENERAL ASSEMBLY

(Continued from page 4)

only for the purposes named, but also for all other purposes for which appropriations are usually made from the General Revenue Fund. If they should fail to do so, the State Levying Board is directed to levy taxes on property sufficient to make up the deficiency.

A NUMBER of measures of more or less importance the I. A. A. is supporting before the General Assembly cover varied subjects, all of practical interest to farmers. Bills which have already passed the House include H. B. 410 (Rep. Luckey, Vermilion county) which would absolve an owner from damages resulting from his live stock running unattended on public highways without his knowledge, where such owner used due care in keeping such live stock off the highways. Under the act, responsibility for accidents resulting from live stock running at large would be placed on the party whose negligence brought about the damages.

Cow Has Right-of-Way

In a recent decision a Wisconsin judge held that a cow being driven across a road from one pasture to another had the right-of-way, and that drivers of vehicles were bound to exercise due care to avoid hitting such animal. The present Illinois law presumes the owner of live stock to be liable for damages resulting from unattended live stock on public highways.

H. B. 501 (Rep. Johnson, Ford county) would make the owner of any dog liable for damages it inflicts by killing or molesting live stock (sheep, goats, cattle, horses, mules, poultry, swine). This bill, which authorizes the killing of such dog, passed the House by a substantial majority vote on April 1.

Butter Substitutes

H. B. 451, which provides that no state institution supported by public funds shall purchase more than 25 per cent of its fat requirements for inmates in the form of butter or lard substitutes, passed the House on March 31, although it was amended before passage so as not to apply to county and municipal institutions. This bill was substituted for H. B. 84 (Handy), which prohibited the use of butter substitutes in all state institutions.

H. B. 4 (Rep. Davis, Jackson county) provides that lime dust manufactured at the Southern Illinois (Chester) Penitentiary shall be furnished free to farmers in the drouth stricken area of that section. This bill will be supported by the Illinois Agricultural Association as an emergency measure to expire at the end of the year 1931. Sen. Harry Wilson of Perry county has introduced the same measure in the Senate as S. B. 387.

License Milk Dealers

The milk dealers' licensing bill, H. B. 440 (Rep. Corzine, Christian county) provides for state licensing of milk dealers and carries a provision that applications for licenses shall contain a certificate signed by a physician showing freedom from communicable diseases of each person handling or coming in contact with milk sold. The state's attorney and sheriff of each county shall be furnished with a list of licenses twice a year. The measure is designed to improve the milk supply in small towns and rural communities. This bill received favorable consideration by the Committee on Agriculture, and as we go to press, is on third reading in the House.

Motor Vehicle Bills

A number of bills amending the motor vehicle act, changing the classification of trucks by weight and the license fees therefor, also clarifying the law with reference to exempting farm tractors and other farm machines from the payment of motor license fees have been introduced.

Reps. Hunter, Winnebago county, and Allen, Whiteside county, have introduced similar measures covering the reclassification of trucks according to capacity.

The Illinois Agricultural Association will support the bills which coincide closest to the resolution on these questions passed at the last annual meeting, namely:

"We favor and pledge our support to amendment of the Motor Vehicle Act:

1. *"To exempt farm tractors and any farm implements and machinery drawn by tractors from the requirement of motor licenses when such tractors, implements and machinery use the highways only in moving between fields or farms for the purpose of carrying on farm operations.*
2. *"To establish a more equitable schedule of license fees with different rates for trucks having a combined weight and rated capacity of less than 4,000 pounds, between 4,000 and 8,000 pounds, and between 8,000 and 12,000 pounds."*

Hunter Bill Passes

Rep. Hunter's bill, H. B. 228, which provides that farm machinery including tractors, threshing machines, clover hullers, ensilage cutters, corn shredders, corn shellers, etc., shall not be subject to the motor vehicle act, passed the House on March 26.

The Illinois Agricultural Association appeared in opposition to H. B. 407 which would give cities one cent of the three cent gas tax to use for the construction of roads and streets. The I. A. A. supports the State Department of Highways in contending that the distribution of the gas tax be left undisturbed, the hard road program completed, but that the Highway Department take over the building and maintenance of streets through towns and cities that have been designated as state highways.

Amendments to the Co-operative Acts of 1915 and 1923 are covered in House bills 466 and 467 (Homer J. Tice, Menard county), respectively. H. B. 466 would make the 1915 Act co-operative in principle as well as in name, would increase the number of shares a stockholder can hold from five to ten shares, authorizes a maximum of $1,000 per share instead of $500, permits one co-operative to invest in the stock of another up to 10 per cent of its capital stock, and provides that dividends on capital stock be limited to 8 per cent.

H. B. 467, which amends the Co-operative Act of 1923, is designed to broaden and make more flexible the 1923 Act so as to meet all conditions developed through past experiences. Under the amended act it will be possible to organize co-operative credit corporations, to organize national co-operative marketing associations under the Illinois law. It will do away with the necessity of organizing co-operatives under the Delaware laws.

The amendments proposed in H. B. 467 have the approval of the Legal Department of the Federal Farm Board.

State Income Tax Up In Senate on April 15

As this issue of the RECORD goes to press the Lantz state income tax bill, S. B. 138, is scheduled to come up for third reading in the State Senate Wednesday, April 15, at 10 A. M. The legislative committee of the I. A. A. secured a special order for consideration of the measure following the action of the Senate two weeks before in passing the bill from second to third reading.

A state-wide conference of County Farm Bureau presidents has been called at Springfield for Wednesday afternoon, April 15, to consider the income tax bill and other legislation supported by the Illinois Agricultural Association before the 57th General Assembly.

State Legislatures Pass Income Tax Bills

THE Iowa Senate on March 25 passed a state income tax bill. The measure provides a tax of 1 per cent on corporations and the rates on individuals are graduated from 1 to 5 per cent. An income tax had already been approved by the House which carried a 3 per cent corporation tax and lower salary brackets than that provided in the Senate amendments.

The Senate vote followed a special message from Governor Turner renewing his plea for an income tax to relieve part of the burden on property owners.

Georgia

THE George state legislature recently enacted—

1. A state income tax with rates from 1 to 5 per cent on individual incomes and 4 per cent on corporate incomes;

2. An act allowing an offset of 1931 sales taxes against income taxes paid in 1932.

Utah

UTAH passed a personal income tax with rates ranging from 1 to 4 per cent. Exemptions are $1,000 for single persons; $2,000 for a married couple, and $400 additional for each dependent. An offset is allowed for property taxes paid up to one-third of the amount of the income tax.

Missouri

JEFFERSON CITY, MO., April 2.—The House has concurred in Senate amendments to the income tax increase bill and passed the measure which now goes to the governor for his approval.

It provides for income taxes on a graduated basis ranging from 1 to 4 per cent, which, according to its proponents, will bring in about $5,500,000 of additional revenue annually.

Maryland

A BILL proposing a personal income tax with rates ranging from .5 per cent to 5 per cent has been introduced in the Maryland legislature.

Oklahoma

A BILL providing for a net income tax on corporations and individuals passed both Houses of the Oklahoma legislature and was sent to Governor Murray on April 4. The governor announced that he would approve it immediately.

The bill provides for a tax of 2 per cent on incomes up to $10,000 a year, 3 per cent on $10,000 to $20,000, 4 per cent on $20,000 to $100,000, and 5 per cent on all above $100,000. Individuals are allowed an exemption of $750 and $750 additional for each dependent, reports the U. S. Daily.

Three-fourths of the proceeds of the tax goes to the common school fund, and one-fourth to the general revenue fund of the state.

Pennsylvania

HARRISBURG, Pa., April 2.—A bill proposing a state income tax will be considered by the House when it meets April 7.

The proposed income tax is graduated from rates ranging from 2 to 10 per cent. The maximum rate for corporations would be 7 per cent.

Vermont Governor Signs Income Tax

Governor Wilson of Vermont signed the state income tax bill recently passed by the legislature. The rate for corporations is 2 per cent. In the case of individuals the rate is 2 per cent for earned income and 4 per cent for unearned income. On earned income the exemptions are $1,000 for single persons and $2,000 for married persons. Where all the income is unearned, the exemptions are $400 and $800.

Thompson Grain Member

Unofficial reports state that Sam. H. Thompson, newest member of the Federal Farm Board, will succeed Samuel R. McKelvie when the latter retires in June as grain representative on the board. A business man with an agricultural connection is expected to be chosen to bring the board up to its full membership when McKelvie leaves.

Independent oil operators are leasing farm lands around Spring Lake in Ogle county, Illinois, where a small oil seep was recently discovered. Several rigs are already drilling, one being down 115 feet.

South Dakota recently passed a bill providing for a tax on substitutes for butter and lard. The bill was aimed "at the cheap imported oils which constitute 65 per cent of the oils used in the manufacture of oleomargarine, not against cotton seed products," states Loyson G. Troth, state secretary of agriculture.

Driver's License Debate at Galesburg Meeting

"Resolved, that Illinois should adopt a drivers' license law" was the subject of a debate held before 45 members of the Farm Bureau Boosters Club, Galesburg, April 2. Harry Peterson and Frank Sutor of Sparta township, the affirmative team, won the decision. William Moore and Art McGovern of Copley township comprised the negative team.

E. I. Wilson of Tazewell county, specialist in parliamentary practice, will demonstrate parliamentary rules at the next meeting on Thursday, May 7.

The subject for debate at the June meeting will be "Resolved, that the Philippine Islands should be given their independence."

Sid Cherrill of the I. A. A. live stock marketing department, spoke on live stock marketing following the debate.

15th District Conference

CO-OPERATIVE grain marketing was one of the principal topics discussed at the 15th district I. A. A. conference, Canton, March 26.

Harry Gehring of Knox county and director of the Illinois Grain Corporation stated that the business of the Mid-West Grain Corporation, co-operative sales agency, had been increasing rapidly during recent months, and that 34 fully qualified co-operative elevators now hold membership in the Illinois Grain Corporation.

Organization and membership solicitation were discussed by R. J. Hamilton and John C. Moore. Hamilton stated that during the first two months of the year more members joined the Farm Bureau and I. A. A. voluntarily than in any other similar period in the history of the organization.

Produce marketing was covered by Farm Adviser L. E. McKinzie of Schuyler and J. E. Meatheringham of Adams county.

A. N. Skinner, former I. A. A. director from Yates City, opened the meeting and introduced his successor, C. G. Bates of Schuyler county, who presided.

Mr. Bates outlined the legislative program of the I. A. A. and talked briefly about the newer developments of co-operative marketing.

F. M. Higgins, formerly I. A. A. district organization manager, is back at his old job as editor of the Lake Geneva (Wis.) News-Tribune.

MISSING PAGE(S) ARE ADVERTISEMENTS

Whiteside Cuts Values; Endorses Income Tax

Board of Supervisors Takes Action in Meeting April 1

THE Whiteside county board of supervisors voted on April 1 to cut valuations of land and city lots in the county an average of 20 per cent, and went on record in favor of the Lantz state income tax bill as a step toward placing taxes on the basis of ability to pay. J. D. Conrad, Sterling assessor and prominent Farm Bureau member, presented evidence to show why the reduction in land values should be made.

The cut will not be a horizontal one. An effort will be made to equalize downward an average of 20 per cent, each assessor being authorized to use his own judgment in making the reductions.

Supervisor R. A. Norrish of Morrison, former president of the Whiteside County Farm Bureau and a director in the Illinois Farm Bureau Serum Assn.; Supervisor S. C. Given, Fenton, and Mr. Conrad drew up the following resolution which was adopted unanimously:

"Whereas, the supervisors and assessors of Whiteside county now in session, find that the valuations of land in Whiteside county have decreased 40 per cent since the last quadrennial assessment, and,

"Whereas, it is the opinion of this group that on account of the depreciation in land values, a reduction of assessed values will be necessary, and,

"Whereas, a reduction in values will cause a loss in revenues for the county that will make it impossible to meet the ordinary and necessary expenses,

"Therefore, be it resolved that we request our senator and representatives from this district to support the Lantz income tax bill now before the state legislature or any other tax relief bill that will aid in the assessment of intangible personal property.

"And further, that the county clerk be instructed to forward a copy of this resolution to the members of the legislature from this district."

Mr. Norrish, in supporting the resolution, stated that many farmers are paying from 20 to 40 per cent of their net incomes in taxes on their farms, that holders of real estate are compelled to pay taxes on such property whether they own it or not, while the mortgage holder escapes. County expenses can't be reduced much, he said, because state laws require counties to pay such items as mothers' pensions, blind pensions, TB sanitariums, war veteran relief, etc.

NOTICE
ILLINOIS AGRICULTURAL ASSN.
ELECTION OF DELEGATES

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of May and June, 1931, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureaus and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of Association, including the election of officers and directors as provided for in the by-laws of the Association.

During May an annual meeting will be held in Massac county.

During June an annual meeting will be held in Ogle county.

Signed:
G. E. METZGER, *Secretary.*
April 15, 1931.

Large Audience Hears Pres. Smith at Rochelle

MORE than 500 farmers and townspeople gathered in the Rochelle township high school the night of March 26 to hear President Earl C. Smith discuss legislation pending before the 57th General Assembly.

The proposed state income tax figured largely in Mr. Smith's address. The Lantz income tax bill, the speaker said, is aimed at the injustice of the present system which forces real estate, creating only 10 per cent of the state's income to pay 90 per cent of the taxes.

Mr. Smith expressed the belief that the measure has an excellent chance of passage in the present session because the fairness and justice of this tax is becoming widely recognized. With the antiquated property tax breaking down in almost every section of the state, with tax delinquencies mounting higher and higher, students of political economy and statesmen realize that taxation based on ability to pay is the only fair method of deriving revenue to support government.

Property owners of Ogle county would have saved $133,710 if the bill had been a law this spring, the speaker said.

He deplored the fact that so many Illinois farmers are still outside the ranks of the Farm Bureau and I. A. A., emphasized the need for all farmers working together to solve their problems.

G. A. Lazier of Lindenwood, former president of the Ogle County Farm Bureau, presided. On the speaker's rostrum were C. E. Bamborough, Polo; George F. Tullock, Rockford; L. D. Carmichael, and Anson Rosenkrans, presidents respectively of the Ogle and Lee County Farm Bureaus.

Marshall-Putnam Tax Valuations Too High

Assessors Act to Reduce Taxes as Result of Farm Bureau Information Service

As we go to press word is received that the Marshall county supervisor of assessors, Ray Litchfield, instructed the assessors to make a 25 per cent cut in the value of best farm lands in that county. Timber land and cheaper pasture lands will command a 30 per cent reduction. Vacant city lots will also be cut. Improvements on both city property and farm property will be allowed a reduction.

Putnam County Also Reduced

Putnam county was not so seriously out of line in its valuations as was Marshall. The supervisor of assessors therefore instructed the assessors to make the necessary equalizations on the cheaper lands in Putnam Co., effecting a considerable reduction on that class of property. City lots and personal property will also be reduced.

"The reduction in valuations which will be effected in Marshall and Putnam counties this year, largely as the result of tax studies made by the local Farm Bureau tax committees, and which was supported by general sentiment in favor of such changes both by the assessors and by the people at large, will be a substantial savings to taxpayers. In some instances local taxing bodies will find it necessary to reduce their budgets because they have levied to the limit of the legal rate. In addition, Marshall county residents will have the assurance that they will be paying very little, if any more, than their just share of state taxes. This saving alone will result in at least $15,000 reduction in the amount of state tax that will be paid."

Sec'y. Hyde Visits I. A. A.

Secretary of Agriculture Arthur M. Hyde and C. B. Denman, livestock member of the Farm Board, called at the I. A. A. office, Chicago, on April 6.

E. W. "Farmer" Rusk, formerly county adviser in Macoupin county, has severed his connection with the Chicago and Illinois Midland Ry. and Station WENR, to take charge of agricultural programs for Station WMAQ, owned by the Chicago Daily News.

Error cannot exist where truth is continuously promoted.

SATURDAY, May 9, was set as the opening day for the 1931 Farm Bureau baseball season by directors of the Illinois Farm Bureau Baseball League who met at Peoria March 20. Around 100 officials, players and visitors attended. Nearly all the 34-35 counties expecting to have teams were represented.

Principal action taken included (1) rearrangement of the districts to make way for new members, (2) adoption of State Arbitration Committee's report on eligibility, (3) adoption of playing rules for the season.

The accompanying map shows the new arrangement of counties into districts. Each district will organize before the opening of the season, elect a district chairman and dictator, adopt a schedule of games to decide the district championship, agree on selection of umpires, division of gate receipts, etc.

The State Arbitration Committee, composed of League President Chas. Black, Jacksonville; Vice-President John Stout, Chatham; Secretary George Thiem, Chicago, reported on the troublesome question of eligibility of players. Eligible are:

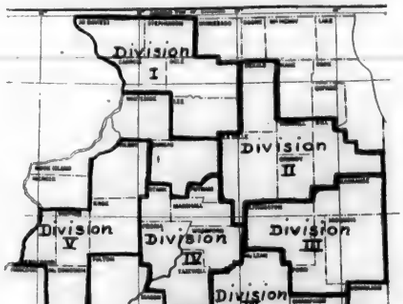
1. Farm Bureau members actively engaged in operating a farm or actively superintending the operation of a farm.

2. Dependent son or dependent relative of a Farm Bureau member actively farming and living with such member.

3. Where joint membership is held all parties to membership actively engaged in farming.

4. Part time employment away from the farm shall not be construed as making a prospective player ineligible under the eligibility rule as defined in the constitution.

5. Farm managers actively superintending the operation of farm lands who are members of the Farm Bureau.



6. Dependent sons of Farm Bureau members, or members of the Farm Bureau who go to school and work on the farm during vacation.

Most significant rules adopted require:

1. Each team to deposit $25 cashier's check as forfeit for failure to report at regularly scheduled game.

2. Each team to fill out eligibility questionnaire on each prospective player and file with state league secretary 10 days before first scheduled game.

The Spaulding No. 0 new cushion cork center ball was adopted as official.

Divisions in Illinois Farm Bureau Baseball League

"Skeets" Bloomquist, former Galesburg star will again act as manager and attempt to lead the Knox county team into the state semi-finals.

It was decided by the players at a recent meeting to start practice within the next two weeks and attempt to get in all the practice possible before the opening of the league schedule, which will be the latter part of May.

Division IV will open the season May 16 when Marshall-Putnam and Peoria cross bats in Peoria county, while Woodford and Tazewell meet on the latter's home grounds. Wilfred Shaw was selected district dictator at the divisional meeting.

From McLean

Division VI held its meeting in Clinton April 3, where L. R. Welk was chosen district dictator. First games will be played May 16. Each county will keep its gates receipts at home games, pay its own umpires at home and away.

Douglas county games will be played at Tuscola, Macon county at Decatur, Champaign games at Urbana, Logan at Lincoln, McLean at Normal University diamond.

Jefferson County Farm Bureau Get-Together

"FOR the first time in the history of the Jefferson County Farm Bureau, and so far as we have been able to find out, probably for the first time in Illinois, all present and past members of the Board of Directors and their families were invited to a get-together," writes Charles E. Twigg, the new county agent at Mt. Vernon.

W. T. Wooden, first president of the Jefferson Bureau, told of the difficulties encountered in organizing a Farm Bureau in that county. A. E. Drennan, a former president, brought the history of the Bureau down to recent years.

I. E. Beall, present Farm Bureau president, gave an account of his former connections with the Farm Bureau Federations in Texas and Missouri, emphasized the superior Farm Bureau service program in Illinois.

Other speakers were F. L. Brissenden, I. A. A. district organization manager; H. H. Connaway, delegate to the I. A. A. convention; County Adviser Twigg; Assistant State Leader F. L. Longmire; L. R. Caldwell, former county adviser; the secretary of the local Chamber of Commerce, and the manager of the Emmerson Hotel.

National Co-Op. For Fruit and Vegetables

Plan to Co-ordinate Regional Co-Ops. in Nation-Wide Sales Plan

AS we go to press a national meeting of fruit and vegetable co-operative representatives is scheduled to be held in Washington, probably on April 13 at the call of Charles S. Wilson, member of the Federal Farm Board.

On April 6, fruit and vegetable marketing representatives from Illinois, Michigan, Wisconsin, Indiana, Mississippi, Arkansas, Missouri and Kansas met with Mr. Wilson of the Farm Board in St. Louis to discuss possibilities for organizing a fruit and vegetable regional co-operative in the Mississippi Valley. A. B. Leeper, director of fruit and vegetable marketing, Secretary Geo. E. Metzger, and W. L. Cope of the I. A. A., together with several Illinois growers, sat in the conference.

A. B. Leeper

A committee of four was appointed to go to Washington at the call of the Farm Board to meet with 11 other representatives chosen from all sections of the United States to discuss the advisability of organizing a national fruit and vegetable marketing agency. Mr. Leeper was chosen a member of this committee.

At present there is little co-ordination between regional and district co-operative marketing associations. It is hoped that the new movement will bring the district associations together so that a national plan can be developed and sales representatives of the nation-wide co-operative placed on all the principal markets.

Farmers National Grain Profit $666,266.84

Annual Report to Stockholders Reveals Corporation Had Good Year in Spite of Depression

A PROFIT of $666,266.84 in the fiscal year ending February 28, 1931, was reported by Walter I. Beam, treasurer of the Farmers National Grain Corporation, to the Board of Directors' meeting in Chicago on April 6.

At the annual meeting of stockholders held the following day at the Sherman Hotel, President C. E. Huff stated that the net profits of the corporation represented more than 100 per cent earnings on the outstanding capital stock. Pres. G. C. Johnstone of Bloomington represented Illinois Grain Corp. at the stockholders' meeting.

Directors of the corporation voted to set aside 50 per cent of the net profits for reserve and declared a 6 per cent stock dividend. The remainder of the profits will be distributed in patronage dividends in the form of paid up capital stock. The corporation handled approximately 111,000,000 bushels of cash grain of the 1930 crop.

McKelvie Speaker

Ex-Governor Samuel R. McKelvie of Nebraska was the principal speaker at the stockholders' meeting. The Farmers National is the largest handler of grain in the United States, said McKelvie, by reason of the large bushelage handled in its first year of operation. "I want to urge that every stockholder support your National Grain Corporation with all your receipts. By withholding a part of your grain you only weaken your organization. While it is true that some other concern may from time to time offer you a higher price for a few carloads of grain, don't forget that your national agency contracts to take all your grain.

"There are too many agencies taking a toll of the farmer's production," continued McKelvie. "There is too much duplication in machinery, too much waste. Guard against duplication of effort in your own organization and eliminate it promptly when discovered.

Profits to Producers

"Co-operative marketing can't make the dollar do gymnastics. It can make as much profit as any private organization handling an equal volume, and the profit so made will be returned to the producers who made it possible."

Mr. McKelvie read a telegram from headquarters of the Farm Board at Washington which expressed faith in the future of the Farmers National Grain Corporation, the Board's desire to keep in close contact with all the operations of the organization. McKelvie predicted that at the coming meeting of the U. S. Chamber of Commerce at Atlantic City much time would be spent by the organized middlemen discussing how the purpose of the Agricultural Marketing Act can be defeated.

Reports Brief

The reports of President Huff and Manager Geo. S. Milnor were very brief. They stated that a report would be distributed in pamphlet form shortly. Important details connected with the handling of grain and the financial operations of the company were not given out. Hostile interests are anxious to get this information for use in their campaign of misrepresentation against co-operation marketing, and the officers and directors deemed it advisable not to release it. Private commission agencies are careful not to reveal their financial operations, and the Grain Corporation to protect itself has been compelled to withhold its sales position and details of financial operation from the public.

Mr. Huff thanked the directors and other officers for their fine support, and spoke approvingly of the good work of employees and staff members.

A number of amendments to the by-laws were made. Hereafter a single stockholder may hold as much as 25 per cent of the stock of the corporation. Heretofore the stockholder has been limited to one-twentieth of the capital stock.

Directors Elected

Directors elected were as follows: C. E. Huff, Farmers Edu. & Co-op. Union, Salina, Kansas; John Manley, Oklahoma Wheat Growers Ass'n., Enid, Okla.; J. J. Knight, Equity Union Grain Co., Kansas City, Mo.; Wm. H. Settle, Central States Grain Ass'n., Inc., Indianapolis, Ind.; L. E. Webb, Farmers Co-op. Commission Co., Dodge City, Kansas; Geo. E. Duis, North Dakota-Montana Wheat Growers, Grank Forks, N. D.; M. W. Thatcher, Farmers Union Terminal Ass'n., St. Paul, Minn.; W. J. Kuhrt, Northwest Grain Ass'n., Minneapolis, Minn.; Ernest R. Downie, Kansas Co-op. Wheat Marketing Ass'n., Wichita, Kansas; F. J. Wilmer, North Pacific Coast Growers, Inc., Rosalia, Wash.; Oscar Slosser, Ohio Farmers Grain & Supply Co., Fostoria, Ohio; C. B. Steward, Farmers Westcentral Grain Co-op., Inc., Lincoln, Nebraska; C. W. Croes, American Wheat Growers Ass'n., Aberdeen, S. D.; R. A. Cowles, Illinois Grain Corporation, Chicago; and Jess Wade, International Grain Growers, Ogden, Utah.

To comply with the change in the by-laws only 15 directors were elected. Jess Wade of Ogden, Utah, is the only new man on the Board. S. J. Cottington, Iowa; Sam H. Thompson, Chicago; L. J. Taber, Columbus, Ohio, and E. G. McCollum, Indianapolis, were not re-elected. The report of the nominating committee was adopted unanimously.

Resolutions Adopted

Resolutions adopted commended President Hoover for the appointment of Sam H. Thompson as a member of the Federal Farm Board, expressed regret at the resignations of Messrs. Legge and McKelvie, commended the selection of James C. Stone as chairman; upheld the desirability and effectiveness of the Agricultural Marketing Act in its present form.

Between 75 and 100 stockholders and visitors from all sections of the grain belt attended the meeting. The farm press was invited, but daily newspaper reporters were barred. Secretary of Agriculture Arthur M. Hyde and Samuel R. McKelvie, Sam H. Thompson and C. B. Denman of the Federal Farm Board were in Chicago for this and other meetings.

Superpower Company Hearing on May 5th

Tuesday, May 5, at Springfield, before the Illinois Commerce Commission, landowners from LaSalle, Livingston, Woodford, Tazewell, Will and Grundy will gather to ask consideration of a new proposed route for the Super Power Company's high line from Powerton to Joliet.

The hearing was arranged by the I. A. A. to give a few landowners who are dissatisfied with the cross country route an opportunity to present evidence showing why the route should follow section lines and fences. The commission previously had given the utility a certificate of convenience and necessity to build the upper half of the line. Such a certificate carries with it the right to condemn property.

At a conference in Springfield on March 24 more than 50 landowners, farm advisers and Farm Bureau officials from the counties mentioned met with President Earl C. Smith, Donald Kirkpatrick, and L. J. Quasey to discuss legal phases of the case and to clarify in the minds of all the rights of both landowners and utilities in this question.

THE first annual meeting of the Illinois Live Stock Marketing Association will be held at Bloomington on Thursday, May 28. The board of directors of the new co-operative met in the I. A. A. offices, Chicago, on Friday, April 3, to plan the future work of the association. The association was incorporated on March 4.

Three hundred and fifteen county live stock marketing committeemen, live stock producers and farm advisers attended six district live stock marketing conferences held throughout the state during the week of March 23. These men represented 62 counties. County marketing committees outlined educational programs for the respective counties in accordance with suggestions presented by Ray E. Miller, director of livestock marketing for the I. A. A. The program of the state organization was discussed with particular reference to the new state live stock marketing association, its purpose and plan of operation.

During the first three months of 1931 the Indianapolis Producers handled 2,638 carloads of live stock, representing approximately 34% of the market receipts.

Illinois counties showing an increase in the business consigned to the Indianapolis Producers over the first three months last year were Vermilion with an increase of 33 cars, Ford with 16, Edgar 10, Dewitt 9, Iroquois and Woodford 6 cars each.

Illinois shipping association managers who increased their business to the Indianapolis Producers over the first three months of last year are Fred Gumm, Paris, with a gain of 9 cars; W. E. Leischner, Deland; W. F. Kurtz, Tabor; George M. Hudson, Hindsboro; Abner Wood, Redmon; Clarence Pousler, Shumway; R. C. Boatman, Sheldon; William Fulk, Cerro Gordo and Decatur; D. H. King, Dundas; H. H. Richards, Parkersburg, and G. W. Elbert, Clarksburg. Managers who shipped the same number of cars as last year were: C. M. Weller, Tuscola; O. C. Fisher, Windsor, and W. H. Bingaman, Neoga.

For the first three months of 1930 approximately 78.5% of the receipts at Indianapolis arrived by truck.

Mrs. C. M. Stephens, Davenport, Chairman, Quad-City Milk Council

Mrs. Stephens and other members of the Consumers Committee have taken an active part in working out an orderly marketing quality improvement program between the organized dairymen represented by the Quality Milk Association about Rock Island, Davenport, Moline, and East Moline, and the organized dealers.

The Consumers Committee consists of Mrs. C. M. Stephens, Mrs. J. W. Casto, Rock Island; Mrs. W. R. Wood, Moline; and Mrs. J. F. Ryan, East Moline.

Decatur Milk Producers Announce Price Schedule

THE Decatur Milk Producers Association, following a recent meeting with dealers at that market, reports that the price of base milk for April, May and June will be $2.06 per cwt. delivered at Decatur.

Class II milk will bring a price computed on the basis of Chicago 92 score butter plus 12½ cents per pound fat in 100 pounds of milk. Thus if the Chicago 92 score price is 30 cents per pound and the milk tests 3.5 per cent, the price would be computed at $1.49 per cwt.

Class III milk, of which there was only 13,000 pounds on the market in March, will bring a flat price based on Chicago 90 score butter price for the butterfat content in 100 pounds of milk.

At present approximately 70 per cent of the milk delivered at Decatur is base milk. During February and March the price received by the Producers was $2.27 per cwt. for base milk. Previous to February the price was $2.65.

Since the first of the year the retail price on this market dropped from 12½ cents to 10 cents per quart.

Secretary Geo. E. Metzger attended the price conference and assisted the Producers in their negotiations. The price obtained by the Producers is in line with the price of milk on similar Illinois markets.

Milk Producers-Dealers Progress at Rock Island

A THREE cent per cwt. check-off on all milk delivered by members of the Quality Milk Association to distributors at Rock Island, Davenport, Moline, and East Moline was agreed upon at a meeting on March 31, where the largest dealers and milk producers were represented.

The producers consented to pay two cents and the dealers one cent to provide personnel and equipment for checking weights and tests, improving quality, and advertising dairy products in the Quad-Cities.

Following the meeting a new scale of prices was announced. Milk will sell for 11 cents a quart and 6 cents a pint on these markets. A proposed cut in the price to the producer will be given further consideration. The old retail price was 12 cents a quart.

R. W. Bartlett of the University of Illinois and Wilfred Shaw of the Illinois Milk Producers' Association commended the Quad-City milk council for its efforts in establishing an orderly marketing system and a higher quality product for the consumer. Farm Adviser John Spencer of Rock Island county has taken an active part in getting the Quality Milk Association under way.

Sanitary Milk Producers Endorse Health Ordinance

At a meeting of the directors of the Sanitary Milk Producers, in St. Louis, April 6-7, the Board endorsed the recent ordinance passed by the City Health Department requiring all producers supplying that market to build a dairy and milk house according to sanitary specifications laid down by the city health office.

The Sanitary Milk Producers has advised its 8,800 members to comply with the ordinance and to that end is furnishing them with blue prints of a dairy house that will meet all requirements.

Among other requirements the milk house must have three windows in it, and a cooling tank with a capacity of four gallons of water for each gallon of milk.

Secretary Geo. E. Metzger of the I. A. A., who met with the Board, reports that the organization is making fine progress, that all the larger dealers are co-operating except the Pevely Dairy Company.

February Record Month For Rock Phosphate

Farmers Buy Limestone and Rock Phosphate in Spite of Farm Price Deflation

ILLINOIS farmers used more ground rock phosphate (lime phosphate) in February, 1931, than in any February during the past 12 years, reports J. R. Bent, director of Limestone-Phosphate department.

"In the face of the current deflation of farm prices, this is a great tribute to this wonderful fertilizer," says Bent. "Many have found that it makes the difference between profit and loss in the grain farming system.

New Test

"The recent test which has been perfected for determining whether or not soil is deficient in quickly available phosphate, has done much to stimulate a greater use of this economical fertilizer. Farmers need not now wonder whether or not they will get results. They can know in advance by consulting their farm adviser. If the soil needs phosphorus, it pays to use it even at present farm prices.

"Julius Alvord of Richland county stated recently that he applied 1,000 pounds of ground rock phosphate per acre on 18 acres in 1920. The same field was in corn in 1929. Part of this field had no treatment; part of it was limed; and part of it was limed and phosphated.

Doubles Yield

"The portion of the field without treatment yielded 32 bushels per acre of poor quality corn; the limed portion, 50 bushels per acre; and the limed and phosphated portion of the field, 65 bushels per acre.

"In 1930 he had the same field in oats. The untreated part of the field made 8 bushels per acre; the limed part of the field, 18 bushels per acre; and the limed and phosphated part of the field, 32 bushels of oats per acre. The long time benefit is well illustrated in this experience."

The Wonderful Soybean

The San Antonio (Texas) Evening News calls the soybean the world's most wonderful plant because: "Milk, flour, salad-dressing, lubricating and illuminating oil, glycerine, paint, varnish, celluloid, printing ink, soap, waterproof, explosives, linoleum, rubber, coffee and margarine can be made from the bean of this plant."

H. H. Walker

Clare Bradford

O. D. Brissenden

New District Managers Announced by Metzger

Organization Men Employed to Fill Vacancies, Start April 1

THE appointment of three district organization managers for two northern Illinois districts and the southwestern Illinois section is announced by George E. Metzger, director of organization. Appointment of the men was confirmed at a meeting of the I. A. A. Board of Directors in Chicago on March 13.

H. H. Walker of Greenville, Bond county, is the new appointee for the southeastern section. Born in Clinton county near Carlyle in 1874, Walker and his sons now farm 683 acres of land near Greenville.

He is a charter member of the Bond County Farm Bureau, which he joined in 1920. Since December, 1926, he has been assisting the Organization Department in membership solicitation.

Clare Bradford from Mercer county, selected for the northern Illinois district, succeeds H. D. Fink. Bradford was born in Mercer county 38 years ago. He attended a small college in Aledo after which he started farming. Bradford has been a member of the Mercer County Farm Bureau for the past 12 years, has served on the local organization committee, and at present is a director of the Tri-County Oil Company.

O. D. Brissenden, son of F. L. Brissenden, will succeed H. L. Hough as district organization manager in the northeastern Illinois section. Mr. Hough resigned to become director of organization for the Wisconsin State Farm Bureau.

Brissenden is the youngest of the district organization men. He was born in Clay county, Ill., 32 years ago. After graduating from the public schools of Flora, he attended the University of Illinois where he was a member of the student army training corps during the war. For the past three and one-half years he has been employed as farm superintendent of the Lincoln State School and Colony in Logan county.

Tall and well built, Brissenden has been active in the Logan county Farm Bureau Forum, which he served as president. He was a leading member of the Logan county debating team in the inter-county Farm Bureau debates last winter. During the past three years he has been attending the Lincoln College of Law night school at Springfield.

Taxation Is Subject at Ottawa Armory Meeting

JOHN C. WATSON, director of taxation, addressed more than 500 LaSalle County Farm Bureau members and visitors in the Ottawa Armory on March 30.

Calling attention to the fact that 1931 is the year when all real estate and farm lands in Illinois will be revalued for taxing purposes, Watson urged his audience to take a special interest in the tax situation and seek to obtain equalization between various classes of property. Real estate should be valued on the 1931 basis, not as of 1927, he asserted. Property values have come down considerably in the past four years.

Mr. Watson discussed the need for tax revision, for taxation based on ability to pay. He told of the advantages of having one county assessor instead of a full-time township assessor. "Uniformity in valuations," he said, "is almost impossible so long as we have as many assessors as there are townships in the county. Every assessor has his own idea about values, and with 37 assessors in one county you are likely to get as many different bases of valuation."

Henry T. Marshall of the LaSalle County Farm Bureau Tax Committee presided.

11 Qts. for $1.00

Eleven quarts of milk for $1 is the new retail price, the lowest in 10 years, announced April 1 by milk distributors in Springfield, Ill. The cut was made in an effort to boost consumption and get rid of the surplus.

Soybean Growers in Stock Sales Drive

Several Counties Oversubscribe Quotas. All Make Progress in Placing Association on New Basis

PROGRESS of Illinois soybean growers in placing their co-operative sales agency, the Soybean Marketing Association, on a capital stock basis is indicated by accomplishments in recent weeks in the central Illinois soybean area.

The association proposes to sell $50,000 worth of capital stock to provide working capital and to give every member grower a direct financial interest in his own marketing machinery.

The 26 counties in which nearly 3,000 members of the organization reside, have been placed on a quota basis in the stock subscription campaign. In the first week of the drive McLean and DeWitt counties both over-subscribed their allotments.

Scott Leads

A checkup of results just before going to press reveals that little Scott county leads the state with stock subscriptions in the Soybean Ass'n. office totaling 105 per cent of its quota. DeWitt is second with 104 per cent, McLean third with 102 per cent, and Peoria fourth with 90 per cent.

Manager J. H. Lloyd of the Soybean Marketing Association and V. Vaniman of the Illinois Agricultural Association were scheduled to complete a series of meetings through the soybean territory on April 11. At these meetings the speakers explained the capital set-up, and the problems facing the Soybean Association in the coming year.

While farm income in 1930 declined appreciably from that of the preceding years, soybean growers are making a valiant attempt to operate their marketing machinery with as little outside financial help as possible. They have been reluctant to borrow money from the government and the modest loans which have been made the growers propose to pay back as soon as conditions warrant.

DeBord Is V.-P.

Through error the name of Jesse L. Beery was published as vice-president of the Illinois Agricultural Co-operatives' Assn. in the March RECORD. Byron W. DeBord of Princeville, Ill., was elected vice-president at the annual meeting of the Board of Directors held at Springfield on January 28.

Pass Oleo Bill in Wisconsin

The Wisconsin state legislature recently passed a bill providing for license fees ranging from $1,000 to $50 annually from persons making, selling or publicly serving oleomargarine in Wisconsin. A $1,000 fee is required of the manufacturer or wholesaler dealer, $300 from a retail dealer, $100 hotel or restaurant, $50 boarding house.

Illinois Vote on Oleomargine Bill

The vote of Illinois members of Congress on the Brigham-Townsend bill restoring the 10 cents per pound tax on yellow oleomargarine was as follows:

U. S. Senate—

For the bill: Chas. S. Deneen.

Not voting: Otis F. Glenn.

House of Representatives—

For the bill: Chas. Adkins, John C. Allen, Wm. W. Arnold, John T. Buckbee, Carl R. Chindblom, Burnett M. Chipperfield, Ed. E. Dennison, Homer W. Hall, Wm. P. Holaday, Wm. E. Hull, James F. Igoe, Ed. M. Irwin, Wm. R. Johnson, Ruth H. McCormick, M. Alfred Michaelson, Claud V. Parsons, Henry T. Rainey, Frank M. Ramey, Frank R. Reid, Richard Yates.

Against the bill: Fred A. Britten, Oscar DePriest, Morton D. Hull, Adolph J. Sabath, Elliott W. Sproul.

Not voting: Thomas A. Doyle, Stanley H. Kunz.

Limestone Day, Tonti, August 16, 1918

W. L. Cope of Marion county writes: "On page nine of the March issue of the I. A. A. RECORD is a picture of Dr. C. G. Hopkins preaching the gospel of permanent soil fertility. This picture was taken at Tonti, Ill., on August 16, 1918. The occasion—Limestone Day.

"Dinner was served by the ladies of the community. There was also talk on conservation of food by some lady—have forgotten her name. Am enclosing a statement of the number of cars unloaded."

The statement enclosed is that of L. H. Brasel, I. C. R. R. agent, who says: "Our records show that on August 16 and 17, 1918, there were 18 cars of limestone unloaded at this station, the majority of which cars were released on August 17."

Saline, Johnson, Massac, Hardin and Pope counties are considering the organization of a five-county service company to handle petroleum products.

McDonough County Makes Good Record

A 7 per cent dividend on preferred stock and an 8 per cent patronage dividend on common stock was recently declared by the McDonough Service Company. More than $2,400 was added to the surplus. The total volume of business handled by the company amounted to $25,103.18.

At the annual meeting of the McDonough Farm Bureau in March it was reported that during the year 98 new members came into the organization, that 90 per cent of the members used some form of Farm Bureau service, and that the Farm Bureau closed the year with a net worth of $23,426.65.

Lard Substitute Tax Before Iowa Assembly

A 3 cent lard substitute tax is proposed in a measure before the Iowa legislature. Southern states have protested in the interest of cottonseed oil. "It is solely a revenue measure, although of doubtful value," said Secretary Mark Thornburg in reply to protests. The Iowa Senate also passed a 5 cent tax on butter substitutes.

Cook County Forms New Buying Service

Gardners Supply, Inc., is the name of a new co-operative organized by the Cook County Farm Bureau to handle truck gardeners' supplies, seeds, insecticides, feeds, etc.

Organized with an authorized capital of $25,000 the company began operating the last day of February with $7,500 paid in for working capital. During the month of March the company did a business of over $8,000. It expects to handle upwards of $30,000 in sales during the year.

The co-operative will meet local prices and all savings will go back to Farm Bureau member patrons on a patronage basis. Control stock in the co-operative is owned by the Cook County Farm Bureau.

Insecticides handled will be in line with recommendations of the University of Illinois. Fertilizers and chicken feeds from the Indiana Farm Bureau have been put in stock. Joe Zickmund is manager.

The Illinois Senate, March 31, defeated a measure to provide that owners and operators of motor vehicles shall not be liable for injuries to guest—passengers except for willful and wanton misconduct.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

Number 5 | MAY, 1931 | Volume 9

State Income Tax Before House

Opponents of Measure Raise Smoke Screens and Seek to Delay Consideration

RATTLING of skeletons in the closet by champions of the tax dodgers has been heard as a result of the hearing before the House revenue committee at Springfield last week when the Lantz state income tax bill and companion measures moved on toward consideration in the House.

A blast was unloosed against the measure by the Civic Federation of Chicago which represents a small group of wealthy men including large holders of stocks and bonds. The burden of the plaint was that security holders would be exposed by the income tax and their stocks and bonds placed on the property tax books to suffer double taxation.

As a matter of fact provision has been made for administration of the proposed income tax by a separate Department of Income Taxation which under the act cannot impart information to other taxing bodies. The exposure argument is being used as a smoke screen to hide the real reason of many for opposing a state income tax: namely, to avoid paying a fair share of the tax burden.

Another reason advanced by opponents is that local property taxes would not be reduced by the proposed income tax measure. Yet, if the rates were raised to provide more revenue to reduce local as well as state taxes the very people who advance this argument would be the first to howl; in fact the Civic Federation contradicts itself when it criticizes Senate Bill 138 because, in harmony with some of the most progressive income tax states, its highest rates are slightly higher than is the case in a few other states.

The old bogy of unconstitutionality raised in the Senate is again being trotted out in the discussions over in the House. Yet, there is ample justification in past State Supreme Court decisions and in the constitution itself for believing that the proposed income tax, which is an excise tax, is just as constitutional as the inheritance tax with its graduated rates, the gas tax, and any other excise taxes.

Tax dodgers get active against income tax bill.

Smoke screens raised to hide real reasons for opposition.

Chicago paper changes front, admits income tax a fair tax but wants reapportionment so Chicago can rule the state.

Big real estate men want property tax offset feature; objections to this proposal cited.

How companion bills to S. B. 138 make it a "replacement" tax.

Cost of administration much less than cost of property tax.

The Chicago Tribune, which has been a very unfair opponent, apparently has had a twinge of conscience for in a recent editorial (May 8) it modified its previous stand by admitting that the income tax is a sound and fair tax; that ability to pay is an accepted basis of taxation. It admits that "One man may be ruined by the levy on his possessions; another may have an income unrelated to his taxable wealth. Taxation of the means of livelihood without consideration of the revenue produced has injustice bound up in it. A man taxed upon the volume of his investments may have his living taken from him. He can stand a tax upon the income derived from these securities."

So has the Tribune endorsed an income tax and candidly implies in the same editorial that its opposition is not based on any lack of merit of the proposed legislation, but purely because the legislature has not seen fit to reapportion representation according to population and allow Chicago to rule the rest of the state.

The opening hearing on the bill and its companion measures before the House Revenue Committee on May 6 was marked by general agreement that owners of real estate are being taxed to death; that some relief must be provided. Nor was there opposition expressed to the income tax as a fair method of deriving revenue.

Representatives of big real estate holders in the larger cities, many of whom also own large blocks of stocks and bonds, held out for the property tax offset feature under which property taxes would be deductible directly from computed income taxes. Thus, the real estate owner who pays as much as $1,000 in property taxes would have to get a net income of at least $27,167 if Senate Bill 138 is enacted, before he would pay any income tax.

It is very likely that this feature would influence many who now own no real estate but who come in the income tax-paying class, to buy a lot, a home, or a flat building, or perhaps even a farm. "Buy a Lot and Save Your Income Tax" might be the slogan of many a subdivider and real estate operator.

The weakness of the property tax offset feature lies in the fact that it would greatly reduce revenue derived from the income tax, thus throwing a greater portion of state taxes back on property

and at the same time would officially sanction the tremendous inequality in taxation under our present system. While farmers and real estate owners under present conditions pay all the way from 20 to 50 per cent of their net income in taxes, the income tax proposes a maximum of only 6 per cent on net income.

The Companion Measures

The companion bills, S. B. 164-165-166-167-168-169-170-200, repeal levies against property for state tax purposes and give effect to the replacement feature of the proposed income tax. Thus, if the measure raises $30,000,000 of revenue for the State General Fund, a like amount will be removed from the levies against property. However, the University of Illinois fund, the state school fund, and the blind relief fund are protected if by any chance the income tax is held unconstitutional, by authorization given state officials to levy taxes for the General Fund, out of which may be appropriated money for the above purposes.

At the same time Senate Bill 169 provides that the Governor, the Auditor of Public Accounts, and the State Treasurer are directed to estimate the revenue to be derived from the income tax in 1932 and reduce the tax levy on property to such an amount.

It is estimated that the cost of administering the state income tax will require not more than 2 per cent of the tax so collected and will probably require less. The cost of administering the property tax, on the other hand, is considerably greater than this percentage.

Action in Three States On Income Tax Bills

St. Paul, Minn., April 25.

Bills proposed a constitutional amendment authorizing an income tax have been passed by both the House and Senate. Under the Minnesota law such an amendment must be submitted to the electorate.

Tallahassee, Fla., April 25.

The bill proposing a constitutional amendment permitting an income tax has been passed by the Florida Senate by a vote of 27 to 11.

Lansing, Mich., April 25.

The Michigan House has passed a bill proposing a graduated personal income tax. The sales tax was defeated.

The sub-committee appointed to frame a national fruit and vegetable growers' marketing plan with Federal Farm Board backing will meet in Washington May 18.

Comparison of Tax Now Paid by Property, and Net Income That a Person Would Have to Receive to Pay as Much Taxes Under the Income Tax Bill as Property Owners Now Pay

Column 1 below shows the average tax now levied directly on property and indirectly on the income from property; column 2 the net income from property which on the average is only four times the actual taxes. Columns 4, 6 and 8 show the income a single person, a married couple or the head of a family of four would have to receive to pay as much taxes as the property owner pays (column 1) on his income from property (column 2).

(Note: It is here conservatively estimated that in recent years general taxes levied on tax-paying property have taken one-fourth of the net income therefrom, computed before taxes are paid. This is an indirect tax without any exemptions of 25 per cent on the net income from tax-paying property.

TAXES NOW LEVIED ON TAX-PAYING PROPERTY			LEVY ON NET INCOME PROPOSED BY SENATE BILL 138

The Displacing of Present State Taxes on Real and Personal Property by Senate Bill No. 138--The Income Tax Bill

And Its Eight Companion Bills

If the State Income Tax Bill and its eight companion bills were now in effect, taxes on net income would displace state taxes on lands, town and city lots, and personal property due this spring in the following amounts for each county and each legislative (senatorial) district in the state outside of Cook county:

(Note: Cook county would have its property taxes reduced approximately $12,682,210 if the above measures were now in force.)

County	*Taxes Displaced*
Eighth District	
Boone	$ 63,780
Lake	335,020
McHenry	138,550
Total in District	$537,350
Tenth District	
Ogle	$133,710
Winnebago	343,760

Fruit Growers Meet Good Crop Expected

The annual meeting of the Illinois Fruit Growers Exchange was held at Centralia, Tuesday, May 12. One of the principal topics discussed was the new national co-operative fruit and vegetable marketing plan.

Manager A. B. Leeper is a member of the committee framing the plan to be submitted to the Farm Board at a meeting in Washington in the near future.

The growers are expecting a good crop of peaches, pears and apples. The bloom throughout the fruit producing sections was unusually heavy, and a good set is reported.

C. E. Lindell of McPherson county, Kansas, banker and farmer, recently sold 16 wheat-fed hogs on the Hutchinson market which netted him 96.5 cents a bushel for his 50-cent wheat. In addition to the wheat Mr. Lindell fed oats and tankage.

Review Bills Before 57th General Assembly

I. A. A. Representatives Watch Legislation of Doubtful Value, Oppose Property Tax Increases

AGRICULTURAL measures actively supported by the I. A. A. are making progress before the General Assembly. House Bill 410 (Lucky) which provides that no owner shall be liable for damages in civil suit for the running at large of livestock causing injury to persons and personal property unless such owner having exercised reasonable care to restrain such animals has knowledge thereof, passed the House and has been reported out of the Senate Agricultural Committee with favorable recommendation. Senator Barr of Joliet is handling the bill in the Senate.

House Bill 466 (Tice) which amends the 1915 Co-operative Act to make it co-operative in principle as well as in name, is now on second reading in the House, while House Bill 467 (Tice) which amends the 1923 Co-operative Act has passed the house and received favorable recommendation from the Senate Agricultural Committee.

House Bill 501 (Johnson) which makes the owner of any dog liable for damages sustained by reason of such dog killing, wounding, or chasing livestock, passed both the House and Senate, but has been called back to correct a discrepancy in its title and an illegal provision.

House Bill 451 which limits the use of butter and lard substitutes to 25 per cent in state institutions passed both the House and Senate some time ago.

Other bills of more or less interest to Illinois farmers include H. B. 4 (Davis) which provides for free distribution of limestone from Chester penitentiary as a temporary measure to aid drouth-stricken southern Illinois farmers. This bill passed the House on April 30.

H. B. 228 (Rep. Hunter) which exempts farm machinery and tractors from paying the state motor license fee passed the House several weeks ago. This measure has the active support of the I. A. A.

Several bills would amend the motor vehicle act so as to change the state license fees and classifications of trucks. Senator Dunlap's bill No. 71 would make the license on trucks weighing less than 4,000 lbs. $8.00; 4,000 to 8,000 lbs. $12.00; and 8,000 to 12,000 lbs. $22.50; trailers and semi-trailers weighing 2,000 to 4,000 lbs. $12.00, and 4,000 to 10,000 lbs. $25.00. The Dunlap bill passed the Senate and now lies before the House.

Rep. Henry Allen introduced a new bill H. B. 870, which assesses trucks weighing less than 3,000 lbs. $10.00; 3,000 to 8,000 lbs. $14.00; and 8,000 to 12,000 lbs. $22.50; trailers and semi-trailers weighing 2,000 to 4,000 lbs. $12.00; and 4,000 to 10,000 lbs. $25.00. Mr. Allen's new bill, it is expected, will derive more revenue than Sen. Dunlap's. Allen's previous bill H. B. 139 was identical to the Dunlap measure.

A remedy for the financial plight of school districts unable to pay interest and principal on school bonds under present tax limitations is sought in S. B. 81 (Huebsch). This bill provides for a tax in excess of the 2½% limit for such purpose if and when a majority of the voters of the district give their approval. Rep. Bolger of McHenry county was active in including the referendum provision in the bill. The distressed districts, it is understood, are located mostly in the suburban area outside Chicago and in southern Illinois.

A number of other school measures of doubtful value to farmers are being studied. Following its well known policy reiterated in resolutions passed at the last annual meeting, the Association will oppose legislation which seeks to increase property taxes. The I. A. A. believes that such a position will help bring about a fair and equitable taxing system based on ability to pay.

Publicity Conference at Institute of Co-Operation

A conference for publicity directors and editors of farm organization and co-operative papers will be a special feature this year at the seventh session of the American Institute of Co-Operation, Manhattan, Kansas, June 8-13.

Among the general topics to be considered at the coming Institute, which opens Monday, June 8, are: "Possibilities of Adjusting Production to Demand," "Lessons from the Merchandising Problems of Older Co-Operatives," "Financing and Risk-Bearing for Co-Operatives," "Evaluation of the Work of the Federal Farm Board," and "National Problems of Co-Operatives."

General sessions will be held in the morning and special sessions devoted to individual commodity marketing in the afternoon.

Thomas Represents Advisers

Melvin Thomas, farm adviser of Coles county, represented the State Association of Farm Advisers at the April meeting of the I. A. A. directors in Chicago. B. W. Tillman, president, was unable to be present.

Coultas Hired by Soybean Association

"Hank" Lloyd Goes to Aurora Bank As Farm Manager

WILBUR H. COULTAS, farm adviser in McLean county for the past three years, was employed as active manager of the Soybean Marketing Association at a meeting of the directors in Springfield April 27th.

W. H. Coultas

After graduating from the University of Illinois, Coultas became assistant farm adviser in Peoria county where he served for three years before taking a similar job with Harrison Fahrnkopf, former farm adviser of McLean county. When Mr. Fahrnkopf was employed as director of grain marketing for the I. A. A. in September, 1928, Coultas succeeded him as farm adviser. Coultas was active, along with other central Illinois county advisers, in organizing the Soybean Marketing Association.

Mr. Coultas succeeds J. H. Lloyd, one of Illinois' first farm advisers, who leaves the Soybean Association to become farm manager for the First National Bank of Aurora.

In tendering his resignation, Mr. Lloyd said: "It is with deep regret that I sever a connection of more than 15 years with the Farm Bureau movement in Illinois. In my new work, however, I expect to continue to do everything I can for the best interests of Illinois farmers, and to co-operate with the Farm Bureau which has done so much for Illinois agriculture.

"My desire to spend more time with my family and to enter the field of farm management in which I have long been interested, prompts me to make this new move. I have appreciated the past opportunities in working with the soybean growers of Illinois. I have every confidence that under the competent supervision of the Board of Directors, and the corporate and active managers the organized soybean growers of the state will go on to further achievement in co-operative marketing."

Lloyd expects to take up his new duties around the middle of May. Coultas will leave McLean county June 15. He and his family expect to move to Oak Park.

Nothing tones down a troublemaker so quickly as to run into someone he isn't sure he can lick.

Seek Lower Rates on Peaches

Lower rates on peaches shipped out of southern Illinois to eastern markets are being sought by peach growers of that section.

A meeting to bring about fairer rates was held in the I. A. A. offices on May 1. A. B. Leeper and L. J. Quasey of the I. A. A. met with the group which included growers and railroad men.

The committee appointed by the fruit growers consists of A. B. Leeper, manager of the Illinois Fruit Growers Exchange; H. W. Day, Illinois Horticultural Society; Guy Beauman, Johnson county; H. H. Lamar and J. J. Keith, Union county; and W. S. Perrine and Senator Henry M. Dunlap who have large orchards in Marion county.

It is estimated that 25 per cent of Illinois peaches are hauled out of southern Illinois territory by truck because of the high freight rates. Illinois peaches are carried by railroads at a rate of 85 per cent of first-class freight rates, while Georgia peaches are hauled to market at 47 per cent of first-class rates, it was stated.

Hornbeek Employed As District Manager

L. B. Hornbeek of Winchester, Scott county, is the new organization manager for the sixth district in southeastern Illinois. He succeeds F. M. Higgins, who resigned the first of the year.

Mr. Hornbeek made a good record as a part-time membership solicitor. He has been active in Farm Bureau work in Scott county for many years. Hornbeek is reported to have made 9 per cent interest on the investment in his farm in 1929, which he operated along with his work for the Farm Bureau.

Oil Men Meet

District meetings for directors, managers, and truck salesmen of county oil co-operatives affiliated with the Illinoise Farm Supply Company are scheduled for Tuesday, June 9, Decatur; Wednesday, June 10, Peoria; and Thursday, June 11, DeKalb.

John Krawetz, chief chemist of the Phoenix Chemical Laboratory, and Ralph Matthews, vice-president of the Battenfeld Grease and Oil Corporation, will speak to each group.

Greater uniformity in handling and selling SERVICE petroleum products is being brought about as a result of these meetings.

Advice to advertisers: When everything else fails, try improving the product.

I. A. A. Directors Attend Mrs. Sorrells' Funeral

Mrs. Sorrells, wife of Sam Sorrells, I. A. A. director from the 21st district, was buried at Raymond on Sunday, April 19.

The following resolution expressing the sympathy of the Board of Directors to Mr. Sorrells was passed at the April meeting:

WHEREAS, the Board of Directors of this Association has learned with profound regret of the death of Mrs. Samuel Sorrells, the beloved wife of our esteemed associate and fellow member of this Board of Directors:

RESOLVED, that the Board of Directors, deeply sensible of the loss sustained, extend their associate and fellow member, Samuel Sorrells, its sincere sympathy, and shall and hereby does note in its records its tribute and appreciation of her noble character and service rendered in her community and to humanity; and

BE IT FURTHER RESOLVED, that a copy of this resolution be tendered to the bereaved family.

The president appointed the following committee of three to attend the funeral: W. L. Cope, Geo. F. Tullock and Charles S. Black.

LaSalle-Peru Producers Keep Milk at Home

The Tri-City Dairymen's Association of LaSalle, Peru and Oglesby is maintaining a price level of $2.65 per cwt. for 3.5 per cent milk because members of the organization are keeping all milk at home that dealers cannot handle for the wholesale and retail fluid trade.

It is reported that the surplus amounts to about 15 per cent of the total supply. The extra milk is being used to feed pigs and calves on the farm.

Picnic—Fish Fry

A picnic and fish fry is being arranged by District Organization Manager L. F. Brissenden for Farm Bureau presidents, executive committeemen, farm advisers, and their families, in the 14 counties comprising Brissenden's organization district in Southern Illinois.

The event has been scheduled for Saturday and Sunday, August 22-23, and will be held at Dixon Springs, a well-known summer resort in Pope county between Vienna and Golconda. George Metzger, J. C. Spitler and other speakers will be present.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. Handling Bad Bills

I. A. A. representatives are watching a number of bills before the legislature which for various reasons are undesirable from the farmer's standpoint. Several of these propose or pave the way for property tax increases to which the Association is unalterably opposed. One or two have other features threatening the rights and interests of farmers.

Our position on these measures has been and is being quietly made known. Obviously it would be poor policy to widely announce such opposition and thereby provoke reprisals which might endanger constructive legislation the Association is actively sponsoring. Particularly is this true where bills lie dormant in committee with no apparent chance of passage. Much quiet but valuable work is done in and out of legislative halls by those who seek their reward in accomplishment rather than in public acclaim. Sometimes it's smart to be silent.

The Producers' Responsibility

ON May 4 the Soybean Marketing Association had received stock subscriptions in the amount of $21,600 from members in the central Illinois soybean territory.

Soybean growers believe in financing their own marketing operations. They will place their co-operative on an independent financial basis just as soon as possible.

It is generally recognized that permanent success in co-operative marketing can be attained only when producers believe in the principal strong enough to support their organization with their finances and products. Cheap money loaned by the government may help but will not make the difference between success and failure. The responsibility for success lies with the producers. They alone can determine what the future of this form of marketing will be.

Power Lines on Farm Lands

TO what extent does a high power line erected across a farm depreciate its value?

This is a question constantly coming up in arguments over power-line routes and damages asked of utility companies by landowners. That a power line built across a farm does lower its value is beyond question. But how much? To be effective testimony in establishing such damages must be based on fact. Do any of our readers know of farms so encumbered which have changed hands recently? If so, how much less was paid because of the high line? The direction and placement of the towers and wire across the land naturally influence the damage sustained.

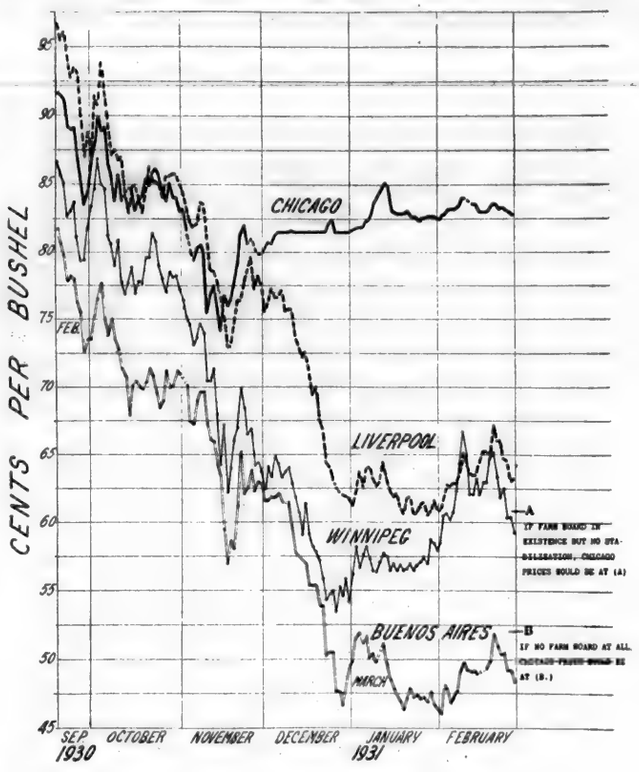
If you have had experience farming around towers or poles, we would like to hear from you. Write the I. A. A. RECORD, 608 So. Dearborn St., Chicago.

Organization Pays

According to the LaSalle County Farm Bureau, farmers in that county through whose land a natural gas pipe line is to be constructed, will receive nearly $32,000 more for damages and property rights than they would have received under the original contract offered them.

The revised contract was secured for landowners by the Farm Bureau with the assistance of the Illinois Agricultural Association.

The old contract provided for payment of $1 per rod "and reasonable damages," whereas the revised agreement stipulates payment on the basis of $1 per rod for right-of-way and "$4 per rod for damages."



Farm Board and Wheat Prices

WHAT has the Farm Board and the Grain Stabilization Corp. meant to the wheat grower and wheat prices?

The accompanying chart received from Secretary of Agriculture Arthur M. Hyde will help answer the question. In September, 1930, before the Grain Stabilization Corp. became effective, note that the Liverpool price at 97c was higher than the Chicago price at 92. In February, 1931, the Chicago price was 82½c, while the Liverpool market had dropped to 63c.

The stabilization operations backed by the Farm Board are credited with averting hundreds of bank failures and farm bankruptcies in the wheat growing sections. Now that last year's crop is largely out of farmers' hands and either processed or owned by the Stabilization Corp., support has been removed from the market. As a result prices have drifted lower. The support given the grain market by the Farm Board when a crash was imminent, is likened to the support given the stock market by the big banks in the fall of 1929.

More favorable wheat prices are now dependent on increased demand from European countries which have been using home grown grains almost to the exclusion of imports, improved buying power by consumers in this country, and lower domestic production.

Enforcing the Oleo Law

ENFORCEMENT of the state law against selling yellow colored oleomargarine is reported from several counties where violations have been discovered.

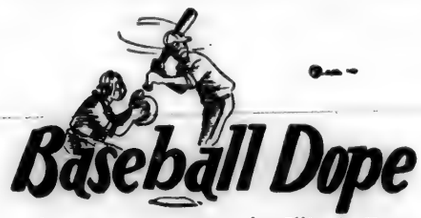
This law was placed on the statutes for a good purpose, namely, to protect butter, a home-grown product, against the unfair competition of a product made largely from imported vegetable oils. There is little objection to the sale of uncolored oleo, particularly that made largely from American animal and vegetable fats. Dairymen have no desire to curtail the market for beef fats, cottonseed oil and similar products originating on the farms of this country. They do rightfully insist that such products be sold for what they are, that imports of cocoanut oil from the Philippines be further restricted. No one can assail such a policy, for it is in line with protection industrial interests are now enjoying.

The Wool Pool

ILLINOIS wool growers have an opportunity to cooperate with the National Wool Marketing Corp., which last year handled 38 per cent of the entire clip in the United States.

An initial payment of 11 cents per pound will be made to the growers on delivery, the balance to be paid when the crop is sold. In some localities last year the price paid by local buyers was no higher than the initial advance of the co-operative. In 1930 it is reported Ohio wool growers received a total of 28 cents per pound for their high grade wool. In Illinois, where wool growing is largely a sideline, the average quality is not so high as in Ohio. But growers who pool are assured of getting all the market affords less the moderate handling charge. It looks like good business to patronize this co-operative setup where every producer is paid on honest weights in line with the quality of his product.

To Meet at Bloomington



THE first annual meeting of the Illinois Livestock Marketing Association, newly organized state co-operative, will be held at Bloomington on Thursday, May 28. Election of directors and consideration of plans and policies will be the principal order of business at the meeting which will begin at 10 A. M. in the McLean County Farm Bureau assembly hall.

Speakers will include P. O. Wilson, Chicago, manager of the National Livestock Marketing Association; D. L. Swanson, Chicago, manager of the Chicago Producers Commission Association; and Ray E. Miller, director of livestock marketing. Henry Parke of Genoa is temporary president of the association. Live stock growers from all sections of the state are expected to gather for the meeting.

Grain Corp. Growing

The business of the Mid-West Grain Corp. continues to improve and during April 410 carloads of grain were handled.

Since Nov. 1 when the regional began operating on its present basis, grain has been received from 134 different points in 40 Illinois counties. This satisfactory growth indicates the confidence grain producers and co-operative elevators over the state have in their own sales agency.

As we go to press the Illinois Farm Bureau Baseball League is about to open the 1931 baseball season—the eighth since its organization in 1924. Baseball schedules have been made up in the eight divisions and the first games will be played on May 16.

A rearrangement of the districts was made necessary because of the several new teams joining the league. The new divisions are as follows:

DIVISION I	DIVISION V
JoDaviess	Henry
Stephenson	Knox
Carroll	Henderson
Lee	McDonough
DIVISION II	DIVISION VI
DeKalb	McLean
LaSalle	Champaign
Kendall	Douglas
Will	Logan
Grundy	Macon
DIVISION III	DeWitt
Kankakee	DIVISION VII
Iroquois	Menard
Livingston	Cass
Ford	Morgan
	Sangamon
DIVISION IV	DIVISION VIII
Stark	Christian
Peoria	Montgomery
Woodford	Macoupin
Tazewell	Greene
Marshall-Putnam	

Games in most cases will be played Saturday afternoons, 2:00 P. M., although a number are scheduled for July 4. Games announced for the coming weeks where definite locations have been chosen are as follows:

May 15—Logan vs. Macon at Colony Grounds, Lincoln.
May 16—Douglas vs. Champaign at Twilight Park, Urbana.
May 16—Menard vs. Sangamon at watch factory diamond, Springfield.
May 23—Douglas vs. Macon at Tuscola.
May 23—Logan vs. McLean at Normal University diamond.
May 30—Douglas vs. McLean at Tuscola.
May 30—Champaign vs. Macon at Decatur.
June 6—Champaign vs. Logan at Twilight Park, Urbana.
June 6—Macon vs. McLean at Normal University diamond.
June 13—Douglas vs. Logan at Lincoln.
June 13—Champaign vs. McLean at Normal University diamond.
June 13—Morgan vs. Sangamon at watch factory diamond, Springfield.

At a meeting of the State Arbitration Committee at Springfield, May 5, a ruling was adopted that to be eligible hired men must be regularly employed for the season. In addition they must be Farm Bureau members. The League seeks to discourage the employment of men for their ability as players.

Indiana Farmers Are Co-Operators in Buying

Indiana farmers are buying petroleum products co-operatively through bulk plants in 48 counties. More than 35 of the 48 plants have been established during the past 18 months.

There are purchasing organizations located in 87 of the 92 Indiana counties all of which are affiliated with the Indiana Farm Bureau Co-Operative Association. All kinds of farm supplies are bought locally, and the profits are distributed at the end of the year on a patronage basis.

TO LIMESTONE USERS

The I. A. A. Limestone-Phosphate Department calls attention to the change in the method of buying limestone from contract companies. Farm Bureau members who purchase from contract companies should now pay their bills in full, without discounting, and take the certificates they receive with their bills direct to the Farm Bureau office for credit. Much trouble, delay and annoyance is involved if purchasers fail to observe these requirements.

Not 1c for Pills

"My slogan for American housewives and mothers has been for many years: 'Millions for Prevention and Not One Cent for Pills,'" writes Fannie M. Brooks, health education specialist of the University of Illinois, correcting a quotation in the February issue of the I. A. A. RECORD. "No one advocates the use of cod liver oil more than I do."

"I was glad to see the picture of Dr. Hopkins' limestone day demonstration in the I. A. A. RECORD," writes W. S. Storment of Salem in a letter to J. E. Whitchurch, Saline county adviser.

"That picture was taken Aug. 16, 1918. It brought back to mind how I happened to be there. I was Marion County Food Administrator and was asked to come out and furnish the sugar for the coffee for the dinner."

10 Per Cent of Nat'l. Income Goes for Taxes

The federal office of education reports that more than 23 per cent of all tax revenue is now expended annually for public school instruction. In addition to spending more than $2,180,000,000 for elementary and secondary education annually, more than $5,486,000,000 are invested in buildings, grounds and equipment.

Federal, state and local taxation is in excess of $9,250,000,000 annually in the United States. This is 10 per cent of the national income.

Meat Packing Costs

The American meat packing industry with an annual volume of business in excess of $3,390,000,000 pays a little more than 86 cents of every dollar of the plant value of its finished products for materials, principally live stock, according to the American Meat Packers Institute.

The remaining 14 cents covers all charges such as wages, salaries, interest, rent, depreciation, taxes, insurance, advertising, cost of research, and manufacturing profit.

Meet at Monmouth

Railroad, pipe line, and other public utility questions received principal consideration at the 14th district meeting, Monmouth, on March 18. L. J. Quasey, director of transportation, led the discussion on these problems.

Other matters considered were livestock and organization.

The next district meeting is scheduled for June 2 at Monmouth.

The Story of the Spider

While Mark Twain was editor of a Missouri paper, a subscriber wrote to him saying he had found a spider in his paper and asking Mark whether this was a sign of good or bad luck. The following was the reply of the well-known humorist:

"Old Subscriber: Finding a spider in your paper was neither good luck nor bad luck for you. The spider was merely looking over our paper to see which merchant is not advertising, so that he can go to that store, spin his web across the door and lead a life of undisturbed peace ever afterward."

TEN CAR TRAIN OF LIMESTONE TO ONE MAN
Left to right: Former County Adviser W. E. Foard of Bond county, G. C. Bauer, owner, and Geo. Bauer, a son, standing along the C. B. & Q. right-of-way through Mr. Bauer's farm just after unloading.

"I AM only sorry we did not have the Farm Bureau 25 years ago to show us the value of

Limestone."

—G. C. BAUER,
Bond Co., Ill., member.

Make the Farm Pay with Limestone

LIMESTONE **MUST** be a good investment or G. C. Bauer, gray-haired Bond county farmer, wouldn't have bought 600 tons in one order. Out of the experience and wisdom of his 60 years Bauer says: "I would have been much farther ahead financially had I begun 15 to 20 years ago to lime my land."

After watching the crop yields increase on his first 50 acres of "lime sweetened" soil he decided to wait no longer to treat the rest of the farm. The 600 ton order was the result.

I. A. A. CHEMIST IN TENNESSEE
Laboratory tests insure honest quality and price according to test.

Phosphate for Clover

LIMESTONE and **ROCK PHOSPHATE** together are the champion soil builders. Clover, alfalfa, corn and small grains thrive where they are present. Phosphorus in the soil makes possible early-maturing higher quality grain for sale at top prices. Bigger crops lower per bushel costs. ***NOW more than ever your soil needs limestone and phosphate to make the farm pay.***

ORDER from your County Farm Bureau to ***get guaranteed quality*** at a ***discount*** to members only.

April Good Month in Auto Insurance Sales

High Agents and Counties Announced, Prizes Awarded

The Illinois Agricultural Mutual on May 1 had received 27,468 applications for automobile insurance. The total for April was 606. A total of 1,033 applications came in during March and April.

The 10 high counties last month in applications are as follows:

Cook	43	St. Clair	21
Champaign	34	Vermilion	17
McLean	31	Iroquois	16
Mercer	21	Logan	16
Will	21	Morgan	16
Madison	20		

In the prize contest (umbrellas) for the month, the following agents won:

H. O. Hinkley, Bond Co.; K. W. Cleland, Boone Co.; Roy Mitchell, Champaign; Cook County Farm Bureau; E. McClaughey, Frank Diekman, Cook Co.; F. W. Case, DeKalb Co.; C. T. Jessen, DeWitt Co.; D. J. Auble, DuPage Co.; H. O. Henry, Effingham Co.; Wm. E. Hedgcock, Arthur Welmeier, McLean Co.; Mark Foster, Mercer Co.; L. T. Oxley, Morgan Co.; J. D. Smith, Sangamon Co.; H. A. Bonser, Shelby Co.; D. P. Robinson, Henry Co.; T. Wesley Reed, Iroquois Co.; F. H. Wilson, Gerald Dickson, Kane Co.; Bertram Abney, F. L. Thies, Lake Co.; F. W. Peckham, Lee Co.; C. E. Hopkins, Livingston Co.; L. R. Welk, Logan Co.; Chris Bunte, Madison Co.; R. F. Shaffer, St. Clair Co.; Edw. L. Dillon, Vermilion Co.; A. A. Miller, Wayne Co.; Wm. C. Linker, Whiteside Co.; E. L. Wilson, Will Co.; T. E. Benton, Williamson Co.; H. R. Hitchcock, Winnebago Co.

The following agents won electric clocks:

Roy Mitchell, Cook County Farm Bureau, Clifford T. Jessen, T. Wesley Reed, Fred H. Wilson, Bertram Abney, C. E. Hopkinis, L. R. Welk, Wm. E. Hedgcock, Mark Foster, L. T. Oxley, J. D. Smith, R. F. Shaffer, Edw. L. Dillon, E. L. Wilson.

The 10 high agents for the month are:

Roy Mitchell, Champaign	26
Cook County Farm Bureau	18
C. E. Hopkins, Livingston	16
R. F. Shaffer, St. Clair	14
Edw. Dillon, Vermilion	14
Wm. Hedgcock, McLean	13
L. T. Oxley, Morgan	13
L. R. Welk, Logan	12
Mark Foster, Mercer	12
E. L. Wilson, Will	12
Clifford Jessen, DeWitt	12
E. McClaughey, Cook	11
H. O. Henry, Effingham	11
T. Wesley Reed, Iroquois	11
Fred Wilson, Kane	11
Bertram Abney, Lake	11
J. D. Smith, Sangamon	11

The counties in which more than 75 per cent of the Farm Bureau members carry automobile insurance in the Illinois Agricultural Mutual are as follows:

DuPage	118%
Cook	110%
Winnebago	95%
Clinton	79%
Bond	77%
Will	77%
St. Clair	76%
Wabash	76%
Montgomery	75%

Members who have two or more cars and trucks insured account for the high percentage in DuPage and Cook counties.

Employers' Liability

APPLICATIONS for employers' liability insurance received during April by the Illinois Agricultural Mutual brought the total to 1,654 since the service was initiated.

The 10 highest counties for April are: McLean, Morgan, Grundy, Henry, Logan, Tazewell, Will, Winnebago and Woodford.

The high agents for April were: Wm. E. Hedgcock, McLean; L. T. Oxley, Morgan; Wm. E. Freitag, Tazewell; Paul Brown, Grundy; Homer Hitchcock, Winnebago; L. R. Welk, H. W. Bradshaw, Woodford, and D. P. Robinson, Henry.

Recent farm accidents reported are as follows: *DuPage county*—shelling corn with power sheller—employee had bar in hand. Bar caught in drive chain striking employee across face cutting both cheeks. *St. Clair county*—employee broke thumb while driving steel posts. *McLean County* — employee kicked by cow—possible rupture.

V. Vaniman, director of insurance service, announces that any member of any unincorporated association such as threshing rings, stallion rings, bull associations, etc., is liable for his total worth. Insurance against accidents to employees of such associations can be had at very moderate cost.

Heroine School Teacher Held Country Life Policy

Helen Scott of Atkinson, Henry county, the brave school teacher who dashed onto a Rock Island railroad trestle recently to save her pupils from an approaching passenger train, was a policy holder in Country Life Insurance Co.

Miss Scott succeeded in saving one child, but she and two others perished. Her $1,000 policy was the first double indemnity claim to be paid by the company. She was just 26 years old and lost her life on her birthday while on a picnic with her pupils.

Editor, I. A. A. RECORD:

"When the I. A. A. RECORD was a little four-page paper we seldom noticed it It usually went in the waste basket without being read. But since the paper has been enlarged and made more attractive, we look forward to it each month, and now the whole family reads it from cover to cover."

Everett G. Reynolds,
Morgan county, Illinois.

Lee County Member Mangled by Tractor

Ed Hanson, a loyal Farm Bureau member of Lee county, Illinois, was accidently killed while plowing with his tractor recently. Gordon, his son, working at the opposite end of the field, saw the tractor going down the road without anyone on it and ran over to investigate. He found his father's body mangled between the plows. Mr. Hanson apparently had fallen off the tractor while trying to adjust it when still in operation.

When they learned of his untimely end, 36 neighbors of Mr. Hanson came over to assist the widow in completing the seeding and planting that was under way. Ten tractors and many teams were put into operation. The neighbors completed the planting and seeding, and hauled out 80 loads of manure.

The sad accident was a shock to the community, and the Farm Bureau loses an enthusiastic booster in Mr. Hanson. His daughter, Marion, is graduating this year as a nurse from the Augustana Hospital in Chicago.

Country Life Business Increases 60 Per Cent

Country Life Insurance Company made a new record in the life insurance field when it wrote 60 per cent more insurance during April than the preceding month, and 60 per cent more business than was written in the same month last year. Since the first of the year the company has written $5,725,000 of life insurance.

Debates Announced

A series of seven debates between Manager L. A. Williams and Donald Kirkpatrick, legal counsel for the I. A. A., will be staged during May and June in the counties which placed highest in life insurance written during April. Topics of widespread interest to farmers will be chosen for the series of debates to be announced shortly.

The seven high counties where the debates will be held are: Cook, McDonough, Bond, Madison, Randolph, DuPage and Clay. The first two debates on subjects to be announced later will be held at Macomb on May 20 and Greenville on May 21.

More than $2,000,000 of "contest" business written in April came in from agents.

Lloyd G. Rodman, a graduate of the University of Illinois who served four years as teacher and principal in the DeLand high school, has been employed as assistant farm adviser in McLean county.

An Open Road for Elevator Managers

By Lacey F. Rickey
Grain Marketing Specialist, University of Illinois

DID you ever stop to think why it is that few man voluntarily and consciously take up country elevator management as a life work?

L. F. Rickey

A large majority of country elevators are in small towns. Often the elevator manager handles more business than anyone else in the town. He is a man of weight and influence in his community. When the necessary living expenses incident to living in a small town are taken into consideration, he receives what totals a very respectable salary. On the whole, his work is pleasant. He has the advantage of living close to his work. He is given a large degree of responsibility in guiding the affairs of a good-sized business. He works hard, to be sure; and at certain times must put in long hours. However, all things balance up to an agreeable total, and when once in the work, if the man is at all adapted to the position, he ordinarily stays with it for a long time.

Blind Alley Job

Where then is the fly in the ointment? As co-operative grain marketing has been organized, country elevator management has been a blind-alley job. A good average man could, if he were diligent, keep the elevator business going in fair shape and be practically assured of his job for a long time. Under the management of a man with more than average business ability, the elevator would prosper, and increases in prestige and salary would be forthcoming.

Ladder Now Provided

But the physical limitations to volume of grain which might in any way be induced to come to any one country elevator precluded the possibility of any very large salaries being paid. His contacts were not such as to bring his abilities to the attention of larger employers who could make full use of his talents and hence pay larger salaries. He had a good job as small-town jobs go, but there was no ladder by which he could climb into a better position in the business world. In order to get into a field of larger opportunities it was necessary to back out of the blind-alley which led nowhere and start all over; and that is a painful process.

This has all been written in the past tense. Why? Because a ladder is now being provided by which the efficient manager of a local co-operative elevator can climb to enlarged fields in his own line of work. The ranks of the real grain men needed to operate the regional and national grain co-operatives should and will be recruited from the managers of local co-operative elevators who have demonstrated their sympathy with and understanding of the fundamental principles of co-operation, together with a knowledge of grain and business ability of a high order.

The young man with ambition may now take the management of a local co-operative elevator with the assurance that when he has proven his ability he will have the same chance as the young fellow who enters other lines of industry, to advance into positions where his abilities may be fully used, where he may take just pride in his enlarged accomplishments, and where the honor and reward going to men who do things will be his.

The Bogey Men

Bogey-men have been set before the managers by those having their own interests to serve. The development of regional co-operatives would do away with the necessity of business and grain handling ability at the local stations and reduce the managers to grain weighers, with salaries to correspond. A little reflection will show the falsity of this claim. The same local management ability will be required. The services rendered to him will enable him to do a better job of handling his local station. The only difference will be that when he does send his grain to the terminal market, as he has always done, he will turn it over to someone who is vitally interested in the success of his local elevator rather than merely in the commission to be obtained from handling the shipment.

Ready for Next Step

And in addition to this, he is part and parcel of the terminal organization himself. As expansion and promotions occur, his success in handling his part of the business will suggest to those in charge of operations in the larger field that here is the man who has demonstrated that he is ready to take the next step up the ladder of successful achievement.

Only a few years ago many people watching the development of Japan and China saw therein a "yellow peril." Far-sighted business men, seeing instead a "golden opportunity," shaped their policies to meet it and prospered accordingly. The large volume of golden grain concentrated under the operations of a nation-wide co-operative marketing organization may mean to the local manager either a yellow peril or a golden opportunity, accordingly as he avails himself of the possibilities thus presented. A blind-alley job is being changed to one which gives the local manager "some place to go."

This Story Is True

And, as Chairman Legge says, "This story has the further advantage of being true." I speak from experience. I was a country elevator manager for some time before I realized that I had a good job which led me nowhere in particular. It was a momentous decision when I gave up that job to back out of the blind-alley and start over. I have never been sorry that I made the decision. I have been able to be of more service to myself, to my family, and to society in general. But I lost some valuable years. I wish that there had been present then the opportunity to climb out rather than the necessity to back out.

Start Membership Work

Farm Bureau membership sign-ups will be conducted in Logan, McLean, Hancock, McDonough, McHenry, DeKalb and Warren counties within the next few months. The organization staff of the I. A. A. is assisting the local committees in all these counties in getting ready. All indications point to successful membership drives, reports Geo. E. Metzger, director of organization, for farmers realize the need for organization now more strongly than ever.

McLean county is out to make a new record for the largest membership sign-up in one day. Tazewell county now holds the record with 1,288 members added to the Farm Bureau roll in a 24-hour period.

On March 15 the index of farm prices stood at 91 per cent of the pre-war level. On the same day a year ago the index was 126 per cent.

How you can QUIT FARMING AT 65

and retire on a guaranteed monthly income for life

EVERY normal man looks forward to the time when he can do as he pleases: knock off work, go south for the winter, take fishing and hunting trips, enjoy life.

At a surprisingly small annual investment you can guarantee a future income ample to provide for many comforts that make life after 60 or 65 so enjoyable.

What the Plan Does for You

COUNTRY LIFE's retirement income plan requires only 20 annual payments when the policy is paid up and your income begins.

For example, you take out a policy at 35, make 20 annual payments, at the end of which your policy is paid up, and you get an income of approximately $40 per month until age 65.

At age 65 your income jumps to $80 per month, which is guaranteed for life. The $80 monthly instalments are further increased by interest dividends to be apportioned annually. The dividends it is estimated will bring the instalments up to approximately $100 per month.

Your Family Protected

IN THE event of your sudden death, the policy guarantees $12,500 to your beneficiary. The annual premium payments constantly increase the cash value of your policy, on which you can borrow if necessary.

The plan has other benefits. It provides money to pay off the mortgage on your farm or home . . . money to educate your children, money for a trip abroad, money for dozens of other things you have always wanted.

ALL these benefits are made available to you at once with your first premium payment. Annual instalments are small enough to be a burden to no one.

Write for the Facts

Mail the coupon and get full information about Country Life's retirement income plan. Country Life is Your Company, organized to provide highest security, legal reserve protection at low net cost. *Write today and get the facts.*

The Canadian Wheat Pool

Condensed from The New Freeman (February 4, 1931) by Reader's Digest

W. B. Herbert

BEFORE 1923 (the period of war-time regulation excepted) the business of wheat marketing in Canada was something of a racket. The wheat producers—some 275,000 of them scattered over more than 200,000 square miles—were privileged to extract the grain from the soil. Sometimes they received a living wage; sometimes they didn't. But the people who relieved them of their grain and handled it from warehouses grew fat. Wheat millionaires and sub-millionaires appeared, lots of them. But not on the farms. The grain barons of Winnipeg and other cities developed the most pernicious commercial oligarchy in Canada's history. For nearly 40 years their wealth and power increased while the poor devils who grew the wheat struggled to keep the sheriff beyond the fence.

Shake Off Despair

Small wonder, then, that a great squawking ensued when the worm turned. In 1923 the wheat farmers shook off the despair that had been welded to them. They organized pools —co-operative associations—in Alberta, Saskatchewan and Manitoba, to gather their wheat together and sell it. The movement started at the bottom; right on the farmsteads and in the small villages. It looked back upon four decades of unhappy exploitation by the private marketing trade, and was impelled by a grand spirit of sink-or-swim together. It had not a red cent of capital, but of new-born spirit there was ample. The aims of the movement were stated in simple terms: to attempt to sell wheat in an orderly manner, i.e., as actual demand for real wheat arose; to try to eliminate the widespread gambling in fictitious wheat which was enervating the industry; and above all, to return to the farmer every possible *sou* which accrued from the sale of his wheat.

140,000 Sign

A contract was prepared wherein the farmer agreed with his neighbors to deliver his wheat to a common agency of their own creation during a term of years. More than 140,000 wheat growers signed the contract. The organization was completed while the grain trade was still blinking and, before the public realized what it was all about, the organized farmer was in the game. During the past seven years these Canadian farmers have pounded their way to the front, battling every inch of the way against the unscrupulous opposition of the grain trade gang. While the provincial pools were busy attracting new members, building up their own elevator system of 1,600 country houses and 12 terminals, collecting more than a billion bushels of wheat, distributing more than a billion and a quarter dollars among their members, creating circulating libraries and working to improve the quality of Canadian grains, the Central Selling Agency concerned itself with establishing branch offices in New York, London, Paris and Buenos Aires, and agencies in every important wheat-importing country.

Costs Were Low

Operating and overhead costs of the entire system were amazingly small, and the excess earnings from elevator operations which were returned to pool members fairly staggered even the most rabid pool enthusiasts. In its balmiest year the turnover of the Central Selling Agency exceeded $323 million, and its sales of wheat in 20 different countries totaled more than 222 million bushels.

The wonder of it all is that this mighty business is owned and controlled, and was built up, by farmers; by honest dirt-farmers "with no knowledge of big business." There are no silent partners, no idle shareholders. The directors of the pools are all pool farmers, elected by their fellow members. They receive no salaries; only allowances while occupied with pool matters. The whole thing belongs to the farmers. It is an outstanding illustration of triumph by the under-dog through peaceful methods.

What About Present

At this point someone may ask ominously: "What about the present situation?" Certainly the present situation does splash the picture. Up to last year the wheat pools stroked their boat without financial assistance from any government. Last year, however, they were caught, along with all other grain-marketing agencies on this continent, in the disastrous decline of prices. Each of the prairie pools applied to its provincial government for a guarantee of its financial obligations to the banks, based on adequate security in the form of $30,000,000 worth of elevator facilities.

Since the granting of the guarantees, even darker days have fallen upon the grain markets. The price of wheat has been more than halved; and it is now obvious that the position of the pools with the lending banks is such as to necessitate calling in the government guarantees to the amount of some millions. Already the pools have instituted plans for the repayment, over a period of several years, of any amount which the governments may be required to pay to the banks. The attitude of the pools has inspired widespread admiration. The pool has suffered a body blow; but it is not whining for the governments to pay its debts. It is simply asking them to give it a helping hand until the worst of the storm is over. The federal government of Canada recently granted to the manufacturing interests, tariff protection that smells to high heaven. And yet some people are complaining because the organized farmers, who are the backbone of the nation, ask that some of the blessings of government be turned their way for a short period.

"Kick 'im, 'arry!"

While the wheat pool has experienced serious difficulties in the past year, the attitude of the old established grain trade has been similar to that of the cockney who said: "Kick 'im, 'Arry! 'E's still breathin'!" Skullduggery has been practiced in the markets to depreciate the value of the pool's wheat supplies and weaken its financial position. All the misfortunes of the land—unemployment, traffic stagnation, retarded collections, decline of export trade, general depression — have been placed on the pool's doorstep, while the real fathers of these unwanted children have been kept in the background.

The wheat pools of Canada, being comprised of human beings, have made mistakes and have been flayed mercilessly for them. But today, when the prices of agricultural products are such as to involve a crisis for the rural community, the pool is in the heat of the battle for economic and social rights which are essential to a satisfactory standard of living on the farm; rights which the farmer could not hope to gain through his individual efforts.

Spirit Lives

The Canadian wheat pool is still pledged to the principle of co-operative self-help and still convinced that the

Tom Campbell Gives Farm Board Credit

"Few people realize the real good that the Federal Farm Board has accomplished to date," says Thomas D. Campbell, one of the largest wheat growers in the United States, in a recent interview in the New York Times. "It undoubtedly has saved many farmers from bankruptcy, and they, in turn, have prevented the liquidation of banks in their community; and industry as a whole has profited from the Farm Board. I firmly believe that had Mr. Legge not supported the commodity market last December there probably would have been a $10,000,000,000 crash in one day in the stock market.

"We are now experiencing the most serious industrial depression in our country since 1873. Still, we have had but very little disturbance. The entire world is disturbed. Most of Europe is in revolt. Two-thirds of South America has changed hands within the last six months. Still the United States has maintained an even keel.

"There must be some fundamental reason for this fact. It is obvious that it can be credited to one factor only, namely, the activity and foresight of the administration in anticipating these conditions and eliminating their seriousness by proper governmental assistance at these times, and it is equally obvious that the activity of the Federal Farm Board has been no small factor in the destiny of our economic condition."

Missouri Grain Men Organize Co-Operative

The Missouri Grain Growers, Inc., organized by the Farm Bureau, Farmers Union and farmers' elevators of that state will soon become a stockholder of the Farmers National Grain Corp.

R. W. Brown, state Farm Bureau president, was elected president of the new grain co-operative, T. H. DeWitt of the State Farmers Union was chosen vice-president, and M. R. Miller, State Farmers Union secretary, was named secretary-treasurer.

Credit Corporations Aid to Country Bank

The operation of an agricultural credit corporation as a supplement to local credit facilities will enable the country bank to maintain a more profitable loan and investment policy so as to increase the prosperity of the community, according to B. C. Powell, a member of the National Advisory Loan Committee.

The Greatest Necessity

"THE farmer is suffering chiefly today from a diseased system of distribution all along the line. It costs him too much to market his products. It costs him too much to purchase his necessities. He sells in a wholesale market and buys in a retail market. He suffers because of the distribution of the national income and of the tax burden. That word 'distribution' covers a multitude of injustices and the only way to solve these injustices is through the complete and thorough organization of agriculture so that the farmer can compete with the other organized classes. If farmers would realize that the organization of agriculture along sane lines is the greatest necessity of our times, they would forget the bunk of the politicians and they would not let the enemies of organization stop them until the job was done. Until agriculture is organized, it will continue to be at the mercy of the other organized classes."

(Editorial, The Farmer, St. Paul, Minn.)

One Per Cent Made On Investment in '30

An analysis just completed on 2,300 records kept by farmers in the University of Illinois farm accounting service reveals that the account keepers last year averaged about 1 per cent on their capital

This is not as bad as in 1921, when account keepers in central Illinois suffered an actual net loss, reports R. R. Hudelson. The rank and file of farmers, he believes, probably did have a net loss last year, since those co-operating in the management service make higher earnings than the average of all farmers. Their advantage usually amounts to about 2 per cent of the total investment, or nearly a thousand dollars a farm for central Illinois.

The average farmer's actual net loss on last year's operation means that he has been allowed only $600 to $720 for wages. He did not earn enough to pay interest on borrowed capital to say nothing of paying interest on his own capital invested in the business. The heavy hog-producing sections of the state showed relatively higher farm incomes than the grain-selling areas.

Our first thoughts are not always our best thoughts.

How to Organize a Credit Corporation

The advisability of organizing county credit corporations is being considered in Iroquois, Adams, and Marshall-Putnam counties.

The Federal Intermediate Credit Bank of St. Louis informs the RECORD that credit corporations may be organized in Illinois under the general law by three or more persons.

The successive steps in organizing a local credit corporation are as follows:

a. Obtain a list of subscribers to the capital stock of the proposed corporation.

b. The subscribers meet as soon as sufficient capital has been subscribed, elect directors to manage the affairs of the corporation, and adopt by-laws.

c. The directors meet immediately after adiournment and elect officers.

d. After the officers are elected, the subscribers should then pay into the organization the amount of stock they have subscribed. At least fifty per cent of the amount subscribed must be paid in, in cash.

e. The directors then sign the Articles or Certificate of Incorporation in duplicate and acknowledge the same before an officer authorized to take such acknowledgments.

f. The certificate, in duplicate, is then sent to the Secretary of State at Springfield, Illinois. Upon receipt of this certificate, the Secretary of State will attach his certificate to one of the copies and return it to the corporation.

g. When the copy of Articles and the Secretary's Certificate are received, they are to be taken to the Recorder of Deeds in the county of domicile of such corporation for record.

h. After these papers are a matter of record, the directors meet again and upon passing of proper resolution, make application to the Federal Intermediate Credit Bank of St. Louis for the rediscount privilege. The resolution and all papers incident to making the application will be furnished by the bank. The application is to be accompanied by at least Ten Thousand Dollars ($10,000) of United States Government or Federal Land Bank Bonds to be held as collateral by the Federal Intermediate Credit Bank. A complete list of the papers necessary for the purpose of making this application acceptable is to be found under Paragraph Three. It is essential to have the advice of a competent local attorney.

Uncle Ab says farmers fight too much among themselves; milk versus coffee; sugar versus tobacco; meat versus vegetables; yet farmers raise them all.

Volume of Cream Handled Affects Per Pound Costs in Produce Associations

Farm Bureau Members Continue Patronage to Co-Operatives, Figures Show

THE influence of volume on costs of handling cream by local co-operative associations is clearly illustrated in the following records taken from the books of the Schuyler County Produce Association:

THREE YEARS' RECORDS ON COUNTY PRODUCE ASSOCIATION

	1928	1929	1930
Lbs. Butterfat from Farm Bureau Members	44,091.5	50,173.9	43,743.5
Lbs. Butterfat from Non-Farm Bureau Members	26,059.5	32,403.5	12,947.7
Lbs. Butterfat from Floaters (signed no agreement)	8,277.6	11,337.1	6,119.5
Total	78,428.6	93,914.5	62,810.7
Total Trading Income	$5,383.14	$5,219.28	$3,611.15
Total Expenses	3,314.35	3,169.53	3,254.01
Net Profit	$2,068.79	$2,049.75	$ 357.14
Expenses per lb. fat	3.5c	2.5c	4.3c

The figures above coupled with observations of the market situation in that and other counties justify the conclusions that:

I. Produce co-operatives invariably raise local butterfat prices to the farmer and reduce the spread between the country butterfat price and the Chicago butter market.

II. Farm Bureau members who join local co-operatives patronize their associations in the face of adverse conditions more loyally than do non-Farm Bureau members who have signed contracts.

III. Reduced volume of produce received rapidly increases the per lb. or unit cost of handling.

IV. Directors of co-operatives should act promptly in cutting overhead expenses as volume declines.

V. Low butterfat prices have caused receipts of cream pools and private cream stations to decline approximately 20 per cent during the past two years.

In LaSalle county the operating costs of the co-operative jumped from 1.6 cents per lb. butterfat to 4.8 cents per lb. when the volume declined from 1,200 lbs. daily in June, 1930, to 8,000 lbs. for the month in November. By February, 1931, the cost had been lowered to 2.4 cents per lb. by reducing overhead expenses and increasing volume.

CANADIAN WHEAT POOL

(*Continued from Page 15*)

producer will receive the maximum share of the selling price of his product only through his own efforts to market in an orderly manner as actual demand arises.

The spirit behind the pool will never be stamped out. It has succeeded in creating a new conception of self-respect among western Canadian farmers; and they will never go back to the knuckle-down-and-grin days. Composed of 144,000 members striving to drag their daily labors from the despair of mere sweating for a livelihood, the Canadian wheat pool can be said to share the sentiments of Ramsay MacDonald: "We want to bring back light into the villages and farms; and to make men feel that agriculture is not a drudgery and derelict process. We want to put into it new energy, skill and science, a higher motive, better wages and houses, and closer friendships."

Kane County to Have Big Meeting June 16

The Kane County Farm Bureau announces that it will hold its fifth annual mid-summer meeting on June 16. The meeting will begin at 6:30 P. M. and will be devoted to an evening of business and entertainment.

Farm Adviser Harry Kelley is planning a program that will bring out members from all sections of the county.

Iroquois Considers Credit Corporation

Directors of the Iroquois County Farm Bureau met with representatives of the Iroquois County Bankers' Association at Watseka on May 8 to consider the organization of a credit corporation for Iroquois and adjoining counties.

Mr. Gulledge of the Federal Intermediate Credit Bank, St. Louis, met with the group.

The Iroquois County Livestock Marketing Association, which began operating last December, up to May 1 had shipped more than $115,000 worth of livestock, over 100 carloads.

Every load of livestock from Knox county except one went to the Chicago Producers Commission Association in the week ending May 2, announces the Knox County Farm Bureau.

Sangamon county led all others with an increase to the Indianapolis Producers of 15 cars in April over last year. Macon county was second with an increase of 11 cars, Vermilion third with an eight-car increase, Piatt county fourth with an increase of four cars, and Effingham fifth with three more cars.

The percentage of live stock at the Cincinnati market handled by the Producers Commission Association increased from 11.5 per cent in 1925 to 28.4 per cent in 1930.

Radio publicity and advertising played an important part in this substantial increase in business. The Cincinnati Producers broadcasts every day from WLW.

The range hog of the south is recognized as dangerous in spreading hog cholera.

Pipe Line Co. Gets Permission to Build

The Illinois Commerce Commission on April 30 granted the Panhandle Illinois Pipe Line Company a certificate of convenience and necessity to build and operate a natural gas pipe line from Pleasant Hill in Pike county, across central Illinois to Chrisman in Edgar county.

According to reports more than 100 cities will be served by the new line, which is a subsidiary of the Panhandle Eastern Corporation. The natural gas will come from the Texas fields. It is estimated that the cost of gas, both for illumination and fuel, will be reduced nearly 50 per cent.

A total of 1,275 loans aggregating $169,284 were made to Southern Illinois farmers from the drouth relief appropriation recently voted by Congress, according to a report by T. Weed Harvey, federal representative at 315 No. 10th Street, St. Louis. The loans were nearly all small and were made chiefly for seed, fertilizer, etc.

Indiana Farm Bureau to Carry on Tax Fight

Conflict to Enter State Conventions of Major Parties

THE Indiana Farm Bureau Federation is planning to carry its fight for tax revision based on ability to pay to the state conventions of the major political parties in 1932.

In a recent statement Lewis Taylor, director of the Federation's tax and legislative department, said:

"Northern Indiana industrial captains, stirred from their lukewarm attitude towards state politics by the tax fights in the last legislature, are making plans to have some voice in the state conventions next year. * * * * Activity of this sort is lending color to the belief that in the preconvention campaign the same conflict between rural and urban centers over the income tax plan which marked the closing days of the legislature, will be re-enacted.

Not with Money

"It remains to be seen whether the rural sections will rise to the occasion and see that their voices will be heard in the state conventions in 1932. If the farmers are to be heard, they must begin without delay to prepare to share in the control of the conventions. This they cannot do with money. The industrial captains have seen to that by imposing their own taxes on us and retaining money thus obtained, to control state conventions.

For Tax Equality

"Our plan is easier and more simple, as to win in this fight we must proceed at once to share in the control of the political set-up from precinct committeemen to state chairmen of both parties. If, in the fight for tax equality it is necessary to soil political hands and clothes in the process of applying dope to industrial bloodsuckers, savings to farmers not only in money, but also in political self-respect and economical government, should provide adequately for the laundry bill. To this end our organization should now apply itself."

A state income tax was passed by both Houses in the recent session of the Indiana General Assembly, but it failed to become law. "The bill was sent to the Governor, but over the protests of the House and its speaker," states the Hoosier Farmer. "The protest was based on the Senate's acceptance of a report from its conferees recommending passage of the bill in the form it went through the House. Previous Senate amendments changing rates and exceptions radically were dropped. The House protested that its conferees had not signed the report accepted by the Senate as 'a conference report' and that the Senate action was illegal." The attorney general then declared the bill unconstitutional.

Farm Bureau Members Are Preferred Risks

"IF everyone of our policyholders had the interest of his own company at heart as much as J. B. Simmons of Johnson county, the cost of accidents and overhead expense could be reduced even further," says A. E. Richardson, manager of the Illinois Agricultural Mutual Insurance Company. "We believe Farm Bureau members are preferred risks because they work for the best interests of their own company."

Richardson refers to the following letter recently received from Mr. Simmons:

"In regard to the accident I had with the car, went to a garage and the man wanted $25 to fix same. Now this damage does not interfere with the operation of the car in any way. It will be against the sale of the car when I get ready to trade it in on another car, however.

"One of your officials made us a talk at our Farm Bureau meeting at Vienna. He made us see insurance as we had never thought of it before. He made us realize it was our Company and not just an insurance company. This is the reason been letting this matter go. Thought I would be somewhere that I could get the job done cheaper. If I can't get it done for less than $25 will let it go."

Signed J. B. SIMMONS,
Johnson County, Ill.

As indicated in his letter, Mr. Simmons was so sincere about wanting to do the right thing for his own company that he offered to cancel his claim against the company rather than pay an exorbitant garage bill.

NOTE: The company instructed Mr. Simmons to have his car repaired and send in the bill.

Thank You!

Illinois Agricultural Mutual Ins. Co.,
Chicago, Illinois.

I have your letter of the 13th, saying your Company had collected the full amount of my loss of $32 from L. H. Minton and enclosing your check for $6.40 covering balance due me. That's what I call service and I want to thank you very much.

R. M. ATKINSON, Pike County, Ill.

Ohio Farm Bureau Asks for Tax Reform

Submits Recommendations to General Assembly of State

The tax program recently presented to a sub-committee of the Ohio General Assembly by the Ohio Farm Bureau recommends:

1. **A personal income tax with low rates and low exemptions. Favors exemptions lower than thus far been suggested in order to reach all those with ability to pay.**
2. **An equitable tax on intangibles either by a low rate or through the income method, or both.**
3. **Selective sales taxes to reach luxuries and amusements.**
4. **Certain business taxes of which stamp taxes, mortgages recording taxes and stock transfer taxes are types.**
5. **Removal of the automobile from the property tax and an equitable increase in the license fee.**
6. **Truck and motor bus taxes levied in proportion to their use of and damage to the highways.**

L. B. Palmer, president of the Ohio Farm Bureau, who presented the program, pointed out that a state survey showed that approximately one-half of the automobiles of the state are returned for taxation, while the other half escape. He stated that any new taxes adopted should be replacement taxes, not additional taxes.

By L. A. Williams

HAVE you named the children second beneficiary in your life insurance policies? Do you know that you should, or why you should? Do you know how to protect creditors with life insurance, or how to protect the beneficiary's interest against loss through the bankruptcy of the insured while living? Do you know how to prevent life insurance funds from going through probate costs? Do you know how to protect the life insurance you leave to your loved ones, against loss from unscrupulous men who trail down estates left to widows?

Write to Country Life for advice. It is one of the big services of the Company.

Downstate Votes Beat Income Tax

20 Representatives Line Up with Cook County Delegation in Voting Against Relief to Overburdened Property Owners

TWENTY downstate representatives united with the solid opposition from Cook county to defeat the Lantz state income tax bill by a vote of 75 to 74 in the House at Springfield, June 3. The bill needed two more votes or a total of 77 to carry.

Voting with the opposition from Cook county against tax relief to home and property owners were Otto A. Buck, Villa Park, DuPage county; E. P. Conerton, LaSalle, LaSalle county; Leo D. Crowley, Peoria, Peoria county; Howard L. Doyle, Decatur, Macon county; Charles D. Franz, Freeport, Stephenson county; Leroy M. Green, Rockford, Winnebago county; Michael F. Hennebry, Wilmington, Will county; Frank Holten, East St. Louis, St. Clair county; R. H. Huschle, East St. Louis, St. Clair county; Carl J. Jobst, Peoria, Peoria county; Charles P. Kane, Bloomington, McLean county; William J. Lawler, Springfield, Sangamon county; Martin B. Lohmann, Pekin, Tazewell county; Richard J. Lyons, Mundelein, Lake county; Charles F. Malloy, Sorento, Bond county; David H. McClugage, Peoria, Peoria county; Schaefer O'Neill, Alton, Madison county; John F. Petit, Batavia, Kane county; Schuyler B. Vaughn, Greenville, Bond county; and John L. Walker, Joliet, Will county.

Only Tax Relief Bill

"Regardless of all the discussion about the need for tax relief the Lantz state income tax measure and its companion bills, which were largely prepared and sponsored by the Illinois Agricultural Association, were the only legislation before this session of the General Assembly which even promised any relief to the overburdened property owners of Illinois," Earl C. Smith, president of the Association, said following the vote.

Further comment by the I. A. A., together with a complete record disclosing the step by step progress of the measure in both houses, will be published in an early legislative issue of the Illinois Agricultural Association RECORD.

The history of the income tax measure in the 57th General Assembly is very similar to that of the income tax bill supported by the Illinois Agricultural Association in the 56th General Assembly two years ago.

More Support This Year

This year the measure had more support both in the Senate and House. The vote in the Senate in the 56th General Assembly was 28 to 19. This year it was 31 to 17. The Revenue Committee in the House this year as two years ago was packed with Cook county representatives who in each case reported the bill out unfavorably with the recommendation that it do not pass. This year as two years ago a motion to non-concur in the report of the Committee carried, 86 to 60, thus automatically restoring the measure for further consideration. The final vote in the House two years ago was 72 to 69, this year 75 to 74.

Governor Emmerson signed House Bill 410 introduced by Rep. Luckey of Vermilion county, which had the support of the Association. This statute defines and clarifies the liability of owners of livestock.

Must Prove Negligence

Heretofore it has been presumed that the owner was guilty of negligence and hence liable for injuries to persons or property resulting from his livestock running loose on the highways. Cases are on record where judgment was rendered against owners of livestock even though they were unaware of the fact that their cattle, horses, hogs or sheep were at large, and where negligence on their part could not be shown.

Hereafter the plaintiff must prove negligence by the owner and if without his knowledge livestock is allowed to run loose by vagrants, hunters, or other trespassers opening gates or breaking down fences, the owner of such stock shall not be held responsible for any injuries or damages resulting from collisions, etc.

House Bill 467 carrying amendments to improve and liberalize the Co-operative Marketing Act of 1923 recently passed the House and now awaits the Governor's signature.

A 42 Per Cent Tax

"In response to your request broadcast over WLS for report on taxes, income and outgo on farm land, I submit the following:

"This is a report of 160 acres of average (or better) Sangamon county land farmed by tenant paying one-half of grain and $8 per acre for grass land. Landlord furnishes clover seed and limestone for soil.

Cash received for grains of all kinds and cash rent	$1,234.75
Cash paid out as regular annual expense, including taxes	418.01
	$ 816.74
Cash paid out for repairing of more permanent nature	$ 206.89
Net income on 160 acres	$ 609.85

"The taxes on this farm last year were $255.35. Figured on the basis of net income from the farm I paid approximately a 42 per cent income tax."

C. F. SPICER,
DeWitt County, Ill.

Plan Parade in Chicago to Boost Meat Consumption

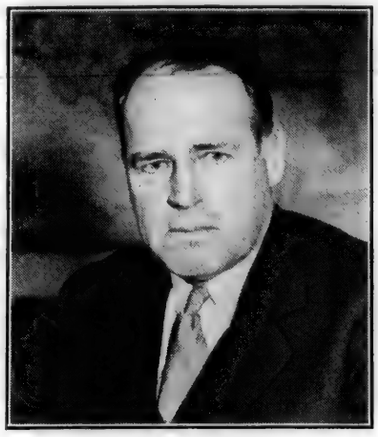
Invite President Hoover to Review Demonstration, Cattle and Hogs Lowest in 19 Years

AS we go to press parades and demonstrations to call to the attention of the consuming public the extreme low prices of meats are being planned by livestock, packer, and allied interests throughout the country.

A series of meetings was held in Chicago early in the month to plan and prepare for the demonstrations. Vice-President A. R. Wright, who has been coming in for several days each week, officially represented the Illinois Agricultural Association at the conferences. The I. A. A. is planning to participate in the parade down Michigan Boulevard, Chicago, at noon on June 18. County Farm Bureaus of northeastern Illinois were requested to organize 4-H Club delegations to march in the procession. Similar demonstrations may be held in other cities.

A. R. Wright

The National Livestock and Meat Board and the American Institute of Meat Packers were active in arranging the conferences which adopted the plan. Livestock associations, retailers, railroads, and other large industrial groups are taking an active part.



Telegraph White House

A telegram was forwarded to President Hoover at the White House in which he was advised that:

"Cattle and hogs recently reached the lowest levels in about 19 years, and meats and by-products have for some time been available at greatly reduced prices. Livestock recently has been selling below the cost of production.

"At a meeting here today of agricultural leaders, exchange officials, packers, railroad executive, and others co-operation was arranged for a parade here in the capital of agriculture on June 18 to bring spectacularly to the attention of the public the information that livestock and livestock products are available at prices greatly reduced from those once quoted. We cordially invite you to review this parade or address a mass meeting afterwards as you prefer."

The telegram was signed by leaders and representatives from the various interests participating in the conference.

Wayland Magee

Member Federal Reserve Board

Wayland Magee, new farmer member of the Federal Reserve Board appointed by President Hoover, is president of the Douglas County, Nebraska, Farm Bureau. He was appointed to fill the vacancy left by the death of Ed Cunningham, who before being appointed to the Board, was secretary of the Iowa State Farm Bureau.

Mr. Magee operates a 1,280 acre farm in Douglas county near Omaha. He is president also of the Nebraska Crop Growers Association, and a member of the Coarse Grains Advisory Committee of the Federal Farm Board.

Mr. Magee was born in Chicago. After graduating from the University of Chicago he studied law at the University of Bonn, Germany, and at Northwestern and Harvard Law Schools. He was admitted to the bar in 1908. Later he studied agriculture at the Universities of Iowa and Nebraska. He is 49 years old.

On WJJD Daily

The I. A. A. broadcasts from Station WJJD, Chicago, daily (Monday to Friday) from 11:15 to 11:30 A. M. Central Standard time, I. A. A. farm and market news and comments by George Thiem. Weekly review of livestock markets each Friday by Phil Evans and Russell Everett of Chicago Producers.

Edgar L. Bill, former director of station WLS and one time Director of Publicity for the I. A. A., recently purchased the radio station at Peoria. It is reported he will operate it as a private enterprise.

The station covers the city of Peoria and the surrounding rural territory.

Champaign and Urbana are considering adopting daylight savings time. The Farm Bureau and many business men are against it.

Average taxes per acre on farm real estate declined slightly in 1930 compared with 1929, the first general decline the country over in the 17 years of record.

Newly elected officers of the Massac County Farm Bureau are President J. A. Maedaker, Vice-President C. S. Atkins, Secretary C. L. Campbell, and Treasurer A. H. Fulmer.

2,500 McDonough Folks And Guests Hold Jubilee

Capacity Crowd Hear Co-op. Marketing Debated in Teachers' College Auditorium

TWENTY-FIVE hundred Farm Bureau members and their guests gathered in the Western Illinois State Teachers' College, Macomb, on May 20, for a Cooperation Jubilee dedicating the McDonough County Livestock Marketing Association organized there. Representatives from western Illinois counties as far north as Whiteside and as far south as Madison came for the celebration. The McDonough County Farm Bureau and Country Life Insurance Co. sponsored the gathering.

Donald Kirkpatrick

A feature of the evening was the debate staged by Donald Kirkpatrick of the Illinois Agricultural Association and Lawrence Williams of the Country Life Insurance Company on the question "Resolved, That Illinois Farmers Are Not Ready for Cooperative Marketing."

Speaking for the affirmative, Mr. Williams stated that many farmers are not yet supporting the cooperatives already organized; that too many have shown no disposition to make use of their opportunities to control their own marketing machinery. Mr. Kirkpatrick for the negative reviewed the many successes Illinois farmers have already achieved in the field of cooperative marketing; asserted that farmers had responded loyally to every sound plan advanced, although their leaders in some instances had failed them.

Leadership at Fault

"It's not the producers who are at fault," said Kirkpatrick. "They have been ready and willing to co-operate whenever a sound set-up was offered that promised to improve the old system. Failure of leadership and management should be charged with responsibility for projects which have not succeeded."

Ray E. Miller, livestock marketing director, Illinois Agricultural Association, and Dave Swanson, manager, Chicago Producers Commission Association, preceded the debaters, while the Pawnee quartette from Sanagamon county appeared between speeches and provided lively entertainment.

A feature of the program was the historical style show presented under the direction of the Eldorado unit of the McDonough county Home Bureau and under the personal direction of Mrs. Ralph Nelson.

This historical style show traced the development of women's styles during the past 100 years.

Musical Features

The singing of the Pawnee Four with their extemporaneous paraphrasing of the speeches of the program, brought down the house with laughter. Bernie Young and his broadcasting orchestra from Chicago also provided entertainment.

R. C. Doneghue, farm adviser, introduced the past presidents of the Farm Bureau, the present executive committee of that organization, and the livestock marketing committee under whose direction the organization of the Marketing Association has been carried out.

Miss Irene Crouch, county Home Bureau adviser, introduced the executive board of the Home Bureau.

McDonough Leads

The staging of the Jubilee came as a reward to McDonough county when the Country Life Insurance company's general agent, G. O. Chenoweth, and his seventeen special agents led the state in sales during the month of April.

Special agents who were introduced by Mr. Chenoweth, were: Edwin C. Ogle, Maurice Moon, Austin Reed, Marion Herzog, Daniel J. Vahle, M. C. Pollock, Carl Mowrey, J. F. Stickle, R. Burdette Graham, F. M. Allison, H. D. Lantz, Owen Stickle, W. E. Siepel, Frank Stump, C. O. Reedy, Philip Marshall, and LeRoy Sinnett.

Managers of the various cooperative organizations of the Farm Bureau were also introduced.

Fred Herndon, president of the Farm Bureau, was the presiding chairman of the Jubilee.

The new McDonough County Livestock Marketing Association at Macomb with more than 500 members will assemble, grade and ship livestock on orders direct to the packer or to the cornbelt and eastern markets.

L. A. Williams

Five More Debates

MORE than 800 Farm Bureau members, their guests and families from Bond and surrounding counties gathered at Greenville on Thursday, May 21, where Larry Williams and Donald Kirkpatrick held the second of their series of debates on co-operative marketing. The Bond County Farm Bureau and Country Life Insurance Company sponsored the meeting.

Similar gatherings where debates between Kirkpatrick and Williams will be the principal attraction were scheduled for June 12 at the Wheaton High School, DuPage county; June 15, LaGrange, Cook county; June 29, Edwardsville, Madison county; June 30, Sparta, Randolph county, and July 1, Louisville, Clay county.

The seven counties in which debates have been held or scheduled placed highest in the amount of life insurance business written by Country Life agents during April.

Country Life Submits New Endowment Policy

A new endowment insurance policy which matures at age 65 was recently brought out by the Country Life Insurance Company.

A $10,000 policy will start paying an income at age 65 of $78.50 per month plus monthly interest dividends. The $78.50 is guaranteed for life and should the insured die before having received 10 years of this income, the heirs or estate will receive the difference between what has been paid since age 65 and a total of 10 years of this income, in one lump sum.

This policy was submitted to the State Insurance Department for approval following its adoption by the Board of Directors. It will not be available to policyholders until the state's permission is received.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for missent copy please indicate key number on address as is required by law.

Mr. Thompson at Quincy

IN HIS first address since becoming a member of the Federal Farm Board Sam Thompson spoke plainly and pertinently to the home folks at Quincy about those who oppose farmers' efforts at helping themselves in the field of marketing.

"The opposition, while not large in numbers, is keeping itself very much in the public eye," said Mr. Thompson. "I would like to suggest to you farmers that when you hear attacks on co-operative marketing, the Agricultural Marketing Act, and the Farm Board, that you do a little investigating and find out the motive behind the attack. For the most part this opposition comes from handlers of farm products who fear that their business will be injured if these products are marketed by the producers in their own interest."

Precisely. And because Mr. Thompson spoke the truth, he and the Farm Board have been viciously attacked by an arrogant Chicago newspaper noted for its prejudice in championing the vested interests.

Under similar circumstances, Alexander Legge, former chairman of the Board, would have spoken more bluntly, less discreetly than Mr. Thompson. He probably would have said, "The middlemen think they have a God-given right to market the farmer's products for him. A small pack of wolves can make a lot of noise." The opposition would have swallowed hard, but Mr. Legge would not have been belabored. He has important connections with influential people who buy much white space in the press of the country.

But Mr. Thompson is a farmer. He belongs to the so-called "squirarchy" which believes that a property tax which takes 25 to 40 per cent of the farmers' net income is unfair and unjust. We congratulate him and the Farm Board for their enemies.

In Fairness

THERE is little disposition on the part of thinking farmers to minimize the service performed at present and in the past by those who make or have made their livelihood in handling farm products.

There are estimable gentlemen in the ranks of the so-called middleman. Many of these men have served the producer with honor and integrity. Many are open-minded, some are even sympathetic toward the efforts of producers in helping themselves.

But the minority that is bitterly resentful does most of the talking. By fair means or foul they would destroy attempts of producers to set up and control their marketing agencies. So do the few cast an odium on the entire trade.

If co-operative marketing as a new system of merchandising farm produce is to achieve permanent success it must make a contribution, and perform a service better or at less cost than the system it replaces. Farmers fully realize this fact. All that they ask is that the way be left open without discrimination for the test.

"A drop of ink makes millions think."—Lord Byron.

Some people notice that the days are getting longer, others that the nights are getting shorter.

Uncle Ab says we could get more done in the present if we did not have to spend so much time telling what we have done in the past.

Observations

MANY a shot has been taken at the business and industrial leadership of the country since the depression and widespread unemployment set in more than a year ago. Prominent men in business as well as public life have joined in pointing the finger of shame at industrial captains who have turned thousands away from their factories and workshops to swell the ranks of the jobless.

Without arguing the merits of either side in the controversy over who or what is responsible for the current hard times, it may be interesting to hear what one stout defender of the manufacturer, George Roberts, economist for the National City Bank, has to say about it.

Referring to the federal income tax returns from corporations for the highly prosperous year of 1929, Mr. Roberts shows that 40 per cent of the companies that year reported deficits while the other 80 per cent reported average net earnings of 8.92 per cent.

"If the returns were consolidated to show net earnings for all the active companies, the result would be $3,667,354,123 of profits upon a gross income of $60,960,346,678, or 6 per cent on the value volume. This is scarcely above a normal merchandising profit on turnover, whereas manufacturing is subject to greater risks than merchandising, by reason of fixed investment in addition to the trading risks," declares Mr. Roberts.

"These figures for the net earnings of manufacturing corporations not only disprove the theory that as a class they make large profits, but show the fallacy of the declaration of the Washington Conference that American industry has 'failed in this crisis as in every other crisis to assume responsibility for keeping wage-earners employed and industry at work.' Since 40 per cent of these corporations had net deficits in 1929, it may be assumed that another important percentage made only moderate net earnings and that no more than a small minority would be able for any length of time to continue production of goods which could not be sold at a profit. . . ."

Mr. Roberts then turns to a report of manufacturing in New York state which reveals that 75 per cent of the 70,000 factories in that commonwealth are small businesses which employ fewer than 50 persons each; that these small manufacturers are busy men struggling along against severe competition trying to make a living themselves while risking their capital.

"Unemployment undoubtedly presents a problem, but it cannot be solved by any policy that would be disastrous to the industries," he continues. "If the latter are to assume the responsibility of keeping labor always employed they will have to find means of doing so by obtaining higher prices for their products or paying lower wages to their employees. The risk of such an obligation would be a serious one, and could not be borne by the employers alone. . . .

"The old saying about the wisdom of saving for a 'rainy day' is evidence that life always has been subject to ups and downs and emergencies against which the prudent accumulate reserves. If everybody accumulated reserves and avoided indebtedness except for temporary needs, the whole problem of crises and depressions would practically disappear."

Our own observations among friends and acquaintances, both in the city and the country, lead us to believe that there is much truth in Economist Roberts' assertions. Keeping up with the Joneses, or downright "foreflushing," are ingrained American habits. Many people live up to or beyond their means most of the time. When adversity temporarily hits the family there is nothing in the "kitty" to pay the grocer and the landlord.

High wages, salaries and bonuses paid by many a firm in 1928 and 1929 went into high-priced automobiles, extravagant living and stock market speculations instead of in gilt edge bonds for the inevitable rainy day. It is doubtful if any economic or social system can be devised that will spare us from the consequences of indiscreet and immoderate living.—E. G. T.

Cause of Farm Depression

Adjusting production to market demand, reducing costs of production, and eliminating submarginal land are three lines of action recommended by the U. S. D. A. in a recent bulletin "Land Utilization and the Farm Problem."

Among the elements cited as contributing to the present agricultural situation are: changes in agricultural production, crop land, and farm labor; increase in number of tractors and decrease in numbers of horses and mules; and changes in consumption of food products.

Leeper Elected President National Fruit Exchange

A. B. Leeper, director of fruit and vegetable marketing for the I. A. A., was recently chosen president of the National Fruit and Vegetable Exchange. This is the new nation-wide co-operative sales agency recently set up with the aid of the Federal Farm Board.

A. B. Leeper

The members of the Board of Directors represent prominent co-operatives between the Rocky Mountains and the Atlantic coast.

The Exchange will not handle citrus fruits since the citrus fruit growers are already well organized.

Speak at Manhattan

"CREDIT Problems Resulting from the Handling of Side Lines in Local Co-operatives" was the subject of an address prepared by Secretary George E. Metzger for delivery at the American Institute of Co-operation at Manhattan, Kansas, on June 10. Mr. Metzger was unable to attend. His paper was read by Frank Gougler, director of produce marketing.

Mr. Gougler addressed the conference on the subject, "Collective Bargaining of Butterfat," on June 9.

Other Illinois speakers during the week were A. D. Lynch of Sanitary Milk Producers, St. Louis; Don Geyer of the Pure Milk Association, Chicago; P. O. Wilson and Chas. A. Stewart of the National Livestock Marketing Association; and C. E. Huff, Geo. S. Milnor and Bill Stahl of the Farmers National Grain Corporation.

DeKalb Signs 1,000 In Two Days

More than 1,000 members were signed in the DeKalb County Farm Bureau in two days, reports Farm Adviser R. N. Rasmusen. Three townships, Clinton, Paw Paw and Kingston, increased their memberships over that of three years ago.

Clinton township topped all others when out of 143 men interviewed 107 became members. Volunteer solicitors, Edgar E. Hipple and T. F. Sawyer, operating in Clinton township, signed 42 of the 48 men they interviewed.

State Live Stock Ass'n. Holds First Annual Meet

Two Hundred Attend Meeting at Bloomington May 28

TWO hundred livestock farmers from practically all sections of the state met at Bloomington, Illinois, on Thursday, May 28, for the first annual meeting of the Illinois Livestock Marketing Association. Officers chosen were: Samuel Sorrells, Raymond, president; Sam McClugage, Peoria, vice-president; G. F. Tullock, Rockford, treasurer, and Ray E. Miller, Chicago, secretary.

Samuel Sorrells

The following directors were elected: District No. 1, William Temple, Serena, LaSalle County; District No. 2, W. E. Sawdey, Rockford, Winnebago County; District No. 3, Harvey Herndon, Adair, McDonough County; District No. 4, Carl Lage, Saybrook, McLean County; District No. 5, Mont Fox, Oakwood, Vermilion County; District No. 6, Dudley H. Myers, Mendon, Adams County; District No. 7, J. R. Fulkerson, Jerseyville, Jersey County; District No. 8, C. F. Oaks, Assumption, Shelby County; Chicago Producers, H. H. Parke, Genoa; St. Louis Producers, A. E. Crum; Peoria Producers, Sam McClugage; Indianapolis Producers, O. B. Goble; I. A. A., Samuel Sorrells and George F. Tullock.

The meeting was called to order by Henry H. Parke, who introduced the speakers on the morning program. Ray E. Miller, director of Livestock Marketing discussed the plans and purposes of the State Association. D. L. Swanson, manager, Chicago Producers, spoke on "The Illinois Livestock Marketing Association and the Cooperative Sales Agency on the Terminal Market." P. O. Wilson, secretary-manager National Live Stock Marketing Association, talked on "The National Livestock Marketing Association and Its Program."

The afternoon session consisted of a general discussion and election of officers and directors. The purpose of the Illinois Livestock Marketing Association is to correlate the activities of Illinois livestock farmers and livestock marketing organizations in one program for the most economical and effective marketing of Illinois livestock. The operation of the Association will be correlated with the National Live Stock Marketing Association and its member agencies.

Left to right are Fred Gumm, shipping association manager, and his brother, Zeis Gumm; Zeiss Jr. of Paris, Edgar county, and C. M. Love of Charleston, Coles county.

This picture was taken when they visited the Indianapolis Producers several weeks ago.

Anniversary Celebration at Urbana

The Champaign County Livestock Marketing Association will hold its first anniversary on Wednesday, June 17, in Urbana.

This association was the first in the state to market hogs direct to the packer. "The association has raised the price of livestock to the farmers of the county, and has built up a good net profit," says the Champaign County Farm Bureau.

Dave Swanson of the Chicago Producers and Sid Cherrill of the I. A. A. were scheduled as speakers.

Wool Pools Organized In Several Counties

County wool pools have been organized in Shelby, Champaign, Adams, Piatt, Iroquois, LaSalle, Knox, Henry and Sangamon counties, according to information received by Ray E. Miller, director of livestock marketing. Other counties which will handle wool at local points include Lee, Henderson, Brown, DeWitt, Pike, Wayne, Wabash, Jackson, Johnson, Stark, White, Rock Island, Bond and Warren.

Miller announces that all shipments must be billed in accordance with the following instructions:

Ship all cars on straight bill of lading to the National Wool Marketing Corporation, Boston, Massachusetts, stop at Chicago, Illinois, Crooks Terminal Warehouse, Belt Line Railway, for storage in transit. Mail the original bill of lading of weights to Boston office; memorandum bill of lading and copy of weights to Crooks Terminal Warehouse, 5967 W. 65th Street, Chicago, Illinois.

Each bag of wool should be plainly marked with the name of the shipper, county and lot number. A mixture of lamp black and kerosene applied with a small brush is useful in marking bags.

Livestock Marketing

AT ITS last meeting in Chicago on May 22, the Illinois Field Service Committee went on record recommending that:

1. The duties and functions of the Illinois Field Service Committee be assumed by the Illinois Livestock Marketing Association.
2. That the Illinois Livestock Marketing Association assume the obligations and responsibilities in carrying out the field service, educational and organization program now being carried out by the Field Service Committee.
3. That surplus funds now to the credit of the Field Service Committee be turned over to the Illinois Livestock Marketing Association, in consideration that Illinois Livestock Marketing Association assume the obligations and duties of the Field Service Committee.
4. That the present members of the Illinois Field Service Committee enter into agreement with the Illinois Livestock Marketing Association under the terms of which the latter would assume substantially the same duties as are now being discharged by the Illinois Field Service Committee.
5. That the following resolution be sent to members of the Illinois Field Service Committee for their information and action together with a suitable agreement to be executed between such member and the Illinois Livestock Marketing Association.
6. That Field Service Committee be terminated and the funds to the credit thereof be disposed of as above upon the adoption of the following resolution by a majority of the members of the committee.

During May the Indianapolis Producers handled a total of 849 carloads of live stock, representing 31.19% of the receipts. This was 600 carloads more than the next largest firm on the market. Indiana patrons sent in 651 carloads and Illinois 198.

Edgar county led all others for the month with a total of 23 cars. Douglas county was second with 22, Coles county third with 19 and Vermilion county fourth with 15 cars.

The following Illinois counties increased their business to the Indianapolis Producers over May last year: Cumberland, Edgar, Macon, Piatt, Sangamon and Vermilion.

A CERTAIN ESTATE FOR THE BENEFICIARY

Country Life Insurance Protects the Farm Home and Family

THE story of Leonard Moehl of Putnam County, a young, progressive Farm Bureau member in his prime, illustrates the uncertainty of life, the value of protection.

In excellent health two weeks before his death, he succumbed to a sudden attack of pneumonia. His thoughtful provision for his family insures them a home and freedom from want until the readjustment which invariably attends the passing of a loved one, can be made.

Will You Leave a Certain Estate to Provide for Your Family After You Are Gone?

Farm Bureau Members Save $200,000 Annually

Auto Insurance Service Now Used by Nearly 28,000 Policy Holders

THE Illinois Agricultural Mutual Insurance Company is now saving its policy holders more than $200,000 annually on the cost of their insurance, according to V. Vaniman. These figures are based on the current rates of the I. A. A. Farm Bureau Company and those charged by the closest state-wide competition, which recently increased its rates.

The Illinois Agricultural Mutual on June 1 had received 27,947 applications for auto insurance since it began operating a few years ago. Total applications for May were 479.

10 High Counties

The 10 high counties in auto insurance policies in force are as follows: DuPage 1,059, Cook, 989, Champaign 914, McLean 858, LaSalle 843, Winnebago 796, Henry 784, Livingston 688, Logan 676, and Will 606.

The 10 high counties in applications received during May are: Champaign, Mercer, McLean, Kane, Will, Lake, St. Clair, Livingston, McHenry, Logan, Cass, Cook, Monroe, Morgan, Ogle and Whiteside.

Roy Mitchell of Champaign county led all other agents in applications received with a total of 35. Next in line were Mark Foster, Mercer county; Bertram Abney, Lake County; C. E. Hopkins, Livingston county; Fred H. Wilson, Kane county; Otto P. Kolmer, Monroe county; Wm. E. Hedgcock, McLean county; R. F. Shaffer, St. Clair county; L. T. Oxley, Morgan county; K. W. Cleland, Boone county; and Earl Payne, Schuyler county.

A few accidents reported by policyholders recently follow:

Clinton county—Our insured going east started to make left-hand turn. Stopped with front wheel just over black line. Truck going west at high rate of speed avoiding our member's car ran over curbing into a front porch causing personal injury to occupants of truck and damage to house and porch.

Effingham county — Our member loaned car to prospective purchaser. Prospective purchaser allowed son to use car in evening. Bright lights of approaching car caused son to hit man on highway resulting in death to man.

Remarks: A good rule to follow—"Don't drive blind."

Logan county—*Fire*—Member delivering gas. Employee poured gas into tractor and spilled some on hot manifold igniting gasoline. Employee threw gas can on ground spreading fire to can on ground and one hanging on faucet of oil truck. Tank on truck blew up. Nothing left but junk.

Remarks: Gasoline is dangerous. Use every reasonable care in handling it.

Knox and Monroe Lead

Interest in hail insurance on farm crops is on the increase with the advance of the crop season. Applications for hail insurance received by the Farmers Mutual Reinsurance Company, June 1, totaled $425,313.

Most of the insurance applied for is to cover corn and small grains. The leading counties in hail insurance applications up to June 1 were: Knox, Monroe, Henry, McDonough, and St. Clair.

Monroe county farmers led the state in protecting their crops against hail up to the middle of May. Otto Kolmer of that county was high agent and had taken applications for $39,800 worth of hail insurance by May 18. The next nine agents in business written follow: T. E. Benton, Williamson county; C. Kingston, Warren county; L. R. Welk, Logan county; A. M. Nash, Henry county; C. J. Thomas, Jackson county; A. Speichmeyer, St. Clair county; I. Cottingham, Jersey county; R. H. Fick, Henry county; and E. Altes, Monroe.

During the past two years hail insurance has cost $20 per $1,000 on corn and small grains. This is approximately one-third cheaper than that provided by old line companies.

The cost of insuring soybeans is slightly higher at $25 per $1,000. Initial payment is $4 per $1,000 on all hail insurance and a check for the balance must be given at time of application payable Oct. 1. The Farmers Mutual Reinsurance Company reinsures all its hail risks.

Explain Farmer Employers' Liability in Accidents

Policy Holders Report Many Accidents to Employees in Recent Weeks

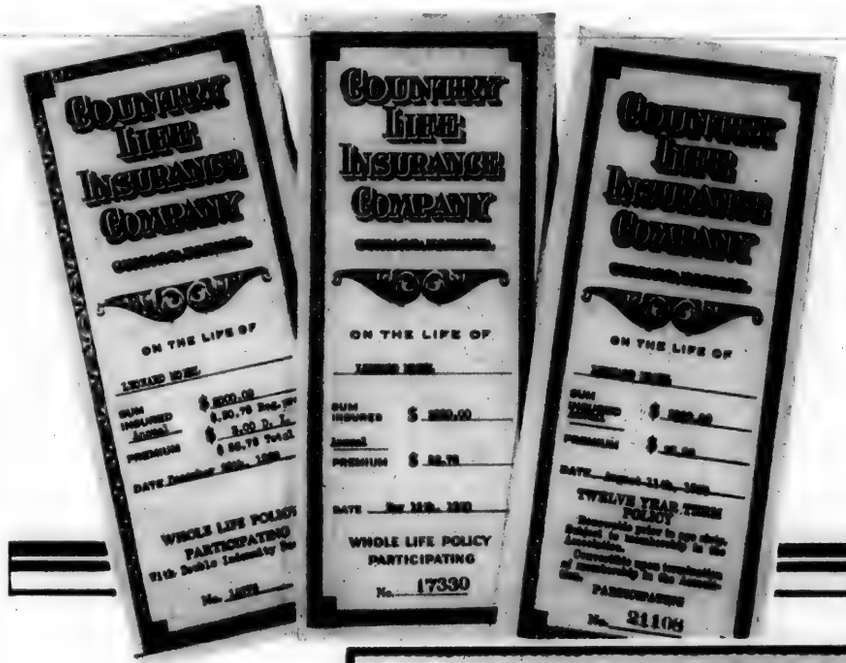
"ONE of our members reports that his attorney gave him to understand that a farmer doesn't have to carry employer's liability insurance," says V. Vaniman, director of insurance service. "He gave our member the impression that the farmer is exempt from liability.

"Apparently there is some misunderstanding. For while it is true that the farmer employer is exempt from the provisions of the Workmen's Compensation Act for work done on a farm, he is not exempt from the common law liability for injury or death to employees engaged in operations on the farm.

"Under the common law, if the employer is guilty of negligence or careless in any way he is liable."

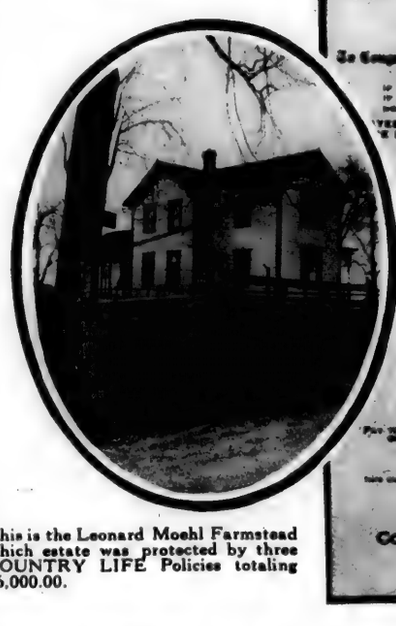
Recently accidents to farmer employees have been reported as follows:

Saline county — Hired man fell, throwing hand under roller on which log was moving.



Kane county—Employee fell over partition; vein in right leg bursting.

Jackson county — Employee while working with spray material got some lime in eye.



Morgan county — Employee standing up in box wagon when driving out of barn—cut head on nail in plate over door.

Richland county—Employee stretching barb wire for employer, when wire came loose from stretcher and tore palm of left hand.

Will county—Man throwing down hay got chaff or small piece of weed in eye; eye becoming much inflamed.

"Give Us a Chance, We'll Do the Rest"—Cummings

Mid-West Grain Corp. Handles Over 3,000,000 Bushels Grain in Six Months

THE Mid-West Grain Corporation operating on the Chicago, St. Louis, and Peoria grain markets passed the 3,000,000 bushel mark recently only six months after it began operating on its present basis, Manager Chas. P. Cummings reported to 200 McLean county grain producers and elevator stockholders at a meeting in Bloomington the night of June 3.

C. P. Cummings

"Any old-line grain man would say it's remarkable what we have accomplished in so short a time," said Mr. Cummings. "We handled 1,761 carloads of grain in six months. I can't conceive of this success as based on sentiment alone. We are not asking for the support of the farmers' elevators on that basis.

"All we're asking of the growers is to give us a chance. We don't want anybody to feel that they are being forced in. To be successful this business must be built on a basis of mutual satisfaction. Twenty-seven years' experience in the grain business leads me to believe that the producer can be benefited through co-operation. Every penny made on this business belongs to the grower. We're here to make money for you. A volume of grain is necessary to do this.

"If we have 150 elevators working together I know we can make a showing in savings you and I can be proud of. There are two things that grain producers can do by working together:

1. They can regulate the movement of grain to market.

2. They can eliminate the wide day to day fluctuations.

"The miller is interestd, so is the farmer in a more stable price. There is no excuse, for example, for the 13-cent drop in the price of wheat in one day. This is what happened at Minneapolis today.

"It is heart-breaking to realize that corn started out early last fall during shucking time at 60 to 65 cents a bushel and now corn is bringing around 48 cents a bushel to the grower.

"If our co-operative set-up has merit it will grow in spite of all the mud slinging by those opposed to us. If not, we won't succeed regardless of what we can do. I'm not worried about the unfriendly propaganda being spread over the state. That advertising does us more good than harm. If we're right they can't hurt us. And if we're wrong all the kind things anyone can say won't make us succeed.

"I know this much, one week 70 per cent of our grain business came from non-members and the reason we got it was because we could pay the price, and for no other reason. If we can't deliver as much or more for your grain as the other fellow we can't expect your business."

Put Grain Sales Profits in Pockets of Farmer

Farmers National Grain Man Tells Aims of Co-operation in Terminal Markets

"THE Farmers National Grain Corporation hopes some day to control enough volume to stabilize the price of grain in line with its value," D. P. Moore of the Farmers National, Chicago, asserted in his address at Bloomington on June 3.

"Our object is to assist in bringing about equality between grain prices and the prices of things farmers have to buy," he said. "Farmers have the support in their co-operative efforts of most of the big interests of the country except the middlemen.

"The middleman's only interest is a selfish one. They make a lot of noise but they are in the minority. Industry as a whole wants to see the Marketing Act succeed to bring a greater measure of prosperity to the farmer because business men know that a prosperous agriculture is necessary for industrial prosperity."

Mr. Moore paid his respects to the attacks on co-operative grain marketing. Referring to statements made by F. S. Betz, editor of the Farmers' Guide, at the recent old-line grain dealers' convention in Peoria, Moore said: "Betz' speech was the biggest boost for the Marketing Act I've ever seen. His education apparently stopped with the farmer's elevator. Everyone knows that the farmer's elevator has done a fine thing locally for the farmer. That's beside the point.

"Now farmers are carrying their co-operation a step farther into the terminal markets. Certainly if there is any justification for co-operation locally there is more justification for it in the terminal markets where the prices are made and where manipulation in behalf of the grain handlers' interests is frequent.

"Betz raked up the previous attempts of farmers to get together to help

(Continued on Page 15, Col. 1)

Growers Getting Inside Information on Markets

Fahrnkopf Emphasizes One Difference Between C-operative and Middleman System

"YOUR co-operative sales agency tries to pay the producer as much as possible for grain. Under the old-line system the commission house tries to buy from the farmer's elevator as cheaply as possible. This is one difference between the two methods of marketing," Harrison Fahrnkopf, director of grain marketing for the Illinois Agricultural Association, told 200 McLean county grain producers at Bloomington on June 3.

H. Fahrnkopf

"This whole movement represented by the Farmers National and the Mid-West Grain Corporation would be worth while if only for the knowledge farmers are getting about how their grain is handled in the markets," said Fahrnkopf. "The co-operative's chief interest will be to get the farmer a maximum price, to improve the system so it will work as well for the producer as it has for the middleman."

The new agreement running between the Illinois Grain Corporation and the farmers' elevators provides:

1. For selling the producer grain through his own co-operative agency on the terminal markets when it can pay as much as any other buyer.

2. That the local elevators operate as Capper-Volstead associations with returns on that part of the stock representing capitalization of the grain end of the business, limited to 8 per cent, the balance to be held in reserve or turned back to the producer in the form of patronage refunds.

Fifty-seven farmers' co-operative elevators had affiliated with the Illinois Grain Corporation and its sales agency, Mid-West Grain, by June 6. This record has been achieved in a little more than a year. By June 1, the Mid-West had handled upwards of 3,000,000 bushels of grain in the six months of operation on its present basis.

"The best answer to the frequent attacks inspired by those selfishly opposed to farmer co-operation is the record of our progress," G. C. Johnstone, president of the Illinois Grain Corporation, and a prominent grain and livestock producer in McLean county, declared in a recent statement.

"The ever-growing volume of grain being handled by the Mid-West is being

obtained on a competitive basis. Merit and merit alone is responsible for our growth. We have been getting the business because we are demonstrating that a co-operative can pay the farmer as much or more for his grain as any old line company.

"When farmers decided to own their own local elevators 25 or more years ago they were met with the same kind of opposition we are experiencing now in building a co-operative agency in the terminals. We are going to win this fight because our set-up is sound and our management capable of getting the farmer the most for his product. Furthermore, all profits made from handling grain will go to the member elevators and on to the producers in patronage refunds."

PUT GRAIN SALES PROFIT

(*Continued from Page 14*)

themselves. And in this same talk he made the point that the grain trade after much discouragement and failure had built the present efficient system for marketing grain. I'm not disputing the fact that the grain trade has accomplished much in improving the marketing system. Nevertheless there is plenty of room for further improvement. It's time the producer took a hand in making the system work for him as well as it has worked to enrich the middleman. Farmers may expect much opposition and discouragement in their co-operative efforts.

"You producers have an organization operating in all the big grain markets of the world. Every buyer of grain of any size in any state of the Union has the Farmers National's bid on grain every day between 1:00 p. m. and 9:30 next morning. That's what you have done for yourselves in less than two years' time.

"The Farmers National is handling more grain than any other firm in the country. It is the only organization that can offer grain at all times in the quantity and quality desired by the buyer. But you producers have to work with this system to get the benefit."

The 200 farmers in Peoria, Knox, Stark, and Henry counties in the Farm Bureau farm management service paid an average of $356 each in taxes last year. The farm incomes after taking out 5 per cent for the investment averaged $196 less than nothing, reports the Peoria County Farmer.

Champaign county has adopted a new cream marketing plan. Pick-up trucks are gathering the cream at the farm twice a week and are hauling it to the farmers' co-operative creamery at Crawfordsville.

To Continue Policies

Chairman James C. Stone of the Federal Farm Board met recently with representatives of the big grain exchanges of the country for a conference on wheat. Chairman Stone announced that the Board would continue its present policies calling for no stabilization of the 1931 crop and the further development of co-operative marketing.

Attending the conference were Julius Barnes, grain exporter; James C. Murray, president, Chicago Board of Trade; Fred B. Wells, B. H. Woodworth, Minneapolis Chamber of Commerce; George Davis, Kansas City Exchange; James Norris, Chicago; Walter McCarthy, Duluth; and E. J. Peck, Omaha.

Wheat Storage Space Ample for New Crop

In spite of the large carry-over and prospects for a large wheat crop, there is no indication of any great shortage of storage space or any unusual congestion in handling the forthcoming crop, according to the Farmers National Grain Corporation.

The carry-over June 30 is estimated at 275 to 300 million bushels, or approximately that of last year. It is estimated that there will be more storage space in proportion to wheat supplies than was the case a year ago.

Says Red Top Business Returns $1,500,000 Yearly

Eighty-five per cent of the world's supply of red top grass seed is produced in 13 counties of southern Illinois, according to J. J. Pieper, Crops Division, College of Agriculture, Urbana. The industry averages returns of about $1,500,000 a year to some 7,000 growers, he says.

The average annual production from 1922 to 1930 was more than 10,000,000 pounds. Prices range from 10.5 cents a pound in 1927 and 1928 to 22 cents a pound in 1925-1926. The average annual production of red top seed per farm is 1,500 pounds having a value of $225.

The index of the general level of farm prices on May 15 was 86 per cent of the pre-war level, 38 points below a year ago and the lowest since 1910.

The board of directors of the Illinois Produce Marketing Association meeting at Decatur, May 13, voted to pay a dividend of 7 per cent on all outstanding preferred stock.

LaSalle Co. Grain Co-op. Now Operating at Ottawa

THE new conditioning and loading station set up by the LaSalle County Co-operative Grain Company at Ottawa started operating late in May, announces the Organized Farmer of LaSalle county. Open house was held on May 25 and 26 when representatives from neighboring counties in northern and central Illinois gathered to see the new equipment.

"Cracker" Johnson

E. L. "Cracker" Johnson, a graduate of the University of Illinois, College of Agriculture, and former associate county adviser in Macoupin county, has been employed to manage the new co-operative.

Grain is cleaned and loaded simultaneously by an airforce blower. Cash is paid for the grain as it is hauled in for loading based on the prevailing market.

The loading station is equipped with a 22-foot scale of 10-ton capacity. The loading equipment will handle 1,000 to 1,600 bushels per hour. Grain is blown either directly into cars or into one of the four steel storage bins with a capacity of 2,000 bushels each. Air under high pressure forces the grain up the chute so as to remove excessive moisture and condition the grain for storage. Dirt and foreign material is separated from the grain at the same time.

Marshall County Grain Producers Meet Wenona

Grain producers about Wenona in Marshall county met on June 1 to consider ways and means of getting a maximum price for their grain. They discussed the possibilities of the new air force blower type of grain loader which is being used in LaSalle county to facilitate and cut overhead expenses in handling grain.

With this new device it is reported that grain can be blown directly from the unloading chute into the car and much dirt can be removed in the process to improve the grade.

The St. Clair County Farm Bureau recently moved into new quarters in the new Hotel Belleville opposite the Court House.

Steps toward organizing agricultural credit corporations have been taken in McLean and Champaign counties.

Co-operative Produce Marketing in Illinois

By Frank Gougler

THREE reasons Illinois producers of butterfat have undertaken to market this commodity co-operatively may be stated as follows:

1. Because they felt they were not getting enough for their butterfat in relation to the Chicago butter market.

2. Because many producers were dissatisfied with weights and tests received from some of the creameries buying butterfat in the state.

3. Because producers recognized inefficiency in the method of assembling butterfat where more and more stations compete for the small volume of cream coming into a given town.

Before co-operative produce marketing was launched, butterfat was being purchased from three to six cents under the Chicago market, the margin being wider in southern Illinois than in northern Illinois due to keener competition in the latter section and a poorer quality of the product in the southern counties. The operating costs of private cream stations before pools were organized ranged from four to six cents per pound. Co-operative cream stations recognized that this cost could be reduced by handling a larger volume through their pools than was being handled by private cream stations.

Higher Average Price

At the present time the price for butterfat in relation to the Chicago market for northern Illinois will average quite closely throughout the year to the Chicago market, and in southern Illinois from three to five cents under the market depending upon the time of year and the range in the butter market price.

In regard to the dissatisfaction of weights and tests, it cannot be said that producers were dissatisfied with all creameries buying butterfat within the state. But evidence indicated that some companies were taking advantage of producers in this respect. These conditions promoted the organization of the first co-operative cream marketing association as early as 1924.

The first station was started in June of that year at Paxton, in Ford county. Up to the end of 1928, little attention was given to this project. As a result only a few additional pools were organized during that period. One of the early pools organized at Polo, Ogle county, was later converted into a co-operative creamery which has been operating very successfully.

During 1928-29-30 cream pools were organized over the state until at the present time sixty-five such units are now operating with several more getting ready. As each pool was organized it did its own shopping around to find a buyer for the pooled cream. Early in 1928 it was found necessary to improve this method of selling to give every creamery an opportunity to buy pooled butterfat. A plan was therefore devised of selling to the high bidder.

Asked for Bids

During the organization period of a pool, careful thought was given to the number of creameries that might be interested in purchasing the butterfat. All creameries that could possibly be interested were invited to submit bids. They were asked to bid for the butterfat for a period of one year paying on the basis of the Chicago market on the association's weights and tests. This plan was followed until the spring of 1930. At that time representatives of the processors pointed out objections to the plan. These were:

1. The creamery buying a pool of cream had no assurance that they would have it more than one year. This being the case, an individual creamery might lose a number of pools very suddenly. This actually happened in one case so as to work a great hardship on the company.

2. Another objection raised was that in many cases instead of moving the cream to plants nearby, it was moved to distant creameries. This reduced the quality of the product instead of improving it.

With these points in mind, it was suggested by processors that an effort be made to work out a plan to correct these evils.

Decide to Federate

Prior to November, 1929, Illinois cream pools were individual county associations with producer members on contract to market all their produce through the county organization. It was decided to reorganize these associations in accordance with the Marketing Act of 1923 and to provide for capital stock. It was also decided to federate these county associations into a statewide organization.

This was done November 6, 1929, when the Illinois Produce Marketing Association was organized providing for three classes of stock. Capital stock consists of 30,000 shares of class "A" preferred $25 par value with cumulative dividends of 7%; 150,000 shares of class "B" preferred for the Illinois Agricultural Association, which initiated, developed and is responsible for the project, and 75,000 shares of common stock. The "B" stock has no financial interest. County associations in like manner were incorporated with 2,000 shares of class "A" stock at $25 per share 7% cumulative dividends, 2,500 shares of class "B" stock of no par held by the Illinois Produce Marketing Association, and 1,000 shares of common stock. The above provisions are for large counties. Small counties are organized with only one-half the number of shares in each class.

The Illinois Produce Marketing Association is governed by fifteen directors. This board, in co-operation with the I. A. A., devised the present plan of selling butterfat, which provides:

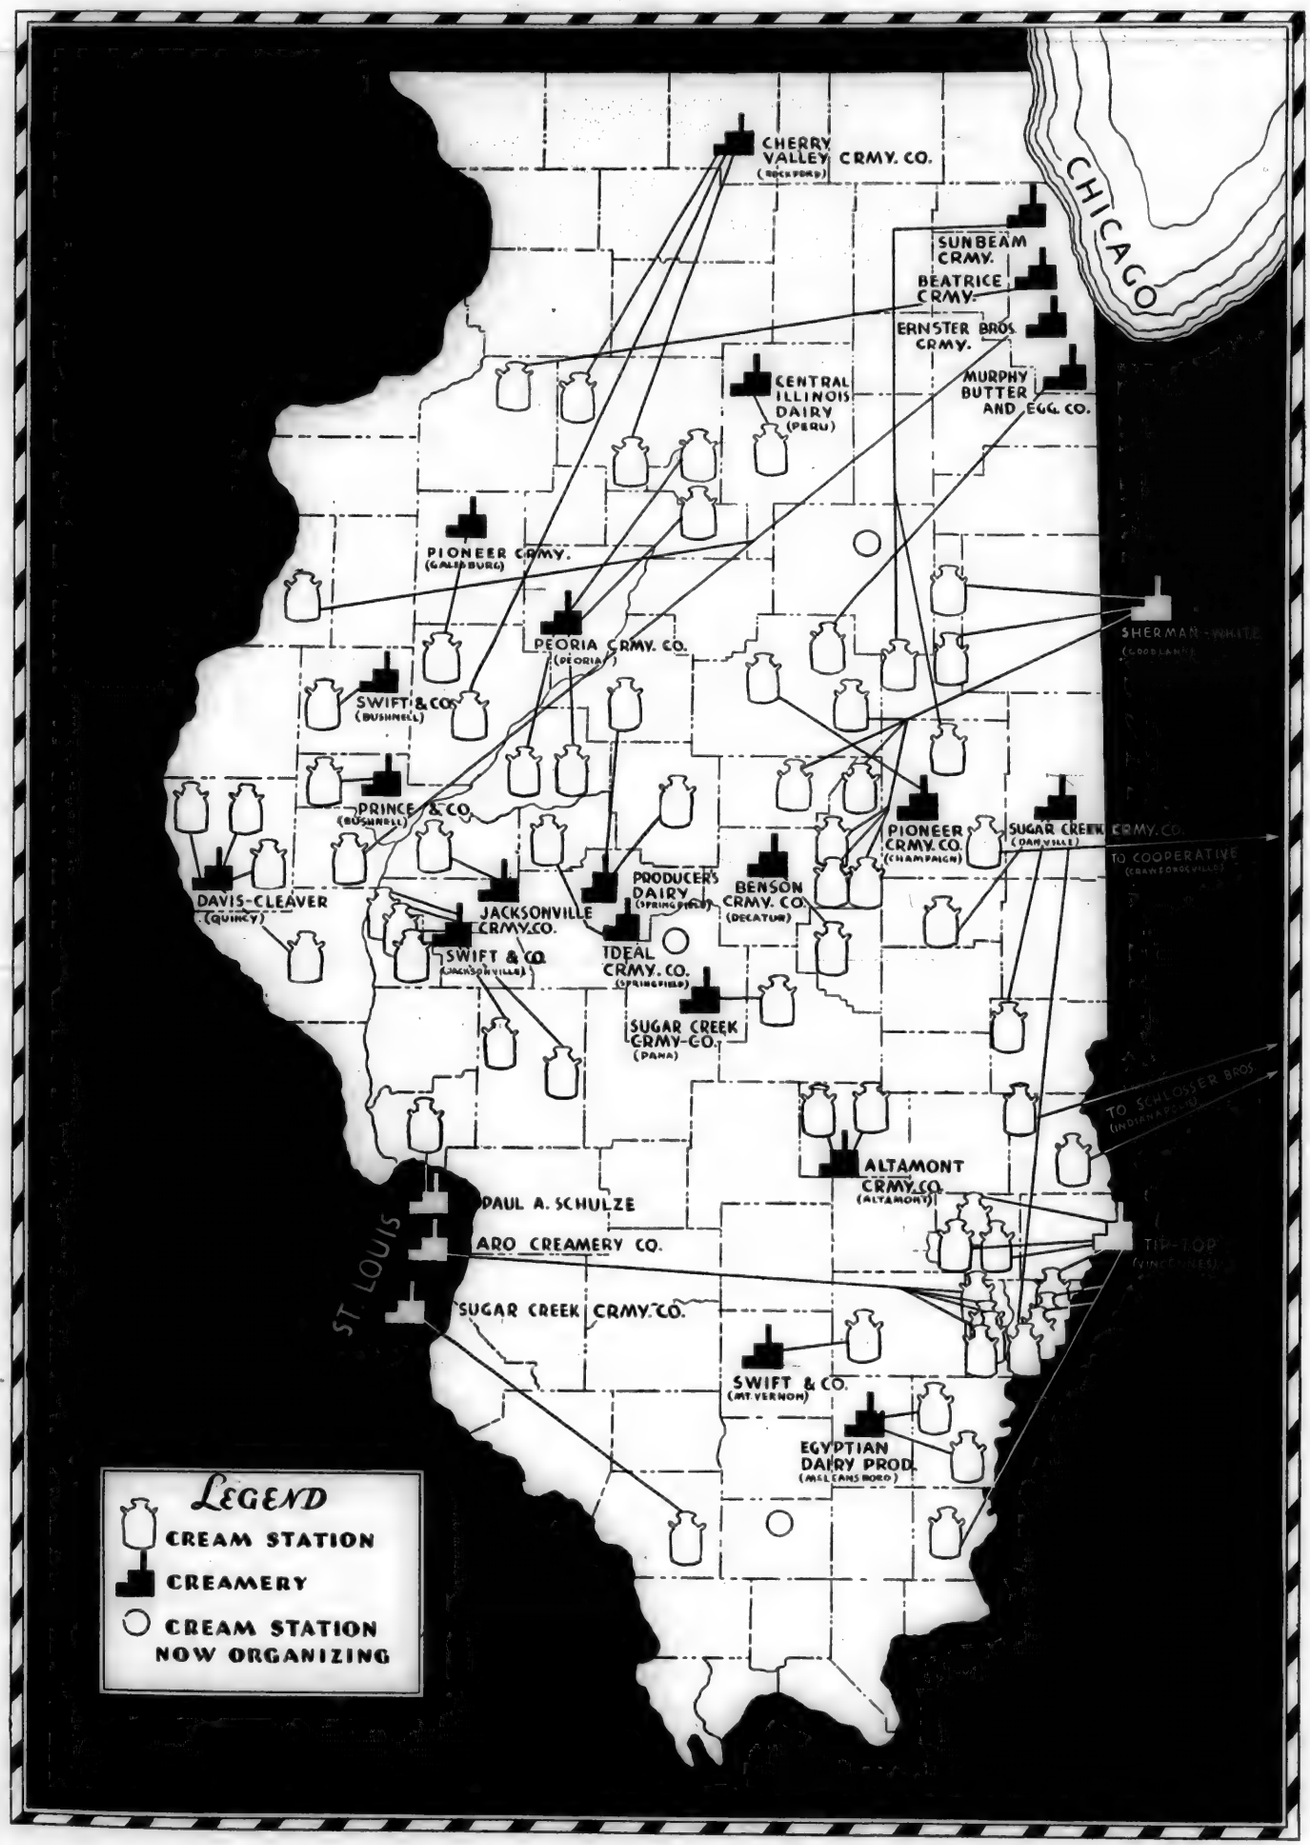
What Plan Provides

1. That the initial price paid for butterfat handled by pools be uniform throughout the state regardless of the location of the pool.

2. For protecting the operating margin of the pool.

3. For division of profits made on butter manufactured from pooled butterfat between the manufacturer and producers.

4. For administering the plan by a committee of six men—three representing processors and three producers.



The initial price paid for pooled butterfat is based on the daily Chicago 90 score market, which varies according to the butter market as follows:

Chicago Price Range of Butter	Premium or Deduction for Fat
15 - 19¾	Minus 2¾
20 - 24¾	" 1¾
25 - 29¾	" ¾
30 - 34¾	Plus ¼
35 - 39¾	" 1¾
40 - 44¾	" 2¾
45 - 49¾	" 3¾
50 - 54¾	" 4¼
55 - 59¾	" 4¾

Insofar as the contract creameries are concerned, the local produce associations are protected by the creamery receiving their butterfat to the extent of three cents per pound above the price received from the creamery. After the creamery has paid all procurement, manufacturing and sales costs and is credited with the going return on investment, the remaining net profits made on pool butterfat are divided so that one-half goes to the Illinois Produce Marketing Association for refunding to the county associations on a patronage basis. The administration of this marketing plan is in the hands of six men as follows:

Tom Borman, Beatrice Creamery,

PRODUCE MARKETING

(Continued from Page 16)

Chicago; Tom Canfield, Swift & Co., Chicago, and Dr. N. W. Hepburn, Peoria Creamery, for the processors; and Earl Smith, president, Geo. Metzger, secretary, Illinois Agricultural Association, and Sam Elkins, president Illinois Produce Marketing Association, for the producers.

The duties of the Administration Committee are:

(a) General supervision of all matters requiring joint supervision.

(b) Arbitration of controversies that may arise between the parties or between processors signing similar agreements.

(c) To allocate and reallocate cream delivered by association to processor.

(d) To adjust all matters of differences with reference to grading, weights and tests.

(e) To encourage the production of a better product.

This method of co-operative marketing has incorporated into the plan some entirely new features. It is more or less an experiment in the field of co-operative effort.

Profit-Sharing Plan

The "division-of-profit" plan with private interests is rarely ever seen in the co-operative field. Here is an attempt not only for producers to co-operate but one to bring about co-operation between producers and private interests. With such wide deviation from the usual method of co-operative effort, it is expected that serious problems might arise.

The Administration Committee nevertheless has been quite successful in administering this plan. There has been no disagreement in the matter of allocation of butterfat, neither has there been difficulty in settling other problems coming before the Administration Committee with the exception of one instance.

A Problem Unsolved

The problem that has not yet been solved is that of protecting the pools' operating margin at points where independent buyers not co-operating in this plan are responsible for unduly high prices. The best that has been accomplished at these points is for the processor to protect the pool to the extent of one-half of its operating cost. Such an adjustment cannot be accepted as satisfactory over a long period. It will be necessary for the Administration Committee to work out a satisfactory policy covering this situation.

Numerous cases have been reported by creameries stating that they are not getting the full amount of butterfat paid for. Investigations have been made in every case and findings indicate that in some cases the creamery is at fault and in other cases the trouble is at the station.

The first division of profit period extended from June 1, 1930, to March 31, 1931. During that period the total amount of pooled butterfat amounted to approximately 1,684,000 pounds on which the total amount of money paid in by the creameries amounted to $1,645.74, which is equivalent to practically .1c per pound. The division of profits for this period is almost negligible. It is as much as could reasonably be expected perhaps when market conditions during the period are taken into consideration. A study of the market from June 1, 1930, to March 31, 1931, indicates that during the entire period there has been a consistent decline in the market.

Decline Hurts All

This decline naturally resulted in low profits or losses, not only from the standpoint of the processors but also from the standpoint of the margin made by the co-operative association. Of the 24 creameries purchasing pooled cream during this period only eight were able to show a margin above operating cost. This small division of profit is disappointing to the producers. Yet this method of marketing deserves further trial in a period more favorable for its success.

The end of the present contract period expires with the calendar year 1931. At its close improvement undoubtedly will be brought about to eliminate some of the present difficulties. An agreement should be reached to protect co-operatives in towns where independent operators are buying butterfat. During the past year the direct shipper price for butterfat has been more favorable than station price. This condition should be corrected by giving pools some consideration. Finally, if the dairy industry of Illinois is to develop to the fullest extent, it will be necessary to develop and enforce a grading plan. With other states forging ahead in the production of high quality butter, it is necessary for our state to fall in line or be satisfied to take a lower price for what we produce.

L. F. Brissenden

L. F. Brissenden, I. A. A. district organization manager in the southeastern Illinois territory, recently returned from a trip to British Columbia, where he and Mrs. Brissenden visited their son and daughter-in-law.

"Here is one fish story that's true," he writes. "The salmon I caught shown in the picture was 37 inches long and weighed 19 pounds. I got a real thrill out of landing this salmon.

"I learned many things during the trip about the wheat pool in Canada, and co-operative poultry and egg marketing up and down the Pacific Coast."

60 Marshall-Putnam Livestock Men at Peoria

Producers' Representatives Demonstrate Market Grades and Grading

SIXTY livestock farmers led by Guy French, director of the Peoria Producers and chairman of the Marshall-Putnam Farm Bureau Livestock Marketing Committee, and R. J. Laible, Farm Adviser, visited the Peoria Producers on May 20. They were met by Eddie Sitton, hog salesman and Ray E. Miller of the Illinois Agricultural Association, and conducted through the yards.

Methods of unloading, receiving, weighing, yarding and feeding were explained. Following the trip through the yards the delegation was assembled in a large pen where different grades of hogs had been selected. Mr. Sitton discussed each grade of hogs, why it was graded in that manner, its value and what the outlet for that class of stuff was. The calf grading demonstration was particularly interesting. Many of the visiting growers expressed surprise at information which came out in the demonstration. A discussion of the different grades of butcher cattle concluded this part of the program.

Luncheon at Hotel

Following luncheon at the Hotel Jefferson, George Wilson, president of the Peoria Producers, was presented by Mr. French. W. R. Hembrough, manager of the Peoria Producers discussed informally the operation of the co-operative, the Stocker and Feeder Company, and later answered questions. Manager D. L. Swanson of the Chicago Producers was also a guest and spoke briefly of the operation of the Chicago Producers and its relation to the Peoria Producers. Ray Miller and Sid Cherrill of the Livestock Marketing Department of the I. A. A. discussed the activities of the Livestock Marketing Department.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

Number 7 | JULY, 1931 | Volume 9

Some Facts for Illinois Grain Producers

By Harrison Fahrnkopf

THE Illinois Grain Corporation is one of twenty-five grain marketing regionals which own the Farmers National Grain Corporation. The organization is state-wide in scope, while the latter organization is the national grain marketing agency set up by grain marketing co-operatives of the United States at the suggestion of and under the direction of the Federal Farm Board.

H. Fahrnkopf

The Illinois Grain Corporation does not duplicate the work of the Farmers National Grain Corporation. The function of the state regional is to originate the grain. This is done through the local co-operatives in the country. The work of the National is that of contacting the millers and processors who buy grain. The state regional assembles the grain. The Farmers National Grain Corporation sells and merchandises it.

Co-operative marketing will make for an improved agriculture, and an improved agricultural situation will benefit the entire business structure of the country. The farmer can improve his business by efficient production and efficient marketing.

Efficiency and Economy

The handling of grain through large, well-managed single selling agency channels should eliminate waste and make for efficiency and economy. For this reason, co-operative marketing developed on a sound and constructive basis will benefit both the producer and the consumer.

Illinois ranks high as a producer of grain. A large quantity of this grain produced is marketed, is not fed on farms where grown. In fact, if we had six other states which marketed as much grain as Illinois, these six, together with Illinois, would furnish for market all the grain in the United States.

There are operating in Illinois today approximately 450 farmers' elevators, which handle more than one-half of all the grain going into market channels from Illinois. The grain marketed from these local co-operatives totals approximately one hundred million bushels. Thinking farmers who believe in handling this grain co-operatively through their local elevators also believe that it is to their advantage to sell this grain at the terminal market through their own co-operatives. If it is a good thing for one hundred or more farmers to co-operate locally in shipping their grain, it ought to be a good thing for one hundred or more farmer elevators to co-operate in merchandising their grain through a single sales agency. The Illinois Grain Corporation is such a co-operative sales agency.

All Owned by Grower

The Illinois Grain Corporation is supported by memberships of local co-operatives. The farmer holds a membership in his local elevator, the elevator holds a membership in the Illinois Grain Corporation, and the Illinois Grain Corporation is a member of the Farmers National Grain Corporation. Thus the entire structure is producer-owned and producer-controlled. The first elevators to become members were pioneers in the movement. They made a cash stock subscription which enabled the Illinois Grain Corporation to become a going concern. Now elevators can become members without a cash stock subscription.

Interest in the state-wide co-operative is growing every day. Indifference is being replaced by enthusiasm for the plan of marketing through the Illinois Grain Corporation. Today many farmers, especially directors of elevators, are informing themselves as to how they can link their elevator and community with this worth-while movement. They are beginning to realize that just as surely as it is good for farmers to co-operate it is equally good for co-operatives to co-operate.

Midwest Grain Corp.

The grain sales or operative end of the Illinois Grain Corporation is set up as a separate organization known as the Mid-West Grain Corporation. Under this name is handled all business pertaining to the merchandising of grain.

In addition to offices at Chicago, Peoria and St. Louis and memberships on the boards of trade and grain exchanges in these cities, branch offices are located at Jacksonville, Decatur and Pontiac, Illinois. C. P. Cummings, a man with more than a quarter of a century of successful experience in merchandising grain, is manager of the Mid-West Grain Corporation. Mr. Cummings has associated with him in the various offices a group of very able and competent men. All of the foregoing personnel and service is now available to the farmer whose local co-operative is a member of Illinois Grain Corporation. If your local elevator is not a member of this state-wide co-operative, you should inquire why it is not a member.

The Producers' Opportunity

Illinois farmers have the opportunity of marketing their grain through co-operative channels to the miller and processor. In many communities there have been operating for years co-operative farmers' elevators. Until recently co-operative marketing of grain has not advanced successfully beyond this local elevator station. The producer now has an opportunity to support and use not only his local grain marketing agency but his state and national agency as well.

The Illinois Grain Corporation and its subsidiary sales agency, the Mid-West Grain Corporation, are now past the experimental point. They are going concerns. They have marketed more than three million bushels of grain. Oliver Wendell Holmes said, "The human race is divided into two classes—those who go ahead and do something and those who inquire why it wasn't done in a different way." Men associated with farmer elevators for many years have gone ahead and set up the Illinois Grain Corporation. They have done a good job. Thinking grain producers will support it.

Corn Cost 60c a Bu., College Figures Show

Cost studies made by the Farm Organization and Management Department of the Illinois College of Agriculture show that the cost of growing corn in the best corn sections of the state in 1930 was 60 cents a bushel, which is more than the crop is now bringing.

In 1930 costs were 10 cents a bushel higher than in the two preceding years largely because of reduced yields. Labor rates were considerably lower than those prevailing the year before, but this difference was not enough to offset the reduced yields.

Gregory to Speak at Midwest Training School

The Midwest Farm Bureau Training School will be held at Madison, Wis., August 10 to 13. Among the I. A. A. organization men on the program are Secretary George E. Metzger, whose subject is "From the Inside"; R. J. Hamilton, "Adapting Sales Methods to Farm Bureau"; V. Vaniman, "How to Collect Dues"; and A. B. Culp, "Leadership Training Schools."

The banquet will be held at the evening session on August 12, with L. B. Palmer, president of the Ohio Farm Bureau Federation, in charge. C. V. Gregory, editor of Prairie Farmer, will be the speaker. R. W. Brown, president of the Missouri Farm Bureau Federation, is dean of the school.

The early commercial potato crop this year in 19 important potato-growing states totaled 48.6 million bushels, or 13 per cent more than last year.

Indiana is one of the four states in which tuberculosis among cattle has been reduced to one-half of one per cent or less, the others being North Carolina, Maine and Michigan. Approximately 3,000,000 cattle were tested from which about 30,000 reacted.

What Is Pooling? U. S. D. A. Bulletin Answers Question

Time, Patience and Courage Required to Build Co-operative Marketing Machinery

IN U. S. D. A. Miscellaneous Publication No. 14, under the heading, "Possibility of Market Expansion," the following appears: "Few farmers, as individuals, can afford to undertake market development because of the expense involved and the lack of sufficient supplies to make the exploitation policy permanent. Here, again, the POOLING by a large number of growers of the expense, risks and other features involved in market expansion makes possible a program for widening the market for their product which is of benefit to the grower, but which would be prohibitive were it undertaken by him individually."

The word "pool" is a much abused word. It merely refers to group effort as opposed to the individual acting alone. So far as it concerns the farmer and marketing, he has been doing it for years through his local farmers' elevator. Although the farmer has not pooled his selling efforts in merchandising his grain through his local co-operative elevator, he has, along with his neighbors, been pooling the cost of maintaining an elevator, employing a manager and other operating costs—he has been pooling his selling expenses.

The Illinois Grain Corporation, however, is not a pool. Both the member elevators and farmers sell their own grain at a time determined by themselves. By-laws and articles of incorporation (a charter) do not make or constitute a co-operative. It takes something more. And not the least of the "something more" is good leadership supported by a local and wide-awake membership.

In a recent meeting one poor soul raised a brand new objection—he said that the set-up of the Illinois Grain Corporation and the Farmers National Grain Corporation was so good that the Farmers National Grain Corporation would become too powerful—would get dangerous and ask unfair prices for grain. Charley Cummings of Mid-West enlightened him by saying, "The thing for this generation to do is to give the best we have toward building the machine and let our grandchildren take care of the matter of becoming dangerous."

To build the Illinois Grain Corporation requires time, patience and courage on the part of the leaders throughout the state who believe in the movement. The new has to be sold to us. We don't want it at first. 'Tis said that it took McCormick fourteen years to sell his first hundred reapers.

The business trend of today is for the finances of the community to flow toward the industrial centers; for example, witness the chain stores, chain oil companies. Banks in large trade centers are bulging with money. Our co-operative marketing machine is set up so that terminal earnings flow back to the community.

Intermediate Credit Loans Reach $110,000,000 in '30

FINANCING farmers' co-operative marketing activities reached new proportions in 1930 when the volume of funds loaned by the 12 Federal Intermediate Credit Banks reached $110,000,000 for the year.

This represents, of course, only a small proportion of the total amount advanced by lending institutions to farmers' co-operative marketing associations so they might carry out their programs of orderly marketing.

In 1930 about 12,000 co-operative marketing organizations did a business of approximately $2,000,000,000. Not all of this business, by any means, was done on borrowed funds. Much of it represents products sold for consumption shortly after they left the farm.

The bulk of the financing for orderly marketing represents loans on a score or more staple commodities under the supervision of the Federal Farm Loan Board in Washington. Since the Intermediate Credit Banks were organized in 1923, they have loaned to farmers' co-operative marketing associations more than half a billion dollars.

Following the creation of the Federal Farm Board, under the Agricultural Marketing Act, the rapid growth of co-operatives and the development of national sales agencies have been responsible for a large increase in the activities of these loan agencies.

Intermediate credit is becoming an increasingly important factor in the financial structure of the United States. It has proved that it can fill a distinct agricultural need.

Rubber from Goldenrod

Thomas A. Edison at 84 has at last succeeded in making synthetic rubber from goldenrod grown on his plantation in Florida. He will turn the process over to the government as a patriotic gift. The value of the process lies in the fact that it insures an emergency supply of rubber. At present rubber is cheap due to over-production, making the new process of little immediate worth. Henry Ford and Harvey Firestone have large goldenrod plantations in the South.

Grain Producers View New Blower at Ottawa

Loading Equipment Said to Cut Local Costs of Handling Grain

GRAIN producers from a dozen central and northern Illinois counties gathered at Ottawa, July 2, to view the Airforce blower used in loading grain by the LaSalle County Co-operative Grain Company.

This unique device, a new invention recently placed on the market, is a one-man outfit operated by electricity. It simplifies the task of loading grain in cars or storing it temporarily in fireproof, steel bins mounted on cement foundations.

The Airforce equipment at Ottawa includes four steel bins of 2,000 bushels capacity each, a 30-horsepower motor, modern scales and compressed air dump for weighing and unloading the grain, and the blower which is credited with removing excess moisture, dirt, and chaff from the grain before being elevated into the cars or steel bins.

A powerful steel fan operating at 1,675 R. P. M. blows the grain at a high rate of speed through the blower into the car or bin.

E. L. "Cracker" Johnson, manager of the LaSalle county co-operative, states that he finds loading direct into the cars is a time saver and is practical where grain is moving freely.

2400 Bu. Per Hour

"We made a test on our opening day with a 101-bushel load of corn, blowing it into the car in 2½ minutes which is at the rate of 2,400 bushels per hour," he said. "Oats move somewhat slower, or at the rate of about 1,600 to 1,800 bushels an hour. Wheat and barley can be loaded somewhat faster."

Johnson states that an old experienced grain man from Chicago was out to inspect the equipment a short time ago. He made a very thorough investigation from one end to the other. He remarked that it looked to him as though this loading equipment would revolutionize grain handling in this country.

The advantages claimed for the Airforce Conveyor Sales are: (1) No fire hazard. (2) One-man operation. (3) Cleans grain, eliminates dirt line in cars. (4) Dries and conditions damp grain. (5) Raises grade and test weight. (6) Handles grain rapidly. (7) Handles grain most economically. *Ottawa plant handling grain at 1¼c per bushel.* (8) The nearest thing to a conditioning plant that a grain producing community can afford. (9) This equipment is within the financial reach of practically every grain producing community.

New Airforce Blower and Steel Bins Used in Handling Grain by LaSalle County Co-Operative at Ottawa.

The Airforce Conveyor Sales is not sold outright. It is merely leased by the company controlling the patents and manufacturing. The company requires an initial advance of $3,500 to show the good faith of the co-operative, individual or company using it. This $3,500, however, is to be rebated back to the local organization at the rate of 1-8 cents per bu. of grain handled after the first year of operation.

The LaSalle County Co-Operative has been handling and shipping grain at a cost of 1.5 cents a bushel, divided as follows: ½ cent to the Airforce Conveyor Sales, ¾ of a cent to the manager, who pays for his own help, light and power, and ¼ cent to the LaSalle County Co-Operative Company for working capital, etc. Out of its half cent the Airforce company rebates ⅛ cent per bu. to the Co-Operative until it has paid back the $3,500 originally invested by the local unit. All expenses of upkeep, wind insurance, etc., is paid by the Airforce company.

Avoids Destructive Competition

"We retain control of this machinery instead of selling it outright," said B. A. Shearer of the Airforce Company, "so as to avoid destructive competition in any community. This plan insures that it will not be unprofitable for any local unit using the blower to operate it."

Mr. Shearer stated that he had investigated average costs of handling grain by country elevators. "I found them to be considerably higher than the 1.5 cent per bu. figure." It has been recommended, he said, that the loading charge of local country elevators be established uniformly at 2 cents per bu. for oats, 3 cents for corn, and 5 cents for all other grains.

"This new grain loading equipment apparently has interesting possibilities," commented Harrison Fahrnkopf, director of grain marketing. "It may assist in cutting local costs of handling grain. It is important, however, that this equipment be not allowed to jeopardize investments of farmers in local co-operative elevators. Duplication of machinery for handling grain at the local point should be avoided.

"The blower may well be tried out at points where present facilities are inadequate for handling grain. In view of present financial conditions among farmers over the country, the comparatively small investment required for such grain handling equipment has considerable appeal."

Stone Meets with Grain Exchange Men

Chairman James C. Stone of the Federal Farm Board met recently with representatives of the big grain exchanges of the country for a conference on wheat. Chairman Stone announced that the Board would continue its present policies calling for no stabilization of the 1931 crop and the further development of co-operative marketing.

Attending the conference were Julius Barnes, grain exporter; James C. Murray, president, Chicago Board of Trade; Fred B. Wells, B. H. Woodworth, Minneapolis Chamber of Commerce; George Davis, Kansas City Exchange; James Norris, Chicago; Walter McCarthy, Duluth; and E. J. Peck, Omaha.

The Illinois Grain Corporation and its subsidiary sales agency, the Mid-West Grain Corporation, are now past the experimental point. They are going concerns. They have marketed more than three million bushels of grain. Oliver Wendell Holmes said, "The human race is divided into two classes—those who go ahead and do something and those who inquire why it wasn't done in a different way." Men associated with farmer elevators for many years have gone ahead and set up the Illinois Grain Corporation. They have done a good job. Thinking grain producers will support it.

Corn Cost 60c a Bu., College Figures Show

Cost studies made by the Farm Organization and Management Department of the Illinois College of Agriculture show that the cost of growing corn in the best corn sections of the state in 1930 was 60 cents a bushel, which is more than the crop is now bringing.

E. L. "Cracker" Johnson, manager of the LaSalle county co-operative, states that he finds loading direct into the cars is a time saver and is practical where grain is moving freely.

2400 Bu. Per Hour

"We made a test on our opening day with a 101-bushel load of corn, blowing it into the car in 2½ minutes which is at the rate of 2,400 bushels per hour," he said. "Oats move somewhat slower, or at the rate of about 1,600 to 1,800 bushels an hour. Wheat and barley can be loaded somewhat faster."

Johnson states that an old experienced grain man from Chicago was out to inspect the equipment a short time ago. He made a very thorough investigation from one end to the other. He remarked that it looked to him as though this loading equipment would revolutionize grain handling in this country.

The advantages claimed for the Airforce Conveyor Sales are: (1) No fire hazard. (2) One-man operation. (3) Cleans grain, eliminates dirt line in cars. (4) Dries and conditions damp grain. (5) Raises grade and test weight. (6) Handles grain rapidly. (7) Handles grain most economically. *Ottawa plant handling grain at 1¼c per bushel.* (8) The nearest thing to a conditioning plant that a grain producing community can afford. (9) This equipment is within the financial reach of practically every grain producing community.

New Airforce Blower and Steel Bins Used in Handling Grain by LaSalle County Co-Operative at Ottawa.

The Airforce Conveyor Sales is not sold outright. It is merely leased by the company controlling the patents and manufacturing. The company requires an initial advance of $3,500 to show the good faith of the co-operative, individual or company using it. This $3,500, however, is to be rebated back to the local organization at the rate of 1-8 cents per bu. of grain handled after the first year of operation.

The LaSalle County Co-Operative has been handling and shipping grain at a cost of 1.5 cents a bushel, divided as follows: ½ cent to the Airforce Conveyor Sales, ¾ of a cent to the manager, who pays for his own help, light and power, and ¼ cent to the LaSalle County Co-Operative Company for working capital, etc. Out of its half cent the Airforce company rebates ⅛ cent per bu. to the Co-Operative until it has paid back the $3,500 originally invested by the local unit. All expenses of upkeep, wind insurance, etc., is paid by the Airforce company.

Avoids Destructive Competition

"We retain control of this machinery instead of selling it outright," said B. A. Shearer of the Airforce Company, "so as to avoid destructive competition in any community. This plan insures that it will not be unprofitable for any local unit using the blower to operate it."

Mr. Shearer stated that he had investigated average costs of handling grain by country elevators. "I found them to be considerably higher than the 1.5 cent per bu. figure." It has been recommended, he said, that the loading charge of local country elevators be established uniformly at 2 cents per bu. for oats, 3 cents for corn, and 5 cents for all other grains.

"This new grain loading equipment apparently has interesting possibilities," commented Harrison Fahrnkopf, director of grain marketing. "It may assist in cutting local costs of handling grain. It is important, however, that this equipment be not allowed to jeopardize investments of farmers in local co-operative elevators. Duplication of machinery for handling grain at the local point should be avoided.

"The blower may well be tried out at points where present facilities are inadequate for handling grain. In view of present financial conditions among farmers over the country, the comparatively small investment required for such grain handling equipment has considerable appeal."

Stone Meets with Grain Exchange Men

Chairman James C. Stone of the Federal Farm Board met recently with representatives of the big grain exchanges of the country for a conference on wheat. Chairman Stone announced that the Board would continue its present policies calling for no stabilization of the 1931 crop and the further development of co-operative marketing.

Attending the conference were Julius Barnes, grain exporter; James C. Murray, president, Chicago Board of Trade; Fred B. Wells, B. H. Woodworth, Minneapolis Chamber of Commerce; George Davis, Kansas City Exchange; James Norris, Chicago; Walter McCarthy, Duluth; and E. J. Peck, Omaha.

Hornbeek on Job in Southeastern Illinois

Burl Hornbeek of Scott county is on the job as organization manager of the sixth district in southeastern Illinois to succeed F. M. Higgins, who resigned the first of the year to edit the weekly newspaper at Lake Geneva, Wis.

Burl Hornbeek

Mr. Hornbeek has been active in Farm Bureau work in Scott county for several years. During this time he has worked with the Farm Bureau as a part-time membership solicitor, making an excellent record. Along with his Farm Bureau work he has operated his farm and is reported to have made 9 per cent interest on his investment in 1929.

Jersey County Organizes Co-operative Grain Co.

The Jersey County Co-operative Grain Company began operating June 29 as the sixty-seventh co-operative affiliated with the Illinois Grain Corporation.

67

It will market its grain through the Mid-West Grain Corporation, the sales agency of the regional co-operative and subsidiary of the Farmers National Grain Corporation.

Arrangements have been made for the use of three local elevators. Leases have already been signed for the Neely elevator at Jerseyville and the McClusky elevator at McClusky. The Fidelity Co-operative Grain Company at Fidelity has signed an agreement whereby it will be classed as a direct shipper as a part of the county set-up.

Carload shippers will be taken care of at Elsah, Grafton, Lock Haven, Reddish, Reardon, Dow, Delhi, Fidelity and Bell Trees. Wheat, corn and oats will be bought and handled as usual at the three elevators on prevailing prices, announces R. H. Voorhees, president of the company. Mr. Voorhees is also president of the Farm Bureau.

Other officers are: Louis Lock, vice-president; C. G. Reddish, secretary-treasurer; Herman Schafer, W. W. Legate, R. E. Ewin and Grant Thompson, directors.

H. G. Neeley has been employed as county manager. George Smith of the Pan Handle delivered the first load of wheat at 8:30 a. m. on June 29.

The May issue of the RECORD is the best yet. It's full of meat from cover to cover.

A. B. Schofield
Ford County, Ill.

The classification of steers by ages instead of weight will be maintained at the International Livestock Exposition, to be held in Chicago, November 28 to December 5, according to B. H. Heide, secretary-manager. The proposed change was withheld when it was learned that many exhibitors had made purchases before the change was announced.

Hoover Grants Tariff Raise on Dried Eggs

Additional protection to American farmers against imports of dried eggs and egg products was granted by President Hoover recently acting on reports of the Tariff Commission. The President made no change, however, in duties on cattle hides and calfskins.

The President approved an increase in the tariff rate on dried whole eggs, dried egg yolk, and dried egg albumen from 18 cents to 27 cents per pound. The duty on olive oil in packages weighing less than 40 pounds was reduced from 9½ cents to 8 cents per pound, but the duty on olive oil in packages weighing 40 pounds or more was unchanged. The duty of 10 per cent ad valorem on cattle hides and calfskins was not changed. The duty of 7 cents per pound, but not less than 35 per cent ad valorem, on cheese, other than Swiss and Cheddar, was not changed.

The Farm Bureau and other groups of producers had recommended 50 per cent increases in the duties on dried eggs, bulk olive oil, cattle hides and calfskins, and no decreases in the duties on any of these products under investigation. Farm groups took no particular part in the investigation concerning packaged olive oil.

The Illinois Agricultural Association joined the A. F. B. F. and other state Farm Bureau federations in requesting the President to support the suggested increases. The I. A. A. telegram to the President read as follows:

"We respectfully recommend for your consideration that tariff schedules on dried eggs, cattle hides, and calfskins be increased by 50 per cent under provision of the Tariff Act for the period of the present emergency at least."

Milk receipts in New York City increased 43 per cent between 1920 and the present time, while the population increased only 28 per cent.

Max Harrelson to Dept. Of Information Staff

Max Harrelson, formerly assistant editor of the Illinois Farmer, began work as assistant in the Department of Information on June 15. The growing demands for advertising and publicity service by the I. A. A. and its many associated companies prompted the employment of additional assistance in this department.

Max Harrelson

Mr. Harrelson is a graduate of Ouachita College at Arkadelphia, Arkansas. He later attended Northwestern University, where he took a year's graduate work in journalism. After leaving Northwestern he became staff correspondent for the United Press in Chicago. From there he went to the Illinois Farmer, where he remained until the paper was bought by Prairie Farmer. Since that time he has worked with the Associated Press at Little Rock and the Daily Beacon-News at Paris, Ill.

I. A. A. Will Oppose 15% Up in Frt. Rates

The Illinois Agricultural Association will oppose the proposed 15 per cent increase in freight rates on agricultural commodities asked by the railroads.

As far as rates within Illinois are concerned, the I. A. A. will seek to exempt agricultural products from the increase when the case comes before the Illinois Commerce Commission. In addition Mr. Quasey said he would work with the American Farm Bureau Federation when the hearing is held before the Interstate Commerce Commission at Washington.

That organized agriculture would fight the proposed increase in freight rates was the decision made June 26 when officers and directors of the Farm Bureau Federation met in Chicago.

The action came as a result of the announced intent of the railroads to include agricultural commodities in the general rise proposed.

"The Interstate Commerce Commission has just completed a four-year study of all rates on agricultural products," declared O. W. Sandberg, transportation director of the A. F. B. F. "Now the railroads are asking the commission to scrap this study."

Uncle Ab says that if there were not so much printing it would be harder to find stuff for kindling fires.

Observations

A LITTLE blue-covered booklet entitled "The Passing Show" containing extracts from the daily propaganda sheet of Lowell-Hoit & Co., Chicago grain middleman, came to our desk several days ago.

The contents are representative of the tons of printed matter the organized middlemen are flooding the country with in the hope of destroying the efforts of farmers in bettering their economic condition.

Abandon all your farm organizations and co-operative efforts, ship your grain to us, and we'll solve all your problems for you, about sums up the benign advice handed out gratis in this pamphlet.

No suggestion is made that cash commissions be cut until grain prices recover to a normal level. That would be constructive action farmers would appreciate. Instead the author resorts to calling names and belittling everything farmers are doing in their own behalf.

Country elevators alone escape attack. As they carry forward their co-operative marketing program to its logical conclusion, presumably they, too, will fall from the middleman's good graces. For then they will cease to be customers. The profits in handling grain will go back to the country where they belong.

Hoit & Co. doesn't like the Farm Bureau any more for which we are sorry. So long as it confined its teachings to growing bigger crops to make more commissions all along the line it was lauded as a great organization. Since it began to give some attention to farm prices, to teach co-operative selling, to advise collective bargaining, to cut insurance and other costs, equalize the tax burden, make the tariff effective on farm products it is criticized for "getting out of its field."

But critics like the writer of the Passing Show or The Comedy of Errors, or the Follies—call it what you like—offer nothing constructive. They call names, make faces, belittle, seek to undermine farm organization but suggest no way out. A do nothing policy. Their interests stop with advising greater production, buying the farmer's produce as cheaply as possible, and collecting tolls.

And no one but the farmer pays for the anti-co-operative propaganda. That's where part of the commission fees go. The Passing Show reminds us again of Eddie Cantor's favorite bed time story. Once upon a time mamma skunk and her little ones were walking through the great dark woods when they came upon a big black bear. "Mamma," cried the little ones in fright, "what shall we do?"

"Children, let us spray," was the mother's ready reply.

Middlemen Organize

"The Federation of American Business Men" is the title of the latest grain middlemen's organization which will seek to undermine co-operative marketing under the guise of "getting the government out of business."

One thousand members at $25 per year for four years is the goal. R. I. Mansfield and Mark Pickell, anti-co-operative propagandists, will collect the cash and carry on the program.

Girls from Peoria, Tazewell, Fulton, Marshall-Putnam and Woodford counties will meet at the Tazewell County Recreational Camp near East Peoria, August 5, 6, 7 and 8 for a four-day Girls' 4-H Club Camp. The camp will be under the supervision of the Home Bureau Advisers and County Club leaders.

Reports of games over the week-end indicate that many of the 34 teams of the Illinois Farm Bureau Baseball League were idle July 4 as the second half of the season got under way. The only change in the standing was made in the second division when LaSalle nosed Kendall out of third place.

Kendall defeated DeKalb county in a one-sided game at Yorkville on July 2 by a score of 10 to 2, but slipped out of third place when Will county trounced them, 15 to 5, July 4. In the latter game Kendall used four pitchers in an effort to stop the Will county sluggers who drove out 16 hits. Schultz did all the hurling for Will county.

Greene county increased its lead over Christian by administering a 6-to-5 defeat to the runner-up nine in a close contest on July 4. Two runs in the ninth won the game. Greene county outhit Christian by getting nine hits while the latter nine totaled five. The game was very erratic, Greene making nine bobbles and Christian five.

Douglas county gave Champaign its sixth defeat of the season in a 5-to-4 contest at Urbana, July 4. Champaign made eight hits to six for Douglas.

Now It's "Auditing" Ass'n.

The Illinois Agricultural Auditing Association is the new name for the organization formerly known as the Illinois Agricultural Co-operatives Association, a subsidiary of the I. A. A.

This became effective June 26 when the company was reorganized as a stock association under the act of 1923. Up to that time it had been a membership association. New by-laws and new articles of incorporation were adopted conforming to the state co-operative act. This change will permit the association to serve any agricultural or closely allied concern.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*
MAX HARRELSON, *Assistant Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Back Again

THE breakdown of the general property tax in Illinois, predicted by the Illinois Agricultural Association years ago, is now a reality which none can escape. Rebellion of Chicago real estate owners who have been bearing the bulk of the tax load was to be expected. The business depression coupled with the tax fixing racket in Cook county only hastened and intensified the downfall of a revenue system which should have been scrapped long ago. Rank extravagance, payroll padding, and looting of local government treasuries by Chicago politicians have not helped matters any.

Delinquent taxes brought on largely by inability of property owners to pay their tax bills is the immediate situation the revenue reform committee appointed by Governor Emmerson faces. Chicago is in a bad hole largely because it levies heavy taxes without any regard for the ability of the property owners to pay. Committees can meet and confer from now until doomsday, but if the business and political leaders and press of Chicago don't recognize the soundness of income taxation and use their influence to bring it about when votes count, situations like the present will constantly recur. A problem is never settled until it is settled right.

It Must Have Merit

THE intensity of the propaganda directed against agricultural co-operation in some respects is most hopeful. Co-operative marketing must have merit or the middlemen would not fear it. We can go along with Chairman "Jim" Stone of the Farm Board when he says, "Co-operative marketing is either right or it's wrong. If it doesn't produce better results for the farmer than the system he now has, it won't succeed and shouldn't. I think it will if only the farmers themselves know what to expect from it and what not to expect from it—and when they join a co-operative join with the firm determination of supporting their organization with all their strength and power."

So the rot being spread through the mails and in the country by armies of "contact" men for the commission companies should not be taken too seriously. Farmers themselves will have the final say as to whether or not co-operation pays. They'll not be governed by the advice of those whose only interest is a selfish one. All that the opposition can say will not change the ultimate outcome. Results speak for themselves.

Cutting the Insurance Bill

MORE than a half million dollars saved members annually on their insurance bills is a conservative estimate of the value of this outstanding service developed by the Farm Bureau in Illinois.

Policyholders in Country Life Insurance Co., with $42,500,000 of insurance in force, saved approximately $250,000 on the first year cost of this protection alone.

The Farmers Mutual Reinsurance Co., with $43,000,000 of fire, hail and windstorm insurance in force, is providing a need reinsurance service to protect local township and county fire and windstorm mutuals against excessive losses. Its fire and windstorm rates are still appreciably lower than the old line companies in spite of a recent raise in rates. Farm crop hail insurance costs are a third lower in this farmer-owned and farmer-controlled company.

Another $200,000 is saved yearly by member policyholders on their automobiles and trucks insured in the I. A. A. Company. This figure is based on costs of similar protection in the closest state-wide company.

It is not surprising, therefore, that these co-operative insurance companies have shown very little lapse during the current depression. Policyholders know they are getting a superior service at a bargain in their own organizations.

Indiana Farm Bureau Defends Marketing Act

Declares Jim Watson Being Groomed To Fight Legislation in Next Congress

Referring to the telegram sent by John W. McCardle, Indianapolis, to Senator James E. Watson, Washington, D. C., and printed in the Indianapolis Sunday Star, Lewis Taylor, vice-president of the Indiana Farm Bureau, says, "John W. McCardle, chairman of the Public Service Commission of Indiana, guardian in fact of utilities, and now would-be guardian of national agriculture, out of the vast abundance of his wisdom and thirty years' experience as a grain buyer, wires his conclusions and advice to our senior senator to be relayed to the President of the United States, to the effect that the enactment of the Agricultural Marketing Act was a gross mistake and that a bill be drawn at once for its repeal. His modesty is revealed in the statement 'that a suggestion from me would not be a crime.' True indeed, not a crime, just a telegram uncalled for and unsought, so far as news dispatches indicate, either by the President or the Federal Farm Board, or by agriculture."

Coming as it does, on the heels of a dispatch that a four years' campaign is to be immediately started by grain and other interests, to "educate" the public as to the utter failure of the Federal Farm Board solution and to create a public sentiment that will demand its repeal, naturally leads one to believe that this new enemy of national farm legislation has been chosen to fire the first gun in the pending battle and that the President's chief-of-staff, Senator Watson, has been chosen as its "General Foch," claims Mr. Taylor.

"Gall, nerve and brass are apparent in selecting our champion of the equalization fee as the generalissimo," says the Farm Bureau leader. "How easily the chosen representative of utility interests disposes of the Federal Farm Board. He says to Senator Watson, 'advise the President to make a statement to the American people and especially to the American farmers, that the fact brought out by practical application of the law, creating the farm board proved it to be a complete failure in regard to alleviating the American farmers' and further says he will recommend its repeal at the next session of congress."

"It is rather strange that a board created for the express purpose and benefit of agriculture must be attacked and destroyed, not by those for whom it was created but by commission employees and representatives of utility interests, and that, too, because it has not, in less than two years of its existence, saved agriculture from the depression or panic that has enveloped the world," says Mr. Taylor. "Every intelligent farmer realizes that the Federal Farm Board has not yet solved the problems of the farmer, however, it is the only legislation that we have and we propose to keep it. Probably we will amend it (without the help of our enemies) and out of its work will come a solution of many vital farm issues."

ADDING TO THE LOAD

See Increase in Fruit Handled Co-operatively

Approximately 50 per cent more fruit will be marketed by Illinois fruit growers through co-operative channels in 1931 than in any previous year, according to A. B. Leeper, director of fruit and vegetable marketing.

Most of the increase is accounted for by the organization of new co-operatives among western Illinois winter apple growers, who will market their crop through the Illinois Fruit Growers Exchange.

Apple growers in Calhoun county already have under contract an estimated 150,000 to 200,000 bushels of apples to be marketed co-operatively this year. Liberal increases from other sources are expected to put 1931 well above previous records.

The Calhoun Apple Growers Association is co-operating in the state-wide marketing program. A modern packing and sales shed will be erected at East Hardin, just across the Illinois river from Hardin, Calhoun county seat, on the Chicago and Alton.

Apples will be delivered at the shed by truck across the new bridge, which will be dedicated shortly. The co-operative expects to be ready to handle the 1931 crop of apples.

No one can learn to assume responsibility unless he is made to assume the consequences of his acts.

Organize to Defend Agr. Marketing Act

Hit at Farm Enemies Who Exploit Agriculture for Their Own Advantage

ORGANIZED agriculture is mobilizing against the forces which are threatening to destroy the Agricultural Marketing Act. First steps were taken when forty representatives of national farm organizations and commodity groups met in Chicago June 29 to consider the anti-co-operative propaganda being projected on a nation-wide scale by enemies of farmers' co-operative efforts.

The group appointed a committee to develop a program to defend the Marketing Act and keep the member organizations informed on the movements of the opposition. The committee includes E. A. O'Neal, president of the American Farm Bureau Federation; L. J. Taber, master of the National Grange, and C. O. Moser, vice-president of the American Cotton Co-operative Association.

Resolution Adopted

A resolution was adopted by the farm leaders that ". . . during the entire life of the Agricultural Marketing Act and the existence of the Federal Farm Board, not only America but practically the entire world, has been submerged in the worst economic depression ever experienced, notwithstanding which, the efforts of the Federal Farm Board, acting under the provisions of the Agricultural Marketing Act, have resulted in adding many millions of dollars to the income of producers of agricultural commodities.

"In view of the continued opposition of those groups and individuals, who in the past have exploited agriculture to their own profit and advantage, it is urged that each organization participating in this conference mobilize all of its power to properly inform the people of this country of the merits of the Agricultural Marketing Act and to insist that the Act be retained and that when it is amended the amendments be written by organized agriculture."

Organizations represented at the conference were: The American Farm Bureau Federation, the National Grange, the Farmers Union, and commodity organizations including cotton, grain, livestock, pecan, wool, dairy, poultry, and vegetable associations formed under the provisions of the Federal Act.

Uncle Ab says that the best thing to keep is something you give—your promise.

Life Insurance Means Money to Pay Off the Mortgage

Your Opportunity to
At Wholesale
Term Policy Available to
From July 10

COUNTRY LIFE'S wholesale term policy available to Farm Bureau members between July 10 and August 10 fits present needs for life insurance at a minimum investment.

The wholesale term policy like that offered a year ago carries a low level rate for 12 years when it may be renewed, based on the age of the applicant at that time. An outstanding advantage of this policy is that it may be converted at any time after taken out into any of the regular forms of insurance, full credit being allowed for all the premiums paid in up to the time of conversion.

Only $9.58 at Age 35 with Dividend Rights

The low cost of the new wholesale policy is illustrated by the annual rate of $9.58 at age 35 (amounts to only 19c a week) which will be further reduced by dividends. The policy is non-medical for $1,000 of insurance. Present policyholders in Country Life may secure $2,000 additional insurance without a medical examination. Others may take $2,000 of the new term insurance provided they pay for a short form medical examination.

Policy Convertible Within 12 Years

An important feature of the new term insurance is that it can be changed or converted into standard life insurance at any time within 12 years of the date when taken out. Moreover, when you convert short term insurance you will get the benefit of all premiums paid, and also the benefit of the rate for your age when the short term policy was taken out. The new policy, therefore, is an option on standard life insurance good for 12 years with full protection during this period.

Life Insurance Protects the Home and Family

Low Annual Rates on Wholesale

Age	Annual Prem. Per $1,000	Age	Annual Prem. Per $1,000
18	$7.71	29	$ 8.59
19	7.76	30	8.72
20	7.82	31	8.86
21	7.88	32	9.01
22	7.95	33	9.18
23	8.02	34	9.37
24	8.10	35	9.58
25	8.18	36	9.81
26	8.27	37	10.07
27	8.37	38	10.36
28	8.47	39	10.69

Within Reach of All

The new term policy is offered to Farm Bureau members who may need more protection but do not have the available funds at present to pay the higher premiums on the regular kinds of insurance. The rate on the term policy is so low as to make it easily within the reach of every member. Then later when the policyholder feels that he is in a better position to take out one of the regular policies he can convert and get the full benefit of all payments made on a short term policy.

COUNTRY LIFE INSU

608 SOUTH DEARBORN S

Legal Reserve Life Insurance . . .

8	16.69	59	38.70
9	17.83	60	42.10
50	19.10		

For Farm Bureau Members Only

The wholesale term policy is for Farm Bureau members only in groups of 50 in each county. Counties which secured this insurance last year may add any number of new applicants. Counties which failed to make their quotas a year ago must have at least 50 applications to take advantage of this special offer. The low annual rates given above will be reduced from year to year after the third by dividends.

Maximum Policy $2,000

If you already carry a Country Life policy you may apply for $2,000 of term insurance at the rate designated for your age. If you do not carry Country Life insurance at time of application your limit of wholesale term insurance will be $1,000 unless you pay for a short form medical examination which if approved entitles you to a maximum of $2,000 of insurance.

Points to Remember About New Term Policy

1. For Farm Bureau members only whose dues are paid.
2. Non-medical for $1,000; $2,000 if Country Life policyholder.
3. Convertible within 12 years into standard insurance at age rate when this policy is taken out—every cent paid in to be applied on the standard policy.
4. Must be at least 50 member subscribers from your county.
5. Offered only between July 10 and August 10 this year.

If you are interested in the new wholesale term policy get in touch with your County Farm Bureau office at once or fill out and mail the coupon below.

This Offer Good for 30 Days Only—
July 10 to August 10

NSURANCE COMPANY

RN STREET CHICAGO

Highest Security . . . Low Net Cost

21 Auto Casualty Co's. Increase Insurance Rates

High Counties and High Agents Named for June

In June this year the Illinois Agricultural Mutual Insurance Co. received 678 applications as compared with 659 applications for June, 1930. The total applications up to July 1 was 28,625.

Auto casualty companies in 21 states increased their rates effective January 1, 1931. Also a company located at Bloomington, covering several states, increased its rates effective May 1.

"Although much below the closest state-wide company, our rates are ample," states V. Vaniman, director insurance service. "Due to the caution used by Farm Bureau members in observing simple safety rules and the work being done by them along safety lines, accidents have been reduced so that their company can furnish auto insurance at a lower cost."

The ten high counties in I. A. A. Farm Bureau auto insurance in force are as follows: DuPage 1,068 applications, Cook 1,024, Champaign 932, McLean 920, LaSalle 852, Winnebago 802, Henry 794, Livingston 702, Logan 690, and Will 621.

The ten high counties for June are: McLean, St. Clair, Cook, Kane, McHenry, DeKalb, Stephenson, Iroquois, Champaign, and Lake.

R. F. Shaffer of St. Clair county led all agents in applications received with 35. Other high agents in the order named are: W. E. Hedgcock, McLean; J. D. Smith, Sangamon; Fred Wilson, Kane; Roy Mitchell, Champaign; T. W. Reed, Iroquois; C. E. Hopkins, Livingston; Bertram Abney, Lake; L. R. Welk, Logan; K. W. Cleland, Boone; F. W. Case, DeKalb; and Edward L. Dillon, Vermilion.

Here are a few accidents recently reported by policyholders:

Iroquois county—Our insured, accompanied by three young ladies, lost control of car after striking hole in pavement. Car ran into culvert—ladies injured. One of ladies had to have 99 stitches taken in scalp.

Lawrence county — Our ..ember started to cross street as stop light changed. Car had pulled to right of him and driver's left hand was held out to signal stop. Our member backed into car breaking man's arm between elbow and shoulder.

Macon county—Fatal accident; insured's son driving south on hard road. Bright lights coming toward him made it impossible to see truck parked on road due to flat tire. He saw black object but could not avoid it on account of oncoming car. Four boys injured—one died of fractured skull.

Hancock county — Suit brought against our insured for $10,000 for personal injury and property damage.

Sangamon county — Administrator of estate brought suit against our insured for $10,000. Party riding with our insured was killed when passing car threw rock in insured's face causing him to lose control of car and strike culvert.

Half Million Annually Saved on Co-Op. Insurance

Protection "At Cost" Service to Members Is One of Most Helpful Benefits

Co-operative insurance enterprises supported by the Farm Bureaus and I. A. A. are now saving Illinois farmers an estimated half million dollars a year when compared with the costs of similar protection in privately-owned companies.

There is already a total of more than $42,500,000 insurance in force in the Country Life Insurance Company organized by the Farm Bureaus and the I. A. A. This service alone saved policyholders $250,000 on the initial cost. In addition the company was able to pay dividends for 1930, one year earlier than the contracts provide.

The Farmers Mutual Reinsurance Co. with $43,000,000 of insurance in force against fire, windstorm and hail provides protection at cost, at rates appreciably lower than those charged by old line companies. Farm crop hail coverage costs one-third less in their own company than in the old line companies.

Approximately 26,000 cars and trucks valued at more than $16,750,000 are insured in the Illinois Agricultural Mutual. This insurance together with the employers' liability insurance saves Illinois farmers an additional $200,000 it is estimated in comparison with current rates of the closest state-wide company.

This remarkable development may be attributed largely to two factors: the farmer, although in an extremely hazardous occupation, has always been under-insured; his own organizations, supplying sound protection at cost, are meeting his need for inexpensive insurance.

Farm Employees Hurt In Accidents, Report

Growing Interest in Liability Insurance to Protect Farmer Employers

Constantly shifting farm labor is impressing many Illinois farmers with the necessity of protecting themselves with employer's liability insurance, according to V. Vaniman, director of insurance service.

Statutes and court decisions are more and more favorable to employees. Many farm employees have worked for manufacturers and others who come under the Workmen's Compensation Act. They naturally expect to be paid when they are injured doing farm work.

Resourceful and versatile attorneys can make it very unpleasant for the employer in case an employee is injured or killed.

These factors and the increasing number of farm accidents account for the consistent growth of the farmer employer's liability department of the Illinois Agricultural Mutual, which now has a total of 1,700 policyholders.

The ten counties leading in the number of policies in force are McLean, DuPage, Livingston, Henry, Tazewell, Cook, Vermilion, Fulton, Kendall and Logan.

Incorporated companies such as threshing rings, shipping associations, etc., may take out liability insurance by becoming a member of the Farm Bureau. Unincorporated associations will be granted policies under two conditions: First, if all members of the association are members of the Farm Bureau; or, second, if the association holds a membership in the Farm Bureau and at least 50 per cent of the members are affiliated with the Farm Bureau.

Recent farm accidents reported to the I. A. A. are as follows:

Champaign county—Employee badly injured when thrown from a hayrack by a run-away team.

McLean county—Hay fork fell on employee. Went through the calf of his leg.

Whiteside county — Employee fell off fence while trimming tree. Injured his side.

Richland county — Employee fell off truck, broke bone in one of his toes.

I. A. A. Directors Study Agr. Credit Corporations

Adopts Statement Outlining Policy and Suggestions Governing Their Organization

State-wide interest in the organization of agricultural credit corporations is indicated by scores of inquiries received from farmers' local organizations and County Farm Bureaus.

At a recent meeting of the I. A. A. Board of Directors the subject of credit corporations was discussed, and a statement prepared by the Finance Committee was adopted after careful consideration.

The I. A. A. is of the opinion that "the interest manifested and conditions within the community itself should determine whether or not an attempt be made to organize an agricultural credit corporation.

"Its stock must be subscribed entirely, or in greater part, by local people, and its operations confined to the locality. The institution must conduct its business on a basis providing profit sufficient to take care of its operating expenses, possible losses and make a fair return to its stockholders. Such a business must expect sooner or later to experience losses in its loans. It must be organized and conducted 'for profit.'

"As we understand it, the Federal Intermediate Credit Bank of St. Louis offers its services, or its services are available, in assisting communities to form Agricultural Credit Corporations. Its promotion in the community, with this assistance, should be undertaken by the community, through its citizens, as a community institution, needed at least in the present emergency. Local organizations, as a part of the community may in our judgment take an appropriate part in the program, but each and every person subscribing for stock and becoming a stockholder should, on his own responsibility, make his own appraisal of his contemplated investment, and after becoming a stockholder, look solely to his Board of Directors, officers and management of his Agricultural Credit Corporation to conduct its business according to established practices, minimizing its hazard of losses, and returning to its stockholders a fair return on their investment.

"Such an institution, as established, will take its place in the community as one of its business institutions and can serve the community as indicated and within the limitations of its rediscount opportunity and limitations."

Agricultural credit corporations are advisable where additional credit facilities seem necessary in a given community and where a competent banker or a conservative appraiser of farm collateral can be secured perhaps on a part-time basis to manage the credit agency.

If the corporation is to function without loss it must be operated as ably as any well-managed bank. It must restrict loans only to those offering acceptable credit. It can be no more liberal than any well managed bank. It is not a co-operative but functions under a regular corporate set-up. It can provide money no cheaper than most banks. The rate it charges is governed by the interest at which bonds of the intermediate credit banks can be sold. A spread of 3 per cent is allowed the credit corporation. Thus, if the Federal Intermediate Credit Bank bonds are sold to yield 4 per cent, the local credit corporation may charge as high as 7 per cent interest of its customers.

The value of this new agency lies in the opportunity to bring new money into the community to take over the financing of worthy risks and thus relieve merchants, storekeepers, and others who are carrying their patrons.

Goodbye Canada Thistles, Chuckles Mr. Winings

For several years a patch of Canada thistles has grown unmolested along the railroad right-of-way near the farm of V. I. Winings, Lake City, Moultrie county. Each year Mr. Winings tried to get the section foreman to destroy the thistles, but without success.

This year he was again confronted by the patch of noxious weeds and again went to the section foreman.

"I've instructions from the company not to mow any weeds this season," was the reply he got from the foreman.

Being a good Farm Bureau member, Mr. Winings went to Farm Adviser J. H. Hughes with his problem. Hughes wrote to L. J. Quasey, I. A. A. director of transportation, and Quasey wrote the general manager of the railroad, referring him to the law requiring these weeds to be destroyed.

A few days later Winings noticed the foreman and his crew grubbing the Canada thistles. The foreman appeared greatly perplexed as Mr. Winings approached.

"Just got orders from headquarters to grub these weeds," he commented, wondering why his previous instructions had been reversed.

Mr. Winings only chuckled.

Editor I. A. A. RECORD

I wish to congratulate you on the I. A. A. RECORD this year. It seems to me that the first six months of this year, the RECORD is the best that it has ever been.

L. T. Oxley, Morgan county, Ill.

Radio News

Illinois radio listeners now have a new farm program hour from 6 to 7 o'clock each morning over station W M B D Peoria, recently purchased by Edgar L. Bill, former publicity director of the I. A. A. and former director of station W L S. Robert Boulton is in charge of this program.

Edgar L. Bill

Mr. Bill has invited officers and members of the I. A. A. staff to speak on WMBD's morning farm program when they are in Peoria.

H. E. Young Goes To Purdue University

H. E. Young, prominent in Illinois agriculture for a number of years, has accepted a position with the Horticulture Department of Purdue University and will take up his duties at once.

Mr. Young, for 12 years secretary of the Farmers' Institute at Springfield, was recently editor of the Illinois Farmer. Several years ago he was editor of the Farmers Review in Chicago, and at one time he was connected with the Indiana Farmers Guide.

McLean County First In Bureau Membership

The total membership of the McLean County Farm Bureau on June 23 was 1,647, of which 1,585 were reported signed on June 11 setting a record for the number signed in one day.

Clean-up membership drives planned for July and September are expected to make this the largest county Farm Bureau organization in the world. This distinction is now held by San Pedro County, California, Farm Bureau, which last year had 1,950 paid members.

The drive on June 11 was put on by 377 volunteer solicitors. The supplementary campaigns also will be made by volunteers with a membership of 2,000 as their goal.

In 1930 about 12,000 co-operative marketing associations in the U. S. did a business of approximately $2,000,000,000.

During 1930 the farm population increased for the first time in 10 years.

"Unorganized Growers Hurt Wool Prices"—Hagenbarth

This Is a Consignment Year Is Belief of National Wool Marketing Association President

THAT the unorganized domestic wool grower, in conjunction with the short-sighted dealer, is solely responsible for the present depressed condition of the wool market, is the charge made recently by Frank J. Hagenbarth, president of the National Wool Growers' Association.

"It is not so surprising that growers may be forced by circumstances to sell their wool below the market," said Hagenbarth, "as it is to see dealers who are fully posted pursuing the same course and sacrificing their wools on a very small margin of profit.

"Manufacturers depend upon stabilized wool markets for profitable and certain business. When wools are slaughtered in price they naturally want to be in on the killing. Mills in turn pass the lower prices on to the clothiers, who come back for cheaper fabrics at the vital cost of the grower."

Two Courses Open

Hagenbarth believes that the National Wool Marketing Corporation has only one of two courses open to it under such conditions: it must either meet the competition of the unorganized grower and dealer who are sacrificing their wool on this market, or they must hold their stocks of wool until liquidation of these cheap lots has gone into consumption.

"A fair analysis of the present paradoxical situation will lead one to believe and say that the grower himself is primarily to blame," he declared. "He is throwing away from one-third to one-half the best tariff he ever had. At a time when every dollar of income is vital toward preserving the industry, he is sacrificing millions of dollars due to ignorance of true marketing possibilities or through lack of faith in his product, which is not warranted by the facts, or through the short-sighted attitude of his creditors who may force him to sell.

A Consignment Year

"The lesson drawn from this whole situation is perfectly plain. This is a consignment year. The grower does not have to wait for a rising market. His own selling policy determines the market. He has an advantage, if he will only take it, of a minimum of 13 to 17 cents per clean pound on his wool right now.

"If he has not sufficient faith in his own wool marketing organizations, either locally or nationally, to sell his wools through them, then he should secure as good an advance as he can from any good reliable wool house and ship his wool on consignment.

"In selling at the prices which are prevailing in the producing areas, he is not only slaughtering his own values but he is establishing a false market far below real values for his fellow wool growers."

Illinois Leads in Use of Of Limestone, Phosphate

Illinois farmers are using 38 per cent of the agricultural limestone consumed in the United States and more ground rock phosphate than any other state, according to J. R. Bent, director limestone phosphate department.

Although total tonnages are expected to decline this year, due to lower farm income and the inability of many rural banks to make loans, it seems fairly certain that Illinois farmers will successfully defend their title as leaders in the use of these two commodities.

"During periods of depression such as the country has been experiencing," states Mr. Bent, "rigid economy and careful planning, so that each dollar spent may accomplish the most good, are absolutely essential to success.

"It is significant that under such conditions the interest in agricultural limestone and ground rock phosphate continue to grow. Farmers realize that good soil practices and low production costs accomplished through maximum yield are at the very foundation of successful farming."

Maryland Farm Bureau To Seek Prettiest Girl

The Maryland Farm Bureau will seek its most beautiful Farm Bureau girl by means of a beauty contest at the annual state convention next January, a recent announcement states.

Farm Bureau members in Illinois will recall that the Illinois Agricultural Association sponsored such contests in twelve counties last December. These were the first Farm Bureau contests of the kind ever held.

Counties holding contests were Carroll, Stark, McHenry, Champaign, Henry, Macon, Morgan, Effingham, Richland, Lawrence, Monroe and Union.

Directors of the Maryland Farm Bureau, after considering the idea, decided that such an affair could be conducted with dignity and with due respect to Farm Bureau women. Abbreviated clothes will be taboo. Cosmetics, paint and lipstick also will be ruled out. Judges will base their decision on dress, posture, good grooming and well chosen accessories.

Livestock Marketing

Five Illinois counties increased their business to the Indianapolis Producers for the second quarter this year over the same period in 1930. They are Iroquois, Macon, Piatt, Vermilion, and Sangamon. One-fourth of the livestock handled by the Producers was shipped by Illinois farmers.

Forty-four club members exhibited 330 lambs at the second annual 4-H Club Lamb Show held at the Indianapolis Stock Yards June 25 and 26. F. M. Shanklin of Purdue University was in charge. The Indianapolis Producers entertained the exhibitors at luncheon on June 25.

Livestock shippers on the Illinois Central Railroad may now obtain double deck cars, or two single decks in lieu of a double deck, with no extra charge, announces the Indianapolis Producers. This double deck loading will save $5 to $9 per car in freight charges.

"Have your contract and billing show 'double deck car ordered' and if two singles are furnished give this information at the market terminal so that the proper freight rate may be applied," advises G. E. Ayer, in charge of transportation.

Protect Shipping Assn.'s

Local shipping associations in Illinois are protected against accident claims of employees through the insurance service of the Illinois Agricultural Association, states A. E. Richardson, manager of the Illinois Agricultural Mutual.

A blanket workmen's compensation and employer's liability policy is held in the office of the insurance department covering any accidental injuries which might occur to employees while in the course of their duties.

Mr. Richardson advises that all claims be reported as soon after accidents as possible so that adjustments may be made.

Foot and Mouth Disease

Following a report that England is experiencing a serious outbreak of foot-and-mouth disease, the U. S. Department of Agriculture has placed its inspectors in all the principal seaports on guard against the introduction of the disease. A new quarantine order has been issued adding Scotland, Ireland, Korea, Rhodesia and the islands of the Mediterranean Sea to the list of countries already considered to be infected.

NOTICE THE DIFFERENCE!

Without Lime

the field to the left above failed to produce enough hay to make worth while cutting it. Alfalfa and clover seed sown on acid soil is money wasted. Test before you sow is always a good rule.

With Lime

the field to the right produced a fine crop of alfalfa, yielding four tons to the acre. An application of two tons of limestone an acre paid ten fold in a single year. Clover and alfalfa sown on limed soil pays big returns.

You Can Get the Same Results

LIMESTONE makes the difference between success and failure on many a farm. Conservative banks loan money to buy limestone when a loan for any other purpose is refused. Your County Farm Bureau offers free soil testing service, stands ready to advise you regarding the limestone requirements of all your fields.

Limestone purchased through your County Farm Bureau is guaranteed as to quality and price. A discount of 10 cents per ton is offered Farm Bureau members. Now is a good time to order your next season's requirements.

See your county farm adviser for further details about how to make the farm pay with limestone and legumes.

◆◆ The I. A. A. Is a Service Organization ◆◆

Eighty Office Secretaries Attend Four Meetings

Keeping of Records, Making Reports, Relationship Problems Considered

EIGHTY Farm Bureau office secretaries representing 67 counties attended the four conferences held at Centralia, Decatur, Galesburg and Chicago on June 30, July 1, 2, and 7 respectfully.

The purpose of the meeting was to discuss uniform methods of accounting and making reports. A conference similar to these was held in Chicago last year with the result that a number of secretaries requested the I. A. A. to hold sectional meetings in 1931.

The following program was given in each of the four conferences:

Purpose of Conference and Farm Bureau Outlay—Secretary G. E. Metzger.

Farm Bureau Records, Collections, Membership Records and Reports—L. A. Evans.

Life Insurance, Employers' Liability Insurance, Automobile Insurance, Standardized Uniform Commercial Department Records—F. E. Ringham.

Fire, Wind and Hail Insurance—J. H. Kelker.

Limestone Project—Mr. Evans.

Relations with Serum Association, Livestock Project, and Getting Ready for an Audit.—Mr. Ringham.

In the last three conferences C. C. Ramler of Country Life discussed life insurance records; at Chicago, R. A. Cowles, treasurer, and Mr. Metzger discussed membership and collection reports.

Centralia

Office secretaries attending the Centralia conference were as follows: Garnet Sefton, Clay county; Evelyn Orr, Edwards; Ruby Lawn, Effingham; Marion F. Garner, Marion; Margaret Dunn, Monroe; Edna Black, Pulaski-Alexander; Gladys Allen, Wabash; Mildred Howell, White; Jewell Y. Grimes, Williamson; I. Marie Weigand, Jefferson; Rose Apple, Clark; Bertha Hutchinson and Harriet Summer, Lawrence; Zelah Halderby, Gallatin; Loretta Witter, Wayne; Mrs. Harry M. Campbell, Washington; Alma Meyer, Clinton; Luther H. Robertson, Montgomery; Louise Hoffman, Jackson; Fern Blair, Randolph; Gladys M. Reiling, Johnson, and Mabel R. Britt, Bond.

Decatur

Those attending the Decatur conference were: Agnes L. Cuskaden and Juanita Holaday, Douglas; Mildred E. Williams, Edgar; Ferry A. Coultas and Louise Campbell, Scott; Gladys Graven and Dolores Baptist, Shelby; H. Polson, Macon; Elenora Mayfield, Madison; Mildred Weller, Macoupin; Lucile Sneeden and Hazel Mellon, Pike; Mildred Mennekin, Adams; Bernice M. Waring, Menard; Faye Lindsey, DeWitt; Marguerite Van Meter, Sangamon; Clara Murgatroyd and Ruth Six, Morgan; D. C. Hall, Christian; Edna Ransom, Champaign, and Mrs. Good, Montgomery.

Galesburg

The following were at the Galesburg meeting: Grace Carpenter, Brown; Lorene R. Kuntz and Alice Edmunston, Peoria; Lillian Sargent, Schuyler; Marie Johnston, Warren; Audrey M. Martin, Henderson; Elizabeth Hayes, Hancock; Esther Zentmire and Thelma Calclasure Mercer; Ethel Wedell and Ruth Keeler, Knox; Myrtle M. Miller, Fulton; Isola Cault, Henry; Cora Kerns, Stark, and Ruby Waymark, McDonough.

Chicago

Those attending the final meeting at Chicago were: Marie Storm, Boone; Florence Bartlett, DeKalb; Grace Arundale, Grundy; Edythe Fewell, LaSalle; Veda L. Sharer, Whiteside; Mildred Weed, Will; Maude Stipp, Vermilion; Marguerite H. Moss, McHenry; Dorothy H. Barton, JoDaviess; Elma E. Towne, Clara Moede and Helen Heintz, Cook; Evelyn Bauer and Ruby Knox, Lake; Cleo E. Conter, DuPage; Selma Anderson, Kane; Mabel Andorfer and Thelma Prytherch, Lee; Hannah L. Wilson, Livingston; Hattie A. Carman, Ogle; Alfreda Thulean, Bureau; Hazel E. Kenyon, Carroll; Violet M. Stein, Winnebago, and La Vine Ingemunson, Kendall.

Hope for Reduction Peach Freight Rates

With peach harvesting time almost at hand, Illinois peach growers aided by the Illinois Agricultural Association still have hopes of securing reduced freight rates over eastern railroads giving them an outlet in the eastern and New England states for their excellent peach crop.

Every effort is being made to speed the decision of the Central Traffic Executive Committee which now has the proposal under consideration after an appeal from the Central Freight Association.

Although the immediate success of the proposal is imperiled by the impending proposal of the railroads to increase all rates 15 per cent, peach shippers are still working for a favorable decision in time for the 1931 crop.

DeKalb County Picnic Sycamore, June 24

The old-fashioned picnic spirit was revived on June 24 when 600 DeKalb County Farm Bureau members attended the annual picnic at Municipal Park, Sycamore.

After the basket lunch LaSalle and DeKalb county baseball teams, members of the Illinois Farm Bureau Baseball League, met in a close game which LaSalle county won by a 7 to 6 score. McKenzie of DeKalb allowed only 9 hits to 17 given by Geheber, LaSalle hurler. DeKalb errors and bunched hits by LaSalle won the game.

L. A. Williams, manager of the Country Life Insurance Company, was the speaker of the day.

Hail Losses Reported In Several Counties

Farmers Mutual Insurance Coverage Passes Two Million Mark, Still Growing

SEVERE hail storms in various sections of the state continue to add to the toll of early summer storms which has already run into thousands of dollars' worth of damage to corn and small grain.

Losses were reported in the west-central part of Fulton county on July 2 as a result of the second severe hail storm in Fulton county this summer, the first having done considerable damage near Lewistown June 17.

Farmers in Champaign county also reported losses from a hail storm on July 2. A disastrous storm on June 25 left a trail four miles wide and eight miles long near New Berlin in Sangamon county, causing a loss of thousands of dollars to farmers in that section. Losses were sustained by farmers in the Chicago area where hail fell on June 23, two days prior to the Sangamon storm.

$2,284,888 In Force

Many farmers in these sections were protected by insurance against hail. Protection through the Farmers Mutual Reinsurance Company up to July 6 had reached a total of $2,284,888. This company is saving farmers $10 on each $1,000 policy as compared with rates charged by the nearest state-wide competitor.

Here is an example of the way hail losses are computed by the Farmers Mutual:

An applicant subscribed for $3,000 worth of hail insurance on his 100 acres of growing crops. If he had a total loss he would receive $3,000. If he had only a partial loss the adjuster would reach an agreement with the policyholder as to what per cent of his crop had been damaged.

Suppose 40 acres had been damaged 50 per cent. The $3,000 would be divided by 100 to find the amount of insurance per acre, which in this case would be $30. Fifty per cent of $30 would be $15 per acre loss. Forty multiplied by $15 would total $600, the amount the member would be paid.

THE SCOT COMES BACK

The Scot, goat of many an anecdote, occasionally turns the tables.

Lord Alness, in his autobiography, tells about an English political meeting. One of the candidates patriotically orated, "I have been born an Englishman, I have lived an Englishman, and I hope I shall die an Englishman."

From the back of the hall, in an unmistakable accent, came the question: "Mon, hae ye no ambeetion?"

1,000 Whiteside Folks Gather to Hear Debate

Farm Bureau Gaining New Members Every Day, Cite Progress in Past Year

THE rank and file of Illinois farmers are ready for co-operative marketing and, like the American soldiers in the crucial period of the World War, will fall into line when the hour strikes, declared Donald Kirkpatrick, legal counsel of the Illinois Agricultural Association, in a debate before 1,000 Whiteside County Farm Bureau members June 25 in the Water Works Park, Morrison.

L. A. Williams, manager of the Country Life Insurance Company, speaking on the affirmative side of the question, "Resolved, That Illinois Farmers Are Not Ready for Co-Operative Marketing," said that the fact that only 63,000 Illinois farmers out of more than twice that number were affiliated with organized agriculture as represented by the Farm Bureau was ample proof that they were not ready.

Minority Leads Way

"Largely through failure to think the thing through, too many non-members are standing in their own light, leaving organized co-operative effort the only sane solution of the farm relief problem to the progressive minority who are willing to stick together and work for their mutual interests," Mr. Williams stated. The debate was a feature of the Farm Bureau co-operative rally, one of several held in various parts of Illinois.

President A. L. Goodenough made the welcoming address and introduced the boys' 4-H Club Quartette, second place winners at the Urbana contest. The quartette, composed of Gerald Hudson, Harlan Thomas, Harvey Florence and Wayne Mathew, sang "Pale in the Amber West."

Good Local Talent

Rex Lawrence of Prophetstown then put on his stunt, "Have a Pill," which won fifth at the state contest with 22 clubs competing. This was an impersonation of a quack doctor.

Helen and Henrietta Castelein, also of Prophetstown, gave several vocal and harmonica duets, including "Morning on the Farm" and "Juanita." Claire Gsell, Morrison, entertained the audience with an impersonation of a colored lady at the telephone trying to insure her husband's life.

Farm Adviser F. H. Shuman mentioned the addition of 110 new members during the past year, also reviewed some of the accomplishments of the Farm Bureau.

At the close of the program individual containers of ice cream were served to the audience by 4-H Club girls.

1,500 at Edwardsville

Edwardsville, Ill., June 29.—In spite of the fact that farmers in this section were in the midst of harvesting oats and wheat, a crowd of 1,500 from five counties braved the 100 degree heat to attend the Co-operation Jubilee held here tonight under the auspices of the Country Life Insurance Company and the Madison County Farm Bureau.

Donald Kirkpatrick, legal counsel for the Illinois Agricultural Association, and L. A. Williams, manager of Country Life Insurance Company, debated the question, "Resolved, That Illinois Farmers Are Not Ready for Co-operative Marketing."

Among the speakers were: Frank D. Barton, Illinois Grain Corporation; Harry W. Day, Illinois Fruit Growers Exchange; John E. Miller, president, Madison County Farm Bureau; A. D. Lynch, manager, Sanitary Milk Producers; and J. R. Fulkerson, president, St. Louis Producers Commission Association.

Farm Adviser T. W. May introduced a number of guests including Sam Sorrells, chairman of the I. A. A. livestock marketing committee; E. W. Tiedemann, president of the Sanitary Milk Producers; J. F. Chambers and Henry Backman of the Godfrey Asparagus Growers' Association; George C. Martin of the Midwest Grain Corporation; Harry D. Wright, manager, St. Louis Producers Commission Association; and F. H. Anderson, secretary, National Dairy Association.

Music was furnished by the Edwardsville elementary school band, the Farm Bureau ladies' quartette and the Pawnee Four of Sangamon county. Audrey and Betty Miller gave a German folk dance and Mary Jane Miller gave a Hungarian dance.

800 at Louisville

Louisville, Ill., July 1. — With 800 attending the Clay County Farm Bureau Co-operation Jubilee here tonight, the total attendance of the seven meetings sponsored by Country Life Insurance Company and the Farm Bureaus arose to 11,000.

L. A. Williams, manager of Country Life, and Donald Kirkpatrick, legal counsel for the I. A. A., met in the last of their seven debates on the question, "Resolved, That Illinois Farmers Are Not Ready for Co-operative Marketing."

This has been the feature attraction of each jubilee held in the counties which were high in April life insurance sales.

In addition to the debate, a talk by F. A. Gougler, director of produce marketing, on the need for co-operative produce marketing in southern Illinois was an interesting feature of the program.

Farm Adviser C. S. Love and General Agent Arthur Bryant were given recognition for the success of the jubilee. The Pawnee Four, popular Sangamon county quartet, furnished the music.

1,000 at Steeleville

Steeleville, June 30. — Farm Bureau members, numbering close to 1,000, sought the outdoor amphitheatre for relief from the sweltering heat as they gathered here tonight to attend the Co-operation Jubilee sponsored by the Country Life Insurance Company and the Randolph County Farm Bureau.

William Sauer, president of the Farm Bureau, introduced the board of directors and guests including A. D. Lynch, manager of the Sanitary Milk Producers; Donald Kirkpatrick, legal counsel of the I. A. A., and L. A. Williams, manager of Country Life Insurance Company.

Kirkpatrick and Williams gave their sixth debate on the question, "Resolved, That Illinois Farmers Are Not Ready for Co-operative Marketing." Mr. Lynch discussed the problem of milk marketing.

Recognition was given John Uffelmann, general agent in Randolph county, for his good work in winning the award of the jubilee, which was one of the seven held in the state.

Music was furnished by the Pawnee Four of Sangamon county.

L. A. Williams, manager of the Country Life Insurance Company, was the speaker at the Kendall County Farm Bureau booster meeting held Friday evening, June 26. About 800 attended the meeting. Doc Hopkins, radio entertainer over station W M A Q, gave a number of mountain songs. Band music and several special numbers by Kendall county boys and girls completed the program.

James T. Jardine, director of the Oregon Agricultural Experiment Station and brother of former Secretary of Agriculture William A. Jardine, has been selected by Secretary Arthur M. Hyde to head the Office of Experiment Stations. The post has been vacant since the death of Dr. W. E. Allen more than a year ago.

Culling out the boarder cows would speed recovery of milk and butterfat prices.

Tells 4-H Girls Health Necessary to Success

A WOMAN has to be healthy today to be a success in any job, declared Dr. Caroline B. Hedger of the Elizabeth McCormick Memorial Fund before the recent 4-H club girls' conference at Cornell University.

"The three kinds of jobs—earning a living, making a home and learning how to use leisure time—all need a healthy girl or woman to make a success of them," she said.

According to Dr. Hedger health includes looking well and feeling well. A girl cannot do much about the nose nature has given her, she says, but she can work for a nice brown sun-marked complexion; she can keep her body clean; she can have a correct posture and she can be the right weight for her height.

"Of course you must feel well to hold your job," Dr. Hedger continued. "How you feel makes a big difference in how well you get along with people, how interesting your work is to you and how much of your best you put into it. That means getting enough sleep—most women need at least nine hours every night—and enough play that is re-creation, not wreck-creation."

One hundred and sixty-nine schools, represented by 1,605 boys, participated in the Illinois Judging Contest for Students of Vocational Agriculture held at the University of Illinois, June 19 and 20.

Teams winning first place were: fat stock, DeKalb; dairy, Ridge Farm; poultry, Armstrong; grain, Olney; corn, Chenoa; all divisions, Olney.

Individuals placing first in the contests were: fat stock, R. Warfield, Gibson City; dairy, L. Methany, Ridge Farm; poultry, P. Meyers, Oakland; small grain, R. Stephens, Hutsonville; corn, E. Quick, Atwood.

The annual Saline County 4-H Club picnic was held July 4 at Ferne Clyffe, one-half mile southwest of Goreville. This is one of the scenic spots of southern Illinois. The 4-H picnic was held at the same place in 1930.

Consolidation of townships, small villages, and even counties as now proposed in some states, will be helpful in reducing farm taxes and providing farmers with modern hospitals, schools, and other local institutions, according to Dr. C. J. Galpin of the U. S. Department of Agriculture.

A young man addressed a letter to another young man pointing out that he understood the second fellow had been taking his engaged girl out. He requested that the offender call at his office and talk the matter over. Two days later he received this reply: "Received your circular letter. Will be at the meeting."

On Advertising

Advertising agents agree that advertising should not only reach out to new customers and prospects, but should work back through the advertiser's own organization. Effective publicity prompts every employe to throw out his chest and feel that he is working for an enterprising company. The necessity of keeping one's own workmen "sold" on the merits and worthiness of a company and its product is one of the real problems of management.

Corporation Farming Not So Good Here

The Wheat Farming Company of Hays, Kansas, an organization which operated 72,000 acres, has asked the court for a receiver. This project has been held up as a model of large scale farming. It operated on the principles of big business employing all known efficiency methods, yet dividends failed to materialize.

An editorial in Farm and Ranch for June 20 says: "We have heard of other big farming ventures that are drifting close to the rocks of bankruptcy, which seems to be evidence of the truth of that old fogy theory that farms are a place for building homes, for producing a living and raising good American citizens."

Roger Babson, noted economist who has been investigating corporation and chain farming reports as follows: "We have been unable to find any industrialized farm which can be called profitable, though we have examined the affairs of many. The only one we found that seemed to be profitable turned out, upon examination, to have an oil well upon it."

Brigham-Townsend Act Helps Butter Consumption

Regarding the success of the Brigham-Townsend Act, the new oleomargarine law, which was vigorously supported by the Illinois Agricultural Association, the National Dairy Union says: The new oleomargarine law—the Brigham-Townsend Act—has had greater and more beneficial results to the dairy industry, measured by what has happened in the first two months since its enactment, than had been expected by its most enthusiastic supporters.

In the two months which can now be surveyed — March and April — the oleomargarine industry has reduced production about 31 per cent to get ready for the act which took effect June 3. May figures will probably show even greater curtailment.

Blames Tariff for Part Of Farmers' Troubles

Farmer Can Help Himself by Growing His Own Food, Banker Traylor Says

The farmer can help himself by producing as much of his food as possible on his own farm, Melvin Traylor, president of the First National Bank, Chicago, declared in an address delivered recently before the International Chamber of Commerce at Washington.

"When we find that on approximately 20 per cent of the farms in the United States there is not a milch cow nor a chicken," he said, "and that on more than 30 per cent there is not a hog, and on approximately 90 per cent not a sheep; when we know, further, that on many farms in our large agricultural states, no gardens are kept and almost every article of food is purchased at the store, we are forced to the conclusion that the farmer, by and large, is not farming as he should."

Mr. Traylor told of the enormous increase in taxes and the cost of government. He scored the financial leadership of the country, blamed selfishness and greed for part of our present economic troubles, criticised the abuses of speculation on the stock market, and urged that margin trading in amounts under $10,000 of stock be abolished.

Mr. Traylor, who is a Democrat, took a rap at our high tariff policy when he said: "It sounded well, when industry was prosperous, to tell the farmer that his best market was the American market, well protected by mounting tariff walls. But when he sees behind such protection five or six million of his fellow citizens unemployed and the objects of charity; when he sees frontiers closed and barriers raised to his products in other countries, then, I believe, he has a just right to complain. No one, not even the farmer himself, would advocate the abolition of reasonable protection for industry or American society. But a virtue ceases to be a virtue when its operations destroy economic opportunity and social equality."

While this decrease in oleomargarine production was taking place, butter consumption increased. The increase for this period in 1931 is about 16,000,000 pounds above the 1930 consumption.

At the average wholesale price of 25 cents a pound, this brought four million additional dollars into the pockets of butterfat producers.

Sound Advice

"Whassa matter, Flo?"

"Gawd, Mae! Never go out with a chiropractor."

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

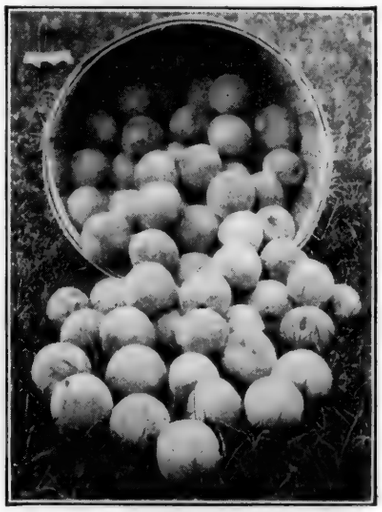
Number 8 AUGUST, 1931 Volume 9

Wonderful Peach Crop Leeper Tells Listeners

Hot Weather and Moisture Aid in Developing Quality Fruit

THE Illinois peach crop this year is wonderful in two ways: first, the yield will be large, and second, the quality will be the best ever produced in Illinois, A. B. Leeper, director of fruit and vegetable marketing for the I. A. A., told radio listeners in a talk over station WMAQ Tuesday, Aug. 4.

"There is no better peach than the Illinois Elberta," said Mr. Leeper. "The quality is excellent this year because the growers have been doing a better job of cultivating and spraying their orchards than in former years. And what is more important, they have done a thorough and complete job of thinning the fruit.



"Many of our growers pulled off three-fourths of all the peaches on the trees so that the remaining one-fourth might take on the proper size. Climatic conditions have been right to produce high quality, clean fruit. There was almost a total absence of insect injury this year. Spraying was an easy task.

Hot Weather Helps

"The hot weather of the last few weeks was conducive to the development of high quality peaches. It takes hot weather to produce a high quality peach, and during the last few weeks we have had plenty of that kind of weather, together with sufficient moisture to give the necessary vitality to the trees and insist on producing a large fruit.

"The Illinois Fruit Growers Exchange will handle more than double the number of cars we have ever handled in any previous season. But we need the support of the consumer to assist our growers in realizing some returns from their time, labor, and investment.

"We solicit your business and will give you as good or better service than any other distributor." Mr. Leeper commented on the splendid co-operation the Exchange and the growers have received in the past from the Illinois Chamber of Commerce. He spoke of the proclamation issued by the governor designating August 16 to 31 an Illinois peach harvest festival.

The famous "Illini Brand" Elbertas from Southern Illinois.

The Exchange will co-operate with distributors and groups of consumers who wish to buy peaches in wholesale lots. There are only 400 bushels of peaches in a car and even small communities can use at least a carload.

"Why not begin now and form a peach club in your community or neighborhood. Advise the Exchange and arrange to purchase peaches in carlots. A substantial saving can be made on the purchase price and the consumer will be assured of getting the best quality."

Leeper thanked the Buy Illinois Products Commission, of which Eugene D. Funk is chairman and George C. Wharton secretary, for their fine co-operation in advertising Illinois peaches.

Lack of capital, lack of farming experience, poor roads and the fact that in many cases children leave the country to work in cities were found to be the principal causes of farm abandonment in New Jersey.

President Smith Speaks at Soldiers, Sailors Reunion

Large Audence Gathers for Picnic at Salem, July 28

THE history of Marion county served as the background for the address of Earl C. Smith, president of the Illinois Agricultural Association, delivered before a large audience at Salem at the 23rd District Farm Bureau picnic July 28. The picnic was held jointly with the Soldiers' and Sailors' Reunion.

Appropriate to the occasion, Mr. Smith delved into the past of Marion county and compared the war for the preservation of the Union with the present economic struggle between groups and nations. The need for organization and leadership in solving today's economic problems is just as great as was the need in 1861 to preserve the Union, he said.

He reviewed the tax history of Marion county and showed that while assessed valuations of property in the last 10 years had greatly declined, property owners are paying six times more taxes today than they paid 30 years ago, even with a lower tax rate.

Values Decline

"The total value of the farms in Marion county in 1920 was stated by the Census Bureau to be $18,833,981," Mr. Smith said. "In 1925 this total value had been reduced to $13,974,334 and in 1930 a further reduction brought the figure to $11,019,937. What has been the trend of local tax bills in Marion county? In 1899 your total tax bill on all the property in the county was $140,165. Ten years later it had increased to $335,963; in 1919 you witnessed another increase to $703,285 and in 1929 the astounding figure of $917,980.

"While I am sure you have recognized the increase in taxes, I wonder how many really know how it was accomplished. In 1899 you had a tax

Auditing Ass'n. at Membership Peak

More Audits in June and July Than in Any Previous Year For Same Period

WITH a total of 298 member companies now being served by the Illinois Agricultural Auditing Association, a new peak has been reached in its membership development.

Fred Ringham

More than 50 new members became affiliated with the Association during the past 12 months, 22 coming in since January 1.

The membership is classified as follows: Farm Bureaus, 69; Home Bureaus, 5; Grain Elevators, 78; Livestock Associations, 28; Milk, Dairy and Produce Associations, 32; Insurance, 14; Oil Co-operatives, 56; Miscellaneous, 16.

Audits recently completed reveal that the net income of farmers' elevators and co-operative oil companies is less than a year ago, county livestock associations are showing an improvement, and Farm Bureaus are on the up-grade in net income due largely to increased commercial activities, according to Manager Fred E. Ringham.

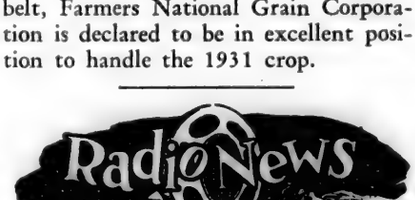
Both June and July this year were higher in the number of audits than in any previous year. July is always a peak month, as June 30 closings are second only to December 31 closings in number. This year there were 30 companies whose fiscal year closed on June 30 and 14 companies with semi-annual or quarterly audits due.

The total number of audits completed during the first half of 1931 was 183 as compared with 146 in the same period last year. The total number of audits made by the association since it began operation seven years ago is 1,800.

(Continued from previous page)

rate of $4.84 on the $100; in 1909 a tax rate of $4.90 on the $100. In 1919 it was $5.42 and in 1929, reduced to $4.06.

"Values were reduced and the tax rate reduced, but taxes increased from $140,165 to $917,180. How is it done? In 1899 your taxes were extended on the basis of one-fifth of total values; ten years later on one-third; ten years later on one-half; and at the present time, are extended on the basis of full valuations of property.



"The solution of our tremendous tax problem can be accomplished in two ways: First, by the people in an organized and constructive way demanding a reduction in public expenditures; and, second, by finding some other sources of revenue to take the place of that unjust portion now being collected from property."

Farmers National Grain Corp. Buys New Space

Farmers came into possession of another large terminal grain elevator through purchase of the 2,300,000-bushel house of the Soo Line at Minneapolis. Acquisition was announced by Farmers National Grain Corporation recently. The plant is of modern concrete construction, electrically operated and with sufficient ground for additional storage construction if required.

Thirty-nine country elevators in Utah and Idaho were also added to the co-operative's facilities through lease from two milling companies. Added to a million dollar facilities program in the Pacific Northwest and to properties acquired elsewhere in the grain belt, Farmers National Grain Corporation is declared to be in excellent position to handle the 1931 crop.

The I. A. A. is now on the air Tuesdays, Thursdays and Saturdays at 8:15-8:30 P. M. Central Standard time from radio station WJJD, Chicago (1,130 kilocycles).

The program will be identified by the Illinois state song, "By Thy Rivers Gently Flowing, Illinois, Illinois," played at the beginning and close of the 15 minute period.

The daily program from 11:30-11:45 A. M. has been discontinued. The noon hour broadcast will probably be resumed after Oct. 1 when Chicago goes back on standard time.

Members are invited to write in and comment on the I. A. A. broadcast.

A radio news release service two to three times a week to 14 midwest stations was inaugurated by the Department of Information early in July. Announcers are making liberal use of the I. A. A. news items.

Soybean Association May Sell 2,000,000 Bu. in '31

Growers Conduct a Membership Campaign, Seek to Control Bulk of Commercial Crop

THE Soybean Marketing Association is now conducting an intensive drive to increase its membership, according to Manager Wilbur H. Coultas.

W. H. Coultas

In 1930 the Association handled more than 1,150,000 bushels of soybeans, which represented approximately 40 per cent of the total commercial volume marketed in Illinois. To be more effective, the Association should strive to double this amount in 1931, Coultas believes.

"We have broadened our contacts with processors and are in a position to move this larger volume to good advantage," he says. "The demand for soybean oil is increasing rapidly in the paint and soap industry as well as in the edible refining trade.

"More of our livestock feeders and dairymen are learning about the superior qualities of soybean oil meal as a protein supplement to their home-grown grains.

Saves a Step

"Our Association is fortunate in handling a commodity which does not have to move through the various grain exchanges. We are in a position to merchandise our soybeans direct to the processors, thereby saving one step in marketing.

"Volume control is a big factor in determining price. When the Association increases its volume to the point where it will be handling the majority of the Illinois commercial crop, then it will have more influence in stabilizing the price to the grower on a satisfactory level.

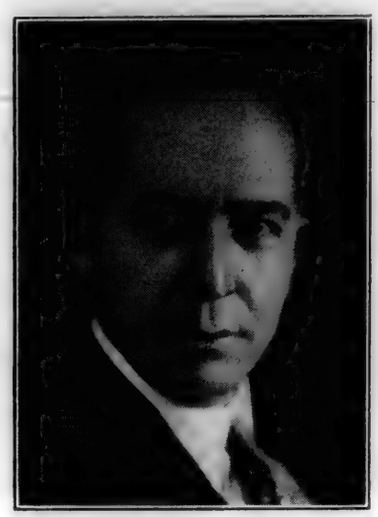
"Even last year when we handled only 40 per cent of the crop, our Association was instrumental in holding the price up around $1 per bu. when every other commodity was rapidly declining.

"Commercial soybean growers have an opportunity to help themselves and their market by organization and co-operation through the Soybean Marketing Association. Our slogan for 1931 is, 'If there are commercial soybeans to market, our marketing association should sell them'."

I. A. A. and A. F. B. F. to Oppose 15% Rate Raise

Hearings in Chicago Begin Aug. 31 Before Commerce Commission

HOW to prevent a threatened increase of $130,000,000 annually in the American farmers' freight bill is the problem confronting the Transportation Departments of the I. A. A. and American Farm Bureau Federation. This is the sum farmers will be forced to add to their present costs of doing business, if the Interstate Commerce Commission allows the 15 per cent increase in freight rates sought by the railroads of the United States.



As the representative of organized agriculture, the I. A. A. and American Farm Bureau plan to oppose the demands of the railroads. Preparation of evidence is now under way for presentation to the Commission at the hearing set for August 31 in Chicago.

The farmer is in no position to shoulder this additional burden of $130,000,000, the Farm Bureau will maintain. Reviewing the condition of agriculture, it will show the Commission that the farming industry has suffered from a depression for ten years, is still suffering from it and with no prospects for relief, whereas the depression from which the carriers are seeking relief is of only twelve months duration.

Exempt Farm Products

If the Commission decides with the carriers that a 15 per cent boost is necessary, exemptions, the organization holds, should be made on agricultural products. The farmer is the only person who pays a double freight bill. When he sells his produce, the freight charges on the shipment to market are deducted from the price he gets for his goods. When he buys his supplies, he pays another freight bill on what is delivered to him. The 15 per cent raise would thus become a 30 per cent raise in the case of the farmer, which makes adjustments imperative if a horizontal raise is granted.

The records of the Interstate Commerce Commission show that the proposed raise will defeat its own purpose by diverting traffic to competing forms of transportation. With the exception of fruit and vegetables, according to the Commission statistics, the greater portion of farm crops move less than 300 miles. If the 15 per cent raise is granted, it is reasonable to expect that the trucking of farm crops to market will increase several hundred per cent and the railroads will still be short the revenue they are seeking.

Edward A. O'Neal

EDWARD A. O'Neal, president of the American Farm Bureau Federation, is scheduled to address the County Farm Bureau picnic in Sangamon county on August 18 and the annual Field Day at Cimco Farm in Mason county on August 20.

The new national president who succeeded Sam Thompson has been closely identified with the Farm Bureau for more than 25 years. He was a charter member of his County Farm Bureau in Alabama, then rose to the state vice-presidency, and in 1923 was elected president of the Alabama Farm Bureau, a position he held eight years until his recent promotion.

As vice-president he was chairman of the legislative committee of the A. F. B. F., a position which has given him a wide acquaintance among men in public life at Washington. During the past two years he has been chairman of the national committee on co-operative purchasing, and also has been active on the national committee on taxation.

Mr. O'Neal will devote considerable attention in his addresses to the organized opposition developed against co-operative marketing. He recently took a leading part in bringing co-operatives together in a movement to defend the Agricultural Marketing Act.

Baseball Dope

As we go to press, five of the eight division titles in the Illinois Farm Bureau Baseball League have been definitely settled. By the time the RECORD reaches you the eight winners will be ready to enter the semi-finals, which begin immediately after August 15 when preliminary play ends.

Teams already sure of a place in the semi-finals are: Carroll, division I; Livingston, division III; Knox, division V; Logan, division VI; and Greene, division VIII.

In the three doubtful divisions, Sangamon was leading division VII, Will was leading division II and Tazewell was ahead in division IV, but the margin was close with a possibility of a tie. Cass, Grundy and Woodford were still in the running.

Carroll, Livingston and Logan went through their preliminary schedules without a defeat.

Henderson County Has A Soft Ball League

Eleven Townships Compete, County Championship Contest Sept. 19

The inter-township softball league sponsored by the Henderson County Farm Bureau as one of its recreational projects is now in the midst of its second season and is creating an unusual amount of interest, according to Farm Adviser Ernest D. Walker.

The league, which is composed of teams from ten out of the eleven townships in the county, will play more than forty games before September 12 when preliminary play stops. The season opened on August 1. Winners of the two divisions will meet at Stronghurst on County Club Show Day, September 19, to play for the county championship.

"Our tournament last year was a great success arousing a great deal of interest in the county and affording recreation to a large group of our members," said Mr. Walker. "Co-operation among the townships was 100 per cent last year and we have ten out of the eleven townships playing now."

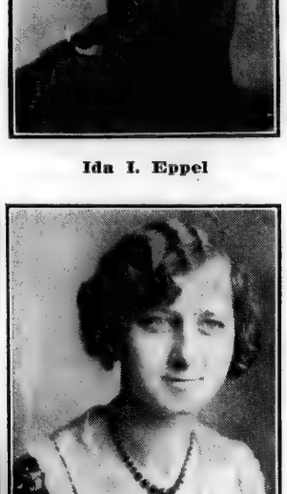
Any Farm Bureau member or dependent member of his family is eligible to play. Players must belong to the team in the township in which Farm Bureau membership is held. The management of each team is in the hands of a manager appointed by the Farm Bureau director in that township.

The management of the league rests with a committee of three with full authority to settle all disputes, determine standing of teams, permit postponement of games and take care of any other details. This committee consists of C. W. Cooper, A. N. Nolan and W. S. Graham, Sr.

All games are reported to the Farm Bureau immediately after they are played. Protests must be filed in writing with the management committee. Games are played by the National Playground Baseball rules as published in Spaulding's Athletic Library.

Frances Johnston

Some of the girls entered in the "Country Life Queen" Contest to be staged Farm Bureau Day at the State Fair, Springfield, Aug. 28.



Ida I. Eppel

Helen Kolmer

Helen Phillips

Sara Biederbeck

Selecting the "Country Life Queen" will be the star attraction at the Illinois State Fair on Farm Bureau Day, August 28. The state style show or beauty contest in charge of V. Vaniman, director of insurance service for the I. A. A., will be held to select first and second prize winners from among the county entries all of whom won their respective county contests last winter.

Pictures of only five of the entries had been received up to the time of going to press.

All of the young ladies are single and all are daughters of Farm Bureau members. Attractiveness, style, poise, personality, and natural beauty will be the determining factors in selecting the prize winners.

Judges will favor simplicity in dress, posture, good grooming, and well chosen accessories. Where beauty and charm prove equal ,the judges will favor the one attired in the most becoming dress suggesting simplicity.

Following are brief sketches of the county winners who had entered the contest on or before Friday, August 7:

Frances Johnston, Lawrence County

Seventeen years of age, 5 feet high and weighs 104 pounds and is a brunette. She is a student at Lawrenceville High School and an accomplished elocutionist. Her favorite sports are swimming, tennis and dancing, and her hobby is public speaking.

Elizabeth Meyer, Morgan County

Twenty-four years of age, 5 feet 4 inches high and weighs 120 pounds. She is a brunette. Miss Meyer is a music student at Mac Murry College Conservatory of Music. Her favorite sports are tennis and basket ball. She plays the piano, xylophone and violin, and her hobbies are music and travel.

Elane Plott, Union County

Sixteen years of age, 5 feet 6 inches high and weighs 115 pounds. Elane is a brunette. Miss Plott is a student at Anna-Jonesboro High School. Her favorite sport is tennis; she plays the piano and her hobby is reading.

Dorothy Roberts, Champaign County

Twenty years of age, 5 feet 4 inches high and weighs 126 pounds. Miss Roberts is a brunette. She is a student at the University of Illinois and a leader in 4-H Club work. Her favorite sports are swimming and tennis and her hobby is flowers.

Sarah Biederbeck, Stark County

Eighteen years of age, 5 feet 3 inches high and weighs 103 pounds; is single and a blond. She is a student at Toulon Township High School. Her favorite sport is gymnasium; her hobby is music and she plays the piano.

Helen Phillips, Macon County

Nineteen years of age, 5 feet 5 inches high and weighs 115 pounds; is single and a blond. Attended Argenta High School and is now a saleslady in a local store. Miss Phillips' favorite sport is basket ball; she plays the piano and her hobby is reading.

Helen Kolmer, Monroe County

Nineteen years of age, 5 feet 6 inches high. Miss Kolmer is a brunette. She is a student at Waterloo High School and plays the piano. Her hobby is music.

Ida I. Eppel, McHenry County

Twenty-three years of age, 5 feet 4 inches high and weighs 110 pounds; is single and a brunette. She is a teacher and attended school at Woodstock High School, Milwaukee Normal Western and Illinois State Teachers College. Miss Eppel plays the piano and is a member of the Business and Professional Women's Club.

Eleanor Ferguson, Henry county; age 18, height 5 feet 4 inches, weighs 105 pounds. Miss Ferguson won the Henry county contest.

She is Scotch-Irish, a brunette, is musically inclined, and has been prominent in 4-H Club work. She plays the violin, piano and pipe organ. Her favorite sports are golf, tennis and horse-back riding. She is a student at the Orion Community High School. She was a member of the All-State 4-H Club orchestra in 1930 and 1931.

Believe It or Not—

Marriages in the United States during 1930 decreased 8.5 per cent from the previous year as compared with an increase of 4.2 per cent from 1928 to 1929, according to the bureau of census. The decline was attributed to the economic depression.

State-supervised roadside markets in Wisconsin will be designated by special signs issued by the state, according to the state department of agriculture and markets.

Calf club auctions sponsored by the International Livestock Exposition will open at the Union Stock Yards on August 18.

Steamship lines operating on the Great Lakes have joined with the railroads in their plea for a 15 per cent horizontal increase in freight rates.

Although more than 340 new post offices on the average have been added to the United States postal system annually since 1789, there are nearly 28,000 less now than there were in 1900, says the post office department. The decline in the number of offices is attributed to the creation and development of rural mail service.

Soybean to Figure in World's Fair Exhibit

Illinois Men Prominent on Committee to Arrange Display

IT makes no difference whether you are painting your house, taking a bath, or eating dinner, the soybean more than likely has a part in it.

So widely has this new crop of the Middle West come to be used and so little is known about it by the consuming public, that plans are being made by soybean growers, processors, and industrial users for an extensive exhibit at the World's Fair in Chicago in 1933.

The story of the soybean in this country will be shown in every detail. Geographical distribution, soil requirements, necessary climatic conditions, soil fertilization, varieties adapted to various localities, varieties for hay and seed, inoculation of seed, soil preparation, methods of seeding, cultivation, harvesting, use of binders and combines, marketing, yields, transportation, control of insects and diseases, and industrial uses—these are a few of the things to be shown in the exhibit.

Plans for the exhibit are already well under way, according to Harvey J. Sconce, agricultural director of the Fair and former president (1919) of the Illinois Agricultural Association.

"Everything is now in the hands of the committee selected at our recent meeting of soybean leaders," said Mr. Sconce to the RECORD reporter. "Each member of the committee is working out plans for his part of the exhibit and it looks as if this might be one of most interesting sections of the agricultural exposition."

Dr. W. L. Burlison of the University of Illinois, chairman of the committee, will have charge of the exhibit on soybean production. Other members are: J. W. Armstrong, Champaign, Ill., president of the Soybean Marketing Association, in charge of marketing exhibit; A. A. Horvath, health section, bureau of mines, in charge of human utilization exhibit; Paul Funk, Funk Brothers Seed Company, in charge of livestock utilization; Guy S. Fox, Armour and Company, utilization in the arts; Dr. H. A. Paulsen, Armstrong Paint and Varnish Works, utilization in paints and oils; H. G. Atwood, Allied Mills, in charge of milling exhibit.

The soybean crop occupies more than a million acres of corn belt land this season. Illinois' acreage this year is more than 25 per cent above that of a year ago.

Some of the manufactured products now using soybean oils or meal are dairy, poultry and livestock feeds, cereals, glue, flour, meal, soaps, paints, salad oils, sauces and condiments, oriental dishes, malted and chocolated milk.

Would Sell to Germany

IN RESPONSE to inquiries about reports from Germany appearing in recent newspapers, James C. Stone, chairman, Federal Farm Board, made the following statement:

J. C. Stone

"The Farm Board has no definite proposals before it from the German government, but if it would aid Germany and if it would increase consumption of American agricultural commodities the Farm Board would authorize the stabilization corporations to sell to Germany on credit terms."

St. Joseph Stock Yards Must Cut Its Rates

An order just issued by the U. S. Department of Agriculture will save livestock shippers, who market at St. Joseph, Mo., $120,000 a year, according to R. W. Dunlap, acting secretary of agriculture. This order is the result of a hearing on the reasonableness of charges made by the stock yard.

An analysis was made of conditions at the live stock market during 1928 which was taken for a fair test year. With 7½ per cent profit on the investment taken as a reasonable earning, the inquiry revealed that the income of the yards was $107,798 in excess of this.

It was also found that the company had been yarding livestock belonging to dealers and traders without making any charge. The order expressed the opinion that the yards should either stand this expense or charge it to the traders, and not to the shippers.

Other markets at which hearings on stock yard rates have been held are Denver, Colorado; Kansas City, Missouri, and National Stock Yards, Illinois. Decisions in these cases will be announced as soon as possible.

Directors of the Illinois Agricultural Association voted at their recent July meeting to purchase $2,500 worth of 6 per cent preferred cumulative stock in the Illinois Livestock Marketing Association.

Livestock Marketing

The Lawrence County Livestock Shippers' Association operates on the basis of a flat rate covering all marketing costs from the time livestock arrives at the yards until it is sold. The rate charged shippers last year was as follows: hogs and cattle 60 cents per cwt., calves and sheep 80 cents per cwt.

Included in these costs are freight, feed, insurance for deads and cripples, yardage, handling commission of local manager and selling commission of the Producers. All livestock shipped by the association goes to farmer-owned and controlled agencies in whatever market is offering the best price. Every Monday is shipping day at Lawrenceville.

In July the Indianapolis Producers received 663 carloads of livestock representing 27.8% of the stock yard receipts. This total lacked one car of being 400 carloads more than that of the largest old line firm. The Producers received 513 cars from the Indiana territory and 147 from Illinois. Approximately 30% of the Illinois business was delivered by truck.

The Greene County Farm Bureau reports that Greene county farmers marketed more livestock through their own co-operative agency each year since 1928. They sold 358 cars co-operatively in 1929, 383 cars in 1930, and during the first three months of 1931, 108 cars, as compared to 81 cars for the same period of 1930.

Guy V. Storms, newly appointed manager of the Shelby County Live Stock Marketing Association succeeding D. E. Elliott, accompanied two loads of stock to Indianapolis Tuesday, August 4.

A. D. Kenney of Paris, Edgar county, topped the Indianapolis cattle market on August 4 with 36 steers averaging 1,116 lbs.

Clifford Morris of Paris also topped the heavy cattle market with 84 head averaging 1,231 lbs. at $8.80 and 21 head averaging 1,227 lbs. at $8.75.

Edgar county led all other Illinois counties in the number of cars consigned to the Producers at Indianapolis in July with a total of 16. The next six largest were Coles, Vermilion, Crawford, Douglas, Clark and Shelby. Both Vermilion and Shelby counties increased their business over July last year.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*
MAX HARRELSON, *Assistant Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for missent copy please indicate key number on address as is required by law.

Taxation in Hard Times

RICHARD T. ELY of Northwestern University, writing on "Taxation in Hard Times" in the Review of Reviews for August, says: "There is no question in the mind of any competent person who has given any attention to this subject that there is a connection between taxation and hard times. There is, however, a general failure to recognize what this question is, and to understand what can be done to remedy the evil situation.

"When in the single State of Wisconsin a million acres are taken over by the counties for unpaid taxes; when even in rich states like Iowa, farmers are losing their property on account of the burden of taxation; when in cities the rents received often do not cover taxes, we have evidence of the closest connection between taxation and hard times.

"When real estate falls in value as it has long since in the case of farm lands, and as it is now in the case of urban lands—the excess valuation is decreased with great difficulty. Schools and other public services must be maintained; and assessors who are faced with this situation maintain old values, or those far in excess of present selling values. Our system of taxation is easily 50 years behind the times. Economic evolution has gone forward, but our tax system has lagged behind."

Professor Ely closes with suggestions which in his opinion point the way to improvement: "We must have a system of taxation of land based upon its annual use value. We must have *state income taxes* based upon the best experience of our American states. We must supplement these revenues by selective sales taxes. We must have a sinking fund or some similar arrangement in order to supplement tax revenues when from time to time they become inadequate as now."

Power in Group Action

No individual dares match his strength with the strength of any group of individuals. The world has come to recognize groups instead of individuals. The world is moving in groups and acting in groups.

There are no Caesars in this day and age. Groups, and not individuals become great.

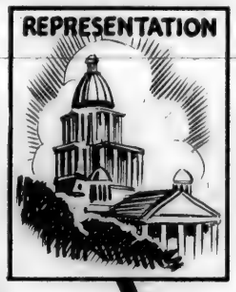
The reason may be that the average intelligence is higher and certainly that average intelligence senses the greater individual benefit resulting from group moving and group dealing.

Indeed, the power to bargain is manifold greater in groups than in individuals. Certainly the political influence is greater.

In groups the individual enjoys the light reflected by the group in information, experiment, social activities and business knowledge.

The group has the power of tonnage control in markets that establish the price which the individual receives for produce.

The group gives "chain" buying power, benefits to the individual which alone he could not have.



The group fights for industry, rights of transportation, justice in taxation and legislation, and in production standards.

The group gives spread of risks with the benefit to the individual of protection against loss by fire, accident, the elements and death.

The accomplishments of the Farm Bureau illustrated on the opposite page were made possible by group thinking and group action. Agriculture as an industry will prosper to the extent that the power of the group engaged in farming is used efficiently in solving its problems.

Is Farm Organization Worth the Cost?

A Radio Address By George Thiem, Station WMAQ, Chicago, July 28.

FOR more than 10 years now Illinois farmers have had an opportunity to judge the results of their organized efforts in the County Farm Bureau and Illinois Agricultural Association. Is organization worth the cost? Do the returns justify the $15 a year the member invests in his Farm Bureau, county, state, and national?

Organized middlemen who just now are engaged in collecting $25 per year contributions for four years to fight co-operative marketing, would like to answer this question for the farmer. They are specifically advising him to abandon his organized efforts, drop his farm organizations, confine his activities to making two blades of grass grow where one grew before. That seems to be the end and aim of all their advice. Will the farmer follow it? I believe not, judging from the history of organization and its accomplishments in Illinois during the last decade.

How Maintained

That Illinois farmers have clung to their state agricultural association more than 60,000 strong through the worst and longest depression in the history of American agriculture is well known to informed people. Mind you the organization has been maintained not by high-powered salesmen, not by artisans skilled in extracting contributions for doubtful ventures, but by the members themselves who every three years voluntarily go out and ask their neighbors to stand together in a worthy cause. What has influenced the decision of such a large number to stick to their organization year after year? There must be a reason. Let us see.

The County Farm Bureau in Illinois was organized back in 1912 chiefly to help farmers with their production problems. The opening of the World War gave the movement a powerful stimulus. "Food will win the war" became our national battle cry. Food prices rose rapidly. The Farm Bureau bent its efforts toward stimulating production, making two blades grow where one grew before. Europe was out of production. Farmers there laid down their implements of production and went to the battle front. Besides her own people, American farmers were called upon to feed the warring nations.

The I. A. A. Organized

The great conflict destroyed the economic balance of the world. Post-war deflation set in. Agriculture felt the effects of the drastic readjustment more than any other major industry. European nations were deeply in debt, had little buying power left. Our food exports rapidly declined. Farm production in Europe and other countries arose. The American farmer became troubled with surpluses. The protective tariff on farm products didn't help any under such conditions. It was natural for Illinois farmers, therefore, to turn to organization to solve the problems arising beyond their line fences. The Illinois Agricultural Association was the result.

One of the first problems that drew farmers' attention was taxation. Farm land valuations had started their long decline following the war. With lower prices for grain and other crops in 1921-22 taxes became exceedingly burdensome. The lower values were not being fully reflected in assessed valuations. The I. A. A. requested a hearing before the Illinois Tax Commission. It was granted. For the first time in history Illinois farmers were represented before such a body along with the railroads, manufacturers, public utilities, and other groups.

Facts were presented to the State Tax Commission showing that assessed valuations were still far too high. The upshot of the hearing was that land valuations from 1921-22 were reduced a total of $181,000,000. As a result Illinois farmers paid $1,072,050 less taxes in 1923 than they would have paid had valuations not been adjusted. Since then repeated cuts have been obtained both for state and county tax purposes.

$22.79 Per Farm

For 1931 the effect of this early work both before the State Tax Commission and before many county boards of review was to reduce Illinois farm land taxes a total of $4,900,000 less than farmers would have paid had the high valuations of previous years not been reduced. This service alone meant an average saving of $22.79 on each of the 215,000 farms in Illinois for 1931.

During and following the war the cost of processing and distributing farm products had increased enormously. Farmers learned that they were getting less than one-third of the consumer's dollar. They were selling on a world market because of their surplus production, and buying on a protected market. They were selling wholesale and buying retail.

To make the tariff effective on farm products brought on the movement to pass the McNary-Haugen bill. Co-operative marketing likewise was turned to as a means of helping farmers obtain a satisfactory price for their products. The Illinois Agricultural Association became prominently identified in these organized efforts.

Livestock Selling Agencies

As a result co-operative producer-owned and controlled livestock selling agencies were organized on all of the larger terminal markets. Farmers had learned that a half dozen buyers working together have all the advantage over 75 to 100 unorganized sellers when it comes to making prices.

Today where the co-operative livestock selling associations are handling a comparatively large percentage of market receipts at the terminals they are having a wholesome influence in getting all the market affords for the farmer's livestock. The Producers co-operatives are giving the farmer a voice in the market. During the past nine years one Producer commission association alone has refunded more than a million dollars of commission charges to farmer patrons. Two others serving Illinois livestock shippers have refunded annually 25 per cent of their commission charges.

Aid to Dairymen

In 10 years the County Farm Bureaus and the I. A. A. together have organized close to 85 per cent of the whole milk producing territory of the state. If these dairy co-operatives added only 10 cents per cwt. net to the whole milk sold in Illinois annually, the increased return would be more than $3,000,000. But these co-operatives have done far better than this.

A. D. Lynch, dairy marketing director for the I. A. A., said in his report for 1929: "The members of the Pure Milk Association in Illinois who supply the Chicago and tributary fluid milk markets received approximately $1,600,000 more during 1929 for their milk than they received during the years preceding their organization." It is difficult even to estimate the value of organized effort represented by these co-operative dairy associations now operating in Chicago, St. Louis, Peoria, Springfield, Decatur, Quincy, Rock Island, Rockford, Champaign, Bloomington, and other points.

More for Butterfat

More than 65 co-operative produce associations or cream pools have improved and equalized local butterfat prices throughout Illinois. In many localities local butterfat prices were raised 3 to 5 cents per pound following this organized effort. The big job ahead for these co-operative units is to get Illinois cream producers to turn out a higher quality product so Illinois butter may compete with the high quality butter coming from the states to the north.

The Illinois Fruit Growers Exchange during the past nine years has done more to advertise and standardize Illinois peaches, apples and other fruits and vegetables than had been done in the previous fifty years.

Now Grain Marketing

Illinois farmers have worked hard against bitter opposition in getting their co-operative grain marketing agencies established in the terminal markets. Their early efforts in this field never got past the organization stage, but today it is a different story. Illinois farmers now have their own selling agency, the Illinois Grain Corporation, in which more than 70 local farmers' elevators and co-operative grain companies are co-operating. Still less than a year old this terminal co-operative affiliated with the National Grain Corporation handled more than 3,000,000 bushels of grain in its first six months of operation.

Farmers are determined to give co-operative marketing of grain a fair trial and judge for themselves whether or not organized selling can produce benefits in this as in other commodities.

Farmers Are Represented

Today the Illinois farmer is as well represented before legislative and rate-making bodies as other organized groups. When rate increases or other regulations are proposed the Commerce Commission hears the farmer's side of the case from his own representatives. There has never been a major increase in freight rates in Illinois since the Illinois Agricultural Association began operating on its present basis in 1919. There have been a number of important reductions to save farmers thousands of dollars on their freight bills. Had the Commerce Commission granted the increase in livestock rates asked by the railroads two years ago which the I. A. A. vigorously opposed, freight charges to Illinois shippers would have been increased about $500,000 annually.

Hundreds of right-of-way, power line, telephone, and rate questions were handled by the Association last year. Settlements made for the use of land in several power line and pipe line cases returned thousands of dollars to farmers above what they would have received without organized representation. Loss and damage and other claims collected by the I. A. A. Transportation Department since 1920 have aggregated $218,812.79. Approximately 1,000 such claims were handled in 1930 alone.

Organized Purchasing Helps

Reducing the costs of needed services and commodities through organized buying has been an outstanding achievement of Illinois Farm Bureau members. A saving of $500,000 annually by farmers who use their own mutual insurance companies is a conservative estimate of how farmers have benefited from this service.

In the companies organized by or with the aid of the I. A. A., there was in force July 1, 1931, $42,500,000 of life insurance, $43,000,000 of fire, hail, and windstorm insurance, and approximately 26,000 cars and trucks valued at more than $16,750,000. The life insurance service saved its policyholders more than $250,000 on the initial cost alone, in addition to the liberal dividends declared one year earlier than the contracts provide. An additional $200,000 is saved by I. A. A. auto insurance policyholders based on current rates in effect in the next low cost state-wide company. This means an annual saving of $13.53 to Farm Bureau members on a full coverage policy on a low-priced car. Farmers are protecting their crops against hail at a third less than the going rates charged by private agencies—saving $10 per $1,000.

$38.68 Per Member

With the advent of power-driven machinery, the farmer has become a large buyer of petroleum products. Here also co-operation has been turned to good account. Farm Bureau members are saving through organized buying of gasoline, kerosene, lubricating oils and greases hundreds of thousands of dollars annually, while getting superior products bought on their own specifications to meet their special needs.

The McLean County Farm Bureau reports that 1,580 county Farm Bureau members last year received patronage refund checks representing savings on their gasoline and oil bills averaging $38.68 per member—a total of $64,000 —more than twice the cost of the Farm Bureau in that county.

Savings to members on purchases of agricultural limestone, rock phosphate, hog cholera serum, home vaccination, and other commodities and services which influence the cost of production need only be mentioned. The individual counsel of the farm adviser in production problems, the many and varied projects including 4-H clubs, social and recreational activities are benefits some members would not do without.

The Problems Ahead

While organized effort has paid big returns on the investment, some of the most vexing problems lie ahead. Price inequalities, excessive distribution costs remain with us. The need for tax reform, for replacing the antiquated general property tax with a system of taxation based on ability to pay is everywhere recognized. That the Illinois Agricultural Association has brought this question to the fore in Illinois is a tribute to the constructive efforts of organized farmers. Some day taxation based on incomes will be the accepted plan for deriving revenue to operate governments here as it is in more progressive states and countries. Ability to pay will be the yard stick for exacting taxes. When that day comes the Illinois farmer along with owners of real estate in town and city who bear 80 to 90 per cent of the tax load will be relieved of a grievous and unfair burden.

The answer to the question, "Is farm organization worth the cost?" is given by farmers themselves. In one day last June nearly 1,700 McLean county farmers indicated their satisfaction with their organization by renewing their Farm Bureau memberships for a new three-year period. Similar records were made in DeKalb, Tazewell, LaSalle, and scores of other counties. Illinois farmers are proud of their organization and what it has done for them. They have stood by it when corn was 35 cents a bushel, wheat 40 cents, and hogs $6. They will continue to do so because they know they are living in a world of organization where one man can do nothing alone.

W. L. Cope, I. A. A. director from the 23rd district, represented the Illinois Agricultural Association at the annual meeting of the Egyptian Seed Growers' Exchange at Flora on July 14.

Ground rock phosphate made the difference in this field of clover. With rock phosphate the yield was 8,100 pounds per acre; without phosphate 1,600 pounds, a difference of 6,500 pounds or 3¼ tons. The soil was sandy loam.

Ground Rock Phosphate—An Investment That Pays Big Returns

THESE are times when every farmer must lower his cost of production. The yield per acre is the most important factor in per bushel or per ton costs. The quality of the grain, whether or not it matures before frost, may make the difference between profit and loss. Perhaps phosphorus is all your soil needs to greatly increase its yielding capacity.

No investment pays such a large return as ground rock phosphate (also called lime phosphate) correctly applied on soil which needs it. Even at current low prices rock phosphate has paid a return of more than 300 per cent in one crop rotation period.

Increased Yield 20-30 Bu.

H. H. BISSELL, Iroquois county, Illinois, says: "Rock phosphate has increased our crops 20 to 30 bushels per acre."

Sam Stadler, Ford county, Illinois, says: "Have used about 150 tons of your phosphate with good results. Matures corn 10 days earlier than where we did not use it. It makes two stalks of clover grow where one grew before."

Shuman Farms, Moultrie county, Illinois, reports: "The corn on the phosphated land yielded 46.1 bushels per acre, while that in the same field, but without phosphate, yielded only 34.9 bushels per acre. These results were better than we anticipated considering the dry season."

More For Your Money

NO PHOSPHATIC fertilizer gives so much usable phosphorus per dollar of cost as ground rock phosphate. Organized buying power enables Farm Bureau members in Illinois to buy ground rock phosphate at less cost than others. The I. A. A. analyses on each carload guarantees reliable quality and equitable price.

Ask your county farm adviser for details.

Accident Prevention Drive Scheduled for September

43 Farm Bureaus Already Committed to Organize Safety Clubs

ILLINOIS Farm Bureaus are again setting a precedent by being the first Farm Bureaus in the United States to put on an automobile accident prevention campaign, states V. Vaniman of the insurance dept.

V. Vaniman

Forty-three Farm Bureaus have appointed accident prevention committees to have charge of county campaigns to be held during the month of September. The Illinois Agricultural Association will present a silver loving cup to the county putting on the best campaign.

Although the Illinois Agricultural Mutual Insurance Company has been able to keep its assessments lower than competing companies on account of the low number of accidents among Farm Bureau members, this campaign is expected to reduce the number still more.

The company is now saving its members more than $200,000 per year on the cost of their auto insurance, according to Vaniman. "It pays out nearly $200,000 a year for accidents. A little united work on auto accident prevention would reduce losses by at least $50,000, saving this much more for the members."

The Illinois Farm Bureau Safety Club has been organized to sponsor safer driving. Any Farm Bureau member may join and will receive an emblem for his windshield and a little folder on auto accident prevention. No fees are required for membership.

Accidents to Farm Employees Reported

The Illinois Agricultural Mutual Insurance Co. reports that a total of 1,749 employers' liability insurance policies have been issued to date. Fifty applications were received in July.

Recent accidents reported include:

Cook County—Hired man plowing corn turned at end of field—reached for lever on plow; lever flew up striking his glasses and causing cut above eye on frontal bone.

Warren County—Riding horseback rounding up hogs; horse's feet slipped from under him on a slope—horse fell on hired man's leg causing a length wise fracture of the large bone between the knee and ankle.

DuPage County — Was sticking hay fork into a load of hay when the team on rope started; he lost his balance, caught hold of rope and hand went into pulley; fingers bruised and cut.

DeKalb County—Hired man was endeavoring to pick cherries; limb of tree gave way and he fell to the ground spraining his right wrist.

McLean County—Hired man was lifting a pig. He lost his balance and fell striking his arm against the tin window of a pig brooder house, cutting a gash half way between wrist and elbow.

NOTICE
ILLINOIS AGRICULTURAL ASSN.
ELECTION OF DELEGATES

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the month of September, 1931, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of Association, including the election of officers and directors as provided for in the by-laws of the Association.

During September annual meetings will be held in Christian, Jefferson and Wayne counties.

Signed:

G. E. METZGER, *Secretary.*

Aug. 15, 1931.

Lightning Hits Barn, Gets $1,200 Insurance Check

Lightning struck the cow barn of Grover Sprouls of Georgetown (Vermilion county) on the afternoon of July 2 resulting in a fire and the complete destruction of the building. Luckily Mr. Sprouls was a policyholder in the Farmers Mutual Reinsurance Co.

A check for $1,200 representing the entire amount of the insurance was mailed from the Chicago office the same day proof of loss was received. In a letter to Edward L. Dillon, general insurance agent for the Farm Bureau in Vermilion county, Mr. Sprouls said:

"I want to express my appreciation for the prompt payment in full of the $1,200 of insurance which I carried on my barn. This check was received within six days after the barn was burned. I am very pleased to recommend this insurance, which I secured through the agency of the Vermilion County Farm Bureau in the Farmers Mutual Reinsurance Company."

Marshall-Putnam County Hit by Severe Hailstorm

A CROP is never safe from destruction by hailstorm until after it is harvested and under a roof, Marshall-Putnam farmers learned recently.

On July 20, when many farmers felt that the worst hail threats were past, a violent hailstorm swept across Whitefield township destroying crops in a strip two miles wide. At the farm of Lawrence Turner near Whitefield hall, the hail stones covered the ground four inches deep when the storm ceased. Many of them were as large as golf balls.

Soybeans in this area paid the heaviest toll, which in some cases was a complete loss. Cabbage, beans, beets and rhubarb were beaten into the ground, leaving nothing but the stems. Corn in tassel suffered worse damage than younger corn.

Three days after the storm one farmer who was not even in the main path of the hail said that his corn was completely ruined. Others were speculating on the possibility of the injured corn's recovery.

More than 2,100 Illinois farmers are protecting themselves against hail losses by insurance with the Farmers Mutual Reinsurance Company, which is owned and operated by farmers. The total amount of protection in force exceeds $2,500,000.

Country Life Gains in '31 Business Over '30

LEGAL reserve life insurance in force in the United States now totals $115,000,000,000, according to L. A. Williams, manager, Country Life Insurance Co.

This is twice the value of all farm lands in America, three times the value of all the homes, six times the total value of all the automobiles in use, and almost one-third the value of all the tangible property in the United States.

"It represents nearly $1,000 per person, an average of more than $3,000 per family, including all races and classes. For families of the middle class, which would include most of the policy holders in the Country Life Insurance Company, the average is much higher than this," says Mr. Williams.

Country Life already has $43,000,000 in life insurance in force. While the total amount of life insurance written in the United States during the first half of 1931 shows a decline of 12.3 per cent as compared with the same period last year, the business of Country Life shows an increase.

Madam, Your Husband Allowed His Policy to Lapse a Year Ago

35,000 People Died Last Year After They Had Lapsed Their Life Insurance Policies

KEEP your life insurance in force. That's the only way you can secure its benefits. When you lapse your policy you lose money, and your dependents lose the protection they ought to have.

Sacrifice almost everything to pay your life insurance premiums. Every payment increases the cash value of your policy—insures that your family will be protected if you suddenly pass away.

Will Rogers says: "I am putting my money into insurance as that's one thing I know is safe. Remember when you were a kid how hard it was to take the plunge in the creek on a cold day? Well, that's like paying an insurance premium. It takes time for some folks to make up their mind to mail the check, but after it's mailed the feeling's fine."

COUNTRY LIFE INSURANCE COMPANY

608 SOUTH DEARBORN STREET - - - - CHICAGO

527 Auto Applications Received During July

Accident Prevention Campaign Is Big Project in September

AUTOMOBILE insurance applications in the Illinois Agricultural Mutual Ins. Co. up to the first of August total 29,153, for the month of July 527. The 10 high counties last month in the number of applications received were McLean, Cook, DeKalb, St. Clair, Lake, Will, Kane, Livingston, Stephenson and LaSalle.

The leading counties in auto insurance applications for the past year were Cook, Champaign, Livingston, Whiteside, Lake and McLean.

V. Vaniman, director of insurance service for the I. A. A. in co-operation with the Illinois Agricultural Mutual, county advisers, and general agents, will direct an accident prevention campaign during the month of September. Vaniman announces that 49 counties had appointed special committees to work on the project by the first of August.

Safety Club

The Illinois Farm Bureau Safety club will be organized as part of the program of reducing the number of accidents. Since the payment of losses takes a large percentage of the semi-annual premiums collected from policyholders, a substantial reduction in accidents will assist the company in holding down assessments and perhaps even lowering them if results justify such action.

A silver loving cup will be awarded by the Illinois Agricultural Association to the county Farm Bureau putting over the best auto accident campaign during September. The second prize will be a banner.

Damages Reported From Gas Pipe Line

Damage claims against the Continental Pipe Line Company reported by Farm Bureau members from Henry, Kendall, and Will counties are in process of settlement, reports the I. A. A. Transportation Department.

This is a natural gas pipe line running east and west through northern Illinois. In some cases the company found it necessary to go through hills and throw up large piles of earth. Subsoil consisting largely of clay was leeched and washed down to adjoining fields where considerable damage was done to crops.

In Will county a number of members reported damages to onion set beds. The company has announced that it will settle all claims soon after the line begins operating in the fall.

The Peoria Producers recently declared a 30% commission refund. Commissions to McLean county shippers varied from small amounts to as much as $20, totaled more than $1,100, reports the Farm Bureau.

I. A. A. Offers Aid in Bureau Telephone Case

W. R. Soverhill, president, and W. F. Black, vice-president of the Bureau County Farm Bureau, Farm Adviser W. W. Wilson, and B. L. Hudson of Wyanet, conferred with L. J. Quasey and Donald Kirkpatrick of the Illinois Agricultural Association in Chicago, Aug. 6, regarding the increase in telephone rates of the Illinois Allied Telephone Co.

The Farm Bureau and the I. A. A. will back the committee representing 6,500 local subscribers in requesting a rehearing of the case before the Illinois Commerce Commission.

The recent drastic increase in rates, the organized subscribers in both town and county contend, was not justified. They assert that the book value of the telephone property has been greatly inflated, and that the old rates gave the company an adequate return on the investment.

In the meantime approximately 3,000 Bureau county subscribers have had their telephones removed because of the unwillingness to pay the higher rates. In the town of Wyanet nearly all the merchants as well as farmers in the neighboring community had their phones removed.

Banker Pleased with I. A. A. Auto Insurance

That prompt settlement of claims is one of the best friend-makers any insurance company can have is the principle upon which the Illinois Agricultural Mutual Insurance Company operates, according to A. E. Richardson, manager.

A letter from Guy Wolf, president of the Exchange State Bank at Lanark, Carroll county, Illinois, confirms this position. Mr. Wolf writes to acknowledge the receipt of a check in payment for damages to his car in an accidental collision.

"I am very well pleased with the manner in which you handled this matter," he said. "I wish to thank you and assure you that the settlement is satisfactory. I count myself lucky that I had insurance covering damages to my car and personal injury."

New Record Established In Co-Op. Oil Purchases

A new yearly record in the co-operative purchase of petroleum products by Illinois farmers will have been established in the 12 month period closing the end of August, announces L. R. Marchant, manager of the Illinois Farm Supply Company. The total gallonage of petroleum products handled during the fiscal year ending August 31 will exceed 30,000,000.

Substantial gains have been made in all lines of merchandise handled. The increase was due partly to new county companies established during the year and to general expansion by all of the 45 associated companies.

At a recent meeting of the managers and directors of the associated companies a goal of 1,000,000 gallons of motor oil for 1932 was established.

There are 847 farmer owned and controlled oil companies operating in the United States, according to a recent government report. These companies represent an investment of around $5,922,000. They handled an estimated 350,000,000 gallons of petroleum products during their last fiscal years and the average patronage refund to the member was 14.9 per cent.

This co-operative service established by farmers represents an effort to cut their production costs, to get away from buying everything retail while selling their products wholesale.

Blue Grass Co-Op. Formed in Kentucky

Kentucky farmers, who have provided several dramatic pages of co-operative history in connection with tobacco, are adding another page.

This summer they are netting $1.00 instead of 50 cents a pound for blue grass seed—without increase of cost to consumers—due to the fact that they have assumed full charge of cleaning and merchandising their crop.

Growers of 1,500,000 bushels of seed, 85 per cent of the state's production, accomplished this achievement through organization of the Kentucky Blue Grass Seed Growers Co-operative Association, at Winchester. Contracts were made with three of the most reliable seed concerns in the state to handle, clean and sell as agents for the association at a fixed charge of 13 to 15 cents a bushel. Sales have been made from $1.18 to $1.36 in contrast to prices of 25 to 35 cents for green seed received by farmers earlier in the season before the co-operative was formed.

Similar co-operatives are being formed in Iowa, Missouri, Nebraska and Kansas where blue grass seed is also grown.

Red Top Seed Buyers Try to Imitate Pool

Seek to Fill Up Warehouses with Seed on Consignment to Collect Storage Fees

OLD line dealers in southern Illinois are attempting to imitate the red top pool which operates through the Egyptian Seed Growers' Exchange at Flora, according to information received by the Illinois Agricultural Association.

A well known seed house at Olney recently sent out a new pooling proposition to boxholders on rural routes throughout the red top territory as follows:

"We offer our facilities to ALL growers of red top. We operate a PUBLIC STORAGE WAREHOUSE and can give you a negotiable warehouse receipt covering same. Your seed remains intact and is NOT MIXED WITH OTHER LOTS OF RED TOP and you can sell WHEN YOU PLEASE.

"WE WILL ADVANCE YOU 9 CENTS PER POUND against your red top and you can sell it when your judgment tells you it is the best time to sell. THIS GIVES YOU MANY OF THE ADVANTAGES OF BELONGING TO A RED TOP POOL and many others besides as the seed remains yours and you sell it when you get ready.

Interest and Storage

"There is a very nominal interest and storage charge. You can get your bags for red top from the SEED COMPANY and at their buying stations."

Manager James of the Egyptian Seed Growers' Exchange comments on the above letter as follows: "You will note that the company states 'We will advance you 9 cents a pound against your red top seed.' Also 'This gives you many of the advantages of belonging to a red top pool and many others.' The company thereby acknowledges that the red top pool offers advantages to the farmer.

"The company further states 'There is a very nominal interest and storage charge.' If the farmers are going to pool their seed, why not pool it in their own organization?

"I believe the reason for the above proposition being circulated is due to the unsettled market condition of red top and blue grass and the old line dealers are not willing to stand the load of a further decline in the price of seed. They want the farmer to carry this risk and, if the price drops below 9 cents per pound, the farmer will refund this difference to them together with the very nominal interest charge."

Do You Ship Farm Produce Parcel Post?

One of the most recent developments in agricultural marketing has been the increased use of parcel post as a connecting link between producer and consumer. At the present time the Post Office Department at Washington is attempting to further increase the sale of farm products by this method.

The Post Office has written the I. A. A. asking for names of those who have tried this method of marketing. If you have had experience marketing by parcel post, write the Post Office Dept., Washington, D. C., and give them the benefit of your suggestions.

Warehouse of Egyptian Seed Growers' Exchange, Flora, Ill.

Ask to Have Agent Continued at Hermon

The Knox County Farm Bureau and the Illinois Agricultural Association entered a plea before the Illinois Commerce Commission on July 30 for continuation of the station agent at Hermon by the Minneapolis and St. Louis railroad.

H. E. Gehring, C. M. Hunter and E. U. Shumaker of the Knox County Farm Bureau, and Donald Kirkpatrick, legal counsel for the I. A. A., gave reasons why the agency service should be maintained.

The Knox County Farm Bureau oil company has a bulk plant at this point. The co-operative and numerous livestock shippers in the surrounding territory would be considerably inconvenienced if the station agent were withdrawn.

Evidence presented to the Commission revealed that the income of the railroad at this station had averaged approximately $5,000 annually during the past four years, and that only during the first half of this year because of the depression have receipts showed a decline.

The fact that livestock growers around Hermon and other points in Knox county are not feeding as many cattle this year as usual accounts for part of the decline in the railroad's business. At the close of the hearing the Commission took the case under advisement.

Macon County Supply Co. Builds New Bulk Plant

CONSTRUCTION of a new bulk oil plant at Lodge, Piatt county, is now complete, making four plants owned by the Macon County Supply Company, which serves Piatt and Macon county farmers.

"Contrary to those skeptics who have said that we could not compete with other oil companies on the low margin of profit existing today in the petroleum industry, we want to emphatically state that the Macon County Supply Company can and is making a profit," declared Manager Hugh Jackson.

"The audit for the first six months of our fiscal year showed a substantial profit for that period. Naturally the profit is not as great as it has been in the past, but unless the margin is greatly reduced during the balance of the year, there will be a nice profit at the end of the year.

"Last year our patronage refund paid to Farm Bureau members in the two counties averaged $15.42 or more than enough to pay the Farm Bureau membership dues. Practically half our business comes from non-members, who buy from us only because they found our SERVICE petroleum products the most satisfactory to use.

Vaccinates His Own Pigs, Saves $144 on 720 Head

A. T. Sumner of Stockland, Iroquois county, reports a saving of $144 on pig vaccinations this year through the use of Farm Bureau serum and virus. He vaccinated 720 head of hogs at a saving of 20 cents a head. He reports that not a single hog was lost on account of the vaccination and that he is well pleased with this Farm Bureau service.

Sam Thompson Talks to Home Folks at Old Salem

Reviews Economic Situation, Tells How Farmers Can Help Selves By Working Together

THE influence of world economic and political conditions on American farm prices, a review of the agricultural situation in this country, the government's national program for agriculture through the Marketing Act, the farmer's opportunity for better bargaining power through co-operative marketing, and the achievements of Illinois farmers in this field were discussed by Sam H. Thompson, member Federal Farm Board, at the 20th district Farm Bureau picnic, Old Salem, Menard county, August 12.

Mr. Thompson's address was a constructive presentation and summary of the current situation and what farmers can do toward improving their economic position.

"To help farmers make the necessary adjustments in production, distribution, and marketing to meet these changed conditions," said the speaker, "Congress passed the Agricultural Marketing Act and created the Federal Farm Board to administer it. By this Act Congress definitely committed the government to the support of co-operative marketing as a means to help farmers help themselves in this adjustment, the most unparalled which they, the farmers of America, have had to make in 150 years.

"*Making these adjustments for American agriculture means collective planning, collective thinking, and collective working upon the supply and demand problems, production problems, and a multitude of problems connected with the economical distribution and marketing of crops.* Progress will be made more surely and more steadily if back of the program there is a growing, coherent and unified body of farmers' co-operative organizations working to a common end. This should develop a program of lasting value. . . .

Only Efficient Producer Can Be Helped

"*Through organized marketing the farmer should receive a larger part of the dollar paid by the consumer for his product. His co-operative can be of real service in helping him to plan his next year's operation. But the farmer must be an efficient producer to get these benefits. There is nothing that can be done to help the inefficient man who refuses to change his methods.*

"Correlation of all of our efforts,

Sam H. Thompson

Federal and State, with the loyalty and support of farmers, will bring about these accumulated results: *adjustment of production to consumer's demand, organized marketing in the interests of the farmer, and efficient production.* It must be kept in mind that no production problem can be separated from the purely human problem of making a decent living, which always presses severely upon the producer. . . .

Progress of Co-Operative Marketing In Illinois

"For more than 15 years the Illinois Agricultural Association has been doing local work in the promotion of co-operative marketing in the state of Illinois. This organization has to its credit, as you all know, a wonderful achievement. In July, 1930, there were 970 co-operative marketing associations in Illinois. These associations had a total membership of 206,700 and during the year 1929-30 transacted business to the amount of $204,600,000, of which dairy products made up approximately $38,000,0000, grain $97,000,000 and livestock $60,000,000. Since the creation of the Farm Board the Illinois Agricultural Association has had the Board's assistance and co-operation in all of its work. . . .

Co-Op. Marketing Not Magic

"*The advocate of co-operative marketing should keep in mind, in his earnest desire to help himself and his neighbors, not to over-sell co-operative marketing. He should not become so enthusiastic as to believe that co-operative marketing is a panacea for all farm ills or that it will make him rich over night,* or that such a plan is the sort of magic by which inefficiency can be turned into efficiency, or weakness into strength, or failure into success. *Co-operative marketing is only a method of doing business.* Unless it can produce better results than the system with which farmers are dissatisfied, it cannot hope to succeed. The results of any system or method, new or old, depend upon the efficiency of its management, the honesty and competency of its officials, and the loyalty of its supporting members.

Individual Farmer's Part

"In this connection, it is worth while to observe that it is the farmer's job to set up the organization. The farmers who market their products through organizations must become responsible for their successful operation. Teamwork between farmers and the management of their associations on one hand and the Board on the other should result in the development of strong co-operatives which can and will render effective service to their members and which will become the chief factors in improving agricultural conditions.

"*If the individual farmer is to receive the benefits, he must become a member of his local co-operative association.* Whether he joins is a matter for him to decide for himself. He should do this of his own free will after he has carefully investigated the situation as to the soundness of the organization's management and the purposes, as well as the benefits, he may secure therefrom.

"The American farmer must come to realize that six and one-half million farmers operating individual farm units are helpless in marketing their products unless they co-operate with their neighbors in local associations and these associations centralize their sales efforts in one organization. In the development of national organizations to cope with other highly organized groups, the individual farmer must do his part by joining and supporting a local association affiliated with the national sales agency.

Know Your Friends

"To farmers and to others interested in the betterment of agriculture I would suggest that they consider the facts I have recited before they swallow other views of the situation, even if these are voiced by their unquestioned friends. *A great deal of misleading and even malicious propaganda is being spread, both openly and under cover, by men who are out to get some*

(Continued on Page 18)

personal advantage or generally to discredit the Farm Board and its efforts to help the farmers. Unfortunately, many people who have the farmers' interests at heart have been misled by such propaganda. Farmers should understand that the real purpose back of this campaign is to block them in their efforts to organize their own marketing system.

Trade Opposition

"It is not surprising that the private marketing trade should resent the growth of co-operative marketing and the aid which the Board has given to marketing organizations. *More business to the co-operative means less to the private trade.* The elimination of fluctuations in prices takes away the speculator's opportunity to profit from such price fluctuations. It is even natural that all those who are bitterly hostile to the Agricultural Marketing Act, the Federal Farm Board, and the national co-operative marketing program, in other commodities as well as wheat, should seek to have the Board adopt mistaken policies, particularly if these would endanger the Board's financial position and weaken its standing with farmers and the country.

Best System Will Survive

"Naturally, there will be competition between co-operative methods of selling farm products and the old methods which have been used for many years. The first reaction on the part of many of those engaged in handling farm products under the old system when the Agricultural Marketing Act became a law was that the change would be sudden, and would, therefore, jeopardize their business. You are reminded, however, of the fact that any changes from one system to another necessarily will be gradual and the industry will have opportunity to adjust itself in meeting these changing conditions. Progress is always painful and the system rendering the best service is the one that survives.

Cost of Distribution

"We hear a lot about the rising cost of distribution. This is not confined to agriculture alone, for it affects every line of modern economic activity. Let me quote you a statement by an outstanding authority, Roger W. Babson, issued June 14:

" 'The keynote to future prosperity is improvement in distribution methods. Distributors must cut costs and pass along to the consumers the saving already achieved in production. Progress in production has far outstripped progress in distribution. Our distribution system, because of its high cost, is still the bottle neck which prevents the free flow of mass production which gets to

the consumer. This business must attract that great potential market among the lower income classes to provide an adequate outlet for its huge producing capacity and to do this it must reduce costs. Authorities estimate that the avoidable waste in distribution is between $8,000,000,000 and $10,000,000,000 a year.'

"I want you to think carefully of that statement coming from an authoritative source, referring to the situation that confronts the industrial and business world. *Industry is much better organized and, therefore, has a greater bargaining power in the sale of its products than is possible for the farmers, acting individually, to have.* If it is necessary for business to organize to meet these situations squarely, then it certainly behooves the agricultural producers to unite their efforts to eliminate all wastes and unnecessary services between the producer and the consumer."

Milk Prices

(For July based on 3.5% milk unless otherwise specified.)

Baltimore—Maryland State Dairymen's Assn. announces $2.84 per 100 lbs. del'd for class I basic fluid milk; f. o. b. country pt. $2.32. Class II $1.86 del'd, country pt. $1.34. Cash and carry 12c.

Pittsburgh—Dairymen's Co-Operative Sales Co. announces $2.68 del'd, $2.03 country pt. for 100 lbs. Class I fluid. Class II $1.49 del'd, $1.10 country pt. Class III surplus, butter prices (.04 cents per 1/10% butterfat). Retail 12c.

Springfield — Producers Dairy Co. announces $1.90 for Class I basic fluid milk del'd to city. Retail 9-1/11 cents. Cash and carry 8c.

Rock Island—Quality Milk Ass'n announces $1.85 per 100 Class I basic, f. o. b. country pt. Class II $1.25. Retail 10c. Cash and carry 8c. These are the prevailing prices, but not the price agreed upon by the dealers and the Quality Milk Ass'n. Class III butterfat price.

DeKalb—Milk Consumers Ass'n announces $2.32 per 100 for Class I basic fluid milk del'd. Surplus butter 92 score market. Retail 12c. Cash and carry 11c.

Chicago—Pure Milk Ass'n announces Class I basic fluid $2.32 country pt. June Class II 93c country pt. June Class III 78c country pt. Retail 13c. Cash and carry 11½c.

Bloomington—McLean County Milk Producers announces Class I 38½c per lb. butterfat. Class IIa 31.85c per lb. butterfat. Class II 28.85c per lb. butterfat. Class III 26.35c per lb. butterfat. The prices for 4% milk f. o. b. Bloomington are: Basic milk $1.814. Surplus milk $1.395. These prices include the 5c per hundred checkoff.

Quincy—Quincy Co-Operative Milk Producers announces $2.20 per 100 lbs. Class I basic fluid del'd. Retail 10c. Cash and carry 8c.

St. Louis—Sanitary Milk Producers announces $2.15 per 100 lbs. Class I basic fluid milk country pt. Class II 97c, Class III 81c. Retail 12c. Cash and carry 10-11c. In above prices 3c checkoff has been previously deducted. Have about a 50% surplus in July.

Decatur—Decatur Milk Ass'n announces $2.06 for Class I basic del'd. Class II $1.45 del'd, Class III 90c del'd. Retail 10½c. Cash and carry 8½c.

Pontiac — Pontiac Milk Producers Ass'n announces $1.92½ for Class I basic, Class II 32c per lb. butterfat. Retail 10c. Cash and carry 8c.

McLean County Producers Report July Sales

The total volume of milk produced by members of the association for July, 1931, is 1,783,643 lbs. It was disposed of in the following manner: fluid milk and cream representing 616,784 lbs., milk to other dealers representing 91,144 lbs., manufactured milk representing 872,737 lbs. and surplus milk representing 202,978 lbs.

Fluid sales are off 3.85% as compared with June, 1931. July sales are down largely due to the summer students leaving town and the people who are on their vacation. Sales are up over 16,700 lbs. as compared with July, 1930.

July production is off 18.41% as compared with June, 1931.

Four hundred and fifty-three members delivered milk during July, with an average production of 126.20 lbs.

July prices for 3.5% milk f. o. b. Bloomington are:

Basic milk	$1,588
Surplus milk	$1.220

The Mid-West Grain Corporation handled 1,063 carloads of grain in the month of July, more than 3,200 in nine months of operation.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

Number 9 SEPTEMBER, 1931 Volume 9

I. A. A. Testifies Before Commerce Commission

15 Per Cent Rate Increase Would Add $2,500,000 to $3,000,000 to Grain and Livestock Freight Bill

AN increase of 15 per cent in freight rates on Illinois farm products would place an additional burden of $2,500,000 to $3,000,000 annually on Illinois grain and livestock alone, President Earl C. Smith testified September 4 before the Interstate Commerce Commission in Chicago.

"Anything tending to reduce the farmer's present income would have to be taken from his capital investment, for with few exceptions almost every commodity is now being produced at a loss," he said.

Many Witnesses

The hearing on Friday, September 4, gave the farmer his day in court. Heads of the important nation-wide and mid-west farm organizations appeared as witnesses. Edward A. O'Neal, president of the American Farm Bureau Federation; Chas. E. Hearst of Iowa; W. H. Settle of Indiana; Chas. E. Ewing, president of the National Livestock Marketing Association; Sen. Smith Brookhart of Iowa; C. E. Huff, president of the Farmers National Grain Corp., Chicago, and others testified before the Commission.

Would Add $150,000,000

In a statement released by the American Farm Bureau Federation, O. W. Sandberg, director of transportation, declared that more than $150,000,000 would be added to the farmer's annual freight bill if the increase is granted. Most of this burden would fall on the great agricultural districts of the middle west, from Illinois to the Rockies, he said.

"We will admit," Sandberg said, "that the railroads have a problem, but

agriculture's problem is vastly more aggravated and our farmers have faced it for more than a decade, while the railroads did not begin to worry until slightly more than a year ago.

He presented evidence showing that during the last decade agriculture suffered a decline in value of $2,670 per farm, whereas during the same period the railroads were able to add about $8,000,000,000 to their book value.

$21.85 on Car Corn

It was shown that a carload of Illinois corn would call for $21.85 more freight charges if the 15-cent increase became effective. In the same way the Kansas wheat farmer would face an increase of $27.99 on each carload of grain shipped to America. Donald Kirkpatrick, legal counsel, and L. J. Quasey of the I. A. A. assisted in getting the evidence before the Commission.

Chas. E. Ewing, president of the National Livestock Marketing Association, gave a dramatic analysis of his farm experiences in operating 2,000 acres of land in Macon and McLean counties, Illinois, uring the past 10 years. "On wheat, oats and corn raised this year," said Mr. Ewing, "the owner's income lacks from $2 to $5 an acre of paying expenses.

"The livestock industry of America is the backbone of agriculture," he said. "Two-thirds of the agricultural lands of America produce hay and forage which must be marketed through livestock. The livestock industry is in no position to carry an added burden. It has been bled white. This 15 per cent increase in rates would impose an additional burden of $14,000,000 to $15,000,000 annually for livestock to carry.

Farmers National Grain Corp. Buys Mid-West

Change Does Not Affect Relation of Member Farmers' Elevators and Illinois Grain Corp.

DIRECTORS of the Illinois Grain Corporation meeting in a special session in Chicago, Sept. 3, voted unanimously to approve an operating contract with the Farmers National Grain Corporation under which the latter will acquire through purchase the entire assets and personnel of the Mid-West Grain Corp., sales subsidiary of the Illinois regional. The transfer will become effective immediately.

This action represents another step in the movement to consolidate the co-operative grain marketing agencies of the country so as to give the grain producers of America an efficient and economical nation-wide sales organization controlling the bulk of the country's annual production.

C. P. Cummings

Through its personnel, the Mid-West Grain Corporation holds memberships on the Chicago Board of Trade, the St. Louis Merchant's Exchange, and the Peoria Board of Trade. In addition to its main office at 608 South Dearborn Street, Chicago, the Mid-West has branch offices in St. Louis, Peoria, Decatur, Jacksonville and Pontiac, Illinois.

Organized less than a year ago to handle and sell the grain delivered by the 71 Illinois farmers' elevators and co-operative grain companies holding membership in the Illinois Grain Corp., the Mid-West Grain Corporation developed rapidly, handling more than 3,000 cars of grain during its first six months of operation. Its largest month was in July this year when a total of

(Continued on page 4, column 1)

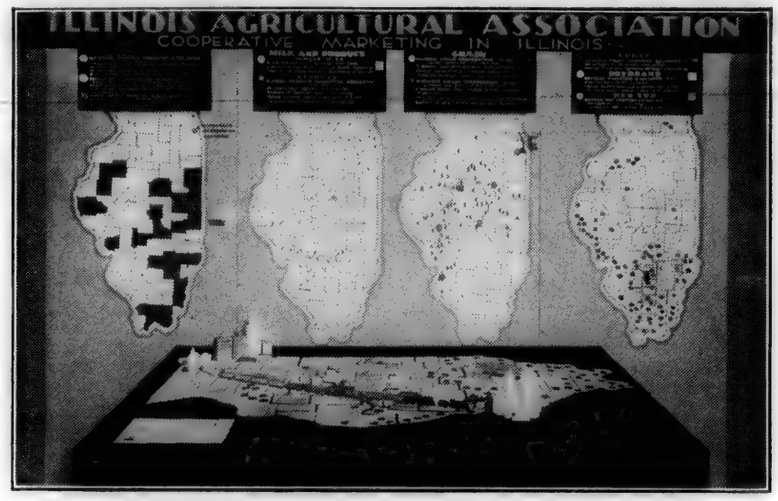
1,063 cars of grain were sold.

"The Mid-West Grain Corp. was formed to provide a grain marketing service for Illinois growers before the Farmers National had fully developed its sales service," commented Earl C. Smith, president of the Illinois Agricultural Association, which has sponsored the co-operative grain marketing movement in Illinois.

"Developments during the past year have been such that the best interests of Illinois grain producers will be served by centralizing their sales efforts in the Farmers National in the interest of efficiency and economy.

"The need of the hour in this movement is co-operation between the co-operatives. The only justification for farm organization of any kind is the service it can render the man on the farm. And we in Illinois as in other states are doing our utmost to consolidate and co-ordinate the forces working for the ultimate benefit of the agricultural industry."

"The sale of the Mid-West Grain Corporation will not in any way affect the relation of farmers' elevators holding membership in the Illinois Grain Corporation," explained G. C. Johnstone of Bloomington, president of the latter organization and a member of the board of directors of the Farmers National Grain Corp. "We will continue as the regional member of the Farmers National for the state building up the volume of Illinois grain handled through co-operative channels.



"The larger sales organization with its personnel and contacts reaching out into all the principal markets of the country and beyond is equipped to give Illinois grain producers and their local elevators the most efficient service and the highest possible price for their grain."

Charles P. Cummings, general manager of the Mid-West, becomes vice-president and sales manager of the Illinois Grain Corporation under the change. Mr. Cummings will continue to represent the interests of farmer elevator members of the Illinois Grain Corporation in the sale of their grain by and through the Farmers National Grain Corporation.

Harrison Fahrnkopf Weds

Harrison Fahrnkopf, director of grain marketing for the I. A. A. during the past four years, and formerly farm adviser in McLean county, was married on July 4 to Miss Gwendolyn Large of Flora, Illinois, who had been employed as office secretary by the Egyptian Seed Growers Exchange.

Mr. and Mrs. Fahrnkopf have established their home in Bloomington.

I. A. A. MARKETING EXHIBIT AT ILLINOIS STATE AND AURORA FAIRS

THE volume of Illinois farm products including livestock, milk and produce, grain, fruit, soybeans and red top sold through co-operative channels is illustrated in the above exhibit shown by the I. A. A. at the Illinois State and Aurora Fairs last month. This exhibit as well as the general I. A. A. exhibit was used also at a number of county fairs including Mercer, Henry, Jersey and Richland.

The exhibit reveals that nearly 22,000 carloads or approximately 20 per cent of Illinois livestock were marketed co-operatively through the Producer agencies at Chicago, St. Louis, Peoria, Indianapolis and Springfield in 1930. Patronage refunds on commissions have averaged $100,000 yearly to Illinois livestock shippers who patronize their own agencies.

Nearly 3,000,000,000 pounds of milk were sold co-operatively in 13 organized milk sheds in Illinois last year. If the collective bargaining and co-operative marketing operations carried on by these milk selling organizations increased the price to dairymen only 10 cents per cwt. their income would be raised approximately $3,000,000.

Last year approximately 5,000,000 pounds of butterfat were sold co-operatively to 24 contracting creameries. This volume of cream came from 58 co-operative produce associations in 32 counties.

The Illinois Grain Corporation with 71 member farmers' elevators represents an annual volume of 12,000,000 bushels of grain. The sales subsidiary, the Mid-West Grain Corporation, handled 3,000,000 bushels of grain during its first six months of operation. Daily bids and services are given from the main office at Chicago and the five branch offices at St. Louis, Peoria, Jacksonville, Decatur and Pontiac.

The Illinois Fruit Growers Exchange with 48 member associations handled approximately 1,500 cars of fruits and vegetables last year.

The Soybean Marketing Association which has approximately 2,900 members, marketed co-operatively in 1930 1,150,000 bushels of soybeans. The estimated increase in returns to growers approximated $172,500.

Seventeen hundred members of the Egyptian Seed Growers Exchange in southeastern Illinois pooled approximately 1,000,000 pounds of red top seed through their co-operative, benefiting not only the members of the Exchange, but also non-members.

Corn for Coal

A Denison, Iowa, dispatch to the press says: "Burn-a-bushel-of-corn-a-day clubs will be formed in this part of Iowa in the fall if present plans materialize. Corn has excellent heating qualities and is selling for $3 a ton less than coal, farmer proponents of the plan say. It is proposed to eliminate the surplus with the hope of increasing the price of corn 25 cents a bushel."

"The August issue of the I. A. A. RECORD for 1931 appealed to me as one of the best publications up to date. It contains from cover to cover material that every Farm Bureau member, as well as non-members, should know.

"Every department was well represented with timely facts showing the reasons why everyone should be Farm Bureau members during the depression.

"Wishing you success for bigger and better publications."

R. G. Stewart, Manager,
Champaign County Service Co.

Edgar Markham, assistant to the chairman of the Federal Farm Board and director of press relations, visited the I. A. A. offices on Aug. 17.

Thousands Visit Farm Bureau Tent at Illinois State Fair

Country Life Queen Contest Feature of Farm Bureau Day

NEARLY a thousand Farm Bureau members and their guests assembled in the Farm Bureau headquarters' tent at the Illinois State Fair, Friday, August 28.

The principal attraction of the day was the style show and beauty contest held early in the afternoon. Miss Frances Johnston, a pretty 17-year-old Lawrenceville high school girl, was crowned Country Life Queen, winning over nine other contestants, all of whom had placed first in their respective county contests.

Miss Johnston, height five feet, weight 104 pounds, is an attractive, blue-eyed brunette with dark chestnut hair. She is an accomplished elocutionist. Miss Johnston has been appearing on public programs since she was eight years of age, and has given readings over a number of radio stations. The prize of $75 in gold was presented by Senator Simon E. Lantz of Congerville, chairman of the Committee of Judges.

Second Prize $25

Miss Dorothy Roberts of Champaign county, a University of Illinois co-ed, was awarded the second prize of $25 in gold. Miss Roberts has been active in 4-H Club work as a member and leader in her home county for a number of years. She is 20 years old, five feet four inches in height, and weighs 126 pounds. Her favorite sports are swimming and tennis.

The other contestants, all attractive girls and winners of their respective county contests, were Eleanor Ferguson, Henry county; Helen Phillips, Macon county; Ida I. Eppel, McHenry county; Helen Kolmer, Monroe county; Elizabeth Meyer, Morgan county; Sarah Biederbeck, Stark county; Elaine Plott, Union county; and Helen Homann, Effingham county.

The girls were judged on the following qualities: grace, poise, simplicity and attractiveness of dress, charm, intelligence, self-possession, vivaciousness as well as physical characteristics.

The contest was staged in a pretty setting on a platform erected for the occasion in front of the colorful I. A. A. exhibits. Each girl was required to mount the platform, walk from one end to the other slowly keeping time with the orchestral music. Each was required to bow, smile and address the judges and audience as follows: "How do you do, Honorable Judges, Ladies and Gentlemen. I am delighted to be here and glad to see you."

Miss Frances Johnston, who was crowned Country Life Queen, at State Fair on Farm Bureau Day winning over nine other contestants.

The girls all were attractively but simply dressed. Each carried bright gold-colored canes with ribbons bearing the name of the county which they represented.

Judges of the contest were Senator Simon E. Lantz of Congerville; G. C. Johnstone, Bloomington; L. W. Taylor, manager St. Nicholas Hotel, Springfield; Prof. Stewart of Berea College, Berea, Kentucky; and Dwight Hart, Taylorville.

After the crowning of the queen each of the contestants came to the platform to congratulate her. President Earl C. Smith had previously introduced and presented the judges to the audience.

The facilities at the Farm Bureau headquarters' tent were enjoyed by thousands of members and fair visitors throughout the week. The I. A. A. exhibits which were more elaborate than usual illustrated the entire I. A. A.-Farm Bureau program in Illinois. The co-operative marketing exhibit attracted wide attention.

It included an electrically-driven train which as it moved over a relief map of Illinois, illustrated where the principal farm products are grown over the state. A series of vertical maps of Illinois formed the background. These were illuminated by lights flashing on and off telling the story of the volume of different farm commodities sold co-operatively. Grain, livestock, fluid milk, produce, soybeans, and red top were represented.

Visualizes Services

The general I. A. A. exhibit illustrated the entire Farm Bureau-I. A. A. program. The display artist visualized attractively and effectively the different services made possible to Farm Bureau members through organized effort. Colored paper cut-outs mounted in a series of 16 cases electrically lighted from the rear told the story. White letters on theatrical gauze screens across the front of each individual exhibit told the story of each project.

The Illinois Farm Supply Company had an interesting exhibit in the tent playing up SERVICE petroleum products; C. W. Ward, sales representative, was in charge. The Sangamon county 4-H Clubs were represented in one corner of the tent with a pop and lunch stand which served hundreds of visitors throughout the week.

The attendance at the Fair this year was below normal, although the exhibits of livestock and attractions were equal to, if not better, than in former years.

During the morning and afternoon the I. A. A. public address system was on hand to entertain the visiting crowds passing through the tent with march and dance music. The new record carrying a 12-minute address by President Earl C. Smith was broadcast through the public address system both morning and afternoon. It received much favorable comment by those who listened.

In answer to requests by many who asked for copies of the address it is reproduced in this issue of the RECORD.

"I wish to congratulate you upon your splendid article: 'Is Farm Organization Worth the Effort?' appearing in the August issue of the Dairyman's Journal. The cartoon on page eight of the same magazine is exactly the kind of advertising that gets over with the prospect."

O. D. Brissenden,
Livingston county, Illinois.

2,000 at Paxton

PAXTON, Ill., August 25.—Farm Bureau members who are not lined up with their co-operatives are standing in the way of progress just as much as non-members, declared Larry Williams, manager of Country Life Insurance Company, before 2,000 Ford county farmers at the county Farm Bureau picnic here today. A. B. Schofield, I. A. A. director, and Farm Adviser Purnell had an excellent program arranged.

G. J. Johnson

"Some Farm Bureau members ought to wear labels so people could tell they are members," Mr. Williams said. "No one could ever tell it by the way they act."

Representative Gus J. Johnson, speaking in behalf of the Association of Commerce, welcomed the Farm Bureau members to Paxton. He paid tribute to the legislative committee of the I. A. A. for the way it has functioned at Springfield.

"The legislative committee of the Illinois Agricultural Association is respected by every member of the House of Representatives for the sincere way it has worked for constructive legislation," said Mr. Johnson. "What that committee recommends carries a lot of weight and always gets careful consideration."

Music was furnished by the Paxton School Band and the Danville colored quartette. The public address system of the I. A. A. also furnished recorded music during the day.

Prizes were given for the oldest couple present, the youngest baby, and the family which came the greatest distance. A carload of limestone and a pure bred gilt were given at a drawing held on the platform.

Kirkpatrick at Murphysboro

MURPHYSBORO, Ill., August 26. — Around 1,500 Farm Bureau members of the 25th Congressional district heard Donald Kirkpatrick, legal counsel for the I. A. A., in an address at the district picnic here today urge more effective organization and co-operation as the only panacea for the present conditions in agriculture.

Mr. Kirkpatrick enumerated instance after instance in which organization had already benefited agriculture and pointed out future possibilities.

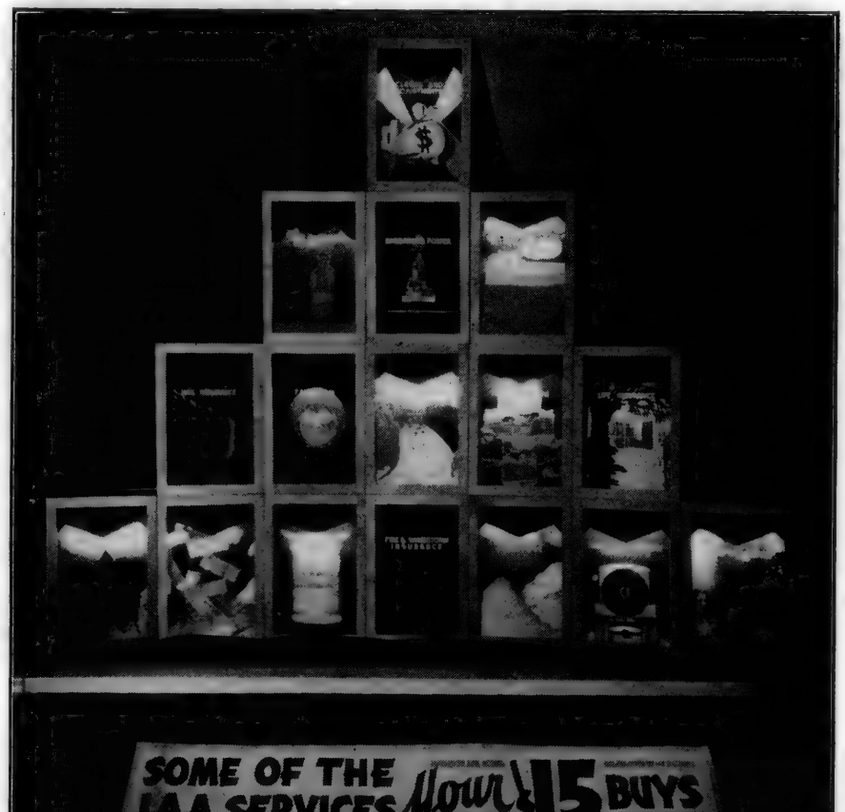
Fred Dietz of De Soto, director of the I. A. A. from the 25th district, introduced the speaker. Farm Adviser J. G. McCall of Jackson county presided.

Preceding the speaker on the afternoon program, the Jackson county 4-H Clubs presented a special program of music and club demonstrations. During the morning 4-H pigs were judged to pick the county winners.

Music was furnished during the day by the amplifying system of the I. A. A.

Good Crowd at Effingham

EFFINGHAM, Ill., August 27.—In direct contrast with the old system of trade, co-operative selling and buying by organized farmers is returning a large part of the profits to the home communities to be deposited in rural banks, George Metzger, secretary of the Illinois Agricultural Association, told Effingham County Farm Bureau members and their guests at the annual picnic here today.



"One of the great faults of our present system is that a great part of the money has been drained out of the rural sections and is now concentrated in the large city banks leaving the rural banks stripped to the point that they are not able to finance local projects," he continued.

Farmers' co-operative oil companies alone returned $400,000 in patronage dividends to Illinois farmers last year to be deposited in their local banks, Mr. Metzger pointed out. In the same way profits on agricultural products marketed co-operatively are distributed back to the rural communities.

Other speakers on the program were Leroy Melton, Greenville, Ill., national president of the Farmers Equity Union; Wilbur H. Coultas, manager of the Soybean Marketing Association, and C. H. James, manager of the Egyptian Seed Growers Exchange, red top co-operative.

Hog calling, chicken calling, husband calling, and other contests were conducted from the platform. Prizes were awarded for the oldest couple attending the picnic, the most recently married couple, and the largest family attending. A horseshoe pitching contest and races were held as the final events on the program. The I. A. A. public address system entertained with music and amplified the speakers' voices.

Southern Illinois Poultry Day was celebrated on September 10 on the Crome Farm at Albion in Edwards county. The University and the Farm Bureaus sponsored the program.

This colorful "flasher" exhibit illustrating 16 I. A. A.-Farm Bureau services attracted much attention at the Illinois State and Aurora Fairs.

CONTESTANTS AT STATE FAIR FARM BUREAU DAY

Seated—1931 Country Life Queen, Miss Frances Johnston of Lawrence county. Left to right, standing—Ida I. Eppel, McHenry county; Helen Kolmer, Monroe; Elizabeth Meyers, Morgan; Eleanor Ferguson, Henry; Dorothy Roberts, Champaign, who placed second; Elaine Plott, Union; Helen Phillips, Macon; Sara Biederbeck, Stark, and Helen Homann, Effingham.

2,000 at Kendall Picnic

SANDWICH, Illinois, August 29.—A parade of 4-H Club members with their livestock impressed the 2,000 people who sat in the grandstand at the fair grounds here this afternoon at the Kendall County Farm Bureau picnic.

A compact column of boys and girls reaching more than 200 yards as they marched past the reviewing stand emphasized the magnitude of this movement among the farm youth of the country. More than $500 in premiums was awarded to winners of the various divisions of the 4-H Club show.

V. Vaniman, director of insurance service for the I. A. A., was the speaker of the day. He emphasized the fact that this is a day of organization when farmers must stick together.

"Nobody is going to solve the farmer's problems for him," said Mr. Vaniman, "and the individual farmer is not going to solve it. When a solution comes it will be reached by organized agriculture."

The morning program consisted of judging 4-H livestock and judging the girls' 4-H exhibit. C. E. Gates, farm adviser of LaSalle county, was judge of all livestock and Mrs. Carl Lewis judged the girls' exhibits.

Horseshoe pitching and music by the amplifying system of the I. A. A. also preceded the picnic dinner. In the afternoon the Plattville Community Band and the East Oswego Male Quartette furnished special music. Farm Adviser W. P. Miller presided.

A baseball game between the LaSalle County Farm Bureau nine and Kendall County was the final event on the program.

Picnic and 4-H Show at Lincoln

LINCOLN, Illinois, August 31.—The Logan County Farm Bureau picnic held at Chautauqua Park here today closed the most popular month for holding annual Farm Bureau picnics. More than 40 Illinois county Farm Bureaus held their annual outdoor gatherings during August.

A crowd estimated at 3,000 attended the picnic in spite of threatened rain. One feature that drew a good crowd during the morning was the county 4-H Club fair where more than 60 pigs, a score of baby beeves and lambs were exhibited. The entire morning was devoted to judging livestock.

In the afternoon at the auditorium, Larry Williams, manager of Country Life Insurance Company, spoke on the ideals of the Farm Bureau. He emphasized that the organization was not formed to make more money, but to maintain and defend a decent standard of living.

"The farmer didn't start this organization business," said Mr. Williams. "Every other industry in the world was organized first and the farmer was forced to do it as a defense measure. No organization has ever succeeded by making money its only ideal. The quicker Farm Bureau members realize that their organization has a greater goal than this, the better it will be for the organization."

Other numbers on the program were as follows: a style show by Logan County 4-H Club girls, a demonstration of how to make a bed properly by one of the room improvement clubs, and several selections by the Pawnee Quartette. Farm Adviser J. H. Checkley presided.

As the last event of the day, the Logan County Farm Bureau baseball team played an exhibition game with Sangamon county. Logan won 12 to 2.

Livingston Co. Board Meets

The Livingston County Farm Bureau board of directors held its regular monthly meeting in the I. A. A. offices on Sept. 8. Meeting with the board also were members of the organization committee from the 18 units in the county. More than 50 attended the meeting.

Raster Takes Bride

Hermann Raster, field resepresentative for the Illinois Produce Marketing Association, was recently married to Miss Mary Ellen F. Randolph of Canton, Illinois. They are making their home at Canton.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

The Railroads Want a Raise

THE present efforts of the railroads to increase their income 15 per cent at the expense of the farmer, manufacturer, and other shippers is an interesting illustration of the constant and continuous efforts made by industries, groups, and classes to get a larger share of the national income. The railroads think they are hard up because the majority are not making the usual five and one-half to six per cent interest on their investment. It is true their stocks and bonds have suffered appreciably during the current depression.

But the railroads are relatively prosperous when compared with the farming industry under existing prices. Railroad securities have suffered far less on the average than farm land values and farm mortgages. Farmers would be pleased to have a benevolent government enforce a price on farm products high enough to bring an average net return of even three per cent on the investment.

There are no government commissions meeting to inquire into the financial status of the agricultural industry for the purpose of arbitrarily fixing farm prices at a profitable level. The most the government has done to date is to loan money and give advisory service in federating farm co-operatives designed to reduce the spread between producer and consumer prices. True, is has bought wheat and cotton through stabilization corporations to help the market temporarily—but it has not fixed prices.

The farmer needs the railroads particularly for long hauls; in fact, he needs many services and manufactured products for which he is compelled to pay prices out of line with current returns for his own services and products.

The hearings before the Commerce Commission teaches a striking lesson. They reveal the need for more effective organization of farmers if agriculture is to hold its own and approximate a fair return for the service it renders.

At. St. Louis

AS we go to press organized dairymen in the St. Louis territory, the Sanitary Milk Producers Association, are withholding their milk from the Pevely Dairy Company, refusing to sell at the starvation prices offered.

The Pevely Company which, according to reports, supplies approximately half the St. Louis market with milk and dairy products, has been antagonistic to co-operative efforts of the producers from the beginning. The company has repeatedly declined to deal with the association in contrast to all other dealers who have recognized the right of farmers to bargain collectively in the sale of their products.

In the meantime the Pevely Company is resorting to the doubtful practice of bringing in "bootleg" milk from uninspected territory. That milk is produced by farmers. Thus we have the example again of one group of farmers contributing to the burdens of another, one group fastening the yoke of low prices tighter around the necks of another. Further organization with co-operation between co-operatives is the obvious lesson taught by this experience. It's the only way farmers can win.

Stark, Whiteside, McLean, Warren, and Henry counties have reported serious outbreaks of hog cholera. The Farm Bureaus are prepared with extra supplies of high grade serum and virus to head off the spread of the disease. Preparedness for such emergencies by the Illinois Farm Bureau Serum Association is quite as important a service as its cash savings to Farm Bureau members.

ONLY four out of 34 County Farm Bureau teams remain in the race for the Illinois Farm Bureau baseball championship. The semi-final series of games opened Wednesday, September 9, with Knox and Carroll counties playing at Galesburg. Greene and Livingston counties were scheduled to open at Carrollton on Sept. 12.

Livingston county, the dark horse in the race for the championship, upset the powerful Logan County Farm Bureau team in the final game of their series at the Three-Eye League Park, Bloomington, Sept. 4, score 9 to 7.

It was a hard-fought game from start to finish with first one team ahead, then the other. Livingston county took the lead 5 to 0 in the second. Logan county came back in the 3rd, 4th and 6th innings and took the lead 6 to 5. In the 8th the two teams stood at 7 all, but in the 9th the Livingston boys forged ahead with two runs to win the game.

Livingston had won the previous game played at Lincoln, 7 to 1. Logan county won the opener on August 21, 1 to 0.

The two remaining teams will play for the state championship which last year went to McDonough county in western Illinois.

Knox county is look upon as a strong contender for championship honors by virtue of having eliminated the 1930 champions from McDonough in the divisional contest. The basis of elimination is two out of three games.

Peoria Communities Meet Hear Marketing Talks

Several hundred Peoria county farmers and their families assembled at the Dave Wycoff farm near Laura, August 25, at a community meeting where Frank Barton, field representative of the Illinois Grain Corporation, discussed the Farm Bureau program in relation to co-operative marketing. Short talks were made by D. P. Moore of the Farmers National Grain Corporation, John Benson, manager of the Peoria office of the Mid-West Grain Corporation, and Albert Hayes, president of the Peoria County Farm Bureau.

L. A. Williams spoke at a second community meeting at the Dunlap high school August 27.

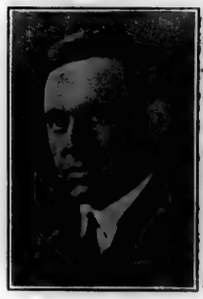
Sam Crabtree of Henry spoke at the third meeting of the series at the home of Dan Larkin, west of Hanna City.

This silver trophy will be presented to the State Farm Bureau League champions for 1931. The trophy, together with gold baseball watch charms awarded to winners in the eight divisions, were donated by the Spalding Company when the League adopted the Spalding ball for official games.

14 Counties Represented At Dixon Springs Meet

"OUR two-day outing and conference at Dixon Springs, August 22-23 in Pope county was a decided success," writes district organization Manager L. F. Brissenden, who planned the meeting.

Farm Bureau officials and representatives from 14 counties in southeastern Illinois attended. The program which opened on Saturday included community singing led by Farm Adviser L. L. Corrie of Wayne county, talks by L. F. Brissenden who told about his recent trip to British Columbia, F. E. Longmire, assistant state leader of farm advisers, and by Secretary George E. Metzger.



On Sunday morning Adviser J. G. McCall from Jackson county led in singing church hymns and addressed the adult class on the Sunday school lesson. Miss Temptner of Perry county taught the young people. About 100 attended the morning services. At noon a fish fry and barbecue was the principal attraction.

"Dixon Springs is located about half way between Golconda and Vienna on a hard road. With beautiful scenery, hotel accommodations, sleeping quarters, swimming pool and the courteous treatment given by the owner, Mr. Wheeler, a Farm Bureau member, and Mr. Dixon, the conference could not have been better," writes Brissenden.

3,000 at Pike Co. Picnic

NEW CANTON, Illinois, Sept. 5.—More than 3,000 Pike county farmers heard addresses by Earl C. Smith, president, and George Metzger, secretary of the Illinois Agricultural Association, at the annual Farm Bureau picnic held here today. Weather conditions were perfect for the outdoor gathering.

Mr. Smith, who appeared unexpectedly at his home county picnic, spoke principally of two major problems now facing agriculture: namely, the need for mobilizing the farmers' bargaining power in the sale of his products, and the need for tax reform in Illinois. Organization offers the only solution to these problems, Mr. Smith said.

George Metzger

Mr. Metzger in his address pointed out the fault in the monetary system of the country, which permits wide fluctuation in the value of the dollar. This condition, he said, is one of the chief stumbling blocks in the way of agriculture and other industries, which depend upon long term credit.

"This is a problem that agriculture has never attempted to work out in the past, but if it is ever solved the borrowing classes will have to do it," he said. "It is certain that the speculators and those who benefit by the fluctuation of the dollar will not attempt to have it stabilized."

Charles S. Black, director of the I. A. A. from the 20th Congressional district, and John C. Moore, district organization director, also made brief talks.

Marian Strauss of Quincy, 1930 4-H health champion in Illinois, appeared on the program in several roles during the day. She played a violin solo, gave several vocal numbers and made a talk about the 4-H Club Congress held in Chicago last winter. Other 4-H numbers on the program included folk dances and demonstrations.

An old fiddlers' contest was conducted on the platform with five entrants. The winner was William Raftery of Barry. The numbers played were "Arkansas Traveler," "Soldier's Joy" and "Red Wing."

The annual meeting of the Illinois Farm Supply Company will be held at Bloomington, Wednesday, October 14, 1931.

Danger of Raising Too Many Hogs—Denman

Tells Swine Growers Day of Big Lardy Type Is Past

THERE is danger from over-expansion in the swine industry especially where feed supplies are not always dependable and transportation costs are high, C. B. Denman, member of the Federal Farm Board, told members of the National Swine Growers Association at their annual meeting in Springfield, August 27. An abundant supply and the low price of feed, he added, are the principal factors responsible for the marked increase in pork production now getting under way.

Mr. Denman referred to the June pig survey which reveals an increase of 2.5 per cent over figures for 1930.

"The western states showed an increase of more than 15 per cent, whereas reports on the number of sows bred or to be bred for farrowing this fall pointed to an increase of 37 per cent for the country as a whole and over 60 per cent for the western states compared with a year ago," he said. "The pig crop this fall for the United States will be about 18 per cent larger than it was in the fall of 1930.

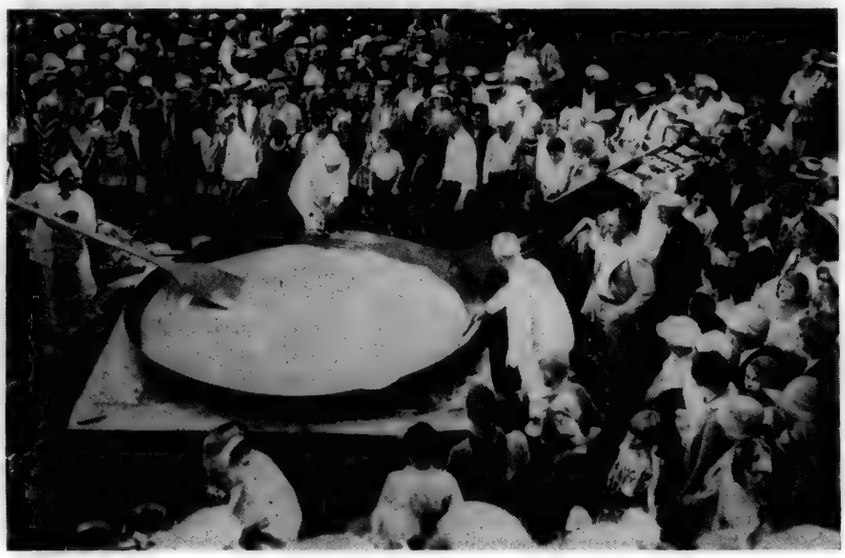
The Mortgage Lifter

"The hog has rightly been named the 'mortgage lifter,' but his lifting power is no longer proportionate to his weight. Hogs weighing from 200 to 220 pounds offer the producer the best chances for success in swine growing, principally because they yield a high percentage of cuts of the type, quality and average weight most definitely suited to consumer demand.

"Change in size of family and in habits of eating, and more work by brain, and less by brawn, have lessened the demand for fat cuts of pork and have increased that for smaller and leaner ones; thereby restricting the heavy hog yielding a large proportion of lard and fat cuts.

Prefer Light Cuts

"The preference for light weight cuts is clearly demonstrated in the wholesale prices of pork products at Chicago during the week ending Aug. 15, 1931. Hams weighing 10 to 12 pounds, for instance, sold at 13½ cents a pound, and 18 to 22 pound hams at 12 cents. Pork loins weighing 8 to 10 pounds sold at 24 cents a pound and those weighing 16 to 22 pounds at 11¾ cents. Likewise, bacon bellies weighing 8 to 10 pounds sold at 13½ cents a pound, while 20 to 25 pound bellies, which must be dry salt cured, sold at 6¾ cents.



"On the basis of Chicago prices, during the first week of August, the regular products from a 200 pound hog could be sold by the packer at wholesale for approximately $7.75 per hundred pounds live weight basis, while those from a 300 pound hog were worth $6.00. Despite the higher dressing percentage of heavy hogs, their cut-out values are usually less than those of light hogs, because of lower prices per pound for heavy hams, loins and bellies and also because a large part of the heavy weight carcass must be dry salt cured and, hence, sold at a lower figure. The standard grading system for hogs recently formulated by the government in co-operation with hog producers and packers will be an important factor in passing back to the swine grower this margin between heavy and light weight hog cut-out values.

More Rapid Turnover

"The higher average price which light hogs command because their carcass products are more definitely suited to consumer demand is not the only reason why they usually are more profitable to raise. Turnover of invested capital is more rapid in producing and marketing younger animals.

"Cost of gain in terms of feed consumed increases as hogs become heavier, since on the average it takes about 200 pounds of corn to grow a hog from the weight of 50 pounds to 100 pounds, while it takes over 275 pounds to grow one from 250 pounds to 300 pounds, showing a wider margin between cost of production and market price, in case hogs are marketed at lighter weights than if they are pushed to heavier weights.

"Analysis of average hog weights since 1880 indicates that swine growers in general have not adjusted their production policy to meet the demand for light weight hogs, especially during the last decade."

ONE YOLK THAT WENT OVER BIG

A popular feature of the recent Chehalis, Washington, Egg Festival was the serving of this huge omelette, composed of 7,200 eggs, which were fried in this huge eight-foot frying pan, weighing nearly half a ton. The huge pan was greased by the novel method of attaching slabs of bacon to the feet of pretty girls, who turned it into a skating rink. Here are the chefs stirring the bunch of eggs with paddles.

Soybean Ass'n. Closes Membership for 1931

IN a series of conferences sponsored by the Soybean Marketing Association early this month, soybean growers met to discuss the grading and handling of the commercial crop which will be harvested within the next few weeks.

Meetings were held at Macomb, Springfield, Taylorville, Decatur and Champaign on September 1, 2, 3, 4 and 5, attended by managers of co-operative elevators, farm advisers and growers. W. H. Coultas, manager of the Soybean Marketing Association, was in charge.

J. E. Barr of the U. S. Department of Agriculture, who has charge of the licensing of Federal soybean inspectors, assisted in the meetings and supervised the grading demonstrations.

By the time this is read the membership sign-up of the Soybean Marketing Association will be closed for the 1931 crop as the deadline has been set at September 15. This was necessary so that plans could be made for receiving, selling and storing the crop. Questionnaires have been sent out to determine the volume of soybeans to be marketed through the co-operative. More than 2,000,000 bushels are expected as compared with 1,150,000 last year.

These Problems Must Be Solved

A 12 Minute Address to Farm Bureau Members About Their Organization

By EARL C. SMITH

I GREATLY appreciate the privilege and opportunity provided by the Department of Information in this unique way to extend a word of greeting, attempt to briefly review the record of progress and achievement of the Farm Bureau movement of Illinois, and to outline some of the ever-increasing problems confronting farmers and what is being done by your organization to secure their proper solution.

Earl C. Smith

Many of you have given liberally of your time, thought and effort to make possible this great organization. No doubt some of you know as well as do I what has been accomplished and what still remains to be done. For more than 12 years we have labored together seeking to improve the farmer's economic position. During this time American agriculture has passed through a most critical period, a period of serious and prolonged deflation, which is undoubtedly the worst in the history of American agriculture.

Largely due to the lack of organization, forces beyond the control of farmers have operated to cut the value of American agricultural investment from eighty billions to a little over forty billions of dollars. Although fighting an up-hill battle, we take much pride in the fact that we can point to many benefits Farm Bureau members have obtained through the power of organization—even though yet in its infancy.

Three Lines of Endeavor

The Farm Bureau program in Illinois has been largely confined to three (3) general lines of endeavor. One, to assist farmers through increased efficiency to lower production costs and overhead expenses; second, to improve the farmer's bargaining power in the sale of his products by and through collective effort; and third, to fill the chair that has so long been vacant around conference tables and in legislative chambers, where public policies and laws were being developed affecting the interests of Illinois and the American farmer.

Since 1920, the Illinois Agricultural Association and County Farm Bureaus have prepared and presented much constructive legislation to each succeeding General Assembly. The Association has provided personnel, which has fought for the farming industry in hundreds of committee hearings, before legislative committees, commissions and rate-making bodies. Throughout all of these efforts, the Association has sought to maintain a constructive position, one worthy of the recognition of all thinking citizens, regardless of what their personal or business interests might be. That success in this effort has been realized is best attested by the fact that in nearly every instance where agricultural interests are involved, the Illinois Agricultural Association is now being invited to sit in and not only present its views, but to speak and act as the representative of Illinois agriculture.

This is the 12-minute address by President Smith recorded on a phonograph record in the Marsh Laboratories, Chicago, and amplified through the I. A. A. public address system at district and County Farm Bureau picnics during August and early September.

Mr. Smith is introduced to the Farm Bureau audiences by George Thiem, Director of Information.

While I could speak at some length relative to the success of the Association in securing the enactment of much of its legislative program during recent years; yet, were I to point to the most important service rendered agriculture, it would be in the success attained by the Association in securing the defeat of much proposed legislation which if enacted into law would have seriously affected and jeopardized the rightful interests of the farming industry.

The Illinois Agricultural Association and County Farm Bureaus, working together, are largely responsible for the fact that assessed valuations of farm lands and property have been reduced at different times since 1920, totaling in the aggregate approximately four hundred and seventy million dollars. All of this effort was justified because of the loss in values and inequality in assessments as between different classes of property. These reductions could never have been secured, except through the influence and power of organization.

It is, of course, apparent that not only the members of the organization, but others engaged in the industry, have benefited equally from these efforts; and it is, therefore, felt that every thinking farmer within the state should add to the strength and influence of the Farm Bureau movement by becoming an active and participating member.

The Tax Problem

Possibly the greatest question before the citizens of Illinois is that of securing a readjustment of our taxing machinery to meet modern conditions and to make possible the distribution of the total cost of government in an equitable manner. The I. A. A. and County Farm Bureaus have inaugurated and continued to struggle in behalf of a system of taxation based on "ability to pay." Support to this program is increasing every day, and certainly no farmer can offer a just reason for refusing to support this most worthy of all public effort at the present time.

We meet on every hand constant and continuing effort to increase rates, to improve the income of one group of our citizens at the expense of another through governmental action. How can the farmer meet these ever-increasing problems, except through organization? Certainly the tremendous investment and interest of agriculture not only justify, but demand the maintenance of a strong and militant organization, if for no other reason than that farmers may be represented at all times and in all places where questions of public policy are being considered and in the making.

In the limited time allowed, I find it impossible to survey the activities and achievements of the 12 service departments of the Illinois Agricultural Association and its 8 associated companies. I shall, therefore, only briefly enumerate some of the more recent accomplishments.

Twenty-two per cent (22%) of the livestock produced in Illinois moves to market through co-operative channels. Three billion pounds of fluid milk, or

about 75 per cent of the state's production, finds its way to market in a similar manner. Five million pounds of Illinois butterfat has been organized in the past two years. A tremendous increase in the volume of fruit and vegetables, or approximately one-fifth (1/5) of the state's production is marketed co-operatively through the Illinois Fruit Growers Exchange. A large volume of soybeans and redtop seed is also being marketed in a collective way by their respective producers. Although not a year old, the Illinois Grain Corporation and its sales agency, the Mid-West Grain Corporation, have handled more than 3,200 cars of grain.

That there is a place and need for these co-operative institutions is best proven by their continuing and substantial growth, and the many manifestations of satisfaction coming from the participating members.

Collect $250,000 Claims

In recent years, claims totaling approximately a quarter of a million dollars have been collected for farmers, and in a majority of cases were claims that had first been tried in the usual manner, before being sent to the Association with a request for service. Nearly 1,000 of such claims were handled in the past year.

Turning from the field of marketing to that of purchasing, I would merely mention that more than forty million dollars of legal reserve life insurance, and forty-five million dollars of fire, hail and windstorm insurance have been purchased from companies made possible by the Illinois Agricultural Association and County Farm Bureaus. The owners of more than 26,000 automobiles, valued at nearly seventeen million dollars are protected in a like manner. I can conservatively state that the initial and annual savings on this volume of insurance would easily approximate one-half million dollars.

More to Be Done

Something over three and one-half million dollars worth of petroleum products were purchased collectively in the calendar year of 1930, showing a saving to the Farm Bureau member patrons of approximately $600,000.

Should time permit, nothing would please me more than to go into much greater detail and to mention the many activities of a general service character that have been carried on and forward, by and through the organization. While we all are and should be proud of our organization and its accomplishments, yet much more remains to be done than has yet been accomplished.

All of these achievements, both in the field of marketing and purchasing, have been made possible by the Farm Bureau movement of Illinois. Very little, if anything, could have been accomplished without the aid of a strong and militant organization. While the Illinois Agricultural Association and its associated companies are in a strong position, yet the need of the hour is for a better understanding on the part of its present members and the enlargement of its membership, that its influence and power may be such as to speed the day of a proper solution to our many and continuing problems.

The farmer is bearing much more than a fair share of the tax burden. Nothing must be left undone to secure fair treatment for those engaged in the farming industry. Farmers still lack effective bargaining power in the sale of many of their products. The farmer is still receiving too small a percentage of the consumer's dollar. Much must be done to bring about closer adjustment of American production to market demands. Farmers are not yet receiving their rightful interest in and benefits of the American protective policy. These problems must be solved. I know of no effective way to bring about a speedy and proper solution, except by farmers speaking and acting together through their organization. If our common interests as farmers are to be protected, our marketing system and economic position improved, we must stand and work together constructively and intelligently for our mutual welfare.

So the Buyers Don't Know What to Pay

THE fact that the board of directors of the Egyptian Seed Growers Exchange did not set the advance payment on seed resulted in a big commotion among the seed dealers, reports the Clay County Farm Bureau in its recent bulletin. "For the past two years the pool advance has set the price for the dealers to pay. With no advance the dealers did not know what to do. The story came to the Farm Bureau office recently from a territory where there are few pool members to the effect that the local growers hoped the pool would set the price so the buyers would start to take their seed.

"Some of the buyers who have been in the market for years would make no offer whatsoever," continues the statement. "Other buyers started in paying 10 cents, dropped to nine, and later on to eight and seven. One member of the Exchange said he hoped the buyers would get their price down to two cents per pound and perhaps the fellows outside the pool this year would be glad to get in next year.

"Last year was one year when pool members got more for their seed than the fellows outside. It is true that some non-members got as much as pool members. The pool members received 18 cents per pound. It is estimated that the average non-member received between 15 and 16 cents per pound for his seed. Just ask one of the 18-cent boys what he thinks of co-operative marketing."

Iroquois Boys and Girls See Sights in Chicago

THIRTY-FIVE boys, girls and leaders from the 4-H Clubs of Iroquois county visited the I. A. A. offices on August 25 in charge of George T. Swaim, former farm adviser in Ford county. Local leaders Raymond R. Meents and Eddie Lafond also accompanied the club members.

Representatives from Stockland, Sheldon, Loda, Buckley, Gilman-Danforth, Ashkum and Donovan Clubs were in the party. They came primarily to attend the auction of their baby beef calves at the Union Stock Yards. The boys and girls were guests of the Chicago Producers' Commission Association, and of Swift & Company, where they were treated to luncheon.

Commenting upon the visit to the I. A. A. offices, Mr. Swaim wrote: "Several members expressed surprise at the number of projects carried on and the evident efficiency with which the member's money is being spent. From the I. A. A. offices the tour led through the offices of the subsidiary companies and then out to the lake. The view of Lake Michigan and the big fountain in Grant Park were of great interest to most of the group.

"Riding in the fast elevators was a new experience to some of the young folks. Leaving the 12th floor of the Transportation building where the I. A. A. and subsidiaries occupy the whole floor, a great whoop went up when the elevator operator put on speed for their benefit."

16 Townships Play Ball, McLean Picnic

Teams from 16 townships in McLean county competed in the soft-ball tournament at the annual picnic of the Farm Bureau and Home Bureau at Miller Park, Bloomington, on Saturday, September 5.

Larry Williams and Vernon Vaniman who debated the question: "Resolved, That Farmers Are Not Ready for Co-Operative Marketing," featured the afternoon program.

L. E. Tanner of Anchor, an officer in the State Horseshoe Pitchers' Association, managed the barnyard golf contest.

Casualty Insurance— A Farm Bureau Achievement

Illinois Agricultural Mutual Nears $1,000,000 in Assets, 30,000 Policies to Members

FROM nothing to nearly a million-dollar company with close to 30,000 policies issued in a period of four years, represents the achievement of Illinois Farm Bureau members in building their own casualty insurance company, the Illinois Agricultural Mutual.

Organized early in 1927, the company began operating April 1 that year. Since then it has never failed to grow in providing automobile and later employers' liability insurance for an ever-increasing number of Farm Bureau members.

How the wheels go around in the home office from the time the application for insurance is received until the policy is issued, is an interesting procedure.

Applications from the County Farm Bureau offices which arrive at the rate of 20 to 50 per day are turned over to Miss Ernst, secretary to Manager A. E. Richardson, where the checks and the applications are separated. The application goes to the Underwriting Department under the supervision of Helen Mertz. The policy is written by one of three assistants. The checks go to the cashier for listing and are then turned over to Mr. R. A. Cowles, treasurer.

The company emblem is mailed as soon as the application for insurance arrives. A carbon copy of the policy is sent to the County Farm Bureau office and the original to the applicant

A card record is made of the kind and class of coverage, and assessments are levied by the statistical department under the supervision of Margaret Lauritzen. The Hollerith tabulating system is in use both for computing the amount of premiums and in recording losses. This punch card system provides a very equitable way of making levies on all makes, ages, and different classifications of pleasure cars and farm trucks.

The company issues four regular classes of policies. Class I, which has the greatest coverage, is the most popular policy. This covers fire, theft, windstorm and hail, collision with a *moving object*, public liability and property damage. About 20 per cent of the members have taken advantage of the full coverage policy which inclues collision with a stationary object.

Manager A. E. Richardson and his secretary, Miss E. J. Ernst.

Another job for the company is sending out notices when assessments are due. The first notice is mailed 30 days before assessments are due, the second notice 10 days, and the final notice on the date due, if payment has not been made by that time. A copy of the final notice is sent to the County Farm Bureau office.

If assessments still remain unpaid 60 days after due, a letter is sent by the company to the insured. If this does not bring a response, the policy is cancelled 30 days later and the balance of the premium deposit and surplus share is returned.

When notice is received from the Farm Bureau that the policyholder is no longer a member of the organization he is at once advised and instructed that his policy will be cancelled at the end of the next six-months' period for which his premium deposit is made if he fail to renew his membership.

The settlement of claims is an important part of the company's work. There are 500 or 600 claims coming in each month. These are results of accidents from 39 different causes. A side-swipe resulting from an unsignaled left turn is the most frequent cause of accidents. Accidents at intersections are next in frequency, damage done to car while parked third, and failure to use ordinary care while driving, fourth. The average amount involved in claims is $40.

Claims are always disposed of as rapidly as possible. On January 1, 1931. there were only 11 claims pending, which were results of accidents occurring before January 1, 1930. During the year 1930 nearly 5,000 claims were disposed of. An average of one policyholder out of every five has an accident each year.

When an accident occurs it is usually reported to the local adjuster in the county. He makes an investigation of the cause and results, lists damaged parts of car, gives names of injured parties, tells where car can be inspected, and gives statements of witnesses and his own conclusions as to the liability of

CLAIMS DEPARTMENT
Left to right—Frank Billings, Earl Kaska and Florence Wilson.

the insured for the accident. He also makes out a formal notice of the accident and files it with the Company.

The Company then instructs the local adjuster the procedure to be followed in settling with the insured and other claimants. Small claims are usually settled at once by the local adjuster when the insured has made proof of his claim and proved that his assessments are fully paid. When claims are filed in the home office, they are listed in the claim register and a number assigned to each one. Records are then checked as to class of car and date of last premium payment.

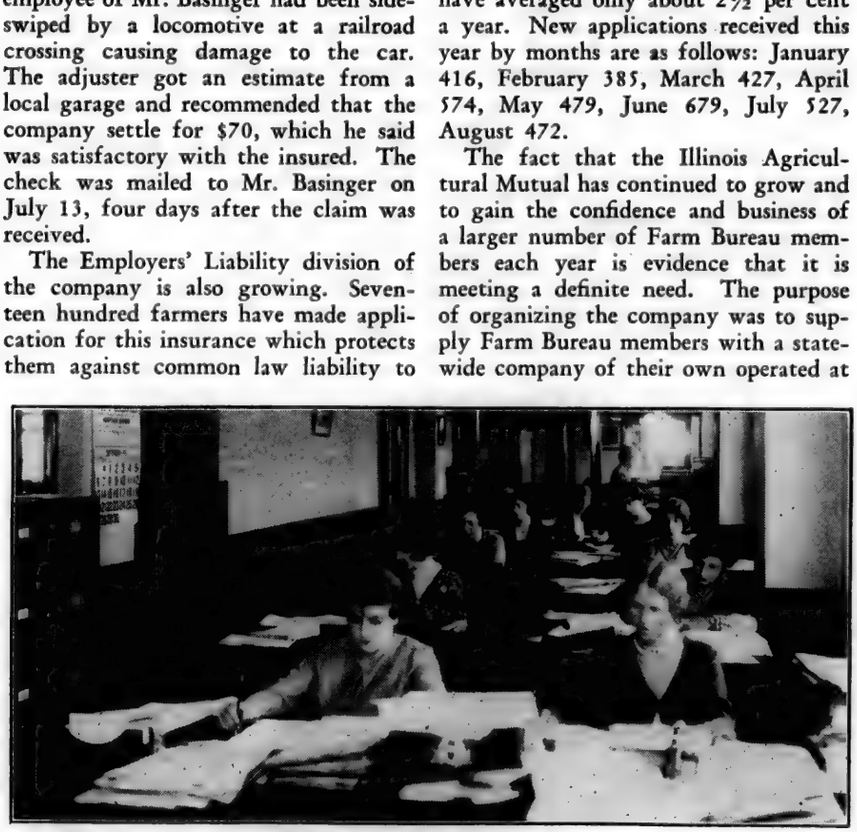
Practically all personal injury and property damage claims are handled by the home office. All settlements of $50 and less are approved by Frank Billings, in charge of the claim department. Larger claims must be approved by the manager, Mr. Richardson. All personal injury claims over $250 are approved by the legal counsel, Donald Kirkpatrick, and claims in excess of $1,000 must be passed on by the board of directors.

The volume of claims has increased steadily with the growth of the company. A typical claim is one filed by O. C. Basinger of Saline county. The local adjuster notified the company on July 9 that an automobile driven by an employee of Mr. Basinger had been sideswiped by a locomotive at a railroad crossing causing damage to the car. The adjuster got an estimate from a local garage and recommended that the company settle for $70, which he said was satisfactory with the insured. The check was mailed to Mr. Basinger on July 13, four days after the claim was received.

The Employers' Liability division of the company is also growing. Seventeen hundred farmers have made application for this insurance which protects them against common law liability to employees. At the present time this protection is costing them about 2 cents per day for each man employed. Helen Ekberg is in charge of this department.

STATISTICAL AND ACCOUNTING DEPARTMENT
Virginia Heaton, Elizabeth Collins, Margaret Lauritzen, George Krogman and William Campbell

Acquisition is directed by Vernon Vaniman, director of insurance service for the I. A. A., working through the County Farm Bureaus. G. R. Williams of Salem is the field representative in Southern Illinois assisting in acquisition and rendering field service on claims. M. E. Roberts of Edinburg is doing the same kind of work in Central Illinois.



To date the company has received applications from nearly 30,000 farmers since its organization. Cancellations have averaged only about 2½ per cent a year. New applications received this year by months are as follows: January 416, February 385, March 427, April 574, May 479, June 679, July 527, August 472.

The fact that the Illinois Agricultural Mutual has continued to grow and to gain the confidence and business of a larger number of Farm Bureau members each year is evidence that it is meeting a definite need. The purpose of organizing the company was to supply Farm Bureau members with a statewide company of their own operated at cost to protect them against loss on their trucks and automobiles.

The company has expanded so that a staff of 25 people is now required to do the work. Its office occupies 1,800 square feet of floor space adjoining the I. A. A. offices in the Transportation Building.

The Illinois Agricultural Mutual is a legal reserve company. Its prompt payment of claims is assured by the maintenance of a substantial cash reserve. The Board of Directors of the I. A. A. requires that a proof of the adequacy of reserves for payment of claims be made quarterly.

All the business has been done on a cost basis and no increase in assessments has been made since the company began business four years ago. On the other hand, several competing companies have increased their assessments within the last year. At present there is no indication that any increase need be made.

UNDERWRITING DEPARTMENT

Auto Insurance Agents In Race for High Sales

The Illinois Agricultural Mutual Insurance Co. hopes to pass the 30,000 application mark this month. A contest is on between agents over the state for which prizes are offered in the form of Penn Bond motor oil to the 10 highest general agents and the 10 highest special agents.

The highest general and special agents in the state will receive in addition a pair of six-ply heavy duty Brunswick automobile tires for any passenger car owned by the agent and insured in the Illinois Agricultural Mutual.

The county sending in the highest number of applications will receive a banner. Champaign county has won the banner for the past three years.

The 10 high counties in applications for August were: McLean, Morgan, Cook, De Kalb, McDonough, St. Clair, Whiteside, Henry, Stephenson, Will.

General Agent Wm. E. Hedgcock of McLean county led all others.

Larry Williams Breaks Record as Picnic Speaker

Addresses More Than 50,000 at Outdoor Assemblies Since Latter Part June

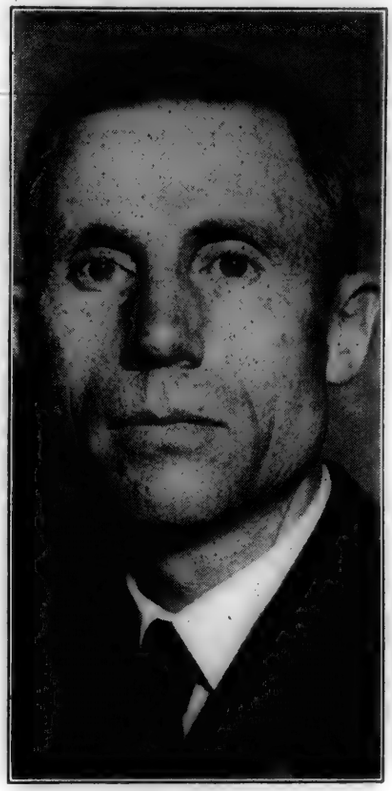
L. A. "LARRY" WILLIAMS, manager of Country Life Insurance Company, broke all records as a picnic and farm meeting speaker during the past summer. He addressed more than 50,000 people at 28 Farm Bureau picnics and gatherings since the latter part of June.

"The largest assembly was in Lake county where 7,000 actually registered in the drawing," Williams commented." I doubt if any of the picnics had less than 1,000 and the average would run about 2,500.

Larry Williams

"The easiest audience to talk to was at the Ogle county picnic at 'The Pines' State Park. The seating arrangement and the natural auditorium which the canyon formed made speaking a pleasure.

"Ford county farmers joined with the business men, making a very pleasing audience to talk to at Paxton, where perhaps the finest picnic grounds possible were made available to the crowd.



Audiences Attentive

"The Lee county group were interested listeners. Although they had to stand or sit on the ground, they were attentive and appreciative. The Williamson county picnic was particularly successful in holding its crowd and creating interest in the contests and sports.

"The 4-H Club shows and demonstrations drew good attendance and generated much enthusiasm at the picnics where this was a feature.

"The public address system furnished by the I. A. A. was a great help wherever it was used. The music from the records provided very fine entertainment to round out the program. The speaker was greatly aided by the amplifier in that he could let his voice down and speak through the microphone in a natural tone. It also enabled the audience to follow the speaker without difficulty."

At their meeting in August the I. A. A. Board of Directors approved an appropriation of $200 for the annual student livestock judging contest at the University of Illinois.

Frank Evans of Salt Lake City, Utah, former secretary and general counsel of the American Farm Bureau Federation, is President Hoover's latest appointee to membership on the Federal Farm Board.

The members of the Farm Board now are James C. Stone, Kentucky, chairman; Carl Williams, Oklahoma, vice-chairman; Sam H. Thompson, Illinois; C. B. Denman, Missouri; W. F. Schilling, Minnesota; Chas. Wilson, New York; and Frank Evans, Utah. One vacancy on the Board still remains to be filled. Secretary Arthur M. Hyde is a member ex-officio.

Approximately 62 per cent of those registering at Farm Bureau headquarters at the Illinois State Fair were members of the organization.

"Destroy Every Third Row Cotton," Advises Farm Board

Chairman Stone Dispatches Telegrams to Governors of Big Cotton States

TELEGRAMS to the governors of all the larger cotton producing states signed by James C. Stone, chairman of the Federal Farm Board, were dispatched on August 12 advising them to get back of a movement to have all growers plow under every third row of cotton now growing.

This drastic action on the part of the Farm Board was taken deliberately following the government cotton report of 15,584,000 bales which, according to the Board's telegram, "if realized provides total crop and carry-over supply of American cotton of more than twenty-four and one-half million bales against probable world consumption of American cotton this fiscal year of 13,000,000 or possibly 14,000,000 bales, leaving probable carry-over one year hence of around 11,000,000 bales.

Tried to Protect

"This condition occurs in spite of 10 per cent reduction in acreage last spring," continues the telegram. "It has already resulted in drastic declines in cotton prices which if allowed to continue may bring direct disaster to cotton producing states and indirect distress to the nation. Through serious world depression of last two years Federal Farm Board has steadfastly attempted to protect cotton farmers and all who deal with them from price declines such as have affected all industries first by sixteen cent loans to cotton co-operatives, second by removal from market by cotton stabilization corporation of 1,300,000 bales, third by 90 per cent loans to co-operatives last year.

"These efforts had some measure of success but have been outweighed by continual excess production and continually increasing surplus. Board believes that time has now come when cotton producers themselves must be called upon for immediate and drastic action. Agricultural Marketing Act, section one, paragraph four directs Board to aid 'in preventing and controlling surpluses and in orderly marketing and distribution so as to prevent such surpluses from causing undue or excess fluctuations or depressions in price for the commodity.' Section five, paragraph four, 'the Board is authorized and directed to investigate conditions of over-production in agricultural commodities and advise as to the prevention of such over-production.' In

line with above mandate from congress and in view existing Board suggests that you immediately mobilize every interested and available agency in your state, including farmers, bankers, merchants, landowners and all agricultural educational forces, to induce immediate plowing under of every third row of cotton now growing.

Must Abandon Acreage

"Without question, at present low prices there will be considerable abandonment late in the season, but this will not improve prices during heavy marketing. Problem to be solved is to secure abandonment in an organized and orderly fashion which will give farmers a better return on the remainder. Board is convinced that such organized reduction immediately done will be more than repaid by increased price received by growers on this and future crops entirely aside from savings by reason of no picking and ginning costs on that part of crop plowed under.

"Board recognizes that this suggestion calls for drastic remedy for serious emergency but commends to you the thought that major operation of this kind rather than attempts at lesser measures is now needed. Board earnestly hopes this proposal which is being sent governors of all cotton producing states will be approved by you and the people of the South and that necessary steps will be immediately taken to put it into effect on basis which will begin reduction throughout South not later than September 1 and complete program not later than September 15.

Board Will Help

"If the 10 largest cotton producing states accept and carry out this program this Board will do all in its power to support the program and will pledge itself to permit no sales by the cotton stabilization corporation of its present holdings before July 31, 1932, and will urge upon the cotton co-operatives financed by the Board the desirability of similar action by them on their stocks of 1930 cotton now held.

"This program if fully carried out by southern farmers as well as by ourselves will mean reduction of total supply by at least 4,000,000 bales and withholding from this year's market of 3,000,000 bales more. You will appreciate necessity for very prompt action if this plan is to effectively benefit farmers this fall and you are therefore urged to immediately advise us your attitude toward co-operation on it. Board will promptly convey to you reactions from other states as received."

Real estate and property owners in Stark county received a 20 per cent cut in tax valuations this spring.

Three of the nine oil trucks operated by Morgan Farmers' Oil Company just after they had finished filling 15 tractors with Aladdin gas at Rees Tractor Meet.

Louisiana Passes Bill To Ban Cotton Planting

A BILL prohibiting the planting, gathering and ginning of cotton this year was passed unanimously by the Louisiana State House of Representatives on August 27. The bill was sent immediately to the Senate, where like action was predicted by Governor Huey P. Long, its sponsor.

The measure is contingent on similar bans being proclaimed by states having 75 per cent of the cotton acreage in 1930.

The vote in favor of the bill was made unanimous, 77 to 0, after Representative Stanley McDermott of New Orleans, who had strenuously opposed it, was permitted to change his vote to the affirmative, stating that he did so "to exhibit a united front to the world."

The bill, as passed by the House, makes it a misdemeanor for any person, farm or corporation to "plant cotton seed to raise cotton, to gather cotton, and to gin cotton in 1932." A fine of not less than $100 nor more than $500, or imprisonment of not less than 10 days nor more than 60 days for each offence, is the penalty for violation.

The bill empowers the state commissioner of agriculture to cause to be destroyed any cotton found growing in 1932.

Governor Long stated that if other governors and legislatures of cotton growing states would take similar action within the next two weeks, cotton would soon be selling at from 15 to 20 cents a pound throughout the world.

"With this year's crop, we have on hand in America more than 24,000,000 bales of cotton, enough already to supply next year's demand," he said. "It would be a crime for the legislatures of the cotton growing states to allow this opportunity to restore prosperity to their people to pass."

THE use of glass-lined tanks for transporting and handling milk has increased so rapidly that today some cities receive 70 to 95 per cent of their fluid milk in tanks.

Use Aladdin Gas at Rees Tractor Contest

MORE than 5,000 farmers witnessed the plowing contest held at Rees Station in Morgan county on the farm of Milford Rees August 6. Fifteen contestants competed in the three divisions.

The tractor meet is an annual event sponsored by the community, the Morgan County Farm Bureau, and the Jacksonville Chamber of Commerce. Entrants this year included five in the two bottom class, eight in the three bottom class, and two in the four bottom class.

During the forenoon and afternoon programs were given from the platform with Fred Scholfield, president of the Morgan County Farm Bureau, in charge.

In the Farm Bureau tent on the grounds an attractive display was shown by the Morgan Farmers Oil Company. C. W. Ward, field sales manager of the Illinois Farm Supply Company, was in the tent during the day assisting the local manager, C. H. Jewsbury, with the display.

All fifteen of the contestants in the plowing contests filled their tractors with Aladdin gasoline furnished by the Morgan Farmers Oil Company. A. L. Young and E. G. Johnson of the University of Illinois judged the contest.

The Vermilion county 4-H Club show and Farm Bureau picnic, September 12, Danville, was held at the I. and I. Fair grounds. Donald Kirkpatrick, legal counsel for the I. A. A., was the chief speaker.

The feature of the morning program was the judging of the calves, pigs, and other livestock. Horseshoe pitching and other contests were held for adults.

Walter S. Batson, formerly teacher of vocational agriculture at Ridge Farm, Vermilion county, began work as farm adviser in Shelby county September 1. Mr. Batson succeeds H. M. Adams, who has been employed by the Cincinnati Producers Commission Association.

Miss Ruth Hitzhusen has been employed as home adviser in Iroquois county. She began work September 1.

"My Dad started to buy my education when I was a little lad—Now I'm prepared to face the world"

In this age of competition to earn a living, the specially trained man makes outstanding success.

Training in law, medicine, engineering, agriculture, business, is most valuable. It fits men for a glorious future.

The cost of Country Life Educational Insurance is low—just a few cents a month. It provides for a monthly educational budget.

Ask your local County Farm Bureau to give you all details.

A $5,000 Country Life Educational Policy will provide $14.58 per month through grade school—$20.00 a month through four years of high school—$75.00 a month through four years of college and a graduation present of approximately $500.00

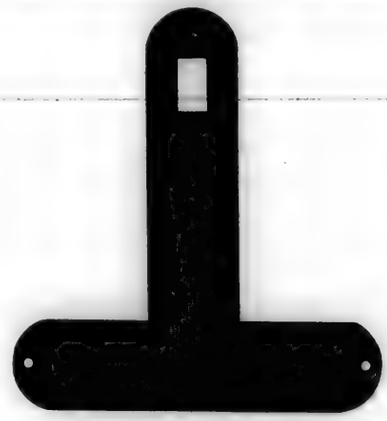
21 Demonstrations Teach Weed Killing

A SERIES of 21 weed killing demonstrations are being sponsored this month by the Illinois Farm Supply Company. C. W. Ward, sales representative of the company and a man from the Chipman Chemical Engineering Company, manufacturers of Atlacide Calcium Chlorate, are in charge of the demonstrations scheduled in Lee, Carroll, Rock Island, Tri-Counties (Warren, Henderson, Mercer), Fulton, Cass, Scott, Pike, Greene, St. Clair, Madison, Montgomery, Shelby, Crawford-Jasper, Edgar, Champaign, Tazewell and Woodford Sept. 18; McLean county, Sept. 19; and Ford and Iroquois counties, Sept. 21.

C. W. Ward



A truck equipped with a power sprayer is being used to demonstrate the effectiveness of calcium chlorate. Approximately nine carloads of atlacide have been distributed by Farm Bureaus and local service companies in the state during the last summer, reports Manager L. R. Marchant of the Illinois Farm Supply Company. More fall applications will probably be made than ever before this month and next.

Fall treatments are particularly successful when properly applied. The chemical either kills the weed outright or else weakens it so that winter freezing together with plant poisoning will completely eradicate the pests. Plant poisoning is similar to blood poisoning. The chemical is absorbed principally through the leaves and stems and circulates through the plant system into the roots. Application should be made for best results before the weeds are killed by frost.

10 High Counties Named In Employer's Liability

The 10 high counties in applications for Farmer Employer's Liability Insurance for August were: McLean, Du Page, Livingston, Henry, Tazewell, Cook, Vermilion, Fulton, St. Clair, Kendall.

This policy protects the employer up to $5,000 per person and with that limit per person $10,000 for any single accident. In addition it covers court costs, lawyers' fees, hospital bills, etc. The cost of the insurance is only $4.50 each six months of hired labor.

For Auto Emblems

The bracket shown in the picture above is for fastening the I. A. A. auto emblem on cars that have a shutter or winter front. The emblem is fastened to the device by wire and may be attached to the bolt which holds the front or rear license plate.

Policyholders in the Illinois Agricultural Mutual may secure one of these free by writing the Company at 608 So. Dearborn St., Chicago.

Some recent accident reports follow:

Cook County — Small bones in wrist broken when crank on gasoline engine flew back.

Du Puge County—Fourth finger broken, nail torn off and skin tore when hand caught in grain elevator.

Livingston County—Standing on toehold on roof when it gave way causing employee to fall 16 feet to the ground sustaining cuts on face. Lung punctured by broken rib.

McLean County — Employee putting collar on horse who had a sore neck. Horse turned and kicked employee on legs causing bad bruises.

Macon County—Returning to field for more wheat sacks, employee lost control of car. Car turned a complete somersault causing injuries to employee's abdomen, right shoulder and hip, paralizing right side.

St. Clair County—Employee was picking ice when pick stuck and handle came off. Not noticing this, employee jabbed again, running rusty pick in hand.

Hire Sales Manager

R. W. Grieser, head hog salesman for the Chicago Producers, has been employed as sales manager for the Illinois Livestock Marketing Association. He began work on September 2.

For the time being the Association will have its headquarters in the I. A. A. offices at 608 So. Dearborn St., Chicago.

Win Prizes in State Fair Drawing Contest

FARM Bureau members from 81 different counties registered at the Illinois Agricultural Association headquarters at the State Fair this year, according to records of the Illinois Farm Supply Company. Sangamon, Christian, Montgomery, McLean, Macon, Macoupin, and Champaign counties led in the number of registrations, in the order named.

The mystery faucet from which a stream of Penn Bond Motor Oil was continuously flowing appeared to be the center of attraction in the oil company exhibit. The ingenuity of George Curtiss, manager of McLean County Service Company, and the generosity of that company, were responsible for this portion of the display.

Martin Fuchs of Harvel, Montgomery county, won the thirty gallon drum of Penn Bond (100% Pure Pennsylvania) oil in the drawing, and Elsie Sauder of Roanoke, Woodford county, won the Brunswick automobile tire. The first seven names, in the order drawn by Ruby Aires of Knox county, were:

1. Ralph E. Arnett, Pekin, Ill., Tazewell county.
2. Robert Means, Hersman, Ill., Brown county.
3. E. F. Stimpert, Panola, Ill., Woodford county.
4. F. C. Dinwiddie, Sinclair, Ill., Morgan county.
5. Martin Fuchs, Harvel, Ill., Montgomery county.
6. Alden Snyder, Hillsboro, Ill., Montgomery county.
7. Elsie Sauder, Roanoke, Ill., Woodford county.

The prizes mentioned above were awarded to the 5th and 7th.

J. C. Bornemann, route 1, Sugar Grove (Kane county) won the drum of oil at the Central States Exposition, Aurora, and Frank C. Barber of Sheridan (LaSalle county) the Brunswick automobile tire awarded by Illinois Farm Supply Company.

I received your check for $17.35, which represents the full loss sustained by me by theft on or about Aug. 13, 1931.

This is the first insurance loss of any kind that I have ever had and I am more than pleased with the settlement.

J. W. GANNAWAY,
Coles County, Ill.

The Illinois Farm Supply Company received 52 coupons and inquiries from the fly spray advertisement in the July issue of the RECORD. The inquiries came from 38 counties.

"Too Many Public Offices," Ex-Gov. Lowden Declares

Advocates Reconstruction of Local Government Into Larger Units To Reduce Taxes

FORMER Governor Frank O. Lowden of Illinois, speaking at a two-day session of the Illinois Chamber of Commerce in Chicago, October 9, advocated reconstruction of county and township governments as a means of reducing the tax burden.

Mr. Lowden declared that township assessment of taxes should be abolished as an outgrown relic of ox-cart days, that there is no excuse for township offices, that many counties are too small for the greatest efficiency, and that a general reorganization of the local government system is needed.

Frank O. Lowden

"In the average Illinois county," Mr. Lowden said, "the salaries of county officials absorb a very large percentage of the total revenue of the county, running as high as 50 per cent. These officials could serve a much larger territory.

"It is a matter of common observation that we have too many public officials. Their number goes on increasing in good and evil times alike.

Many of our county jails have been a disgrace for more than a hundred years. Our county almshouses are expensive and many have been a reproach to our civilization. They should be abolished and in their place should come either regional or state institutions.

"We have too many governments," he said. "An extreme illustration is in Cook county which alone contains 392 independent local governments. Is it any wonder that Chicago, with all its vast resources, should be in financial distress?"

Mr. Lowden favors the abolition of the township. This is a unit of government which has largely survived its needs, he said. No one but the town assessor knows what its boundaries are. The county should be the smallest unit of assessment.

In some states where the regional plan has been adopted the per capita cost of government has been cut in half. Virginia and North Carolina have made big cuts by consolidation of local government units.

"It is sometimes urged that to consolidate counties is a move away from local self-government," he said. "Quite the reverse is true. If we would check encroachment of the state upon functions of the county we must make county government so efficient that there will be no reason for such a change."

Prof. Thomas S. Adams, tax authority of Yale university and a specialist of 35 years' standing who has served as tax adviser to the treasury department, declared that "the best tax we have is the tobacco tax." He said: "We need not more taxes on tobacco, but more taxes like the tobacco tax; that is, sales taxes on articles of wide, but not absolutely necessary consumption."

He declared the income tax better than the property tax. Among his recommendations were: the reduction of public expenditures; the reorganization of the assessment machinery; the introduction of an income tax; and the taxation of intangible property.

Soybean Association Reports Advance Price

Meet at Springfield October 5 to Discuss Details of Marketing Situation

AFTER thoroughly studying the market situation directors of the Soybean Marketing Association have announced a temporary advance of 20 cents per bushel basis number 2 U. S. grade.

This temporary advance is based on a substantial sale of soybeans to a leading processor at a figure well above the present low market level. Although the advance is extremely low, the Association expects the market to strengthen later and hopes to be able to make additional payments to members as this year's crop is merchandised.

As soybean oil and soybean oil meal come into direct competition with cotton seed products, the price is naturally held down by the large production of cotton in the South this year.

Meeting October 5

A meeting of leaders of the Soybean Marketing Association was held at Springfield October 5 to discuss the market situation and to report on probable deliveries from the organized counties. President Earl C. Smith outlined to the leaders the principles involved in the sales contract which has already been entered into with a leading processor.

Representatives from most of the counties reported that only about two-thirds of last year's volume would be delivered this year and that a larger volume than usual will be stored on the farm for future delivery to the Association, and for feeding. It was also reported in certain areas, particularly where the crop is less than average, that a larger number of farmers are plowing under their soybean crop rather than pay the high harvesting cost.

With soybean oil meal being forced down on a competitive level with cot-

ton seed meal, there never was a better time for Illinois livestock feeders to buy a superior protein supplement for feeding with home grown grains than now, according to W. H. Coultas, manager of the Association. Livestock feeders should use more soybean oil meal, as it is superior in protein content and digestibility to either cotton seed or linseed meal and because it is the only protein supplement grown in the corn belt.

Banquet State Baseball Champions at Pontiac

I. A. A. Trophy Awarded Before Gathering in Livingston County October 8

MORE than 150 people, including members of the State Championship Baseball Team from Livingston county, baseball officials, County Farm Bureau directors, and their wives and guests, gathered at a banquet in Pontiac October 8 to celebrate Livingston's recent victory over Knox county in the state finals. S. G. "Steve" Turner, farm adviser, ably served as toastmaster.

After paying tribute to the prowess of each member of the team and Manager Clarence Jacobs, to Ray McKittrick, county baseball director, and the four members of the baseball committee, Francis Skinner, Donald Kirkton, John Wrightam and Wm. Conroy, the toastmaster presented each player with a gold baseball watch charm and a gift from the manager. The watch charm and a silver trophy were donated by the A. G. Spaulding Company.

E. G. Thiem, secretary of the State League, reviewed the history of the organization since its beginning in 1924, discussed some of the questions and problems that arose during the current season, told of the fine sportsmanship shown throughout the championship series by Livingston and Knox counties, and presented "Shy" Wrightam, captain of the team, with the Illinois Agricultural Association trophy, a silver loving cup.

Musical entertainment was provided by a ladies' trio composed of Mesdames Erickson, Shugart and Turner, who won first place in the recent national contest at the American Legion convention, Detroit, and by the Farmer Four, local men's quartette.

Assistant Farm Adviser F. S. Campbell of Knox county, Manager T. J. Sullivan, Pitcher Sornberger and Catcher Shay drove over from Galesburg to help celebrate Livingston's victory. Other guests introduced during the evening in addition to team members and officials were George L. Potter, president of the County Service Company; Calistus A. Bruer, secretary, and Charles Meis, president of the Livingston Farm Bureau.

Await Word from Farm Board on Corn Proposals

PRESIDENT EARL C. SMITH discussed stabilization of corn prices with members of the Coarse Grains Advisory Committe and the Federal Farm Board in Washington on Tuesday, Oct. 6. A plan was formulated by a subcommittee and presented to the Farm Board with the request that it be given attention at the earliest possible moment.

It is likely that a state-wide I. A. A. meeting will be called in the near future to discuss and adopt a definite program.

The marketing staff of the Association and representatives of the Illinois Grain Corporation have been studying various proposals made by members and leaders designed to lift the price of corn to a higher level. A number of the suggestions so made were brought before the proper officials in the national capital.

Soybean Oil Paint at Greatly Reduced Prices

Successful experiments made by the University of Illinois and private tests conducted by paint manufacturers have prompted the Illinois Farm Supply Company to offer a high grade soybean oil paint through the 47 associated service companies.

This paint, containing not less than 20 per cent soybean oil, promises to greatly increase the outlet for soybean oil, which largely determines the soybean market. Illinois grows 40 per cent of the commercial soybeans produced in this country.

In order to get rapid distribution for this paint the Farm Supply Company is offering it through county service companies at 23 per cent below the regular retail price for paint of a similar quality. With special discounts in addition to this, the net cost to Farm Bureau members will be approximately 30 per cent below average local retail prices.

The house paint can be furnished in any of 12 colors shown on a color chart on display at all county service companies.

Members Sign Pledge To Prevent Accidents

REPORTS coming in from several of the 61 counties organizing safety clubs as a part of the state Farm Bureau accident prevention campaign indicate that farmers are joining wholeheartedly in the movement, reports V. Vaniman, director of insurance service.

The first count shows a membership of 369. Considering the fact that windshield stickers and other material were sent out only a few days ago this is an exceptionally good showing, Vaniman said.

369

Every Farm Bureau member is eligible for membership in Illinois Farm Bureau Safety Club and will receive a windshield sticker on which is printed a list of rules for safe driving. Stickers, material and membership are free.

A number of counties are holding special safety meetings during October where demonstrations of safe driving and traffic rules will be given.

Champaign county is planning to install safety lanes for testing brakes and wheel alignment as a means of eliminating mechanical defects which might lead to accidents. Mr. Vaniman says about 75 per cent of the cars tested in safety lanes have defects that need correcting.

A silver loving cup will be given by the I. A. A. to the county conducting the best campaign. Each county entering will present an exhibit of newspaper clippings, news letter items, and other publicity material such as pictures, posters, etc. The winning county will have the honor of naming a local man as president of the Illinois Farm Bureau Safety Club for the coming year. The next four will select representatives from their county to be members of the board of directors.

Ford County Grain Association Formed

The Ford County Grain Association, newly organized, has the following board of directors: Albert Odell, Charles E. Harper, Louis Runneberg, A. B. Schofield, Edward Karr, Paxton; Alfred Arends, Melvin; R. F. Cothern, W. E. McKeever, Harry Scott, Gibson City; Louis Rust, Sibley; George V. Dowse, William Walgenbach, Kempton; John Woodward, Thawville; John Gallahue and P. S. Jensen, Piper City. The temporary officers are: A. B. Schofield, president; P. S. Jensen, vice-president; W. E. McKeever, secretary-treasurer.

Dairymen's League Joins in Opposing 15% Increase

AN appeal to farmers to support their organizations in the fight against higher freight rates has been made by Fred H. Sexauer, president of the Dairymen's League Co-operative Association of New York. He points out that farm prices are now 77 per cent of what they were before the war, while railroad rates are 155 per cent of the pre-war rate.

"The railroads ask for additional revenue so that they may suffer no losses, pay interest of bonds and securities and pay interest on investments such as stocks," said Mr. Sexauer.

"Farmers asked for relief ten years ago. They were finally given the Agricultural Marketing Act two years ago. Already a movement has been started in the cities to kill the act. That was not what the farmers asked for, but they had to accept that or nothing.

"Farmers have had to reduce their costs, cut wages, lower living standards and work harder. Are railroads a mighty institution that can solve their problems by new development, cutting costs and holding on until better times, or must farmers have the burdens of the railroads placed upon their already overburdened shoulders to carry with their own?"

The Dairymen's League supported the McNary-Haugen bill and the equalization fee along with the American Farm Bureau Federation and other farm organizations.

Fruit and Vegetable Growers Meet Oct. 22

The first stockholders' meeting of the National Fruit and Vegetable Exchange will be held at the Hotel Sherman, Chicago, October 22.

A resolution has been drawn up and copies submitted to interested co-operative marketing associations, whose boards of directors will determine whether or not they desire stock in the national set-up.

Each organization desiring to be officially represented at the stockholders' meeting and participate in the election of the board of directors must pass the resolution and name a delegate with full power to represent it, says P. F. Hibst, secretary of the organization.

A. B. Leeper, director of fruit and vegetable marketing for the I. A. A. and manager of the Illinois Fruit Growers Exchange, is president of the National Fruit and Vegetable Exchange. The new organization will probably begin to handle produce January 1.

I. A. A. Directors Vote to Help Milk Producers

Assistance to the Sanitary Milk Producers of St. Louis was voted unanimously by the board of directors of the I. A. A. at its regular meeting in Chicago, Thursday, September 17.

The following motion by Mr. C. E. Bamborough, seconded by Mr. Frank G. Oexner was adopted:

"That the executive officers of Illinois Agricultural Association be and they hereby are authorized and directed to confer with the officers of Sanitary Milk Producers Association in calling a meeting at the earliest moment of representatives from the several County Farm Bureaus in the affected area together with the Board of Directors of Sanitary Milk Producers and representatives of Illinois Agricultural Association; and further, to make available, to the full extent their judgment justifies, all possible man power from within the marketing, publicity, and organization staff of the Association, to assist the dairy producers in the St. Louis territory in protecting their rightful interests."

Edwardsville Paper Fights for Local Milk Producers

In an editorial on the milk strike in southern Illinois against the Pevely Dairy Company of St. Louis, the Edwardsville (Ill.) Intelligencer said in part: "There isn't any doubt about where the sympathies of Madison county residents should be in this fight. About 1700 Madison county farmers are extensively engaged in milk production. Their income from such business vitally affects every person in the county. If Madison county farmers can't make a profit from their labors we certainly cannot expect them to contribute much to the business welfare of the community. On a selfish basis alone every business man in the county wants the producers to win out in this fight. As a matter of fact their sympathies are with the producers anyway.

"They realize that the producers are fighting for recognition and a chance to do business in a business-like manner. They know that if the Pevely Company should win out, a considerable number of our farmers would be reduced to a status little better than that of slavery."

Three Per Cent Money, Corn Holding Considered

Following a discussion about agitation for three per cent money in several sections of Illinois, the board of directors of the I. A. A. at their September meeting voted to refer this question to the Finance Committee for study and recommendation to the board at its October meeting.

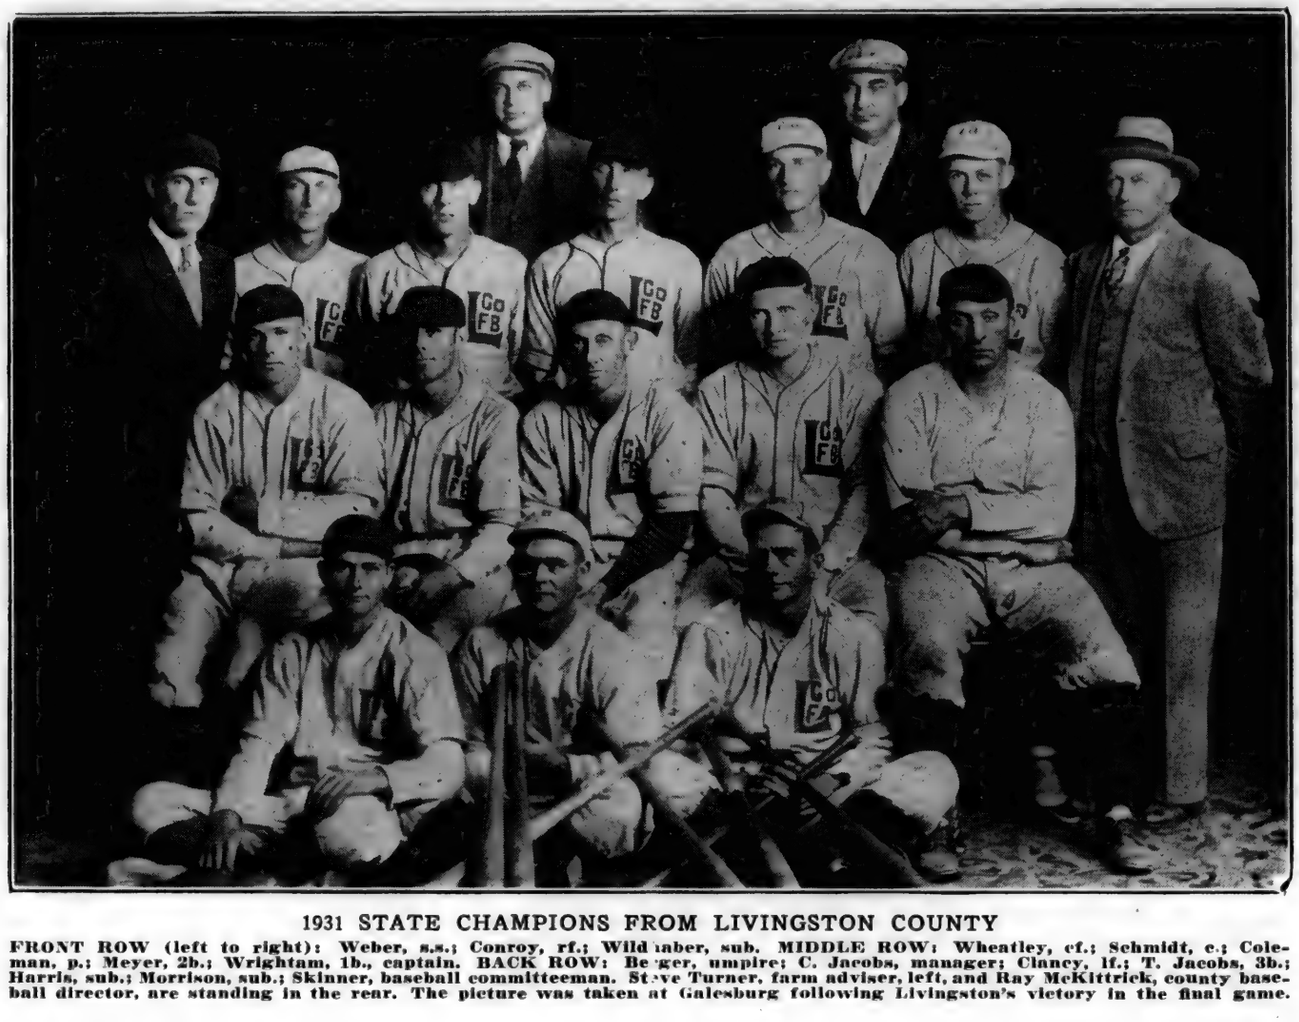
The board also considered at some length plans proposed in Iowa and Nebraska involving the holding of the new corn crop for higher prices. It was generally agreed that any plan that seems hopeful of obtaining the desired result should be supported.

It was regularly moved by Mr. Wright, seconded by Mr. Marshall, and carried:

"That the matter finding a solution or evolving a plan for holding the new corn crop off the market until better prices results, be referred to the Secretary of the Association, with instructions that he in turn place the matter into the hands of the marketing staff of the Association for study and recommendations as to a constructive plan which will attain results, and to make report at the next meeting of the Board."

Haugen Predicts Passage of Equalization Fee

Representative Haugen of Iowa has expressed the opinion that Congress at the next session will pass the proposed legislation to incorporate the equalization fee into the agricultural marketing act.



Mr. Haugen's statement was as follows: "The farm leaders generally are getting back to the equalization fee plan for handling surplus agricultural products, and against the subsidy plan for marketing them under the revolving fund loan provisions of the Agricultural Marketing Act of 1928. There probably will be legislation by Congress this winter to incorporate the equalization fee as a part of our marketing plan.

"I expect the equalization fee plan to be adopted as originally proposed in the McNary-Haugen bill."

Ford County Gains in Farm Bureau Members

A recent membership drive in Ford county put the membership of the County Farm Bureau up to 660 on incomplete returns, making a gain of approximately 100 members in the last year. Two entire townships and portions of several others are not included in this total.

Livingston Wins State Baseball Championship

1931 STATE CHAMPIONS FROM LIVINGSTON COUNTY

FRONT ROW (left to right): Weber, s.s.; Conroy, rf.; Wildnaber, sub. MIDDLE ROW: Wheatley, cf.; Schmidt, c.; Coleman, p.; Meyer, 2b.; Wrightam, 1b., captain. BACK ROW: Berger, umpire; C. Jacobs, manager; Clancy, lf.; T. Jacobs, 3b.; Harris, sub.; Morrison, sub.; Skinner, baseball committeeman. Steve Turner, farm adviser, left, and Ray McKittrick, county baseball director, are standing in the rear. The picture was taken at Galesburg following Livingston's victory in the final game.

BY defeating Knox county 9 to 2 at Galesburg, September 26, Livingston county made a clean sweep of the championship series and brought home the State Farm Bureau baseball title for 1931.

This is the second time in three years that Division III won the state title. McLean county won the championship in 1929. Livington's two straight victories over Knox made it unnecessary for a third game. The new champions won the first game by a score of 5 to 2. Both games were won by late rallies.

A four run revival in the seventh inning gave Livingston enough tallies to win the first game. Previous to the seventh inning Knox county was in the lead 2-1. Opening the inning Sornberger fanned Clancy and then hit Meyers to put the first man on. Jacobs hit a long fly to right field, which was misjudged and fell for a safe hit. Meyers went to third on the play and scored on a passed ball that bounced to the backstop.

Wrightam doubled just inside the right foul line and Jacobs scored. Conroy singled through second bringing in Wrightam. Schmidt was safe on an infield hit which Walt Jones grabbed back of third base too late to make a play. Wheatley was safe on an error and Coleman singled bringing in the final run. Shea picked Coleman off first base for the second out and Weber hit to Bloomquist for the third.

Thirteen solid hits and perfect fielding support back of Pete Coleman gave Livingston the punch to win the final game easily. Knox led 2-1 up to the sixth inning. Then Livingston broke loose with two doubles and two singles which with a walk and an error netted five runs.

Meyers started the fireworks in the sixth with a single to left field. Tony Jacobs was safe when Sornberger juggled his bunt. Shy Wrightam hit for two bases scoring Meyers. Conroy was safe on a fielder's choice as Jacobs was picked off at the plate. Wrightam had advanced to third on this play and scored on Schmidt's sacrifice fly. Wheatley was passed to get to Coleman, who singled to center scoring Conroy. Paul Weber sent a double past first base driving in Wheatley and Coleman. Clancy lined out to the left fielder to end the inning.

Both Sornberger and Coleman pitched spectacular ball in the tight spots. Coleman pitched both games for Livingston and Sornberger did all the hurling for Knox until he was relieved in the eighth inning of the final game by Milam. Livingston played errorless baseball during both games, while mistakes proved costly to the Knox county nine.

The new champions have been awarded the I. A. A. trophy, and the individual players were given gold baseballs at a banquet in their honor. They went through the entire season with only one defeat. That was a 1-0 game in the quarter-finals won by Logan county. Knox had lost only one game up to the time the finals started.

Winners of the eight division titles were Sangamon, Will, Logan, Greene, Tazewell, Carroll, Knox and Livingston counties. The 34 teams this year played more than 130 official games.

A $5,000,000 Annual Business

That's What 47 Affiliated Co-operative Service Companies Are Now Doing

EVERY day of the year more than $15,000 worth of Service Petroleum Products are distributed to Illinois farmers by the forty-seven service companies associated with Illinois Farm Supply Company, Manager L. R. Marchant reported at the annual meeting of the company, Bloomington, October 14. An annual business of $5,000,000 has set a new mark in this field of agricultural co-operation.

L. R. Marchant

The organization began the year with 36 member companies, operating 92 oil bulk storage stations and 243 truck tanks. At the close of the period 47 companies were in operation with 120 bulk stations and 351 trucks.

Farmers' capital stock investment in the 47 companies and the Farm Supply Company totals $929,772 including the $167,000 worth of stock required to establish the ten new companies.

The New Companies

The new companies are located in Champaign, Greene, Iroquois, JoDaviess, Macoupin, Monroe, Randolph, St. Clair, Stephenson and Whiteside counties. Hancock county has the first co-op. oil company organized in Illinois. This company joined the state organization during the year.

Not more than four distributors of petroleum products in the state rank higher in the sale of gasoline than the Farm Supply Company. Only one ranks higher in the sale of kerosene.

More than 33,000,000 gallons of petroleum products were handled during the year. This is the equivalent of about 2,850 tank cars of gasoline, 1,186 cars of kerosene and distillate, 316 cars of lubricating oil and 26 cars of grease. It represents a gain of 74.7 per cent in gasoline over the previous year, 57.4 per cent in kerosene and distillate, 69.49 per cent in lubricating oils and 58.5 per cent in grease.

Mr. Marchant pointed out that this gain was not due entirely to the organization of ten new companies. The average gains made by nineteen of the companies over two years old are 31 per cent in gasoline, 8.4 per cent in kerosene and 29.9 per cent in lubricating oil.

Other products handled during the year were fly spray, stock dip, sulphurized mange oil, wood preserver, cod liver oil, automobile tires, alcohol, glycerine, and chemical weed killers. Some of these products have been introduced within the past three or four months.

Approximately ten carloads, or 297,140 pounds, of chemicals were distributed. About 92.72 per cent of this was Atlacide or calcium chlorate.

The business of the state company for the year was $1,722,210.64 based upon the cost values of merchandise purchased. The net worth of the company according to the official audit was represented by a capital stock investment of $87,897 and a surplus of $42,715.56, which with reserves for dividends total $209,345.06.

Gross operating income for the year was $130,323.68, an increase of 64.1 per cent over last year. Operating expenses were $33,604.89, or 25.8 per cent of the gross income, compared with $25,862.35, or 32.6 per cent for 1930.

Lowers Production Cost

On the basis of the paid-in capital stock held by all member companies, the earnings represent a profit of 115.15 per cent on the investment. Capital stock dividends amounting to $5,337.68 and patronage refunds amounting to $73,394.82 have been declared payable. These amount to 60 per cent of the gross income with 15 per cent of the income going into reserve.

This will be the first year that any organizations other than the shareholders will participate in the earnings of the company. Under the purchaser patron contract, Farm Bureaus and other co-operative associations in counties where there are no service companies may receive a patronage dividend on purchases at the rate of 50 per cent of the amount received by member companies. Fourteen Farm Bureaus will receive refunds this year under this provision.

Every company organized prior to 1931 has paid off the balance due on its note covering stock subscriptions in the Farm Supply Company from patronage dividends.

The aggregate sum of $156,259 has been paid back to shareholders during the five years the company has operated. This is an annual yield of 76.54 per cent on the investment. The amounts paid annually in dividends on preferred stock and in patronage dividends are as follows: preferred dividends—$233.87 in 1927, $1,138.57 in 1928, $1,844.75 in 1929, $3,025.77 in 1930, and $5,162.68 in 1931; patronage—$1,138.21 in 1927, $11,239.71 in 1928, $20,772.74 in 1929, $38,307.89 in 1930, and $73,394.82 in 1931.

115 Per Cent Profit

"The future of co-operative purchasing in Illinois," said Mr. Marchant, "hinges on the interest taken in the movement and the effort made to develop it. The possibilities of large scale operations through the centralization of buying power is a real challenge and an opportunity. Co-operative purchasing offers a definite way to lower production costs which is more important today than at any time in the past decade.

"For this reason co-operative purchasing promises to be of ever-increasing importance. The saving in centralized purchasing is immediately apparent. Many a farmer will be sold on the co-operative idea by this obvious saving and later be made to see the value of co-operative marketing.

"Instead of 47 companies operating 351 truck tanks and serving 60,000 farmers, further expansion should result in some 60 companies with facilities for covering the state from end to end and serving not less than 100,000 customers. It is the duty of every farm organization to do anything that will lend greater dignity to the business of agriculture and increase the returns of those engaged in it. Illinois Farm Supply Company is already deeply indebted to the Farm Bureau leadership of the state for its support."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture

Seeking a Way Out

THE general unrest caused by the continuing low level of farm prices with consequent financial distress has naturally given rise to many ideas and suggestions for a way out. Meritorious as are many of the proposals for price improvement and cheaper credit, few definite and constructive suggestions have been offered for making such proposals effective.

Certainly courage and aggressiveness in support of sound moves which promise to relieve suffering and start stagnant economic machinery moving toward better days is sorely needed. But it is important that only such plans be tried which offer a reasonable opportunity for success.

The Illinois Agricultural Association has been giving careful consideration to credit and price stabilization plans for a number of weeks. Its representatives charged with responsibility have sought the advice and counsel of members and local leaders.

Definite proposals which we believe are constructive and have some chance for success have been and are being formulated. These have been presented to officials in high places who have the power to make them effective. At this writing we are not at liberty to disclose the details of such recommendations. Just as soon as possible the Association will call its members and leadership together that each may do his part toward making whatever plans are adopted effective.

Lowden on Consolidation

ONCE a public office has been created in this country, it "more nearly approaches immortality than anything I know," Frank O. Lowden of Oregon told members and their guests at the annual banquet of the Illinois Chamber of Commerce in Chicago Oct. 9. This situation he gave as one of the reasons for ever-increasing taxes.

Ex-Governor Lowden with his usual courage and directness recommended abolition of the township as a unit of government, consolidation of smaller counties, and creation of regional jails, poorhouses, courts and other public necessities in the interest of tax reduction.

In many counties, Mr. Lowden said, half or more of the total tax levy for county purposes goes to pay the salaries of elected officials. The need no longer exists, he continued, for so many small units of government which frequently fail to function properly. In some rural communities, he said, there are hardly enough residents to fill the elected offices. There is no excuse for having a county judge in every county. The smallest unit of assessment should be the county, he said. Yet we support all these units of government with their countless elected officials and complain about high taxes.

Reorganization of local government machinery into larger units, election of a chief executive with required budgetary control of expenditures in each county, and elimination of many useless offices which are no longer needed, Mr. Lowden believes are necessary to lift some of the burden from the taxpayer and give the people a better administration of local public affairs.

As we go to press the struggle for recognition and a voice in the market by organized dairymen from the Pevely Dairy Company, St. Louis, continues. The Pevely Company insist on naming the price of milk without consumer or producer representation, while denying the dairymen all rights of checking weights and tests.

Farmers throughout the state and nation are watching the outcome of this controversy. The obvious lesson it has taught is the need for more thorough organization coupled with united action of milk producers not only locally but over wide areas. Only with such unification can farmers place themselves on an equal footing with large distributing agencies in the sale of farm products.

M-P Elevator Managers Laud Marketing Service

Directors and managers of the Granville, McNabb and Varna elevators in Marshall and Putnam counties, all members of the Illinois Grain Corporation, met on October 2 at the Farmers State Bank, McNabb, reports the Marshall-Putnam Farm Bureau. Harrison Fahrnkopf and Charles P. Cummings of the Illinois Grain Corporation, and John Benson of the Farmers National, Peoria, attended the meeting.

Mr. Stromgren, manager of the Varna elevator, stated that he has found the service of the Mid-West and Illinois Grain Corporation entirely satisfactory. In only one or two instances, he said, were outside bids higher than those received from this source.

Mr. Whitaker, manager of the Granville elevator, reported that practically all grain from that elevator had been shipped to the Mid-West Grain Corporation and that the service had been very satisfactory.

Marshall-Putnam county stands in eighth place in the state for the quantity of grain shipped through the Illinois regional. A total of 176 cars were shipped to the Mid-West from this county since it began operating.

Kirkpatrick Speaker at Knox County Meeting

ILLINOIS farmers during the past four and one-half years have invested $1,000,000 in co-operative organizations which market commodities produced by someone else, Donald Kirkpatrick, legal counsel for the I. A. A., told Knox county farmers at a community picnic September 15. The county oil and supply companies are examples.

On the other hand, Kirkpatrick pointed out, in the past ten years the same producers have invested little or nothing to perfect a machine for marketing their own products.

He further stated that co-operative marketing does not end with the co-operative assembling of commodities as has become the common idea among many shipping association members. The producer should control the product until it reaches the terminal market or the consumer. Only one out of three cars of livestock shipped through Illinois shipping associations is handled by co-operatives on the terminal markets.

The speaker said that the control of 50 or 60 per cent of grain and livestock would enable these co-operatives to bargain with the purchasers of the commodities in such a way that producers would receive a larger share of the consumer's dollar.

The daily farm program of the I. A. A. over radio station WJJD, Chicago (1130 kilocycles), is now broadcast at 1 p. m. each week day except Saturday.

During the summer the daily broadcast was discontinued in favor of programs on Tuesday, Thursday and Saturday nights.

Daily livestock market reports, farm news and crop and market information of special interest to Illinois farmers will make up the program as in the past. Talks by I. A. A. staff members will be scheduled from time to time. The Chicago Producers will present a weekly livestock market review every Friday.

The state champion 4-H Club quartette from Marshall-Putnam counties will broadcast over the NBC network from station KYW, Chicago, November 7. Illinois 4-H members will provide the entire program at that time. Members of the quartette are Frank McCusky, Lacon; Aman Wilson, Sparland; Bert McKee and Max Meredith, LaRose.

Ray C. Doneghue, farm adviser from McDonough county broadcast from Stations WMAQ and WJJD, Chicago, on Oct. 6-7. He told how McDonough livestock growers were building their own marketing machinery.

The National Broadcasting Company announces that Walter Damrosch and his orchestra inaugurated the 1931-32 Music Appreciation Hour on Friday, October 9. This broadcast goes on the air from N. B. C. stations between 10 and 11 A. M. central standard time.

More than 56,000 copies of an improved manual will be distributed to schools throughout the country. The manual includes suggestions for classroom reception of the series, an orchestral seating plan, descriptive notes on all compositions to be played, a schedule of concert dates, and music material available for school orchestras, in addition to illustrations and comments by national figures.

The NBC estimates that more than 5,000,000 school children hear the Music Appreciation Hour.

Henry W. Trautman, formerly with the Chicago and Kansas City Producers is the new manager of McDonough Livestock Marketing Association at Macomb. He began work Oct. 1.

Illinois Livestock Market Ass'n Now Selling Daily

PRODUCERS are not getting their rightful share of what the consumer pays for his meat, Ray Miller, director of livestock marketing, told Boone county farmers at a special livestock meeting held at the Farm Bureau office September 22.

For each dollar spent in 1913 for meat the producer was getting 56 cents while in 1931 the farmer is getting only 35 cents, Miller pointed out. This gradual narrowing of the producer's share necessarily means less profit. The producer has very little voice in the present marketing situation.

Private commission firms still hold the real control. They have no reason to cut their charges in the stock yards such as pen rent, corn prices, etc. At present commission firms are charging $1.30 a bushel for all corn fed.

The Illinois Livestock Marketing Association is now marketing livestock daily. It is selling according to grade on the market where the stock commands the best price.

Boone county, according to Farm Adviser E. C. Foley, will hold a tour of livestock producers this fall when selling and grading demonstrations will be held.

Mason and McLean Co.'s Lead in Grain Marketing

The Allen Farmers Elevator Company in Mason county, which recently joined the Illinois Grain Corp., makes the 76th grain co-operative to affiliate with the state-wide regional and the Farmers National Grain Corporation. The Allen elevator handles approximately 250,000 bu. of grain annually.

Mason and McLean counties now lead in co-operative grain marketing with seven elevators each in the Illinois Grain Corporation. The 76 grain co-operatives represent a total volume of more than 12,000,000 bu. annually. The Guthrie Farmers Elevator in Ford county, affiliated with the Illinois Grain Corporation the previous week.

J. P. Watkins is manager and Hubert Ingersoll, president of the Allen Elevator. Other members of the board are: Henry Worner, J. W. Harmel, Edward Stansbury, Fred Radefield, Wm. Diers, Fritz Miller, Frank Bartles, and Henry Hiller.

The Vermilion County Livestock Marketing Association has made arrangements to finance cattle and lamb feeding operations for feeders at an interest rate of 6 per cent, according to P. F. Kettering, manager.

A. F. B. F. Plans Great Convention Dec. 4 to 9

Big Problems Facing Organized Farmers, Elect Officers and Seven Directors

BECAUSE of the many problems facing organized agriculture this year, unusual national interest will be directed to the thirteenth annual convention of the American Farm Bureau Federation, to be held at the Hotel Sherman, Chicago, Dec. 4 to 9.

Surplus crop control, adequate financial credit for agriculture, taxation, transportation, stabilization of the dollar, disposition of Muscle Shoals, a national land policy, and other matters will engage the attention of the organization. Every action agreed upon in the mapping of the Federation's program will directly affect not only the lives of America's 27,000,000 rural residents, but the vast background of the nation's entire business life as well.

National Farm Bureau executives are urging that every unit of the great Farm Bureau organization be represented to insure the adoption of a sound platform. State executive committees which have not as yet appointed their voting delegates should qualify at once, Secretary M. S. Winder suggests. He urges, also, that county leaders co-operate with state offices in marshalling delegates for participation in the Chicago meeting.

Speakers Being Scheduled

A full announcement of speakers will be made later. In the past the Federation has been addressed by a president, senators, congressmen, cabinet members, governors and others prominent in public life. This year equally prominent men and women are expected to be scheduled.

A national quartet contest will be a new feature of the convention program this year. Entries will represent states only. The A. F. B. F. annual award "For Distinguished Service to Organized Agriculture," will again be made this year. Nominations close Oct. 15.

Cup to Largest County

The contest to determine the winner of the silver loving cup offered to the largest county Farm Bureau promises to be spirited. San Joaquin County Farm Bureau, Stockton, California, holds the cup at present, but will have some strong contenders to meet this year, including the McLean County Farm Bureau in Illinois.

The important responsibility of choosing a president, a vice-president and seven directors will also face the convention this year. Each will be selected for a two-year term.

The convention proper will open on Monday morning, Dec. 7, for a three-day session. Preceeding this main meeting there will be a two-day National Farm Women's Conference on Dec. 4 and 5. Mrs. Charles W. Sewell, national director of Home and Community work for the A. F. B. F., has selected as a theme for this meeting "The American Farm Home and Its Surrounding Community." Speakers will discuss the rural church and school, rural medical service, recreation, and kindred topics, with emphasis on the Farm Bureau's relations to them. Men will participate in this year's conference along with the women.

Many New Features

A new feature of the convention this year will be the First National Congress of Farm Home Modernization Project Leaders on Dec. 4 to 7. Another feature is to be the A. F. B. F. Exposition of Agricultural Progress. Three national co-operative associations have already arranged for exhibit space. State Farm Bureaus and associated units are also engaging space. There will be a carefully selected group of commercial exhibits, arranged into ten departments covering every phase of farm interest.

Notice
Illinois Agricultural Ass'n. Election of Delegates

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the month of November, 1931, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

During November annual meetings will be held in Bond, Clay, Clinton, Jackson, Madison, Marion, Monroe, Moultrie, Schuyler, St. Clair, Washington, Williamson, and Lawrence counties.

Signed,
G. E. METZGER, *Secretary.*
October 15, 1931.

Define Status of Farm Bureau Memberships

At its September meeting the I. A. A. board of directors adopted unanimously a report of the Organization-Information Committee as follows:

(1) That the I. A. A. recommend to the County Farm Bureaus that only holders of individual memberships in the Farm Bureau and Illinois Agricultural Association shall be entitled to the dividends and services, based upon membership in good standing, and rendered either by the Farm Bureau or associated companies, excepting only those members of the Farm Bureau member's immediate family who are under age and wholly dependent.

(2) No partnership membership to be recognized which involves more than one farm unit unless all business is transacted in the firm or partnership name.

(3) Partnership membership accepted shall participate as an individual member.

The question of who is a Farm Bureau member arose when several cases were discovered of non-member relatives using their connections to get Farm Bureau auto insurance and other services.

Schuyler County Oil Co. Declares 5% Dividend

During its first year of business which has just closed, the Schuyler County Service Company sold more than a quarter million gallons of petroleum products making a net profit of $3,435.68. The board of directors declared a five per cent patronage dividend and placed the remainder of the earnings in the reserve fund.

The Tri-County Oil Company, owned and operated by Farm Bureau members in Warren, Henderson and Mercer counties, sold nearly a million and a half gallons of petroleum products during the fiscal year closing September 30.

Home Industries Booth

Of most appeal to farm women will be the Home Industries booth in which farm home handicraft workers may display the products of their skill. Orders will be taken and forwarded to the makers who will then ship their finished products to the purchaser.

Arrangements are being made for special reduced rates on railroads and motor bus lines and for hotel accommodations. Announcement of these will be sent to state Farm Bureau offices for transmittal to county and community centers.

Country Life Insurance Company

An Example of What Farmers Can Do Through Co-operative Effort

IN 1930 and 1931 many weak organizations in the business world fell by the wayside. Some managed to pull through with heavy losses. Only a few showed a healthy growth. Country Life Insurance Company is among the few that has made substantial progress. It stands out among the sound financial institutions of the country.

L. A. Williams

Country Life throughout the depression has continued to show an increase in new paid for business. It continued to hold its lapse of business down to an astonishingly low figure. It paid dividends not required in the contract. Country Life now has in excess of $43,000,000 of insurance in force counting the business in process.

Business written this year is only three-quarters of a million below the 1930 figures for the same period. The Company expects to approach the amount of paid business of last year by the end of this year. This was $15,715,750. In 1931 the company paid $46,000 in dividends to 1929 policy holders, although the contracts called for no dividends until the end of the third year, which would have been one year later.

All policies issued by Country Life pay dividends. This includes ordinary life, 20 pay life, 20 year endowment, endowment at age 65, and 12 year term insurance issued once a year.

Country Life is a legal reserve life insurance company created in answer to the demands of Farm Bureau members for reliable low cost life insurance. Its rates on participating life insurance are lower than any other company in the legal reserve field.

The company is capitalized at $125,000 with the Illinois Agricultural Holding Company owning the stock. Stock in the Holding Company is held by the I. A. A., County Farm Bureaus, and Farm Bureau members. Control is in the hands of the I. A. A.

On the strength of this set-up it is possible to produce life insurance at cost. Profits are returned to the policy holder instead of the stockholder, since the latter is limited to 7 per cent preferred dividends.

The Farm Bureau demanded a company in which it could have confidence because many farmers had purchased unstable protection only to find that rates would raise, or to find that some assessment company had gone out of business. An additional reason was that even when members did buy legal reserve insurance they purchased high priced investment policies rather than straight life protection because they had no one to advise them. There was a great need for guidance as well as protection. That need is supplied by Country Life.

Cross section of Country Life main office showing new business department in background.

Inasmuch as the board of directors of the I. A. A. could not endorse a life insurance company over which it had no control, it decided to operate its own company. The wisdom of this action has since been demonstrated. The success of Country Life can be explained in part by economical management, sound investments with good interest return, careful selection of risks, and low mortality, as well as a good volume of new business.

L. A. Williams has been manager of the company since its beginning. Dr. John W. Boland has been its medical director. They have had charge of acquisition and selection of risks, resulting in an excellent showing. In 1929, $17,000 in death claims were paid out, with $19,000,000 business put on the books. In 1930, $48,000 was paid in death claims with a total of $35,000,000 business on record.

One of the important features of Country Life is its non-medical business. The term non-medical does not imply the taking of any risk without examination. It does, however, eliminate the cost of the $5 medical fee as fixed overhead in the underwriting expense. More than two-thirds of the company's business is done on the non-medical blank. This non-medical statement, however, is supplemented by two investigation reports, which give the company the necessary information and save approximately $3.50 in the underwriting expense.

If it were not for the 96 active agencies established as a part of the County Farm Bureaus, a company just beginning in 1929 would have perhaps been 20 years in getting the volume of business on its books that has been effected in Country Life in 2¾ years. The early acquisition of large volume has reflected a tremendous saving to policy holders. Commissions on this business are all paid to County Farm Bureaus, who in turn pay the agents. Nearly a half million dollars has been paid Farm Bureaus in commissions to date.

Another advantage the Farm Bureau has given Country Life is co-operation in the organization of a sales force

under Mr. Williams, who has been able to school these men in groups with the aid of the Farm Bureau. Country Life has been an outstanding development in the field of co-operation because of the ready response of organization-minded men. Agents attend schools at their own expense five or six times a year, many driving 150 miles to attend one and two-day schools.

Because the efforts of Country Life are confined to the state of Illinois, it has been possible to carry the facts to the farmer without wasted effort through the I. A. A. Record, the Bureau Farmer, farm papers and the radio. All of these mediums have been used to inform the prospective policy holder, making Country Life insurance more easily sold than that in other companies.

Legal Reserve Required

The same legal reserve requirements are exacted from this company as any other company. Reserve has to be put up on the basis of insurance in force so that millions or billions of life insurance do not increase the security per thousand to the policy holder. Starting in 1929 at a time when any investor knew better than to take chances, it was a simple matter for the finance committee of Country Life to confine its investments to government and municipal bonds and securities of like stability. Country Life is now placed in the enviable position of having the very best of investments and a very low lapse of business.

Low Lapse Rate

The low lapse is perhaps due to the intelligent manner in which life insurance has been sold, coupled with the fact that older companies with older policies hold a greater temptation for the policyholder to reach in and get his money, while the newer policies of Country Life are not yet far enough advanced in age to tempt policy holders with their cash value.

Country Life policies have been sold for protection and not for investment. Many farmers were paying interest on heavy indebtedness already. In the event of the owner's death many farms would have been forced on a poor market at a tremendous loss unless there was cash from life insurance to enable his heirs to stall off foreclosure.

Part of the statistical room with Hollerith tabulator and sorter used in keeping records.

The company has over 1,000 agents, all of whom are Farm Bureau members. All agents work under a general agent appointed by the Farm Bureau in each county. The assets of Country Life are more than $1,000,000. The premium income this year will be over a million.

Insurance Digest Says

Here is what the American Insurance Digest said about Country Life:

"Having written so much business in so short a time, Country Life might be suspected of three things—paying high commissions to get the business; liberal underwriting to the extent that it accepts any and all risks; and a disregard for the permanency of its business in order to achieve success quickly.

"In each of these particulars the reverse is true, which makes Country Life's record all the more inspiring. It has paid its agents a smaller commission than is paid by the older companies in America. Its home office practices economy also, as proved by the fact that the expense per thousand of new life insurance is only $2.65. This is believed to be a lower cost per thousand than any other legal reserve agency company in America.

"Nor does Country Life 'lay down the bars' when it comes to underwriting. It is as liberal in this respect as any agent should want, as it writes insurance on all ages from one month to seventy years, women accepted on the same basis as men, and double indemnity for those who want it. But its business has been so carefully selected that its mortality has been less than 30 per cent of the expected.

"In 1929 business was so carefully placed that in 1930 Country Life's lapse ratio was only 5 per cent. In consequence of this persistency, Country Life made a greater gain in insurance in force last year than any other Illinois company, operating in its home state only.

"All of Country Life's progress has been achieved under the personal direction of General Manager L. A. Williams, who is completing this year his twentieth anniversary in the life insurance business."

West view of main office. Service department in right foreground and cashier's department in background.

Protection Offered Those Hauling School Children

Drivers transporting pupils and teachers to school for compensation can now secure protection against liability through the Illinois Agricultural Mutual Insurance Company at only a small additional cost.

Up to Sept. 18, when this new feature became effective, there was no provision covering liability of car owners while transporting passengers for pay.

The additional coverage provided by the supplement to the policy covers only the hauling of pupils and teachers to and from school. The insured must live on a farm and have agriculture for his principal business in order to get this protection. The endorsement will be issued only on pleasure cars. Coverage is effective between the hours of 7:00 a. m. and 6:00 p. m.

A. F. B. F. Directors Vote for Equalization Fee

THE board of directors of the American Farm Bureau Federation went on record in Chicago, September 23, favoring an amendment to the Agricultural Marketing Act to include the "equalization fee." This declaration will be acted upon at the annual meeting of the federation in December in Chicago.

It is proposed to open a battle for the equalization fee amendment when Congress assembles this winter. At the time the marketing act was passed organized agriculture insisted that it should include the equalization fee principle. Under this each unit of a given commodity would bear its proportionate share of crop surplus control costs. The equalization fee was left out, but the organization supported the act as it was passed.

The statement of the board said: "The federation at the time it announced its position in support of the act reserved the right to insist that should the efforts to administer it disclose weaknesses or limitations within the act, it would ask for amendments necessary to correct such weaknesses and limitations. It seems that time has now arrived.

"We insist that the marketing act should and must be amended by Congress so as to give the Federal Farm Board authority to place charges against all units of any given commodity, moving in the channels of trade, their proportionate shares of all necessary natural costs and losses resulting from the control of crop surpluses, which must be accomplished if the domestic market is to be protected as a market for the American farmer."

Mason County Co-ops. Are Working Together

All local organizations cooperating with the Mason County Farm Bureau including the livestock shipping association, two produce associations, the oil company, and four farmers' elevators have their books audited regularly by the Illinois Agricultural Auditing Association. This co-operative association now serves 298 Illinois agricultural organizations on a cost basis.

Cook County Members Profit by Co-operation

The Cook County Farm Bureau during the past twelve months has ordered between 90 and 100 carloads of feed for members. This means feed valued at around $50,000 wholesale was handled during the year. Farmers saved at least $10,000 by this one service of the Farm Bureau.

No. 1 of a series of advertisements on I. A. A.--Farm Bureau Services.

More than 60,000 voluntary memberships are backing the chain of I. A. A.--Farm Bureau services, each one an important link toward farm equality.

ILLINOIS I.A.A. SERVICE FARM BUREAUS

Effective Representation Requires Numbers

ADEQUATE representation for agriculture, first of the Farm Bureau projects, and vital to the success of all other Farm Bureau efforts, has been permanently established.

Today farm interests get proper consideration. Your I. A. A. representatives receive the cooperation of legislative and administrative government officials. An active and increasing membership commands respect. Every new member gives additional support.

Taxes Can Be Equalized

I. A. A.-Farm Bureau representatives have since 1923 effected substantial savings in taxes on farm lands. The data presented to the Tax Commission by the I. A. A. resulted in an initial $1,072,050.00 reduction in 1923, and in further reductions later.

In 1931 an average of $22.79 less per farm—altogether $4,900,000.00 less taxes were paid by Illinois farmers than would have been paid had the higher unequal valuations on lands not been lowered. Every farmer profits by joining with his neighbors in the battle for equalizing the tax burden.

Link Up with 60,000 Farmers

EVERY activity in the I. A. A.-Farm Bureau program is undertaken in the interest of farmers. More than sixty thousand Illinois farm homes are linked to this progressive movement through voluntary membership. The determination and loyalty of these members to their business will gain strength thru your support. The future of your own industry is more secure when you join with these men to make it so.

ILLINOIS AGRICULTURAL ASSOCIATION

—and—

Ninety-Five Affiliated County Farm Bureaus

608 So. Dearborn Street Chicago, Illinois

IN THIS ORGANIZED WORLD
ONE MAN CAN DO NOTHING ALONE

High School Boy Goes to College on Earnings

Chester White Hogs Pave Way for Honors and Education

Wilson Bryant, "American Farmer" in 1931 from the Waverly, Illinois Chapter, Future Farmers of America, developed a champion herd of Chester White swine as his major project during his Vocational Agriculture course in the Waverly Township High School. Starting with two gilts in his first year of agricultural project work, he reached the peak of the pure bred swine business at the recent National Swine Show held at Springfield, Illinois, when his herd boar, Sunbeam, was declared Reserve Grand Champion Chester White Boar.

His junior boar pig, Lucky Boy, was fifth and his junior sow pig was seventh in the same show. To date his show herd has won a total of $865 in Fair premiums this year, over and above all entry fees. Besides this he has marketed 60 head of spring market hogs and sold 20 breeding hogs. Next year he will have a herd of 20 sows headed by Sunbeam, his champion boar. At the present time he has a good supply of breeding stock for sale and 120 fall pigs.

Sells Breeding Stock

Since he is so situated in the midst of a surplus corn and grain region, he sells the majority of his breeding animals to farmers who feed hogs for their market value. This fact points out the ideal of swine production as exemplified at the recent National Swine Show: "Production of a swine type to meet market demands for high dressing percentage." As to his management, he practices the McLean System of Swine Sanitation, feeds farm grains as the basis of all his rations, is a good sportsman in the show ring, is an excellent judge of breeding hogs, and sells all of his animals as represented and at a moderate price.

Wilson has entered the College of Agriculture at the University of Illinois this fall and expects to pay his way through this year of college on the premiums won since August 1. He is selling out half interest in his present herd to his brother, a former Vocational Agriculture boy, who will handle the herd this winter. Together they expect to continue in the hog business and eventually get permanently established on a good corn belt farm.

Handles Other Projects

It might appear that his project work is one-sided, yet his other project activities include poultry, dairy, corn, wheat, and clover. So he has backed up his major work in Vocational Agriculture with a sound general farming practice.

Wilson Bryant

Also he has won judging ribbons on corn, poultry, dairy, and swine.

His school activities include class secretary and treasurer, local F. F. A. secretary and treasurer, first Illinois F. F. A. state secretary and treasurer, State Farmer in Illinois in 1930 and American Farmer in 1931. Added to this he was third in his class room scholarship with an average grade of 94 for four years of high school work. We wish him success in any other endeavor he takes up, but feel certain that here is an American Farmer who will return to hog farming as a life work, for he is interested in it, has been successful, and enjoys it.

Getting Ready for Fat Stock Show in Chicago

Manager B. H. Heide of the International Live Stock Exposition, Chicago, November 28 to December 5, announces that the preliminary classification for the 1931 show is now off the press and ready for distribution. It will be mailed free on application to the International office at the Stock Yards.

Entries will close for individual livestock classes November 1, for the Hay and Grain Show, November 10, and for the carload lots of cattle, sheep, and swine, November 21.

A two-day session of the I. A. A. board of directors was held in Chicago, September 17 and 18 during which the I. A. A. departmental directors and associated company managers each were given fifteen minutes to discuss the work of their respective departments and companies, and plans for the coming year.

Livestock Marketing

During the first six months of 1931 DeKalb county shipped 408 cars of livestock to the Chicago Producers as compared with 373 during the corresponding period in 1930.

Adams county shipped more livestock co-operatively than any other Illinois county during the second quarter this year. A total of 258 cars went to Producer agencies. Fulton county was second with 228 cars.

One out of every three shipments of livestock made by Illinois shipping associations to the Chicago market during the month of August went through the hands of the Chicago Producers, reports the U. S. Department of Agriculture. This was the highest percentage of any state in the Chicago trade territory. From Iowa the Producers received one out of every nine cars. Minnesota stood next with 14.2 per cent; Wisconsin 6.8 per cent; other states 8.2 per cent. Of the total shipping association business 17.5 per cent was sold through the Producers.

A total of 888 carloads of livestock were handled by the Indianapolis Producers during September, an increase of eight carloads over the same month last year. This was 106 cars more than the combined total of the next three large firms. Forty-one and five-tenths per cent of the rail receipts and 28.6% of those trucked in to the yards were consigned to the Producers.

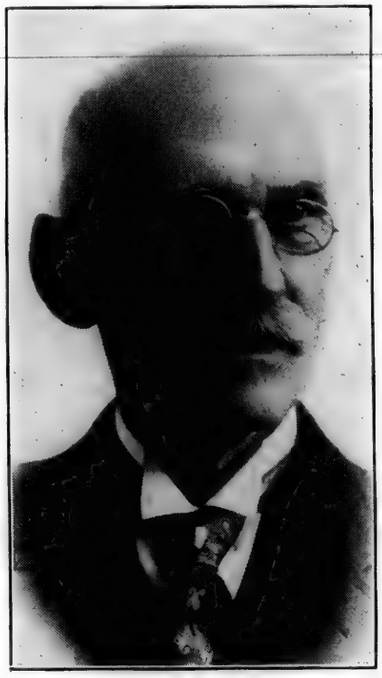
In September the following Illinois shipping association managers sent as many or more cars to the Producers at Indianapolis as a year ago: Fred L. Gumm, Paris; Frank Kettering, Danville; Hans Heit, Garrett; R. C. Boatman, Sheldon; Wm. Fulk, Decatur; Carl Shasteen, Sullivan. The following Illinois counties show an increase to Indianapolis over September last year: Clark, Edgar, Iroquois, Macon, Moultrie, Vermilion.

Up to September 1, 8.37 per cent of the stock received at the Chicago market was delivered by trucks, according to records of the Union Stock Yard Company. Figures taken from the Chicago Producers' records show that they were selling 11.7 per cent of all trucked in cattle, 17 per cent of the calves, 20.5 per cent of the hogs, and 22 per cent of the sheep.

Uncle Ab says that some folks who can think straight, can't think fast enough to keep up with the procession.

Hardy Buys 68 Cars Limestone One Order

Monroe Co. Man Believes Limestone an Excellent Investment



WHAT is thought to be the largest individual order of limestone ever placed was made by D. M. Hardy, a member of the Monroe County Farm Bureau this past summer. A total of 3,400 tons of limestone were purchased to be delivered in two consignments of thirty-six and thirty-two cars between July 24 and September 1, writes Farm Adviser C. A. Hughes.

This limestone was used to cover 1,000 acres in the American bottom which land is owned by Mr. Hardy. Preparatory to the spreading of the lime, the land was thoroughly tested using the Comer test as recommended by the State College of Agriculture. Each tenant was required to spread this limestone on the land as his share of the project.

All Fields Tested

The soil testing and mapping was performed by V. H. Kern, son-in-law of Mr. Hardy. Stakes were driven down at different places in the field and the number of tons of limestone marked on the stake that was to be dumped in these piles. The piles were so arranged as to make it convenient for spreading the required amounts of limestone on the surrounding land. Applications varied from two to five tons per acre.

The land that showed neutral received two tons of limestone. A small amount of these farms had free limestone in them, especially those close to the Mississippi River. Heretofore, Mr. Hardy has used considerable limestone on his various farms and this application completely covers all the cultivated land that he has.

D. M. Hardy

Sells Bonds; Buys Limestone

Mr. Hardy is 84 years old and actively engaged in the operation of his farms. With reference to this unusual amount of limestone, Mr. Hardy says, "During the war time these farms all showed a good profit. The profits were invested in good bonds and held as such. Recently it appeared to me that due to the agricultural situation, it would be good economy to dispose of these bonds and invest the proceeds in limestone. As conditions become more favorable for the farmer, this land will be in a better position to show profitable returns. If the depression continues indefinitely, this land should be in better shape to show profitable returns than if it had not been built up. During the past two years these farms have all come out in red with the exception of a small tract of land on which there are no improvements at all."

"Mr. Hardy will receive $352.28 rebates from this amount of limestone used," states Farm Adviser Hughes. "He also finds it profitable to use the various services of the Farm Bureau such as the Monroe Service Company's products and Farm Bureau serum. His success and experience in limestone indicates that it would pay other farmers to make a better and more extended use of liming their ground."

Run Down Farm Now Outyields Many Others

A RUN-DOWN central Illinois farm of ten years ago is now earning twice as much as other farms in its neighborhood as a result of good crop yields plus efficient management of 10 dairy cows and 18 brood sows, P. E. Johnston, of the State College of Agriculture, reports. The farm of 170 acres is one of the 2,000 or more whose owners and operators are co-operating with the college in keeping systematic farm accounts.

Ten years ago the farm was run down to the point where crop yields were low. Although it is on yellow gray silt loam soil and is quite rolling, it has for several years produced at least 15 per cent more an acre than the average of farms located on better brown silt loam soil. ***A liberal application of limestone followed by the use of sweet clover and alfalfa brought the higher crop yields.*** Records from a large number of fields in the area indicate that where sweet clover or alfalfa occupy the land one year out of four, corn yields are 10 bushels an acre higher than where no clovers are grown.

During the past two years hogs raised on the farm have returned $143 for every $100 of feed fed them. This was

(*Continued on next page, col.* 2)

LIMESTONE IS ONE OF THE PRINCIPAL INGREDIENTS OF FARM CROPS

In a ton of red clover hay there are about 75 pounds of lime. In an acre of good oats there are approximately 20 pounds of lime.

In a ton of alfalfa hay there are about 100 pounds of lime. In an acre of good corn there are approximately 25 pounds of lime.

Linsley Answers Alibis On Limestone Question

Cites Morgan Co. Farmer Who Increased Corn Yield 60 Bu. an Acre in Two Years

IN spite of the rapid increase in the use of limestone there still are thousands of Illinois farmers who are putting off liming every year, states Prof. C. M. Linsley of the College of Agriculture, University of Illinois. Mistaken ideas about soil acidity or the value of limestone often account for this delay. There are four reasons commonly offered by farmers for not using limestone, continues Linsley. Sometimes these are honest reasons, but more often they are merely excuses given by those who have not carefully analyzed their business of farming.

(1) "Limestone is not needed on my land." Most farmers who offer this reason are guessing, and guessing wrong. Only a small percentage of the farm land in the state is sweet. Enough money is frequently thrown away in clover seed over a number of years to pay for liming the entire farm.

(2) "Can't afford to buy limestone." This is sometimes an honest reason. But bankers usually would rather lend money to farmers for limestone than for any other purpose. They know that an investment in soil-building is a sound investment and one of the most profitable a farmer can make.

Six dollars invested in limestone to grow sweet clover made it possible for a Morgan county farmer to increase his acreage of corn 35 bushels an acre in the first crop and 25 bushels in the second.

(3) "Have to wait too long for results." Farmers who use limestone say that this is not a sound reason in the face of the fact that most of the men who offer this excuse have already waited at least 15 to 20 years. They should not object to waiting a year or two longer; as a matter of fact, they will probably delay liming for another 10 years and forget they are still waiting.

(4) "Too hard work to haul and spread." Hauling and spreading limestone is hard work, everyone will admit, but no harder than many other jobs that must be done each year. There is perhaps no farm work that will pay as high wages per hour. It is not so much the amount of work a man does on the farm that brings him money as it is doing those jobs that pay the highest wages.

Uncle Ab says if you have sense enough to be happy, you have sense enough.

CHAMPION DAIRY JUDGES

Left to right: Sam Buford, Rex Parker, and John Buford comprise the Stockton Blackhawk 4-H dairy judging team which won first place at the Urbana contest this year. The boys were coached by H. R. "Hank" Brunnemeyer, JoDaviess county farm adviser. Brunnemeyer formerly operated a Holstein dairy farm in Kane county, and taught agriculture in the Yorkville High School.

Thousands of Dollars In Hail Claims Paid

ONE out of every three counties in Illinois suffered crop damages from hail this year, records of the Farmers Mutual Reinsurance Company show.

In the final check-up on claims October 1, the end of the annual crop hail insurance period, it was learned that the heaviest losses during the past summer were in Knox, Henry and Champaign counties. From these three counties alone damage claims totaling thousands of dollars were sent in by 60 farmers holding policies in the Farmers Mutual.

Twenty-five counties out of the seventy-six which had policy holders in the company this year reported losses. At least a dozen severe hail storms striking in widely separated areas were responsible for the damage.

Most of the loss was on corn and soybeans, which in many cases were completely destroyed. The largest claim reported was for $1,032. It came from Knox county. A total of 113 claims were paid by the company on October 1.

The ten leading counties in hail insurance in force were Knox, Henry, Warren, McDonough, Champaign, Tazewell, Mercer, McLean, Logan and Monroe.

(Continued from previous page)

about 10 per cent better than the returns secured by other farmers who kept accounts. The hog raising is done under the sanitation system of sweet clover pasture. Dairy cows on this farm also have been more efficient than average.

The combination of high crop yields and efficient livestock produced both gross and net receipts which were $5 an acre higher than the average, despite the fact that the land on this farm was valued $50 an acre less than the average of other farms in the area.

Farmers "Under-Insured," U. S. D. A. Man Declares

"The insurance protection carried by farmers falls far short of meeting their insurance needs," V. N. Valgren, U. S. Department of Agriculture economist, told the National Association of Mutual Insurance Companies in session at Chicago, October 7.

"Approximately four-fifths of the farmers in the United States," he said, "have their buildings and other property insured against fire. More than two-thirds have windstorm insurance. Hail insurance covers about 8 to 10 per cent of the total crop acreage. Livestock insurance is negligible. Accident and sickness insurance carried by farmers is small. Less than one-half of American farmers have any life insurance. The percentage of all farmers who have employer's liability insurance is 'decidedly' small. The majority of farmers still lack adequate automobile insurance protection."

Mr. Valgren declared that "to some extent the farmers' lack of insurance may be charged to an unwarranted disregard of the need for protection. To a much larger extent it is chargeable to a meager income and an inability to buy the forms of protection that farmers need. This second reason ties up closely with the cost of insurance which in turn is affected by the nature of the protection provided."

Schools Can Insure in Mutual Fire Companies

The right of township and county mutual fire and mutual windstorm insurance companies to insure school houses and other public buildings is recognized both by statute and by common law, according to a study made by the I. A. A.

In some parts of the state such risks have been insured in the mutual companies for many years. Many mutuals, however, hesitated to take such large risks before the organization of the Farmers' Mutual Reinsurance Company. This company now supplies the smaller mutuals ample protection by reinsurance.

It is a principle of common law that school districts and other political corporations charged with the management of public property have the implied power to protect such property by insurance or otherwise.

It follows that the school boards, trustees and other officials have in their discretion the right to insure in mutual companies.

Country Life Makes Big Gain in 1931

Nineteen Counties Have Made Their Year's Quota

THE following counties and general agents have accomplished their 1931 full year's quota already this year: Bond Co.—H. O. Hinkley; Boone Co.—K. W. Cleland; Carroll Co.—D. R. Lower; Clinton Co.—W. G. Ackermann, R. J. Foehner; DuPage Co.—Donald Auble; Effingham Co.—H. O. Henry; Fulton Co.—Claude Hicks; Greene Co.—L. R. Lee; Henderson Co.—W. A. Stevenson; Henry Co.—D. P. Robinson; Lawrence Co.—W. H. Nuttall; Lee Co.—F. W. Peckham; McDonough Co.—G. O. Chenoweth; Mercer Co.—Mark Foster; Pope Co.—M. J. Koch, Paul Blatter; Schuyler Co.—Earl Payne; Wabash Co.—H. H. Glick; Whiteside Co.—Wm. C. Linker; Woodford Co.—H. W. Bradshaw.

An estimated thirty more will come through before the end of the year, and possibly more than that. The general agents of Country Life are giving the policyholders the very best of service, and they are meeting with wonderful cooperation. No great cooperative move has surpassed Country Life in the favorable response given by the public. Country Life meets a glad hand on every side. This good will is one of the big reasons for its success. Good will and merited confidence are things that money cannot buy. Country Life is proud of its agents who have helped make this splendid showing possible.

How to Name Beneficiary in Your Life Policy

PEOPLE invariably make the mistake of naming only one beneficiary in a life insurance policy. Should the beneficiary and insured both be accidentally killed, it usually involves the paying of a death claim that must be probated, with the accompanying probate costs. It is much wiser to name a first beneficiary, a second beneficiary, and even a third beneficiary, so that the contingents may enjoy the benefits of a life insurance policy without additional cost. the money being paid directly to them in the event the first named beneficiary does not obtain.

There are options of settlement which should be talked over with the agent, of how the beneficiary should receive the money. The insured may provide that part of the money be paid in cash and part of it in monthly installments. Invariably a widow inexperienced in the handling of money, is a target for every fly-by-night security salesman who can get her name. The losses of life insurance funds paid to a widow run beyond 80%, unless the funds are held in trust and apportioned in installments to the beneficiary. However, the life insurance company has no objection to paying the money in cash. Three and one-half per cent interest is paid on funds left in trust, and such other interest dividends as the Company may apportion.

Send in Names of Prospects

COUNTRY LIFE will send an insurance pin to policyholders who send in the name of a prospect. You may have a gold or silver pin with the Country Life tree in the center of it, and the initials I. A. A. in each corner, with Country Life circled about the tree. It is a very beautiful pin. Every policyholder will be proud to have one. Just send in the name of a prospect to whom you believe our agent could sell a Country Life policy. It will be helpful cooperation on your part, will contribute to the further success and achievement of your company, and will be an act of kindness to your neighbor.

$90,000 Death Claims in 1931, $16,500 Sept.

The following death claims were reported in September:

Insured	*Amount*
Helmer Hanson, Kendall Co.	$2,000
Helmer Hanson, Kendall Co.	1,000
Dr. George K. Farris, Johnson Co.	3,000
Jay M. Doty, Winnebago Co.	2,500
Jay M. Doty, Winnebago Co.	1,000
Mahlon John Hohenboken, Knox Co.	5,000
George Loren Sperry, Warren Co.	1,000
William Reulecke, Christian Co.	1,000

The Company immediately sends out claim papers as soon as the announcement reaches the office of the death of an insured. The agent usually offers his services to see that the claim papers are properly executed, to enable the company to pay the claim promptly.

Our claims for the year are approximately $90,000, which is way below the expected mortality. You as a Farm Bureau memeber are interested in the progress of your company, and we want you to know that the business of a life insurance company is to pay death claims.

8 Million New Business 44 Million Now in Force

COUNTRY LIFE INSURANCE COMPANY stands out among all companies this year in its remarkable progress. While most companies are suffering tremendous lapse from cashing out of old policies due to old policyholders needing money, Country Life is in the enviable position of having no policies three years old or over. Therefore, the lure to "cash out" is not present. It is apparent, too, that farmers appreciate life insurance more in times like this than they ever could possibly appreciate it when things are going smoothly.

All but thirteen counties produced business in the State of Illinois for Country Life in the month of September. Premium payments are coming in promptly, and the company's investment policy has proved its soundness. The company has no mortgages, and its bond holdings have fluctuated comparatively little.

It may be a satisfaction to the thousands of Country Life policyholders to know that the company's bonds are largely of non-taxable character, mostly Governments and Municipals. The company finds itself in a most advantageous position to thrive, and it should stand at the top of the companies for millions gained, at the end of 1931, for its lapse is indeed very small. Our total in force is in excess of $44,000,000. With this fine momentum we should finish the year with a most satisfactory gain.

Keep Insurance in Force You May Need It Tomorrow

YOU may think that you can afford to let your policy lapse this year. You may feel that this will not be the year you will die. But you may guess wrong. Thirty-five thousand people thought that way and were wrong in 1930. Thirty-five thousand people died who had just lapsed their policies, making it impossible for life insurance death claims to be paid.

This would be a bad year for anything to happen, certainly a worse year than normal. There will be greater need for your insurance money than ever, if the unexpected should happen. If you have lapsed your policy, just sign a Personal Health Certificate, which you can get at the Farm Bureau office, and send in your premium. We will make haste to get you reinstated. If you need time, ask for a premium extension.

"Poor Bill—over 65 years old and still working hard—

"I would probably be out in the field, too, if I didn't have a *Country Life Insurance Policy*. Now we're not a burden to anyone—we can travel—I can go fishing—just enjoy the leisure we're entitled to."

Look Ahead to YOUR Old Age

Give some thought to *your* future—*now*. Crop failures may come—prices may be low—but a Country Life Insurance Pension Policy will protect you. In case of financial stress, you can borrow money on your policy.

When old age arrives, it will pay you an income.

When you are gone it will take care of your family.

The cost of Country Life Insurance is small—the lowest old line legal reserve rates.

Take care of your future now. . . . Ask your County Farm Bureau to tell you all about the benefits of Country Life Insurance.

Do it now!

Country Life Insurance Co.

Set Up Corn Credit Machinery

State Department of Agriculture Acts to Carry Out Grain Storage Act

AS we go to press, headquarters for the National Corn Credit Corportion are being established in the Fisher Building, Chicago, and the necessary machinery is being set up to make loans to Illinois farmers on corn sealed by the state in cribs on the farm.

Harry Laird of Des Moines, Iowa, was employed as general manager of the Corporation at a meeting of the directors on November 5. Mr. Laird arrived in Chicago November 9 to open headquarters for the Association and set machinery in motion to carry out the provisions of the plan heretofore announced.

Directors of the Corporation chosen at the meeing on November 4 when incorporation papers were forwarded to Springfield, include George S. Milnor, president; Earl C. Smith, vice-president; George A. Ranney (International Harvester Company), secretary; C. E. Huff, John H. Hogan (Continental Illinois Bank & Trust Company), C. E. Hearst of the Iowa Farm Bureau, and Mark Woods, Nebraska farmer and banker.

$2,500,000 Authorized

The National Corn Credit Corporation has authorized capital stock of $2,500,000. It is incorporated under the provisions of the Illinois Agricultural Co-operative Act of 1923.

The Federal Farm Board through the Farmers National Grain Corporation has set aside $500,000 for stock in the Credit Corporation which will be immediately available. This is being matched by stock subscriptions from the following:

Continental Illinois Bank & Trust Co., First National Bank, Central-Republic Bank & Trust Co., Harris Trust & Savings Bank, Northern Trust Co., International Harvester Co., John Deere and Co., Sears Roebuck & Co., Montgomery Ward & Co., Armour & Co., Swift & Co., Cudahy Packing Co., Wilson & Co., Quaker Oats Co., Standard Oil Co. of Indiana, and other interests.

Arrangements have been made with the Federal Intermediate Credit Banks of St. Louis and Omaha by which the credit corporation will have available through rediscount from eight to ten million dollars for loans to producers of corn.

Latest word from Springfield indicates that Stuart Pierson, State Director of Agriculture, has been making progress toward organizing the necessary machinery throughout the corn producing counties to carry out the Illinois Grain Storage Act. Committees to administer the Act under the supervision of the State Department have been selected in most of the principal corn-producing counties.

County sealers at this writing are being appointed to inspect the cribbed corn, measure it, and issue warehouse certificates to the owner for use as collateral in obtaining a loan through the Credit Corporation.

Loans Payable July 15

Present plans provide that all loans secured from the National Corn Credit Corporation will be due and payable July 15, 1932, although such loans may be paid off at any time prior to that date. Forms will be available at County Farm Bureau offices as soon as they can be prepared, printed, and delivered. All applicants for loans must be owners of the corn on which the loan is desired and such corn must be free of liens, or else waivers giving priority signed by the lienholders must be given before it will be accepted as collateral.

The procedure for securing a loan, according to plans developed to date, will be as follows: The prospective borrower will first make application at the County Farm Bureau office to have his cribbed corn inspected, and if found in satisfactory condition, measured and sealed by the local sealer. He will receive a warehouse certificate setting forth the amount of corn under seal. It is contemplated that he will then proceed to the local bank acting as agent for the Corn Credit Corporation, and fill out an application for a loan. The prospective borrower will then sign a note for the amount of the loan and attach the warehouse receipt as collateral. The local bank will transmit these papers to the office of the National Corn Credit Corporation in Chicago where the general manager will receive the application and if found satisfactory will advance the money.

May Pay Off Loans

The National Corn Credit Corporation under the agreement between the borrower and said Corporation, will have authority to designate the marketing agency through which the corn is to be sold so long as the loan is unpaid.

The borrower may pay the loan off at any time on or before July 15, 1932, in which case he may sell the corn anywhere he pleases.

Those interested may communicate with the National Corn Credit Corp., Room 708, Fisher Bldg., Chicago. The rate of interest on loans will not exceed 6½% unless the money market materially advances. It is contemplated that loans will be made at from 65 to 75% of the farm market value of the corn at time of filing application. Indications are that local banks will make many loans direct, but if they do not desire to make the loan direct, the application accompanied by warehouse receipts should be sent through local bank to National Corn Credit Corp.

Legislature Meets to Consider Tax Problems

Speakers Announced for A. F. B. F. Meeting Dec. 7-9

AMERICAN Farm Bureau Federation officials are preparing for a big delegation of Illinois Agricultural Association members at the national convention in Chicago, December 7 to 9, according to word from headquarters. Round trip railroad rates of a fare and a half on the identification certificate plan will prevail from every railroad station in the state with return limit of 30 days.

"In view of the accessibility of Chicago to every section of Illinois," says Executive Secretary M. S. Winder, "it should be possible for a big delegation of I. A. A. folks to attend. It will be a splendid opportunity to make contact with men and women from all over the nation."

Sam H. Thompson, former president of the I. A. A. and later of the A. F. B. F., now a member of the Federal Farm Board, has sent word that he will attend. Frank O. Lowden, former governor of Illinois, will speak on taxation.

Federal Judge William S. Kenyon of Fort Dodge, Iowa, has accepted an invitation to speak. Farm Bureau members will recall him as the United States senator, who in 1921 organized the farm bloc in Congress. Two other speakers will be Professor Benjamin Hibbard of the University of Wisconsin and Professor M. L. Wilson of Montana College of Agriculture, each of whom will speak on the national land utilization policy. Mrs. Frank Evans of Utah, wife of President Hoover's latest appointee to the Federal Farm Board, will be the banquet speaker.

Farm Bureau women are planning two conferences to precede the main sessions of the convention. These conferences both open on December 4. Members who arrive early will have the opportunity to visit the International Livestock Exposition which closes December 5.

Long Truck Hauls Expensive

The Champaign County Farm Bureau is advising its members against hauling hogs long distances in trucks. "Hogs hauled long distances in trucks cannot be marketed with nearly as much profit as hogs sold through our own county livestock marketing association," the Farm Bureau says.

Delegates to A. F. B. F.

Delegates from Illinois to the annual convention of the A. F. B. F., in Chicago December 7-8-9, were selected at the October meeting of the I. A. A. directors. They include Earl C. Smith, A. R. Wright, Charles S. Black, and Samuel Sorrells.

Alternates are: C. E. Bamborough, M. G. Lambert, A. B. Schofield, and Charles Marshall.

Predicts Low Dairy Cow Prices for Next 5 Years

The average price of dairy cows in New York state dropped from $135 in September two years ago to $74 in September this year, according to M. C. Bond, Cornell economist. However, he points out that cow prices in New York are still 29 per cent above pre-war, while cow prices for the country as a whole are 5 per cent below pre-war.

He predicts that this condition will further depress the price in New York because cows are being moved into the state from other sections. It is his opinion that dairymen who hold cows for higher prices will be disappointed, as improvement is not due until about 1936 or 1937, judging from the past.

Winning County Huskers Set for State Meet

Carl Seiler, 28, a lefthander, and former world's champion corn husker, won the recent Knox county contest when he husked 29.78 bushels in eighty minutes on October 28. Hartwick Olson, last year's title winner, was second with 27.82 and William Engstrand was third with 27.32 bushels. Seiler's world's record was 36.82 bushels.

Ray Snyder of Henry won the annual Marshall-Putnam husking contest by turning in 32 bushels and 19 pounds in the eighty minutes allotted. Harold Carter was second, C. O. Johnson was third, and Ernest Rehn was fourth. Johnson is lefthanded.

Co-Op. Grain Shipments In Illinois Are Gaining

Members of the Illinois Grain Corporation shipped three-quarters of a million bushels of grain to the Farmers' National Grain Corp. during October in spite of the fact that grain receipts at the terminal markets were light during the month. This brings the total volume to nearly 7,500,000 bushels.

Reduce Property Taxes, Is Plea of the People

Program Recommended by Governor's Tax Conference Up For Consideration

REORGANIZATION of the taxing machinery toward restoring the credit of Chicago and Cook county, and new sources of revenue to replace part of the heavy burden of taxation on real estate, now being considered by the legislature, are among the more important recommendations made by the Executive Committee of the Governor's Tax Conference on Friday, October 30. The Conference adopted the report in Chicago the following day. President Earl C. Smith is a member of the Executive Committee and served as chairman of the sub-committee on permanent tax relief. John C. Watson met with the group regularly and assisted in preparing the report.

In place of the present Cook county board of assessors and board of review it is proposed that a centralized body of three members be created, "one of whom to be designated as secretary should be the county assessor with full and complete charge of the entire office and all employees thereof."

Earl C. Smith

The other two members of this body which will be known as the Board of Assessment and Revision, are to act in a reviewing capacity to hear complaints filed against valuations made by the assessor. It is proposed that the Board of Assessment and Revision shall be appointed by the president of the county board by and with the consent of the county commissioners. The county board may remove any member for malfeasance or gross neglect of duty in office. The terms of office shall be four years.

Remove for Cause

A bill proposed by the Tax Conference would give the State Tax Commission authority to remove local assessing and reviewing officials for cause. Its purpose is to prevent repetition of assessment delays in Cook and other counties. Other proposed measures would give the affected municipalities authority to finance delayed or deferred tax payments, to validate outstanding tax anticipation warrants, and to pro-

vide methods of meeting obligations already created.

That part of the report providing for new sources of revenue to replace part of the heavy burden on real estate continues in part as follows:

A. "EVERY CONSIDERATION POINTS TO THE CONCLUSION THAT THE TIME HAS COME FOR THE ENACTMENT OF A STATE INCOME TAX. THE FAIREST DISTRIBUTION OF GOVERNMENTAL BURDEN YET DEVISED HAS BEEN ACCOMPLISHED BY THE FEDERAL INCOME TAX."

The report declares that income tax laws have been enacted in Arkansas, Delaware, Georgia, Massachusetts, Mississippi, Missouri, New Hampshire, New York, North Carolina, North Dakota, Oklahoma, Oregon, South Carolina, Tennessee, Virginia and Wisconsin.

The income tax proposed in the recommendations is to be paid in quarterly installments, staggered with respect to the federal income tax payments in order to distribute the load throughout the year.

It is estimated that the bill will produce at least $30,000,000 of revenue per year.

To School Fund

It is proposed that the money so derived be used to replace taxes now levied on property for the state distributive school fund; second, for an equitable distribution of the remainder between Cook county and the rest of the state; and third, for distribution among the elementary school districts within counties.

J. C. Watson

The chief features of the bill are as follows:

1. Exemptions: Single persons, $1,000; married couples, $2,000; children under 18 years and other dependents, $200 each. A filing fee of $2 to be paid by every single person with a net income of $1,000 or more and by married couples with net income of $2,000 or more.

2. Rates on Taxable Net Income: 1% on $1,000 or less; 2% on $1,000-$4,000; 3% on $4,000-$9,000; 4% on $9,000-$16,000; 5% on $16,000-$25,000; 6% on all above $25,000.

3. Deductions and offsets: The usual deductions are allowed from gross income in determining net income. *In addition, there may be credited against the tax computed upon net income the amount of taxes paid or accrued which have been imposed by state or local governments in Illinois, but not taxes of a character to increase the value of the property assessed.* The amount of such credit shall not exceed that proportion of the computed tax, which the net income derived from the tax-paying property bears to the total net income. Owners of their homes are allowed a credit against computed tax on net income of taxes paid on such homes, not exceeding in amount $100.

4. Payments to be in quarterly installments, beginning April 15, 1933.

Tobacco Tax

Other proposals recommended are a tax upon the sale of manufactured tobacco and tobacco products. It is estimated that revenues approximating $18,000,000 annually would be available from this tax. As in the case of the income tax, these revenues would be used to abate property taxes as described above.

The bill provides for a 20 per cent tax upon the retail selling price of all forms of manufactured tobacco, effective July 1, 1932; to be administered as a stamp tax; the revenues to be paid into the public school fund.

It is suggested also that additional revenue may properly be provided by increasing the license fees for certain heavy trucks and busses to put such fees on a parity with those charged in other states. The revenues from this source, estimated at approximately $800,000 per year, would be used in abatement of property taxes. The proposed additional tax covers heavy trucks and trailers with a gross weight including maximum load in excess of 15,000 pounds.

The state income and tobacco taxes, it is recommended be administered by a new Department of Revenue. Other proposed legislation provides for details in connection with making the income and tobacco taxes real replacement taxes rather than additional taxes.

Legislation to provide better enforcement of the personal property tax particularly in Cook county is recommended under which an applicant for a state automobile license would be compelled to present a receipt showing payment of personal property taxes on the car.

It is also recommended that the 57th General Assembly in its first special session adopt a joint resolution calling upon each taxing body in the state to reduce its expenditures and tax levies to conform to the general reduction in commodity prices and living costs.

The report concludes with the recommendation that a special committee be appointed to prepare a definite program looking toward the submission in the next regular session of the next General Assembly of amendments to modernize the revenue provisions of the state constitution.

The report was signed by the following: Joseph K. Brittain, chairman; Philip R. Clarke, Omer N. Custer, Samuel Insull, George F. Nixon, Victor A. Olander, Fred W. Sargent, William H. Sexton, Earl C. Smith, S. E. Thomason, Ray Wantz and Douglas Sutherland, secretary.

WHO'S WHO
EXECUTIVE COMMITTEE
GOVERNOR'S
TAX CONFERENCE

Joseph K. Brittain, chairman, is vice-chairman of the Chicago Association of Commerce; Phillip R. Clarke, president, Central-Republic Trust Company; Omer N. Custer, chairman, Illinois Tax Commission; Samuel Insull, owner of extensive utility properties; George F. Nixon, president, Chicago Real Estate Board; Victor A. Olander, secretary, Illinois State Federation of Labor; Fred W. Sargent, president, Chicago & Northwestern Railway; Wm. H. Sexton, corporation counsel for Chicago; Earl C. Smith, president, Illinois Agricultural Association; S. E. Thomason, publisher Chicago Times; Ray Wantz, Rockford manufacturer; and Douglas Sutherland, secretary, Civic Federation of Chicago.

Singers Represent Illinois In National Contest

The Lenox mixed quartet of Warren county, and the Illini male quartet of Warrensburg, Macon county, winners in their respective divisions at the state contest held during Farm and Home Week at the University of Illinois last winter will represent Illinois in the national A. F. B. F. contest in Chicago, December 7-9.

The Federation reports that there will be entries from a large number of middle-west states.

Save Money on Forms

The Illinois Agricultural Auditing Association has made arrangements with printers and supply houses to purchase all kinds of accounting forms, binders, order books and other standard record equipment for member oil companies at a 20 per cent discount, according to Manager F. E. Ringham. This discount is available only to member co-operatives and can be had only when orders are placed through the auditing association.

Saves Policyholders $100,000 Annually

That's How the Farmers' Mutual Reinsurance Co. Serves Illinois Farmers

THE organization of the Farmers' Mutual Reinsurance Company in the fall of 1925 is significant for several reasons. It is not that farm mutual insurance companies were new at that time; in fact, they were among the oldest ventures in co-operation. Township and county fire mutuals were organized in Illinois before the Civil War. The Farmers' Mutual is, however, the first state-wide mutual to be owned and operated by Illinois farmers.

The outstanding feature of the reinsurance company is that it provides a needed reinsurance service to protect the township and county mutuals against unusual losses at low mutual rates. This was the I. A. A.'s first step toward developing a broad insurance-at-cost program which was later to produce the Illinois Agricultural Mutual and Country Life Insurance Co.

The I. A. A. first took up the insurance problem seriously in 1924. It held to the belief that the organization should work with the local fire and windstorm mutuals and attempt to expand and strengthen their services.

Work Together

Late in 1924 the I. A. A. insurance committee met with the president and secretary of the Illinois Association of Mutual Insurance Companies, together with officers of various farm mutuals, to consider the problem. It was the unanimous opinion that a plan to provide reinsurance for the smaller companies should be worked out.

The following general points were later agreed upon: first, the reinsurance company should be managed by a board of directors selected from officers of various farm mutuals; second, the reinsurance company should supplement the activities of the local mutuals and not compete with them; third, that it should provide a form of reinsurance for the risks carried by the local mutual companies so as to protect them from excessive assessments.

By July, 1925, an active campaign, in charge of V. Vaniman, director of insurance service for the I. A. A., was underway to secure the 200 applications with $500,000 worth of risks necessary to secure a state license. The I. A. A. took charge of field organization work and raised the required amount in a little over a month. The Association also agreed to bear all the expenses of promotion and organization and to grant the company a loan of $10,000 required as a deposit with the state insurance department. The company started operations November 21, 1925.

Manager J. H. Kelker and his secretary, Edythe Lindquist

Hail Added

At first it issued only fire and lightning insurance, but early in the second year hail insurance was added. Today the company writes direct insurance against fire, lightning, windstorm, cyclone, tornado, farm crop hail, and hail damage to buildings, as well as specific reinsurance.

All rural property is accepted for insurance, including farm barns, dwellings, livestock of all kinds, hay and grain in stack, farm machinery, churches, schools, and also property in certain towns and villages in which the owner has agricultural connections. The company does not, however, accept store buildings, public garages, etc.

Specific Reinsurance

The specific reinsurance contract makes it possible for the local mutual companies to cede "specific" insurance to the state company, thus lessening the liability of the mutual company on risks reinsured. The state company will accept an amount on specific risks not to exceed four times as much as the local company keeps. Seventy-two companies have signed the specific reinsurance contract and have ceded to the state company more than $7,000,000.

Fire and lightning insurance rates are based on classifications of property. Farm property falls in one classification, schools and churches in another, and town property in a third. Deductions are given on the cost of insurance for lightning rods, fireproof roof, fireproof walls, fire extinguishers, fire hose attached, and ladder attached so as to afford easy access to the roof. By providing all the precautions the policyholder may reduce his insurance cost about one-third. There are also conditions which add to the regular charges; for instance, there is an extra cost for insuring a building in which stovepipes pass through walls or partitions, or in which a gasoline engine is kept, or where dwelling and barn are within 80 feet of each other.

Wrote $7,066,000 in '31

The company now has a total of $22,600,000 worth of fire and lightning insurance on its books. This amounts to about one-half its entire business. Of this total, more than $7,066,000 was written this year. Some of the insurance is direct and some of it is specific reinsurance ceded to the company from local mutuals. The direct insurance is written by the regular insurance agents of the County Farm Bureaus. Losses are settled by local adjusters.

J. H. Kelker, manager of the company, estimates that farmers save about $50,000 annually on fire insurance in

the state mutual as compared with the cost of old line insurance. This takes into consideration the assessments which members have paid during the last two years. Including these assessments the cost to farmers is still one-third less than the old line companies charge.

Fire Prevention Work

Under the direction of V. Vaniman, director of insurance service for the I. A. A., fire prevention campaigns have been conducted each year to reduce the amount of fire losses to Illinois farmers. This campaign is based on the principle that many fires are preventable and can be avoided with due care.

"A fire is nobody's gain and everybody's loss," said Kelker. "When a fire occurs, it means that the neighbors will have to stand the loss, because it is they who eventually pay the damage. The insurance company merely acts as an agency for collecting and distributing this money."

Windstorm, cyclone and tornado insurance is written on all property except that in commercial use. The reinsurance company now carries on its books a total of $14,600,000 worth of insurance of this type. It protects itself against excessive loss by reinsuring with other companies. This year the company has written $7,180,000 worth of windstorm insurance, saving Illinois farmers an estimated $36,500 on the basis of old line rates.

Reinsure Hail Risks

The company issues two kinds of hail insurance, protection to growing crops and protection to buildings. In 1931 the total crop insurance in force was $2,440,000 and the building insurance was $1,580,000. Hail insurance on crops expires Oct. 1 and must be renewed each spring. Exactly $426,000 of hail insurance on buildings was written this year. All hail insurance is reinsured in other companies 100 per cent. The Farmers' Mutual does not bear this risk without protection.

Hail claims are settled by adjusters of the companies in which this company reinsures. They visit the scene of the hail storm, appraise the loss and recommend the amount of damages due. These men re experts at judging crop losses. This year the Farmers' Mutual paid hail claims in 25 counties out of the 76 having insurance with the company. Hail insurance in the state mutual costs farmers one-third less than the lowest old line rates, saving an estimated $22,000 for Illinois farmers this year.

The Farmers' Mutual Reinsurance Company is owned by its policyholders. It is not a stock company. Its control is in the hands of a board of directors, consisting of nine men, all of whom are officers and directors of local mutuals. It has ledger assets of $135,000 which is equivalent to that much capital stock. Its surplus to policyholders is $42,500. It is a legal reserve company. The total annual saving of farmers who insure with the state company is estimated at more than $100,000.

Illinois Gets Millions For Federal Aid Roads

Illinois received approximately $4,500,000 out of the $105,875,000 Federal aid road funds which were apportioned to the various states by Secretary of Agriculture Arthur M. Hyde on October 15.

New York and Texas are the only states to receive larger sums than Illinois. The apportionment was made on the basis of area, population and mileage of rural post roads. The funds were distributed two months earlier this year, so states could get an early start on plans for next season's construction.

Cull Out Poor Cows

Heavy shipments of dairy cattle into New York State are reported by Cornell University "because dairy cow prices there have been approximately 29 per cent above pre-war, while the average price for the United States on the whole is about pre-war level."

Professor Bond advises dairymen to cull out the poorest producers and save only the heifers from the outstanding cows because there is likely to be a surplus of dairy products during the next four to five years.

Cut Tax Valuations 39 Per Cent in Whiteside

The Whiteside County (Ill.) Board of Review lowered tax valuations $5,437,015 this year compared with 1930.

Following is a comparison of the values of lands, lots and personal property for 1930 and 1931:

	1930	1931
Lands	$22,638,839	$18,937,650
Lots	13,684,362	12,449,317
Personal	7,680,722	7,179,914
Total	$44,003,923	$38,566,908

These figures include all property except railroads and capital stock. It is estimated that this means a cut of approximately 39 per cent in county taxes, and 12 per cent in state taxes this year.

The county tax rate was lowered by the county supervisors from 25 cents on the $100 to 16 cents at their meeting in September.

Illinois Mothers Beat Others in Raising Babies

The infant mortality rate in Illinois is now more than 14 per cent lower than that of the nation as a whole, it has been announced by the State Department of Public Health.

For the year 1930 the death rate among infants was lower in only seven other states, none of which has half the population of Illinois. For each 1,000 births in the United States in 1930 there was 64 deaths among infants. In Illinois the infant deaths per 1,000 in 1930 was 56.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

The Farmer as Speculator

SELL your crop when it is produced, take what you get and go ahead producing more.

Such is the advice the leading editorial of the Chicago Tribune of Oct. 30 handed out to farmers while criticizing them as "speculators" for holding 16 to 18 cent corn on the farm for a better market.

Refusing to sell corn for one-third to one-fourth its cost of production may be speculation, but if so the odds were in favor of the speculator, as events since have proved. At this writing corn prices have advanced approximately 15 cents a bushel or 83 per cent since the I. A. A. first proposed a plan to help finance growers who desire to hold corn for a better market.

Holding corn, wheat, hogs, cattle, clover seed, alfalfa hay, or any other farm crop for a higher market all involves risk. But that risk is greatly diminished when going prices are far below cost of production. It is an economic fact that production of commodities is not maintained very long when prices fall below the cost of producing them.

The I. A. A. may be wrong, but if so, it is making no apologies for the effort it has made to assist producers in getting a higher price for their corn.

An Opportunity for Statesmanship

PERHAPS the outstanding feature of the Governor's Tax Conference report now being considered by the legislature in special session is its open admission that the general property tax has broken down; that it no longer is adequate to finance government. This situation the Illinois Agricultural Association predicted years ago. The depression only hastened the process, revealed the glaring weaknesses of a taxing system which levies burdensome assessments regardless of ability to pay.

The General Assembly, backed by a state-wide group of prominent citizens representing all interests, now has a great opportunity to exercise real statesmanship; to initiate some long-overdue revenue reform. Bills as drawn if enacted into law guarantee that revenue derived from new sources will be used to reduce taxes now levied on property to the extent of approximately $50,000,000 annually. The new measures include an income tax and a sales tax on tobacco, both of which recognize the cardinal principle of taxation based on ability to pay.

Constructive recommendations have also been made toward reducing the cost of government as well as distributing the burden more equitably. The people of Illinois owe a debt of gratitude to the executive committee of the Tax Conference for its tireless four months of effort in trying to find solutions for pressing problems of government. Through their representatives at Springfield they can show their appreciation by supporting its commendable program.

International Livestock Show

MORE than 12,000 choice farm animals will fill the 22 acres of exposition halls and show barns at the coming International Livestock Exposition November 28 to December 5 in Chicago, Manager B. H. Heide announces.

Pure bred herds have been entered from Canada to the Gulf, from the Atlantic to the Pacific, and samples of wheat are en route to the International Grain and Hay Show from western Australia.

The Exposition promises to be outstanding in every respect and will be worth the time and money of every producer who has not seen this brilliant spectacle.

LAND
AIR
WATER

379.05 MI. PER HOUR

77.39 MI. PER HOUR

AIR—379.05 miles per hour—held by Lieutenant J. H. Stainforth, Englishman—1931 Schneider Cup Races — flying seaplane — this exceeded the former record by 47 miles per hour.

LAND—231.36 miles per hour—established March 11, 1929, by Sir. H. O. D. Segrave of England—driving 900horse power Golden Arrow car over Daytona Beach (Fla.) course. This record exceeded by 23.81 miles per hour the time made by Ray Keech on the same course April 22, 1928.

231.36 MI. PER HOUR

WATER—77.39 miles per hour—time made by Gar Wood in Harmsworth trophy races, September, 1930. This record was more recently supplanted by Kaye Don, English speedster, when he made 103 miles per hour against time at Buenos Aires. Don made 93.17 miles per hour at 1931 Harmsworth trophy races in September in a preliminary heat, but was disqualified.

Country Life

OUT TO SHATTER

ANOTHER WORLD RECORD

NOW COUNTRY LIFE

IN MILLIONS

Here's What We Have ALREADY Accomplished

1. ORGANIZED an old-line legal reserve life insurance company owned and controlled by the Farm Bureau members of Illinois.
2. Wrote $12,000,000 of paid for business the first 30 days of the company's existence.
3. Rounded out the first year with more than $19,000,000 of life insurance in force.
4. Finished second year in business with $35,500,000 of insurance in force.
5. Paid $45,000 in dividends to policyholders one year earlier than the policy provides.
6. Made the lowest net cost record in the legal reserve life insurance field.
7. Made low lapse record for the second year of any company when more than 95 per cent of our policyholders paid their premiums.
8. Increased reserves from 1929 to 1930 approximately 500 per cent.
9. Death rate last year only 26 per cent of expected mortality with $35,500,000 of paid business in force.

Loyalty and Co-operation Did It

THIS astonishing record by a company less than three years old was made possible only by the loyalty and co-operation of the 60,000 Farm Bureau members in Illinois. No other company ever launched in this field can point to such a record. This splendid achievement is a glowing tribute to the ability of Illinois farmers to do things for themselves.

Country Life is a great co-operative enterprise. So many have contributed to its success. In less than two years the company was organized with 94 corporate county agencies and more than 1,000 general and special agents.

EVERYONE

OUT TO TOP THE LIST

GAINED IN 1931

We Can Do It With Your Support

We were 47th out of 338 companies in 1930 for actual millions of life insurance gained.

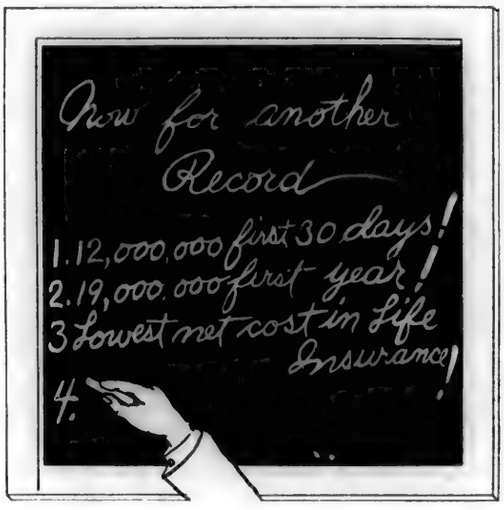
With your help we can be first by the end of 1931.

WE want to win. We want to make a new record. We can do it if you will help. We have a great opportunity. Country Life is in an enviable position because it is young, sound, and growing rapidly.

Other companies are suffering great loss through the cashing out of policies. This is not true of Country Life because our policies are only one and two years old and as yet have little cash value. Thus, there is little incentive for policyholders to cash out.

Country Life is adding new business every week. We have been fortunate in suffering comparatively little lapse, in securing a high percentage of premium payments.

How You Can Help



Now we must continue our forward march, blazing new trails. Here's how you can help:

1. Keep your policy in force.
2. If you have lapsed get your insurance reinstated at once.
3. Tell your neighbor about Country Life's low net cost insurance.
4. Place your spare money in more life insurance where it will be safe.
5. Call your local agent and let him tell you how life insurance can solve your protection and savings problem.

Country Life's future gains in volume of insurance in force will be reflected in lower net cost. The company's success will be each policyholder's success. Maximum dividend payments consistent with safety is Country Life's goal. A steady increase in volume will send your company on to greater heights in the life insurance field.

CAN HELP

HELP COUNTRY LIFE MAKE THIS RECORD

WE can top the list of companies in millions gained in 1931 only with your support. You will buy life insurance some time. You might as well do it now. Volume means low net cost. Help us set the pace and by so doing help yourself.

Country Life policies offer you everything that is desirable in life insurance. In Country Life you get:

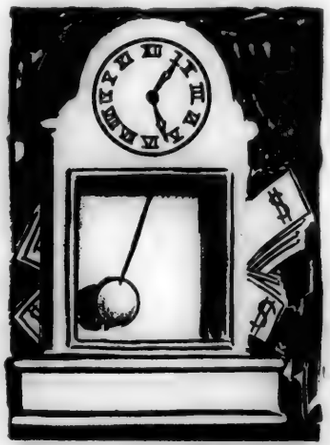
1. Security—it is a legal reserve company.
2. Lower net cost.
3. A choice of a number of popular policies.
4. Money for old-age income.
5. Money to pay off the mortgage.
6. Cash for the education of your children.
7. Security for your family, home, and estate.
8. A safe depository for your savings.

EDWARD A. O'NEAL, president, American Farm Bureau Federation, says:

"Country Life Insurance Company is an outstanding example of a successful co-operative farm enterprise. Its achievements within a period of less than three years stands forth as a shining light of encouragement to the Farm Bureau movement throughout America."

EARL C. SMITH, president, Illinois Agricultural Association, says:

"The record of Country Life Insurance Company in making legal reserve life insurance available to farmers at low net cost speaks for itself. We have every reason to believe that our company will continue its fine record of progress and accomplishment. Now is the time for farmers to present a solid front in all their co-operative endeavors. Support Country Life in its efforts to achieve greater accomplishments."



LAWRENCE A. WILLIAMS, manager, Country Life Insurance Company, says:

"After 20 years' experience in the old-line life insurance field I can say that Farm Bureau members of Illinois have surprised the life insurance world with their remarkable achievement in organizing and developing this company to its present place in so short a time. What has been done in Illinois has never been equalled before anywhere in the world. The high ideals, vision and energy which prompted the launching and development of this company had much to do with its success. Let's all work together and make this new record."

ONE PLACE YOUR MONEY IS SAFE!

Buy Country Life Insurance Now Because:

COUNTRY LIFE is a safe place to put your money. It is an old-line legal reserve company operating under the insurance laws of Illinois. While millions of dollars were squandered on bad investments by the American public, their money invested in life insurance is safe and secure ready to help them meet any emergency.

Foolish people put their money behind the clock or perhaps in an old tin can and bury it. Wise people invest a substantial part of their savings in old-line life insurance like Country Life.

Life insurance is one of the safest forms of investment known.

During periods of panic and depression legal reserve life insurance companies have stood like a rock, secure and strong. Life insurance is the one protection and investment salvaged by many families out of financial wreckage.

Help Country Life take the lead in millions of business gained in 1931. We have a great opportunity. We can do it with your help.

You are going to increase your insurance some time. DO IT NOW!

MARK YOUR CALENDAR

Co-Op. Buying Should Be Recognized by Gov't.

E. D. Lawrence Discusses Distribution, and Oil Company Policies At State Meeting

GOVERNMENT encouragement of co-operative buying associations as well as selling organizations, and amendment of the federal farm loan and the Agricultural Marketing Acts to recognize co-operative buying were recommended by E. D. Lawrence, president of the Illinois Farm Supply Company at the company's annual meeting at Bloominngton, October 14. Mr. Lawrence lauded the member companies on their fine achievements and pointed out that Illinois farmers would no longer accept the doctrine that co-operative organizations should confine themselves to selling alone.

E. D. Lawrence

"No small part of our difficulties," he added, "are due to the high cost of distribution. Our problem is one of getting nearer the wholesaler as well as of getting nearer to the consumer."

Dr. Warren Says

Quoting Dr. George F. Warren of Cornell University, he said: "Most manufacturers buy at wholesale prices, which are low, and sell at wholesale prices, which are also low. But in general agriculture buys at retail prices, which are high, and sells at wholesale prices which are low."

Again quoting from the same authority: "If the government wishes to encourage co-operatives, it should encourage buying associations as well as selling associations. The intermediate credit bank and Farm Board acts should be amended so as to clearly recognize co-operative buying."

Lawrence pointed out that the year closed with 11 new companies compared with 17 the year before; that the period of rapid expansion is approaching an end. Of the 95 counties of the state having Farm Bureaus, 75 are now providing their members with Illinois Farm Supply Company products.

Credit a Problem

Referring to the fact that the absorbing problem for all companies is the matter of credit, he said, "Credit extension costs money, and is by no means a legitimate cost item in our business, since we are selling goods at cost. This is not a new and heartless doctrine. It simply says that he who has no money cannot buy. This is a fundamental rule of business from which it will be unwise, if not disastrous, for us to depart. There are established institutions whose business it is to loan money. Ours is buying and selling. Let us confine ourselves as closely as possible to this field.

"Our next move should be to establish more firmly and to bind together more securely our widespread group of member companies. We have made progress in establishing uniform selling prices. We all recognize that each company has its own problems and under stress of sharp competition the company may feel impelled to cut loose from the prevailing price structure and meet the cut prices of competitors. Such a practice we have strongly urged against.

Cut Price Policy

"Our selling prices are on a par with those of the most conservative companies doing business in our territory. These prices usually provide a safe margin for operating expenses, and a patronage refund, also allowing for reasonable fluctuations in costs. Therefore any narrowing of this operating margin is done at great risk to future welfare.

"The practical-minded farmer-member can be shown that in any event he will get his products at cost and that any initial saving effected may be at the risk of jeopardizing the future standing of his company. A cut price policy invariably will be reflected in reduced dividends at the close of the year.

"Competition between ourselves is unthinkable, yet it has actually existed in a few instances during the past summer. The solution of this problem largely rests with the manager and board of directors, but ultimately a more positive solution must be found which will prevent recurrence of such instances.

Strength in Unity

"The achievements of the Illinois Farm Supply Company should offer reassurance to those who are doubtful of this type of co-operative organization. So far as our own is concerned, most of that doubt has vanished as time has demonstrated the good faith of those vested with authority. However, that there still linger traces of this feeling is evidenced by the fact that some of the older member companies have never taken steps to bring about a corporate relationship with the State Company through the issuance of a special class of stock, in spite of broad limitations placed upon the power to be exercised under that stock. We think that this action indicates a reservation with respect to a complete co-operative relationship which in the long run is detrimental to the best interests of such member company. I advocate no blind surrender of all rights and prerogatives, but when close analysis reveals that certain prerogatives possess little value in themselves while jealously guarded, yet when surrendered contribute in important measure to insuring the continuation of the ideal of service, then their withholding is most unfortunate.

More Perfect Union

"When this nation emerged from the Revolutionary War as thirteen states, these states had recently been joined together by the Articles of Confederation; and it had required the entire duration of the war to induce all the thirteen colonies to yield to a central government for the sake of better management in large affairs which affected them all. But, no sooner were the Articles of Confederation placed in operation than the best statesmen realized that no enduring nation could be built on such a foundation. There was no president. Congress had no real authority of its own. It was only an adviser to the states. Each state became again supreme in its own authority, and commercial warfare between them was disastrous.

"To end this state of affairs, a constitutional convention was called to see what could be done, with the stated purpose of forming 'a more perfect union,' and under that Union we live today. So, let us build our co-operatives for stability and lasting strength, bound together in 'a more perfect union,' confident that in making a contribution to the welfare of the whole, we can best insure the perpetuation of its integral parts."

From 21 to 47

During Mr. Lawrence's administration as president, the member companies increased from 21 to 47 and the volume of business more than doubled. Lawrence was reared on a farm near Hudson, in McLean county, and graduated from the University of Illinois in the class of 1914. He has been active in Farm Bureau work in McLean county where he displayed much ability as secretary of the Farm Bureau and chairman of the committee that established the McLean County Service company which he served as first president. He has been a director in the State Farm Supply Company for five years, two of which he served as president.

Uncle Ab says the wise man will wait until he can afford to gamble; and then he won't need to!

How to Cut Costs of Rural Electrification

Commerce Commission Engineer Believes Lines Can Be Built for $600 a Mile

ADJUSTING construction costs to make possible rural electrification without over-large investments of farmers is one of the major problems now being studied by the Illinois Agricultural Association.

It is the opinion of L. J. Quasey, director of transportation, that worthwhile reductions might be effected in at least three ways: first, the construction of lighter lines; second, elimination of the detailed surveys made by highly paid engineers; third, use of farm labor as far as possible on rural lines.

Howard Mathews

"Many lines are substantially heavier than is reasonably required for rural service," he declared. "Rural electrification should be considered primarily as a pioneering enterprise and whatever reductions can be made in the cost of bringing service to the farm will greatly expedite the extension of rural service.

Overhead Too High

"We observe that the engineering and overhead expense comprise about 17 per cent of the total estimated cost of rural lines. Some of this is undoubtedly necessary, but the type of line required for distribution in rural districts has been quite well standardized and we think it possible to appreciably reduce the engineering expense.

"Construction costs might also be reduced by making the proper allowance for work that could be done on the lines by the farmers themselves. In our judgment this would be practicable in many cases."

J. Howard Mathews, chief engineer, Illinois Commerce Commission, in a recent address to utility leaders stated that studies made by state engineers indicate rural lines adequate in every respect to handle rural service can be built for $600 a mile, and still offer a factor of safety well beyond minimum requirements. He pointed out that companies that once spent $1,500 to $2,000 a mile for rural lines are now building them for $900, which is still too high.

Why So Much?

"We have analyzed some of these costs," he said, "and from a study of the figures it is apparent why there is still such a wide variation in rural line costs. Material costs alone vary from $365 to $1,000 apparently without any particular reason. Labor costs range from $100 to $450, again with no apparent reason.

"The final costs, where low, seem to be explained by good judgment in the selection of material, low overhead and an efficient use of labor. It goes without saying that construction costs should be kept as low as possible because these costs have an important bearing upon rates, as depreciation and interest on the investment are figured in the charges."

Low Cost Best Salesman

"What is needed to increase rural use of electricity on Illinois farms," said Mr. Mathews, "is further modifications in the construction standards and in the rates, which would encourage the extension of lines and permit the transmission of energy at a lower cost.

"From a study of the experience of about 3,000,000 gas and electric customers in Illinois," he said, "I am convinced that while a number of things influence the extent to which an individual will use gas or electricity, there is one outstanding influence which predominates and that is the amount paid per unit of service. There is so salesman like low cost."

Note: This is the first of a series of articles on the subject of rural electrification.

Buy Corn in Iowa Pay 60 Cents a Bushel

A Des Moines, Iowa, dispatch of October 31 stated that a state-wide corn purchasing campaign, resembling the war-time liberty loan campaigns, intended to put from $8,000,000 to $10,000,000 in the hands of Iowa farmers, was started on October 30.

The plan calls for the sale of a million bushels of Iowa corn at 60 cents a bushel, the campaign to start early in November. Every Iowa business man and salaried person receiving $2,400 or more annually will be asked to buy at least one unit of 10 bushels.

On Serum Board

A. B. Schofield, director from the 17th dstrict, was selected by the I. A. A. Board of Directors to serve on the board of the Illinois Farm Bureau Serum Association in the coming year.

Circuit Judge Advocates Acreage Regulation

Advises Farmers to Organize to Secure Fair Prices

GOVERNMENT regulation of acreage planting of the principal farm crops, cotton, wheat, and corn, is recommended by Circuit Judge Louis Bernreuter of Nashville, Illinois, as a solution to the agricultural problem.

"If the Farm Board notices any of these crops running into surplus production, then let it issue an order that the acreage of such crops be decreased a certain percentage at the next planting. If after such reduction a shortage occurs for one year, little harm will be done," according to Judge Bernreuter.

Buy the Surplus

"If with these adjustments of the acreage a small surplus happens to occur, the government should buy it at a fair price on the open market and carry it over to the next year, when it might be needed to cover a shortage. If this plan had been adopted a few years ago," he says, "we would not now have the ruinious surpluses of these crops to contend with. We have enough cotton on hand to last us two years. At the same time an enormous new crop is now standing in southern fields ready to be picked.

Louis Bernreuter

"My plan deals only with the maximum acreage to be allowed each farm. If a farmer sees fit he may put in a lower acreage or none at all. The plan is not to apply to farms below a certain size. Each county is to have its own records and a supervisor. The plan could be gradually extended to other farm products.

Only Sound Solution

"I believe government regulation in all lines is the only sound solution to our own problems. If one of the old political parties were to advocate this idea it would sweep the country in 1932.

"The government must step in and regulate the production of the machine so that the burden of the laborer is lightened. The laborer should not become jobless on account of inventions."

Judge Bernreuter delivered his farm relief ideas before a recent session of the Farmers' Institute at Hamel in Madison county.

Co-Op. Oil Companies Distribute Dividends

Farm Bureau Members Only Share In Cash Returns on Patronage Basis

PATRONAGE refunds returned to Farm Bureau members by the county service companies are especially welcome this fall, reports L. R. Marchant, manager of the Illinois Farm Supply Co.

Whiteside Service Company of Morrison began operations April 1, 1931, and after six months' operation paid the 7% preferred stock dividend, a 10% patronage refund to Farm Bureau member customers, and set aside an equal amount to surplus. Two hundred and sixty-seven customers of the company are not Farm Bureau members. Patronage refund checks were distributed at the annual meeting, October 28.

The earnings of Stephenson Service Company of Freeport during its first six months of operation were sufficient to justify the directors declaring a 12% patronage dividend after setting aside a reserve for the payment of preferred stock dividends and funds to surplus equal to more than 30% of its paid-in capital stock. A 7% patronage was paid at the annual meeting, October 27, and 5% will be paid later. The company has 323 non-member customers.

Adams Service Company of Quincy closed its second fiscal period August 31, 1931, with 1,812 customers. The non-members patronizing the company numbered 1,057. A 20% patronage refund was declared, 10% payable October 24, 1931, and 10% April 1, 1932. Another 10% of the earnings was set aside to surplus.

Rich-Law Service Company of Lawrenceville, operating in Lawrence, Richland and Crawford counties, closed its fiscal year September 30 after eleven months' business. A 15% patronage refund was declared, 10% payable immediately and 5% later, with a good balance to surplus. One Farm Bureau member will receive a patronage refund check of over $220.

Logan Farm Supply Company closed its fourth fiscal year September 30 and at the annual meeting held November 3, the directors announced a 10% patronage refund on gasoline, kerosene, and grease, a 15% patronage on lubricating oil, and 5% on distillate and competitive gasoline. This company placed almost an equal amount to surplus.

Marshall-Putnam Oil Company, one of the pioneer companies of the state, and a charter member of Illinois Farm Supply Company, closed its sixth fiscal year August 31. This company, with a surplus equal to its paid-in capital stock, declared a 24% patronage from the profits of the business for the past year. Eight per cent was paid at the end of the first six months, 8% at the end of the period, and 8% will be paid later.

NOTICE ILLINOIS AGRICULTURAL ASSOCIATION ELECTION OF DELEGATES

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the month of December, 1931, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

During December annual meetings will be held in Brown, Bureau, Clark, Coles, Crawford, Saline, DeWitt, DuPage, Rock Island, Vermilion, Morgan, Edgar, Edwards, Effingham, Henry, Iroquois, Jersey, Johnson, Kane, Stephenson, Wabash, Jackson, Kendall, LaSalle, Lee, Livingston, McLean, Piatt, Randolph, Richland, Union, Champaign and Grundy counties.

Signed,
G. E. METZGER, *Secretary.*
November 15, 1931.

More Cattle on Feed This Year Than Last

Shipments of feeder cattle into Illinois between July and September this year show a considerable increase over the same period in 1930. Many feeders had cattle on hand early in October, but not yet on the feedlot, according to the State Dept. of Agriculture. A considerable number of feeding cattle have been shipped to local points in Illinois where they are held for sale.

With plenty of cheap feed on hand, farmers will feed more cattle this year than last where finances are available. Lighter weight cattle and calves will predominate this year.

Lambs on feed in Illinois October 1 were somewhat less in number than a year ago. Shipments into the state late in the summer indicated an increased interest in sheep, and it is now apparent that feeders plan more feeding than they did earlier.

The amount of feeding that will be done this winter, however, is still uncertain because of the credit situation and the doubt about the number of sheep to be fed on contract.

70 Farm Families' Living Averages $2,489

The value of the living of 70 selected Illinois farm families averaged $2,489 a year during the period 1929-1930, a study made by the State College of Agriculture revealed. "The average expenditure of 18 small families was $3,662 a year," the University report stated. "These averages probably are much higher than those for the state in general in view of the fact that the studies were made with a selected group of thrifty families," it was pointed out.

"Of the $2,489 value for the living of the farm families, $932 was furnished by the farm. Twelve per cent of the total was spent for life insurance and investments. The town families spent 28 per cent of their living expenditures for life insurance and investments.

"Cash spent by the 70 farm families did not necessarily represent the income from the farms on which they lived. Of the $2,489, $1,657 represented the average cash income per family, $420 the average value of raised products used in the home or given away, and $412 the average yearly rental value of the house."

All 88 of the families were American born, and the most usual size of the family was four. Nearly half of the 70 farm families owned the land on which their homes were located, and more than half owned between 160 and 320 acres.

Unorganized Dairymen Disrupt New York Market

Milk being forced into the fluid markets of New York City by small dealers is blamed by the Dairymen's League Co-Operative Association for its reduction of 37 cents per hundred pounds of Class I milk effective November 1.

"It has long been the practice," says the statement issued by the League, "of independent, unorganized producers, and small dealers handling their milk, to dump surplus on fluid markets at any price. This is done rather than manufacture it into by-products. Many of these small dealers have no facilities for handling surplus by manufactured by-products. As a result of their activities the average retail price of loose milk in New York City is nine cents a quart, whereas it should be eleven cents, and much of it sells for even less than nine cents."

"The Dairymen's League Co-Operative Association, and its buyers, have had their choice of either withdrawing from the wholesale market or meeting this kind of competition."

Newspaper Publishes Retraction of Statement

Propagandists Continue Spreading Malicious Untruths About Country Life Insurance Co.

SOME time ago there appeared an article in the Montgomery News, Hillsboro, containing a number of erroneous statements about the Country Life Insurance Company. The information came to the editor apparently from a disgruntled competitive life insurance agent who is finding Country Life's low net cost insurance stiff competition.

The article asserted that a distribution of some $20,000 of dividends was made to the officers of the company; that the Country Life Insurance Co. is a private enterprise and is not owned and controlled by the Farm Bureau in Illinois.

When given a detailed statement of the company's set-up in distribution of dividends, the fair-minded editor of the Montgomery News under date of October 8, 1931, published a retraction as follows:

"Concerning the Country Life Insurance Company:

"On August 27th there appeared in this paper an article concerning the Country Life Insurance Company. At that time the statements contained in the article were believed to have come from an authentic source. We have since learned that the information was erroneous and we are glad to make correction, as it has always been our policy to co-operate with the farmers in their efforts to help themselves.

"Since printing the above mentioned article we have procured information founded upon facts that we are glad to give to our readers:

"The Illinois Agricultural Holding Company was organized as a legal necessity to guarantee perpetual control of the Country Life Insurance Company within the Farm Bureau movement of the state. It has $50,000 of authorized and issued First Preferred Capital Stock, all of which is held by Farm Bureau members and Farm Bureaus in Illinois; $60,000 of Second Preferred, which is all owned by the Illinois Agricultural Association, whose total membership is constituted by all the County Farm Bureau members of the state. The Illinois Agricultural Association also holds all of the Common Stock, namely, 3,000 shares of no par value and which carries the control of the company. None of this common stock can be sold, except by authorization of the Board of Delegates of the Association assembled in an annual or special meeting called for that purpose.

"The total dividends paid by the Country Life Insurance Company to the Illinois Agricultural Holding Company, which owns all of the stock of the Insurance Company, amounts to $20,000, payable: $5,000, February 14, 1930; $15,000, on November 14, 1930. From this amount, a 7 per cent cash dividend, or $3,500, was paid to the First Preferred stockholders as of record February 15, 1930, and $3,500, or another 7 per cent dividend, was declared to holders of record on December 1, 1930, completing the 7 per cent per annum obligations to the stockholders; 14 per cent on the Second Preferred, and 70 cents a share on the Common Stock was declared and paid to holders of record on December 1, 1930, also completing its obligations on this outstanding stock. Practically all of the income of the Holding Company has been paid to the stockholders of the Holding Company and its total operating expense for the year was $270.13, the balance being in the treasury of the Holding Company.

"Before the close of the second year of the Life Insurance Company the Board of Directors declared a dividend to be paid to policyholders upon the payment of their third premium, which was one year in advance of any obligation contained in the policy.

"The manner in which the funds of the Country Life Insurance Company have been conserved is best described in the 1931 Best Life Rating Chart, which shows that the cost of administration per $1,000 of insurance is among the lowest, if not actually the lowest of all the legal reserve life insurance companies covered by their report. This report is supposed to cover all legal reserve companies operating in the United States."

In the meantime energetic enemy propogandists have been giving wide circulation to the original erroneous statement while ignoring the retraction presented above. Members are invited to send in the names of such workers found spreading libelous statements.

CIRCUIT JUDGE ADVOCATES

(*Continued from Page 15*)

In another recent address at Edwardsville, the judge advised farmers to organize as an ultimate solution to their problem. "If you farmers want to improve your condition you must keep on organizing," he said. "You can get permanent relief in this machine age only by organization and limitation of production, and thus be put in a position where you will have some voice in setting the prices of your products."

Accident Prevention Work Gets Results

A decrease in the number of automobile accidents per hundred policies in force in the Illinois Agricultural Mutual Insurance Company during September, 1930 and 1931, in comparison with September, 1928 and 1929, is shown by a recent survey.

Manager A. E. Richardson gives the accident prevention campaigns of the I. A. A. and Farm Bureaus credit for the drop in accidents.

Accidents in September this year were 72 less than they would have been if the accident rate of September, 1928, had continued. They were 89 less than they would have been on the basis of the 1929 rate.

"If we are to assume that each accident costs the company approximately $40," said Richardson, "we find an actual saving of approximately $2,880 on the basis of accidents in 1928 or $3,500 on the 1929 accident rate.

"We find that in 1928 we had 10,082 policies in force and that 2.142 per cent of the policy-holders had accidents during September. In 1929 we had 17,575 policies in force and 2.179 per cent of them had accidents in the corresponding period.

"The first accident prevention campaign was carried on in 1929, but it was not well organized and did not show very great results. In 1930 results were more satisfactory. This year an active campaign was again initiated and at this writing is still in progress. In September only 1.905 per cent of the 30,294 policy-holders had accidents."

The campaigns were held in September because that is the peak month for accidents. December is second high in mishaps according to the company's records.

Waterfowl Show at Quincy

The second water fowl exposition to be held in Illinois will take place at Quincy January 6-10 in connection with the Illinois State Poultry Show, according to the Illinois State Waterfowl Breeders' Association.

Competition in all classes of ducks and geese is open to everyone, states Ruth M. Adams of Alexander, secretary of the organization.

"I saved $96 on limestone, enough to pay my dues for more than six years, because of the services of the Farm Bureau," writes Harvey Stanley, member of the Clay County Farm Bureau.

Country Life Jubilee Saturday Night, Dec. 12

Farm Bureau Safety Club Movement Grows

MEMBERSHIP of the Illinois Farm Bureau Safety Club, which to date has units in more than 70 counties, is now 5,537, according to V. Vaniman. The total is expected to reach 15,000 before the campaign closes January 1. Farm Bureaus are now distributing the 35,000 emblems sent out by the I. A. A. and signing up members.

Cook county has worked out a unique plan for its campaign. Men have been selected in every township and each given 25 emblems and a card on which there is room for 25 names. When the card is filled and sent in, showing that the emblems have been placed on windshields, the appointee's job is completed.

Edwards county worked out a plan in which the insurance men and oil truck drivers engaged in a contest to see who could secure the most members for the club. Mercer county is using the same idea.

Champaign county showed safety films, conducted poster contests among school children, and has arranged to have local units work out their own plans for signing up members. Pulaski-Alexander counties expect to take up the matter in a series of community meetings the latter part of November. Jersey county has already discussed the campaign in community meetings.

Hancock county is considering the installation of brake and mechanical testing equipment. Group meetings are also planned to take up the subject.

Practically every county is putting the idea before Farm Bureau members through the medium of letters and the Farm Bureau publications.

All that is required to become a member is that the car owner have the emblem of the safety club on his car. Only those eligible for auto insurance in the Illinois Agricultural Mutual Insurance Company are eligible for membership. The I. A. A. will give a silver loving cup to the county conducting the best campaign.

Vermilion's Record

The Vermilion County Livestock Marketing Association recently closed its first year of business with a record of $400,000 in sales covering 24,000 head of livestock weighing 6,000,000 pounds.

Livestock is shipped on Tuesdays and Thursdays. Stock went to six terminal markets and 14 packers.

The Martinsville (Clark county) vocational agricultural class made its fifth annual trip to the Indianapolis Stock Yards on October 20 under the leadership of W. G. Baysinger, instructor.

The 14 boys left Martinsville for a cool ride at 3 A. M. on the top deck of a truck owned by Ralph Jeffers, manager of the Martinsville Shipping Association.

The boys inspected the stock yards, went through the packing plant of Kingan & Company, and were entertained at dinner by the Producers Commission Association.

New Directors Chosen By Farm Supply Co.

A new plan of district representation on the board of directors of the Illinois Farm Supply Company was adopted at the annual meeting in Bloomington on October 14. Under the new plan the state is divided into nine districts as follows: northeast, northwest, east, central, west, west central, southeast, southwest, and south.

After an amendment to the articles of incorporation approving this change was unanimously adopted by the stockholders, the directors whose terms of office had not expired tendered their resignations to become effective immediately. These were as follows: A. R. Wright, Geo. F. Tullock, Harry C. Gehring, Grant Broster, W. A. Dennis, and E. E. Stevenson.

The terms of office of the other two directors, E. D. Lawrence and Samuel Sorrells, had expired.

This action enabled the delegates in each district to caucus and nominate a director. The directors elected for the ensuing year were: northeast, T. J. Penman; northwest, G. F. Tullock; east, J. M. Iman; central, E. E. Stevenson; west, F. E. Herndon; west central, F. J. Flynn; southeast, H. R. Neal; southwest, Samuel Sorrells; and south, Grant Broster.

The state championship boys dairy judging team from JoDaviess county placed seventh among 24 at the National Dairy Show last month.

To Select County Queens Seek New World Record

ILLINOIS Farm Bureaus are looking forward to the Dividend Celebration Jubilee on Saturday night, December 12, when county-wide receptions and programs will be held all over the state, announces Manager L. A. Williams of Country Life Insurance Co.

In addition to entertainment by local talent, arrangements have been made for a 30-minute inspirational radio program to be broadcast over station WMAQ, Chicago, beginning at 8:00 p. m.

One of the features of county programs will be beauty contests to select Country Life Queens for the respective counties. Last year 12 counties selected Country Life Queens in similar meetings.

V. Vaniman, director of insurance service for the I. A. A., expects at least 65 counties to hold beauty contests December 12. Winners of county contests will be eligible for the state contest which is expected to be held at the State Fair in 1932. Miss Frances Johnston of Lawrence county is the present Country Life Queen, having been chosen last August in the state contest.

Judges in these contests will consider poise, grace, dignity, style, intelligence, and personality. Since the selection of the Country Life Queen of Illinois at the State Fair, a new meaning of a "beauty contest" has taken hold of Farm Bureau people, Vaniman said.

The Country Life Insurance Company has just announced a campaign to be carried on between now and the end of the year to top the list of companies in millions of business gained in 1931. The company already has several world's records to its credit.

Farm Land Policy to Be Discussed in Chicago

Agricultural land utilization will be discussed in a three-day conference called by Secretary of Agriculture Arthur M. Hyde for November 19 to 21 at Chicago. Representatives of agricultural organizations and land grant colleges will consider the development of a national policy on land utilization.

Sub-marginal land, tax delinquency, farm abandonment, mortgage indebtedness, foreclosed farm lands and other immediate problems will be discussed, Secretary Hyde announced.

"This Will Pay My Dues for Ten Years"

Bond County Member Appreciates I. A. A. Claim Service

TALMAGE DEFREES, president of the Bond County Farm Bureau, recently received a check for $150 in settlement of a claim filed last winter when a car of apples was damaged in transit from Griggsville to Smithboro.

After months of persistent correspondence this settlement was obtained by the transportation department of the Illinois Agricultural Association, although the railroad at first denied responsibility for the damage.

The basis for the claim was as follows: Mr. Defrees ordered a car of apples through the Illinois Fruit Growers Exchange to be shipped standard ventilation. The car was more than four days traveling a distance of 140 miles. It arrived with vents closed and the apples damaged by heating and jolting, to the extent of $160.

At first the railroad denied the claim altogether, asserting that "the loss claimed does not appear to represent a carrier's liability and the claim therefore will necessarily have to be disallowed." An offer of $125 was finally made. This was refused. Later an offer of $150 was accepted by the shipper as a satisfactory settlement.

"The railroad was clearly at fault," said Mr. Defrees in a letter to the I. A. A., "and yet I doubt if individually I could have recovered a cent. This will pay my Farm Bureau dues for 10 years. Talk about service! And think of the men who can't see it!"

The I. A. A. has collected a total of more than $225,000 in loss and damage claims for members since 1920. Last year the association collected 1,000 claims totaling $25,000.

Ogle Gains in Members

Eighty-one new members were added to the Ogle County Farm Bureau in a membership drive in October, placing the total between 990 and 1,000 members. This is a gain of approximately 9 per cent over 1930. Membership is expected to pass 1,000 by the time the sign-up is completed.

Buys Milk in Christian Co.

The Producers Dairy Company of Springfield is now buying whole milk and cream from Christian county dairymen, giving Farm Bureau members an outlet for their dairy products through co-operative channels. The Producers Dairy Company is a subsidiary of the Sangamon County Farm Bureau.

No. 2 of a series of advertisements on I. A. A.--Farm Bureau Services

More than 60,000 voluntary memberships are backing the chain of I. A. A.--Farm Bureau services, each one an important link toward farm equality.

ILLINOIS I.A.A. SERVICE FARM BUREAUS

Organization Can Foster Helpful Legislation

and PROTECT against ill-planned laws

Introduced into our State Legislature each biennium are hundreds of bills, most of which directly or indirectly affect every farm home in Illinois. Some are necessary. Others are likely to harm more persons than they could benefit.

To guard against the passage of legislation harmful to agricultural interests requires constant watchfulness. An aggressive organization with the power of numbers is necessary to maintain this vigilance.

Farmers' Influence Growing

The Illinois farmer no longer stands alone. Representatives of his organization speak with the powerful voice of the 60,000 tax-paying members engaged in farming.

The strength of these 60,000 is great. Yet the combined strength of all the Illinois farmers behind the I. A. A. program would double the effectiveness of every Farm Bureau representative.

Some Needs of Illinois Agriculture

We farmers of Illinois need many things from our lawmaking bodies.

We need a new taxing system based on *ability to pay;*

We need further tariff revision to protect our products against foreign competition;

We need a proper understanding of our cause by the State Legislature to prevent the passage of injurious bills and to obtain measures that will benefit the farming industry;

We need revised transportation costs;

We need favorable credit legislation and better credit facilities.

Every new member adds to the value of the chain of I. A. A.-Farm Bureau Services, and lends support to the fair demands of agriculture. For a better business—a fuller home life—a more secure future—*and a voice in the government that can be* HEARD we must have organization —one man can do nothing alone.

The 60,000 members of the Illinois Agricultural Association have accomplished much. With your help they can do more. Call Farm Bureau headquarters today. Say: "I'm joining!"

Corn Credit Corp. Now Making Loans

Manager Laird Cautions Applicants To File Properly and Avoid Delays

APPLICATIONS for loans totaling more than $20,000 on cribbed corn in Illinois were received by the National Corn Credit Corporation at Chicago November 30, reports Harry Laird, manager.

This represents receipts over the week-end and is, therefore, heavier than the average daily run, he explained. Forty-eight applications had been received, and about one-fourth of these had been paid up to December 1, Mr. Laird said.

The first loan was made to a LaSalle county farmer on November 25. Among other counties, which have sent in applications, are Champaign, Shelby, Kendall, McLean, Henry, and DeKalb.

Mr. Laird explained that faulty applications were causing a great deal of delay on loans.

Common Errors

The most common errors, he said, were the omission of crib measurements by the sealers in filling out the warehouse certificates, and the failure of the applicant to assign the certificate to the National Corn Credit Corporation. One or two applicants have applied for amounts in excess of the maximum, which is 20 cents a bushel. In these cases it has been necessary to have new applications prepared.

The loans continue to be confined to Illinois. Iowa, the only other state possessing a warehouse storage law as required by the Corn Credit Corporation, now has its machinery in working order, Mr. Laird said. He expects to receive Iowa applications within the next few days.

Insurance Available

The applicant will not be required to insure sealed grain as was required at the outset, it was decided by officials of

(*Continued on page 5 col. 3*)

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL ASSN.

NOTICE is hereby given that the annual meeting of the members of the ILLINOIS AGRICULTURAL ASSOCIATION will be held at the Faust Hotel, in Rockford, Ill., on the 28th day of January, 1932, at 9:00 o'clock a. m., for the following purposes:

For the consideration and vote upon approval and ratification of the reports of the president, secretary and treasurer of the Association, and the acts of the board of directors and officers in furtherance of the matters therein set forth, since the last annual meeting of the members of the Association.

To approve, ratify and confirm the several purchases heretofore made by this Association of stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein.

To secure consent and authorization to acquire on behalf of this Association, by purchase, certain stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein.

To elect seven members to the board of directors for two-year terms.

To elect a president and vice-president.

To consider any proposed amendment of the articles of association or of the by-laws of the Illinois Agricultural Association as may be properly submitted.

For the transaction of such other business as may properly come before the meeting.

GEO. E. METZGER,
Secretary.

Chicago, Ill., Dec. 1, 1931.

Outline Plans For 17th I. A. A. Convention

Meeting Goes To Rockford In Northern Illinois For First Time In History

THE 17th annual meeting of the Illinois Agricultural Association will be held January 28-29 at Rockford—the first time in history the convention has been held in extreme northern Illinois. Rockford is the home of George F. Tullock, I. A. A. director, chairman of the Financial Service Committee, and for more than a quarter of a century prominent in farm organization work.

Geo. F. Tullock

Heretofore annual conventions have been held in Peoria, Springfield, Chicago, Rock Island, Galesburg, Danville, and Urbana.

The various associated companies, as in former years, will hold their annual meetings on Wednesday, January 27, the day before the opening of the I. A. A. meeting.

The Chicago Producers Commission Association will hold its annual meeting on Tuesday, January 26 at Rockford, the first time the annual meeting has been held outside of Chicago, to give the directors and delegates an opportunity to attend the I. A. A. convention.

Faust Is Headquarters

The Faust Hotel, Rockford's newest 285-room hostelry, will be convention headquarters. Hotel rates at the Faust will range from $1.75 to $3.50 per day per person where there are two or more in a room. The next largest hotel is the Nelson with 160 rooms four blocks away where rates are from $1.75 to $3.50 each daily. Other hotels are the LaFayette with 48 rooms, rates $1.75

(*Continued on next page*)

to $3 each and $1.25 for additional cots; Park hotel, 40 rooms (no bath) $1; Hayes hotel, 15 rooms (no bath) $1 each; Illinois hotel, 34 rooms, rates $1 to $1.50 per person daily, cots $1; Chandler hotel, 16 rooms (with bath) $1.75 each, cots $1.25—44 rooms (without bath) $1.25, cots $1. The majority are within four to five blocks of the Faust.

Tentative Program

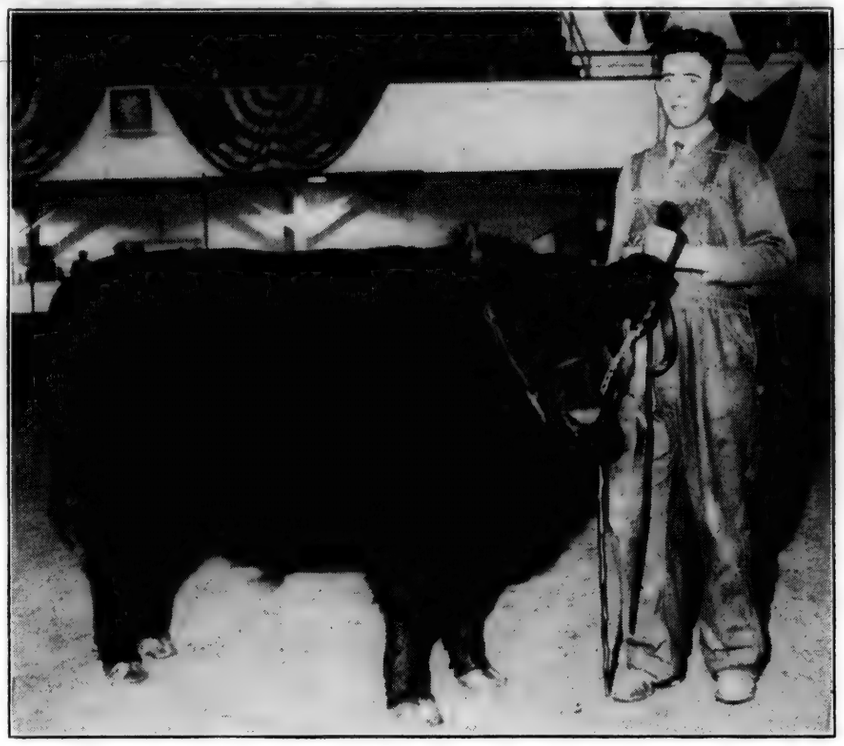
The tentative program of the convention provides for officer's reports Thursday morning, January 28, and for sectional conferences that afternoon. The sectional conferences are arranged primarily to give the delegates and members a chance to express themselves. Most of the time will be available for impromptu discussion.

A list of able and prominent speakers to discuss such current questions as revenue legislation, co-operative marketing, stabilization of money, and other economic problems is being considered.

District caucuses to select directors from the 12th, 14th, 16th, 18th, 20th, 22nd, and 24th districts will be nominated.

The tentative program provides for the annual banquet on Thursday evening and a luncheon Friday noon where speakers of nation-wide prominence are expected to appear.

Number of Delegates



The number of delegates from each county will be based on the paid membership on the last day of December, 1931. One delegate is allowed for the first 500 of paid memberships or fraction thereof, and one additional delegate for each additional 500 members or major fraction thereof.

Speakers are being scheduled for the annual meetings of the Illinois Farm Bureau Baseball League, Illinois Farm Bureau Serum Association, Illinois Agricultural Mutual Insurance Company, and Illinois Agricultural Auditing Association. Country Life Insurance Company and Illinois Farm Supply Company plan to sponsor conferences and meetings of agents, managers, and salesmen.

Master Farmers Are Chosen

Six Illinois farmers, all Farm Bureau members, were honored by Prairie Farmer and awarded the gold Master Farmer medal on Sunday afternoon, November 29, in the WLS broadcasting studios.

Illinois men who received the honor were: E. E. Houghtby, DeKalb county; C. E. James, Piatt county; Henry Brinkman, Livingston county; W. Frank Reid, Winnebago county; A. L. Doubet, Knox county; and M. S. McCollister, Greene county.

WENDELL MORGAN OF MERCER COUNTY AND HIS PRIZE ANGUS STEER

Illinois Wins In Junior Feeding at Stock Show

Attendance Lower But Exhibits Are Up To Standard

THE International Live Stock Exposition, America's most colorful pageant, agriculture's greatest sporting event, is again a matter of history.

Into the huge oval of Chicago's famous stock yard arena during the week swept a constant procession of the continent's best livestock, while judges selected champions. The attendance was smaller than in former years.

The central figure of the 12,000 animals was a stocky, jet black, little Aberdeen Angus steer, Briar Cliff Thickset, from Duchess county, New York. He won the highest honor a beef animal can obtain when he was named grand champion steer of the world by Judge Walter Biggar of Scotland.

Briar Cliff Thickset, owned by Briar Cliff Farm, Pine Plains, N. Y., is the first steer from an eastern farm to win this honor in 31 years. Illini Major, a Shorthorn steer, exhibited by the University of Illinois, was chosen as reserve champion.

The Corn Belt shared honors with Canada and the Rocky Mountain area in the grain and hay show.

Edward N. Lux, Shelby county, Indiana, is corn king. He comes from a family of championship corn growers. A Canadian won the wheat crown with an exhibit of Durum wheat. To Colorado goes the laurels for sending the finest oats, produced by Dr. J. F. Meinzer of La Jara.

It was in the junior feeding contest that Illinois came to the front. The championship fight in the junior fat steer show turned out to be a contest between two Angus yearlings shown by Wendell Morgan and Lawrence Morgan, brothers, from Aledo, Mercer county, Illinois.

"Coalie," Wendell's entry, was declared champion. "Coalie" already had the distinction of being champion in his class and grand champion at the Mercer County Fair, Illinois State Fair, and the Mississippi Valley Fair, Davenport. Wendell is 16 years old, Lawrence 10.

Mercer county also won the honor of having the best group of three steers shown. Illinois won first on the best group of ten junior steers. Twenty-three Illinois counties entered club steers.

Against a field of 14 pens of fat barrows, Raus Brown, 14, also of Aledo, took first place with his purebred Duroc Jerseys. Second place went to John Ash of Ashkum, Ill. Edwin and Harold Brown, Aledo club members, placed fourth and fifth.

A load of Herefords, shown by John D. Moeller, Schleswig, Iowa, copped the prize for car lots of fat cattle after a close contest with the car of Angus yearlings, entered by E. P. Hall, veteran

David Lawrence Talks About Government Aid

Enumerates Ways Groups and Industries Are Subsidized

GOVERNMENT aid to agriculture under the Agricultural Marketing Act has been, in proportion to size, no greater than aid to a number of other industries, declared David Lawrence, Washington's premier press correspondent and publisher of the United States Daily, Washington, D. C., in a radio address over the NBC chain November 15.

His statement has special significance since enemies of co-operative marketing are at present attacking the Marketing Act on the pretense of "getting the government out of private business." Many of the men who are fighting this measure have been enjoying government subsidy for years, Mr. Lawrence shows.

"The truth is, government for generations has been the spokesman of national desire in the expenditure of public funds," he said. "And by national desire is meant the deliberate judgment of the national legislature after weighing the merits of every special plea in terms of the general welfare.

Federal Aid to Many

"Thus, today federal aid is granted to shipping and the American merchant marine can borrow money more cheaply from the federal government for new ships or the purchase of ships previously owned by the government than it can in the money markets of private capital.

"Federal aid is given the airplane industry through the air mail contracts, which again encourage a transportation industry.

"Federal aid was given the railroads originally in grants of land and rights-of-way worth many hundreds of millions of dollars, which wealth belonged to the American people.

"Federal aid is given every day to the publishing industry through the grant of second class mail privileges, while the average citizen pays higher postage for his mail.

"Federal aid has been given, and is being given, to the automobile industry through the billions of dollars spent in public roads, without which the development of the automobile industry would have been seriously retarded.

The Protective Tariff

"Federal aid is given to every industry that obtains a protective tariff because it cannot compete with cheaply made goods abroad. This aid is intended, not merely for the manufacturers, but for the workingmen whose purchasing power is maintained through the wage levels thus preserved.

"So when we enumerate all these federal aids and subsidies, we cannot overlook the concerted attack that has recently been made on the tendency of government to aid the farmer. Agriculture is a twelve billion dollar industry, basic in America's scheme of things, yet a net expenditure of $100,000,000 a year for co-operative marketing spread over two or three years is pointed at as wasteful. Overnight we granted foreign peoples an indefinite postponement of $250,000,000 due our federal treasury, because our rightly paternalistic government wanted to protect our banks whose foreign credits were endangered."

International

(*Continued from page 4*)

showman of Sangamon county, Ill.

A car of Angus steer calves, owned by Dean N. Funk of McLean county, Ill., took the championship in car lots of feeder cattle. They were sold at auction Dec. 2 by the Chicago Producers for the top price of $13.50.

Chester Whites, for the first time in 29 years, won in the swine car lot division. The prize load was exhibited by the Sauk Livestock Shipping Association of Sauk City, Wis. Alva Rexroat, Jacksonville, Ill., furnished the greatest competition with a load of fifty-five 185-pound Hampshires, which were first in the light weight class.

Tyron Rosbrook, of Dixon, Lee county, Ill., was named champion in 4-H club meat judging, winning over 18 competitors from seven states. The contest included the identification of 25 cuts of beef, pork and lamb. Iowa won the college livestock judging contest, Oklahoma second.

National 4-H health champions chosen during the 4-H Club Congress, held in conjunction with the International, are Gertrude Heikes, 15, Dakota City, Nebraska, and William Sanders, 16, Franklin, Ind.

Who Is Entitled to Farm Bureau Service?

At its last meeting on November 13, the board of directors of the I. A. A. voted that "only holders of individual memberships in the Farm Bureau and Illinois Agricultural Association shall be entitled to the services, based upon membership in good standing, and rendered either by the Farm Bureau or associated companies, except only those members of the Farm Bureau member's immediate family who are under age and wholly dependent. Where services carry a dividend or money return, such dividend or money return shall be limited to the member signing the membership agreement."

Make Reservations Early For Annual Convention

Reservations for rooms and accommodations at the annual conventions of the Illinois Agricultural Association and associated companies, Rockford, January 27-28-29, should be made without delay with Charles H. Keltner, farm adviser, Rockford. The local committee in charge of accommodations will use its best judgment in distributing the delegates and visitors among the various hotels.

Rockford is located on the Chicago and Northwestern and Illinois Central Railroads about 80 miles northwest of Chicago. It is also on branch lines of the Burlington and C. M. and St. P. It is accessible by paved roads from all sections of the state, being situated on Illinois route No. 5 east and west, and on routes Nos. 2 and 70 north and south.

Rail travellers from Southern and Central Illinois will go to Rockford by way of Chicago. Members and delegates should ask for reduced rates at time of purchasing tickets. Return the same way you go to get the reduced rate.

Corn Credit Corp.

(*Continued from page 3 col. 1*)

the organization November 30. However, farmers are urged for their own protection to insure corn used as security regardless of this ruling, as they will be liable for the full amount of the loan if the grain is destroyed.

The borrower can get insurance through the state department of agriculture or through the credit corporation. The latter will carry fire and wind insurance for him at 50 cents per $100 of his loan.

The exact cost of obtaining a loan through the Corn Credit Corporation is computed as follows:

On 2,000 bushels of corn the maximum loan is $400, figured on a maximum of 20 cents a bushel. The rate of interest is 6½ per cent per year to July 15, or until he pays the loan. He must pay the sealer ¼ cent per bushel, or $5 on 2,000 bushels. The maximum charge per loan for sealer fees is $7.50. He must also pay the abstractor for reviewing the records on the corn for liens and indebtedness if any. This fee is about $1.

The I. A. A. contributed $50 to help defray the expenses of the state championship vocational agricultural livestock judging team to the national contest held in connection with the American Royal Livestock Show at Kansas City.

Metropolitan Taxes

Maywood, Ill., Nov. 10.—Why does *The Tribune* in its editorials, its cartoons, and in its news dispatches from Washington and Springfield have such an obsession for picturing Illinois as being "tax bled" for the benefit of the rest of the country and Chicago as being similarly bled for the benefit of downstate? Is that an attitude worthy of a great metropolitan daily that advertises itself as the "World's Greatest Newspaper" and if such should be correspondingly broadminded?

I do not notice any of the papers of the great city of New York indulging in whines about being bled for the benefit of the rest of the country or of upstate New York bleeding the city. They have been metropolitan so long they have outgrown that narrow viewpoint, I presume. They are broadminded enough to see that the immense wealth concentrated by virtue of advantageous location in metropolitan centers does not really belong to that district alone for its exclusive use, either for commerical or for tax use purposes. It represents wealth derived from the exploitation of the natural resources and industries of the adjacent region for hundreds of miles—in the case of New York and to a lesser extent Chicago, country-wide. So it is only right that some of the taxes on this immense concentrated wealth should be spent on the regions of its real origin.

If any one has the least doubt that New York's or Chicago's wealth is mainly country derived, just think what would happen if by some freak of fate either or both of these cities were completely isolated from the rest of the nation. Inside of a few years these cities would be down to a mere shadow of their former selves in wealth and power, while the rest of the nation would have suffered comparatively little inconvenience, save that of having to build up new centers of trade. Witness what happened to Vienna when deprived of most of her tributary territory.

O. Quirk in the Chicago Tribune.

Wild Game Film

Quail, grouse, wild ducks, wild turkeys, moose, elk, deer, bears and the elusive trout and bass in their native habitats, are featured in the new one-reel motion picture, "Forest Fires—or Game?" just released by the U. S. Department of Agriculture.

This film may be borrowed free from the Office of Motion Pictures, U. S. Dept. of Agr., Washington, D. C.

The Oregon State Supreme Court recently declared the emergency clause of a bill imposing a tax on butter substitutes valid.

NOTICE OF ANNUAL MEETING OF ILLINOIS FARM BUREAU BASEBALL LEAGUE

NOTICE is hereby given that the annual meeting of the members of Illinois Farm Bureau Baseball League will be held on Wednesday, the 27th day of January, 1932, at the hour of 9:30 a. m., at the Faust Hotel, Rockford, Ill., to elect officers and directors, receive, and, if approved, confirm the reports of the officers and executive committee of the League for the fiscal year ending Dec. 31, 1931, and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the League; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Ill., Dec. 1, 1931.

E. G. THIEM,
Secretary.

Farm Values Decline, Improvements Increase

FROM 1920 to 1930 the value of all farm property, land, buildings, implements and livestock, declined from $77,000,000,000 to $57,000,000,000, reports the U. S. Bureau of Census. The ratio of debt to total value increased from 29 per cent in 1920 to 39 per cent in 1930.

Commenting upon this fact the Bloomington (Illinois) Pantagraph states that "At the same time farmers were encountering this deflation of value and increase of the debt burden, they proved good spenders. Automobiles on farms increased from 2,000,000 to 4,000,000. Motor trucks increased from 139,000 to 900,000 in round figures. Tractors increased from 248,000 to 920,000. Farm homes equipped with water pipes increased from 643,000 to 994,000. In 1920 there were 454,000 homes equipped with either gas or electric lights, while in 1930 there were 841,000 with electric lights.

"With all this increase in use of factory products in the face of declining farm incomes," continues the Pantagraph, "one wonders what farmers would do were the situation reversed and their purchasing power increased. There are more than 6,000,000 farms in America, yet only 4,000,000 reported automobiles, only 841,000 reported electric lights, only 994,000 reported running water in the homes. To give agriculture greater buying power would open up a wonderful market for all manner of industrial products."

Consolidation of Taxing Districts Needed: Watson

Tells How Taxes Can Be Cut and Inefficiency in Government Reduced

Consolidation of taxing districts to eliminate inefficiency and lighten tax burdens was urged by John C. Watson, director of taxation for the I. A. A., before farm leaders attending the national land utilization conference at Chicago, November 20.

The main forces holding these adjustments back in the past, he pointed out, were centered around the opposition of petty office holders, the unwillingness of towns to lose the seat of government, which is regarded as a business asset, and the almost universal idea that there is always some advantage in maintaining so-called autonomy.

"Many counties are so small and have such small values in taxable property that the cost of county government is excessive," he continued. "Consolidation would dispense with one set of officers. It would also reduce the cost of maintaining unnecessary court houses and jails. With properly controlled and supervised county government, county assessors, and larger units for highway maintenance, townships could well be abolished.

"Belief in the advantage of local autonomy is most strongly entrenched in the smaller taxing districts, and nowhere more strongly than in the townships. The impossibility of securing uniform assessments throughout a county through locally elected assessors has been so often pointed out as to require no comment.

"Advocates of local autonomy will doubtless point out that the suggested change will in some cases mean no reduction in expenditures. That is true, but increased efficiency for the same expenditure is one form of economy. The most costly element of government is inefficiency.

"If the people of the local taxing districts clearly understood that local autonomy too often means inefficiency, there is little doubt but that their views would change. Good schools and good roads are too important to justify neglect on the part of the state. Good fiscal administrative methods, helpful supervision and advice, and an equitable taxing system are the only ways by which economy in local expenditures can be secured and maintained."

The farm radio program of the Illinois Agricultural Association is broadcast daily except Saturday and Sunday over station WJJD, Chicago (1,130 kilocycles), between 12:30 and 12:45 noon.

The program consists of live agricultural news, including late market information and developments in current farm problems. The Chicago livestock market is reviewed daily by members of the I. A. A. staff, and a weekly summary is given on Fridays by the Chicago Producers.

THE new rule in business is that co-operation and not competition is the life of trade, commented E. W. "Farmer" Rusk on his radio college of co-operative marketing, from station WMAQ recently.

"We are taught, many of us, from our youth on, that competition is essential to the health and progress of the race—the obvious truth is that co-operation is good and competition bad, and that society flourishes by the mutual aid of human beings," he continued.

"By virtue of their natural isolation farmers have seemed slow in realizing their efforts through co-operation. Coupled with the natural barriers to co-operation among farmers themselves has been the retarding influence of certain individuals and groups who profit themselves because of lack of group action on the part of the farmers. Propaganda unfavorable to organization and co-operation of various sources has tended to make the progress slow. But it is gratifying to note the attitude of friendly, helpful interest being shown on every hand by the public generally. As evidence of friendly interest I refer to a recent editorial in the Daily News in which the following statement is made:

" 'There has been of late a gratifying growth in the strength and efficiency of farm co-operatives in the face of determined opposition by competing marketing agencies. It is not unreasonable to expect steady acceleration of that growth as the co-operatives develop greater efficiency.' "

Importation of dairy products into the United States have declined sharply during 1931, on account of increased tariffs and because of greater declines in domestic than in foreign prices of dairy products. Cream and milk imports have practically ceased.

NOTICE ILLINOIS AGRICULTURAL ASSOCIATION ELECTION OF DELEGATES

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of December, 1931, and January, 1932, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

During December annual meetings will be held in Brown, Bureau, Clark, Coles, Crawford, Saline, DeWitt, DuPage, Rock Island, Vermilion, Morgan, Edgar, Edwards, Effingham, Henry, Iroquois, Jersey, Johnson, Kane, Stephenson, Wabash, Jackson, Kendall, LaSalle, Lee, Livingston, McLean, Platt, Randolph, Richland, Union, Champaign and Grundy counties.

During January annual meetings will be held in Carroll, Cook, Douglas, Fulton, Franklin, Greene, Knox, Lake, McHenry, Macon, Mercer, Peoria, Sangamon, Tazewell, Whiteside, and Woodford counties.

Dec. 1, 1931.
Signed,
G. E. METZGER, Secretary.

Farmers' Elevator Men Meet at Bloomington

More than 60 directors and managers of twelve farmers' elevators met at Bloomington, November 24, with officials of the Illinois Grain Corporation and the Farmers National Grain Corporation. During the meeting the attacks being made against co-operative marketing by organized middlemen were discussed.

Among those who took part in the discussion were Harrison Fahrnkopf, director of grain marketing for the I. A. A. and secretary of the Illinois Grain Corporation; Charles Cummings, vice-president and sales manager of the Illinois Grain Corporation; G. C. Johnstone, president of the Illinois Grain Corporation; John Benson and D. H. Moore, of the Peoria office of the Farmers National; John Schmidt of Beason, Logan county, a director of the Illinois Grain Corporation; E. E. Stevenson, of the Ransom farmers' elevator in LaSalle county, and Floyd Thomas, chairman of the grain marketing committee and vice-president of the McLean County Farm Bureau.

It was generally agreed by those present that the private handlers of farm products engaged in spreading anti-Farm Board propaganda are not so much concerned about the government getting in business as they are about farmers getting in business to sell their own products more direct to the consumer.

15th District Meeting At Cambridge Nov. 24

THE National Corn Credit Corporation, the income tax bill now before the state legislature, freight rates, rural electrification and pipe line right-of-way problems were among the topics discussed at the 15th District Farm Bureau meeting at Cambridge, Henry county, November 24.

C. L. Bates, director of the I. A. A from the 15th District, acting as chairman, explained the purpose of the corn credit corporation and told how it operates.

C. L. Bates

L. J. Quasey, director of transportation, reviewed the report of the Governor's Tax Conference of which President Earl C. Smith was a member. He explained that the purpose of the proposed income tax bill and the tobacco tax bill is to give relief to real property owners.

He also reported on the work the I. A. A. is doing to get fair electric rates, and freight rates for farmers. He stated that he was getting excellent co-operation both from pipe line companies and from farmers in settling right-of-way damage claims, drawing up contracts, etc.

Victoria Elevator Holds Annual Meeting

Harrison Fahrnkopf spoke at the annual meeting of the Victoria Farmers' Elevator at Victoria, Knox county, November 14. He outlined the progress made by the Illinois Grain Corporation during the past year and explained the set-up of the National Corn Credit Corporation recently organized to make loans on corn stored on the farm.

The report of the secretary of the elevator showed a very successful year. The following officers and directors were elected: J. R. Diehl, president; U. J Craig, vice-president; E. J. Ericson, secretary; L. A. Sherman, treasurer; H. F. McClure, and H. R. Cain.

Approximately one-third of the families in the United States now have radio receiving sets, announces the bureau of census.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

How the Proposed State Income Tax Will Lower Property Taxes

MISUNDERSTANDING about the replacement feature of the state income tax is indicated in editorial comment appearing in downstate newspapers.

This arises because the income tax measure itself, House bill 17, does not and cannot under the law provide for a new tax and at the same time repeal or lower other taxes. But the replacement tax feature is provided for in the companion measures which include House bills 23, 24, 25 and 26.

The editor of a Lawrence county newspaper recently wrote: "There is no provision in the income tax bill to lower the state tax rate, and until such a bill is presented it will be folly for taxpayers to expect an income tax to relieve them of property taxes. An income tax bill would mean just one thing: added burden for the taxpayers."

In a letter to the Lawrence County Farm Bureau, President Earl C. Smith in reply to this and other criticisms pointed out that the Constitution of Illinois provides no way for limiting the state tax rate. "The state tax rate is determined in two ways," continues Mr. Smith's statement. "First, by the appropriations made by the General Assembly; and, secondly, after such appropriations are provided, the State Levying Board, composed of the governor, the state auditor, and the state treasurer, determine what rate must be levied against Illinois property to provide the necessary revenue to meet appropriations.

"At the present time, public school moneys are provided in two ways: First, by a levy made by the local school board upon the property of the school district; secondly, by an appropriation of $10,500,000 made by the General Assembly and levied upon the property of the state by the State Levying Board, the $10,500,000 to be distributed to the various school districts of Illinois. This appropriation is commonly known as the State Distributive School Fund. You will note that all revenue for the support of schools is levied upon property by either local or state levy.

"To properly understand the proposed permanent tax relief program recommended by the Governor's Tax Conference, one should read Senate bills 20 to 29 or House Bills 17 to 26, inclusive. In effect, they provide for approximately $50,000,000 of revenue from three new sources, the most important one of which is the income tax bill. All this revenue is to be placed in the Public School Fund. They provide for repeal of authority by the General Assembly to appropriate for and the State Levying Board to levy upon property of the state for any amount of money for the State Distributive School Fund.

"This immediately takes nearly one-third of all levies by the state from property, or in other words, relieves property of approximately one-third of state taxation.

"Instead of having a maximum local tax rate for school purposes of $1 and an additional 50 cents, if authorized by referendum of the people of the district, the maximum local tax rate becomes the average annual amount expended by each school district during the past four years.

"The measures provide that each school district is to receive from the Public School Fund, newly created, its just proportion of the estimated $50,000,000 provided from the proposed new sources. It becomes mandatory upon the county clerk of each county in the extension of taxes levied by the district to reduce the amount

(Continued on page 9)

of certified levy by the local school board in an amount equal to the district's participation from the Public School Fund.

"Let me state it in another way. At the present time and during recent years, the school districts have been levying upon property approximately $82,000,000 per year for the educational fund of the public school. The State of Illinois has been levying an additional $10,000,000 and more recently $10,500,000, making a total of $92,500,000 property is now paying for the support of the public schools.

"Under the new plan suggested, if the proposed measures raise $50,000,000 of revenue from new sources, it would all go toward defraying public school costs and must be used to reduce this previously levied $92,500,000, which would leave $42,500,000 upon property.

"In a period of reasonable prosperity, these proposed new sources would raise much more than $50,000,000, possibly $75,000,000, and it would be used in like manner.

"While it is rather difficult to explain in a letter the many features entering into this series of bills, yet I have tried to give you the practical effect, if this proposed legislation is enacted into law. I do not hesitate to go on record most definitely that, if this proposal is enacted into law, the property of Illinois will be relieved of substantially more than one-half of taxes now levied for the educational fund of the public schools."

Income Tax Measure Aids Property Taxpayers

AS WE go to press, we learn that the Income Tax Bill now pending before the Special Session of the Illinois General Assembly and which carries the support of the Governor's Revenue Commission has passed second reading (the amendment stage) in the Senate, and a special order for its final consideration or final vote was arranged for next Wednesday afternoon.

"This bill embodies every principle which the Illinois Agricultural Association has been urging in recent years before the General Assembly of Illinois," said President Earl C. Smith in commenting on the measure.

"In many respects, its provisions are strengthened and if enacted into law assures the property taxpayers of every school district in the State, substantial relief from taxes they are now paying for the support of the public schools.

"Opponents of the bill are making every effort to confuse the public mind and detract attention and support from the bill," he continued, "by insisting it is an added tax and does not guarantee relief to property taxpayers.

"The Illinois Agricultural Association, and particularly its Tax Department, has been in very close touch with the preparation of this legislation. The series of bills having to do with the subject matter again offers the only opportunity pending before the General Assembly to bring permanent relief to property.

"These measures are entitled to the support of every thinking citizen of the State who believes that the assessed property of Illinois has been bearing a very unjust portion of the total tax burden.

"EVERYONE MUST DO HIS PART. IF YOU WANT RELIEF FROM THE TAXES YOU ARE NOW PAYING ON YOUR PROPERTY AND IF YOU ARE NOT NOW PAYING, BUT BELIEVE PROPERTY TAXPAYERS ARE ENTITLED TO SUBSTANTIAL RELIEF, YOU CAN DISCHARGE YOUR DUTY AND RESPONSIBILITY AS A CITIZEN BY LETTING YOUR SENATOR AND REPRESENTATIVES IN THE GENERAL ASSEMBLY KNOW WHERE YOU STAND."

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL MUTUAL INSURANCE CO.

NOTICE is hereby given that the annual meeting of the members of Illinois Agricultural Mutual Insurance Company will be held on Wednesday, the 27th day of January, 1932, at the hour of 1:00 o'clock p. m., at the Faust Hotel, Rockford, Ill., to elect directors, receive, and, if approved, confirm the report of the board of directors of the company for the fiscal year ending Dec. 31, 1931, and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Ill., Dec. 1, 1931.

GEORGE F. TULLOCK,
Secretary.

On November 30 the Illinois Grain Corporation reported a membership of 79 farmers' elevators and co-operative grain marketing associations.

Observations

THAT the middlemen have united their forces and concentrated their attack behind a powerful national publicity campaign against co-operative marketing is indicated by press stories and editorial comment appearing in at least one Chicago newspaper and in several of the downstate dailies during the past few months. Congressman J. M. Beck of Pennsylvania, a high protectionist of the Mellon-Grundy school of thought, apparently has been engaged to lead the attack against agricultural legislation in Congress.

The middlemen backing the so-called Federation of American Business are attempting to hide their real object. "Take the government out of business" is their battle cry. They are not so much concerned about getting the government out of business as they are about keeping farmers out of the business of marketing their own products.

The government has been in business for more than a hundred years. It has come to the rescue of many infant and ailing industries time after time with legislation giving subsidies of one kind or another. Because the government has attempted to do something for agriculture—the basic industry of the land—by encouraging farmers in marketing their own products there is much talk about "Russianizing the American farm," and "government in business."

The Farm Board's attempt to stabilize wheat and cotton prices at a profitable level was an experiment, but an experiment fully provided for in the Agricultural Marketing Act. The Board merely tried to follow the instructions of the Congress. Organized farmers didn't ask for that legislation. It was a compromise offer.

The Farm Bureau asked for legislation that would make the tariff effective on farm products. It favored and still favors the equalization fee, a plan to raise domestic farm prices to artificial levels in line with the American system and charge the cost of doing so to each unit of the commodity sold. If protection and subsidy is to be our national policy, farmers are within their rights in demanding a seat at the table of privilege.—E. G. T.

The next monthly meeting of the I. A. A. directors will be held at Chicago on December 18.

Advises Women to Help Keep Records on Farm

Farm women are more and more concerned with the keeping of farm accounts, production records, and breeding records of livestock, H. E. Babock, general manager of the G. L. F. Exchange, told farm women at Cornell University recently.

"As time goes on they should know not only how to keep these records, but they should also be able to exercise good judgment in interpreting them," he says. "Since all farmers, in order to operate at all, require three outside services, namely a buying service, a credit service and a marketing service, farm women should know more about these services. Farm women should know about the structure and control of cooperative marketing organizations. They should take more interest in what the markets require, and in how farm conditions and practices affect the grades of products which are sold from the farm."

Demand for Farms by Tenants in Southwest

In spite of all the talk about hard times on the farm there is more of a demand for farms in the Southwest than can be met, according to the Oklahoma Farmer-Stockman. Tenants began to make contracts early in the summer, said the editorial. Not much moving will be done.

"The renter with an average or better farm is going to stay put unless he has a chance to rent a better one. The renter who is looking for a farm most likely was forced to move. In years gone by few renters valued the opportunity of renting a farm. If they didn't like the farm they were on or didn't like the owner they left it and looked for another. Renters are voluntarily doing more work to keep up the improvements and the soil. In many cases owners are able to insist that such things be done. As a whole they are cooperating as they never did before."

Corporation Farming

The Wheat Farming Company of Hays, Kansas, organized in 1927, and operating approximately 70,000 acres, has not yet failed to pay annual dividends, according to a recent report.

It is said that Hickman Price, known as the Wheat King of Texas, expects to make a profit out of this year's operations notwithstanding the low market.

Uncle Ab says that your ship won't come in if you haven't launched it.

Freight and Utility Rates Influence Your Farm Profits

Freight charges on 20,000 carloads of farm products, involving a freight bill of over $2,000,000, were checked by I. A. A.-Farm Bureau representatives during 1930. In many instances substantial reductions were obtained and rules modified to benefit the farmer.

During the year over $25,000 was collected in loss, damage and overcharge claims for Farm Bureau members. This service is available free of charge to members.

Before The Commerce Commission

When the Commerce Commission sits to consider matters affecting rural interests, an Illinois Agricultural Association representative is present to protect farmers' rights.

Because of I. A. A.-Farm Bureau watchfulness, many rate advances on livestock, grain and other farm products have been successfully resisted. Other rate schedules have been materially reduced. This protection is made possible only thru the power of organization.

Electrification—Utility Right-of-Way

The I. A. A. is constantly striving to reduce the cost of bringing electricity to the farm. It was active in more than 20 high tension and pipe line right-of-way cases last year giving advice to members and representing them before the Commerce Commission. Right-of-way contracts were rewritten to provide adequate safeguards for members.

Telephone Rates

The I. A. A. appeared before the State Commerce Commission in more than 35 telephone cases affecting 26 counties. Rate reductions and improved service were secured in many instances.

I. A. A.-Farm Bureau effort gets results because it has ORGANIZATION behind it.

Ninety-Five Affiliated County Farm Bureaus

608 So. Dearborn Street Chicago, Illinois

IN THIS ORGANIZED WORLD
ONE MAN CAN DO NOTHING ALONE

Saving Money on Feed and Supplies

How the Cook and Lake County Farm Bureaus Are Serving Their Members

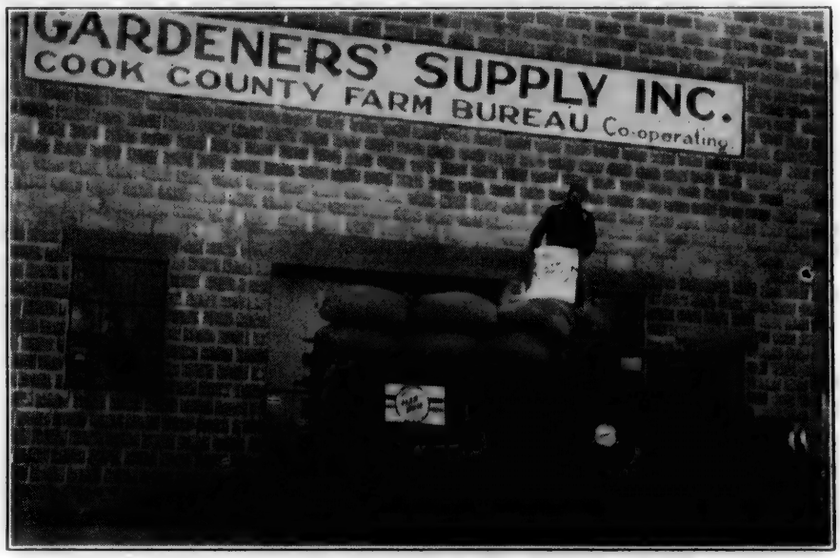
CO-OPERATIVE purchasing of feeds and other necessary commodities through their local farm supply companies is a project Farm Bureau members in Lake and Cook counties greatly appreciate.

The Lake County Farm Supply Company, the first to handle feed in large volume, is now getting out nearly a carload a day, selling livestock feeds to approximately 1,400 farmers, according to A. D. Smith, manager. The Gardeners' Supply, Inc., in Cook county, still in its first year of business, handles about two cars of feed a month.

Feed has been sold through the Lake County Farm Supply since its organization in 1928, along with fertilizer, seed, potatoes, apples, fence posts, and other farm supplies. About 90 per cent of the Farm Bureau members are customers of the company.

Handle Variety Products

Gardeners' Supply, Inc., was set up in Cook county primarily to make it possible for truck gardeners to secure at cost insecticides recommended by the University of Illinois, not readily available locally, according to Farm Adviser O. G. Barrett. Garden seed was added later to help make the enterprise pay. Truck farmers in Cook county buy annually $150,000 to $200,000 worth of garden seed from independent seed houses, Barrett said.



Later fertilizer was added, and on the suggestion of farm people poultry and dairy feeds were included a short time after the company began business. The four main items handled now are insecticides, garden seed, fertilizer, and feed. Gardeners' Supply does not handle petroleum products, but many Farm Bureau members in the northern part of the county buy from the Lake County Supply Company.

$25,000 in 6 Months

The audit at the end of the first six months, which include the best business months of the year, showed a volume of approximately $25,000 of business, or twice the amount expected.

At the recent annual meeting of the board of directors action was taken to set up a second unit at Blue Island to serve the south half of the county. The present warehouse is at Arlington Heights in the extreme northern end of the county.

"This project is to be an important factor in increasing Farm Bureau membership in Cook county on account of the extensive dairy and truck farming interests for which many projects of the organization had no appeal," said Barrett.

TRUCKLOAD OF DAIRY AND POULTRY FEED READY TO BE DELIVERED BY GARDENERS' SUPPLY, COOK COUNTY CO-OPERATIVE.

"To make Gardeners' Supply go along with the general educational program of the Farm Bureau, Joe Zickmund, a Cornell university man who specialized in horticulture, was employed as manager.

Pays Out from Start

"Our price of feed to members is based upon the market price of ingredients plus a fixed sum per ton to take care of overhead, including milling, freight, and handling costs. We manage to keep a little below retail prices and were still able to declare a 3 per cent patronage dividend at the end of the first six months. We also set aside a substantial sum for a reserve.

"Since the Illinois Agricultural Association is not yet in a position to purchase feed and fertilizer on a state-wide basis, we find it necessary to buy through the Indiana Farm Bureau. We buy insecticides from Illinois Farm Supply.

Formula on Every Sack

"One thing I like about the Farm Bureau feed is that it has its formula on every sack," continued Barrett. "If farmers think they can save money by buying the ingredients and mixing them, we sell them the ingredients. There is no secret about this feed."

The Lake County Supply Company buys its feed from independent dealers and sells at local retail prices. The profits go back to members in the form of patronage refunds.

Farm Bureau leaders in both Lake and Cook counties believe that a real service can be rendered Illinois Farm Bureau members by large volume purchasing and mixing of feeds on a state-wide basis. In normal years when farm prices justify the feeding of mixed grains and concentrates substantial savings can be made to further reduce the farmers' cost of production.

Higher Livestock Prices Aim of New Sales Plan

MACON county farmers who are shipping their livestock through the Illinois Livestock Marketing Association are receiving better prices every week than they would have received as individuals from any other outlet, declares William Fulk, manager of the Macon County Marketing Association, one of the member co-operatives.

R. W. Grieser, sales manager for the state association, attributes this to the centralized direction of shipments on the basis of the latest market information rather than by guess. Livestock is directed to the market where it is in greatest demand.

The stock is assembled, sorted and graded at the local marketing associations and on the shipping instructions of the state co-operative is sent either direct to packers or to one of the Producers' agencies on the terminals.

The organization is sometimes handicapped by lack of sufficient volume of the proper grades to bring the best price, but that is a problem which will have to be overcome by the farmers themselves, Grieser said.

Advises Women to Help Keep Records on Farm

Farm women are more and more concerned with the keeping of farm accounts, production records, and breeding records of livestock, H. E. Babock, general manager of the G. L. F. Exchange, told farm women at Cornell University recently.

"As time goes on they should know not only how to keep these records, but they should also be able to exercise good judgment in interpreting them," he says. Bank Failure Cause Goes Back to War—Roberts

Farm Mortgage Debt Rises 119 Per Cent from 1910 to 1920

SOME interesting figures are disclosed by George Roberts, economist of the National City Bank, in pointing out the cause of so many banks being forced to close.

"The fundamental cause of the widespread bank failures goes back to the war-time rise of commodity prices and wages, and to the inflation of credit made possible by the rapid increase of our bank reserves which likewise was a consequence of the war," he said.

"Prices of everything rose and a new level of values was established which as the people became accustomed to it seemed to be real and permanent. A great volume of indebtedness was erected upon the basis of these values, and when it turned out that they were inflated the position of the debtors became a most difficult one. Banks, being debtors to their depositors and subject to call for repayment upon demand on short notice, have been involved in these difficulties, particularly where their funds were employed to an imprudent extent in long-term loans or investments.

Rural Banks Hit

"The situation is well illustrated by reference to the rural banks in which the mortality has been highest. During the war and the succeeding boom period the prices of farm lands were marked up to accord with the higher values of the products grown upon them, and an abnormally active turnover of farm properties began which was financed largely upon credit.

Between 1910 and 1920 the estimated total farm mortgage debt in the United States rose from $3,600,000,000 to $7,900,000,000, or 119 per cent. Farm real estate values by March, 1920, has risen 70 per cent above the 1913 average. The rural banks became involved in loans which directly or indirectly were based on these land values; and the subsequent decline in them was the cause of a great increase in bank failures.

Decline Continued

"By the year 1928 a further rise in farm mortgage debt to $9,500,000,000 had occurred, while the decline in land values continued. Between 1928 and 1930 the total debt remained practically unchanged, but by 1930 land values averaged only 115 per cent of the 1913 base, and on March 1 of this year they had fallen to 106, or nearly 40 per cent under the peak. The decline in the prices of farm products since May, 1928,

when they averaged 148 per cent of the 1909-14 level, carried them down to 72 in September of this year, a reduction of more than one-half.

"These declines in prices and land values have left the new indebtedness without adequate support, and the figures show plainly the grave difficulties with which the banks whose business is with farming communities have had to contend."

Routing the Depressionists

The Cleveland Trust Monthly says: "In a recent speech, Prof. William T. Foster referred to the meeting of a group of leading financial statisticians —experts in business forecasting—in New York City on November 4. Professor Foster quoted eight of these experts as follows: *'The farmers will not buy much from the proceeds of this harvest; and, with the price declines in process throughout the world, there would seem to be little prospect of any extensive business revival in the near future.' 'The general prospect is for slow and irregular business for ten years.' 'I expect to see a long and slow recovery to a general level of subnormal, slow business.'* 'Prices will advance a little from present levels and then fall once more. Recovery will be slow.' 'Conditions abroad will continue to affect our business conditions here. It is a conservative estimate to say that ten years must elapse before we can see genuinely prosperous business in this country.' 'Business will come back to fair, slow operations in three years.' 'The period of readjustment will be long. It will take at least 10 years.' 'We may expect a slow return to a basis on which business can be done at a profit in about three years.' Then Professor Foster continued: 'These pessimistic forecasts were all made on the 4th of November. But it was the 4th of November of the year 1921. At that time business was actually improving, although the experts did not know it. Within four months the gain was so marked that everybody could see it. Within sixteen months business was so far above normal that experts became frightened again. Today, the major economic factors are more favorable to a rapid recovery of business than they were in 1921. It is my sober belief that, just as the depressionists of 1921 were routed, so the depressionists of 1931 are in for a rude awakening.'"

L. P. McMillen, Rock Falls Banker, Dies

L. P. McMILLEN, 50, president of the First National Bank of Rock Falls, was buried at Tampico on November 22 following a large funeral from the McMillen home in Rock Falls. Mr. McMillen was killed instantly in an automobile accident near Malta on the Lincoln Highway in DeKalb county on November 20.

While on his way to the Notre Dame-Southern California football game at South Bend the car ahead slowed up to turn off the pavement. Mr. McMillen jammed on the brakes and skidded on the wet pavement into the path of a car coming in the opposite direction. The road between DeKalb and Malta had recently been repaired, widened, and covered with an asphalt material which becomes slippery in rainy weather. McMillen was thrown against the steel framework of his car and suffered a fractured skull resulting in immediate death.

Mr. McMillen assisted in organizing the Whiteside County Farm Bureau more than 12 years ago and served as its first secretary-treasurer. He was especially active in the early history of the Whiteside County Farm Bureau in signing up new members in the southeastern part of the county. He served on the board of directors of the Illinois Agricultural Co-operative Association several years ago and more recently was chosen chairman of the Crime Prevention Committee of the Illinois Bankers' Association.

Mr. McMillen's loss will be keenly felt. He made an outstanding record of service to his community.

Hogs Sell Below Value Sees Better Market Ahead

Due to the fact that hogs are coming to market earlier this year than usual and that the prospects are for lighter slaughter in the next few months, the present outlook is for considerable improvement in the hog situation, according to H. M. Conway, National Livestock Marketing Association.

He attributes the early marketing to extensive wheat feeding and cholera in the cornbelt. This condition, he says, is making for a winter hog market much the reverse of a year ago, and for extremely low prices at the beginning of the packing season.

Hogs are now selling far below their actual value, as based on consumptive demand conditions, on the general level of commodity prices, on current and prospective supplies, and on the present level of wholesale and retail prices of hog products.

Hyde Would Shut Doors Against Farm Expansion

Need Sound Policy on Agricultural Land Utilization

HOPING for the day when there will be "proper supervision of colonization schemes," when settlers can be "truthfully apprised of the economic facts," and when "Uncle Sam will refuse to deed 640 acres of sand and cactus to a man, no matter how courageous and industrious he may be," Secretary of Agriculture Arthur M. Hyde asked that the nation formulate a sound national policy of agricultural land utilization. He spoke at the opening session of a conference on land utilization at Chicago, November 19-21.

Secretary Hyde

The need for this land-utilization conference, the secretary said, "lies in the vast waste of human and material resources now taking place in our rural areas. Erosion has already gashed and gullied our country sides and ruined 21,000,000 acres beyond repair. The wastage of natural resources in the East and South has already sapped the economic strength of communities and farmers and small towns. Every one of these presents problems of economic readjustment and political reorganization which might conceivably change a loss into a modest profit. Thousands of pioneer souls have listened to the siren song of the expansionists and have followed their land hunger into arid regions or onto cutover lands which Nature intended for other purposes than farms."

Vast Waste

Stop Expansion

Questioning the advisability of any sweeping purchase of submarginal lands by governmental bodies, and allaying the fears of those who expect a modern hegira from the submarginal areas, Secretary Hyde declared:

"There is probably more hope of success in slamming shut a few doors through which expansion is flowing than there is in the recapture of acreage. Most of the expansion takes place in four directions: drainage, irrigation, clearing of forests, and dry land farming. The extent of that expansion is not generally recognized. There are both dynamite and enlightenment in the statistics, taken from the census, that there were 84,000 fewer farms in 1930 than in 1925, but there were 15,000,000 more acres in crops. This in five years, and the last five years at that! There are both pathos and problems in the fact that the 366,000,000 acres planted to crops in 1930 was 55,000,000 acres more than our cultivated area in 1909, and larger than the war-time peak of 1919.

"We must start some time. No program which we can conceive will immediately cure the present emergency. A long-time land-use program cannot write an immediate answer to the present emergency, but the present emergency emphasizes the immediate need for a long-time program. If we had begun even so short a time as 20 years ago—before the expansion of our cultivated area by 55,000,000 acres—how much of tragedy and distress might have been prevented!"

See Plot to Wreck Milk Producers' Co-Ops.

Recent reductions in milk prices from twelve to seven cents per quart in Buffalo were termed the initial move "in a plot to wreck farmers' co-operative marketing organizations," by George F. Snaith of Medina, a director of the Dairymen's League Co-Operative Association, Inc.

"There is no economic reason for lower milk prices in Buffalo," said Mr. Snaith. "The only purpose being served is to give consumers cheaper milk at the expense of dairy farmers so that dealers can break the farmers' organizations and bring producers back to that state of 20 years ago when they were slaves to dealer interests.

"For two weeks we have been hearing persistent rumors alleging that a group of dealers from cities as far apart as New York and Buffalo discussed plans at a milk dealers' convention to attack farmers' organizations by breaking down milk prices.

"Lowering of prices five cents a quart in Buffalo within a week has furnished dealers of other cities a basis for demanding reductions. Compliance with such demands would be ruinous to the dairy industry, and would bankrupt thousands of farmers.

"Present activities in various milk markets indicate that a treacherous plot is being worked out to crush farmers' organizations, and force milk prices down until farmers are faced with starvation."

Limestone applied in addition to farm manure or crop residues increased the value of crops grown as much as $17.75 an acre annually on some soils, according to F. C. Bauer of the University of Illinois. This was a return of more than $7 a ton for the limestone used. The more productive, dark-colored soils did not give so great a response as the light-colored ones.

National Fruit Exchange Plan Told by Wilson

Farm Board Member Discusses Stock Set-Up and Method of Operation

IN an address before the annual meeting of the Vegetable Growers Association of America at Cincinnati, Charles S. Wilson, member of the Federal Farm Board, outlined the aims and objects together with recent developments in organizing the National Fruit and Vegetable Exchange, Inc., of which A. B. Leeper, director of fruit and vegetable marketing for the I. A. A. is president.

"While the organization has not begun to operate as yet, present indications are that sufficient tonnage will be secured so that the Exchange will be ready to start operations about January 1," said Mr. Wilson. Temporary headquarters of the Exchange have been established in the I. A. A. offices at 608 So. Dearborn St., Chicago.

Provides for Representation

"The general set-up of the Exchange provides for representation on the Board of Directors by dividing the country into districts and allowing the cooperatives which are members within their respective districts to select the director to represent them on the board of the National. The Exchange will be financed by the sale of capital stock to the member organizations. No one association may own more than 5 per cent of the capital stock of the Exchange. The amount of stock which any association will be required to purchase is determined by the average volume of shipments for the last three years. Roughly speaking, stock subscriptions are expected to be in proportion to the volume of shipments.

Producer Control

"In the case of new associations which have not operated, the directors of the National have the power to recommend the capital stock subscription which will be required. Member associations are required to pay one-fifth of the purchase price of stock in cash and the balance in four equal annual installments. The provisions governing the voting control and ownership of capital stock are such as to protect the interests of various member associations and through them that of growers at all times.

"Three types of organizations may become members of the National Exchange; namely, centralized associations, federations of locals, and local associations contracting directly with the National for marketing but having representation on the Board of Directors of

Chief of Grain Futures Favors Trading Limits

Annual Report Reveals Interesting Figures on Grain Exchange Operations.

RECOMMENDING legislation which would impose "a rational limitation upon the volume of daily purchases or sales and the total futures holdings permitted a trader for speculative purposes," in the contract grain markets of the country, J. W. T. Duvel, chief of the Grain Futures Administration, said in his annual report to Secretary Hyde that such a limitation "would inure to the direct benefit of all interests using the futures market for proper purposes."

The report of the activities of the Grain Futures Administration for the year ending June 30, 1930, covered a period of unusual activity in the contract markets. The total of transactions in grain futures for the year was nearly 25 billion bushels, a record which was exceeded only in 1925 when the transactions amounted to more than 31 billion bushels.

Transactions 20 Billion Bu.

Transactions in wheat futures alone for this period aggregated nearly 20 billion bushels and was the greatest of any year for which the Grain Futures Administration has records. The largest volume of trading in all grain futures for any one day of the year was on July 15, 1929, when sales on the Chicago Board of Trade totaled 193,479,000 bushels. Another record was set up on October 24, 1929, when sales of Chicago wheat futures alone aggregated 156,126,000 bushels, surpassing the previous record by more than 6,500,000 bushels.

Heavy trading in wheat, according to Doctor Duvel, "was not the result of any unusual speculative activity such as is most frequently associated with scarcity and advancing prices." On the declining market "buying support came largely from the so-called general public," and "the large speculators as a class operated primarily on the short side of the market."

Publication Harmless

Doctor Duvel commented that experience has demonstrated that there have been no undesirable consequences of the publication daily of the open commitments, although some grain interests had regarded this as a dangerous innovation when introduced in August, 1928. The result has been beneficial, he said. Open commitments of wheat futures at Chicago were the highest ever recorded, nearly 250,000,000 bushels, on October 16, 1929.

Doctor Duvel reviewed a report to the Senate which analyzed trading operations. He commented on efforts to relax regulations in regard to the reporting requirement, and points out that there is no basis to believe that this would encourage speculative buying and result in higher prices for wheat. "It is not known," he says, "by what magical process wheat prices could be boosted if the government were blindfolded," and suggests the same process might as reasonably be expected to depress prices. He reviews a fraud case in which the Administration was active and mentions several special investigations in which the Administration is now engaged.

Lime Returns Vary On Different Soils

Limestone, when applied with manure, fluctuated in annual acre returns from $16.22 at Ewing in southern Illinois, to six cents at Minonk in north central Illinois.

These two fields represent extremes in soil types, Ewing being an old, gray soil with impervious non-calcareous subsoil. Minonk is a very young, dark-colored soil. Both soils were on state experiment fields. In the crop residue system the limed soil increased in value from 55 cents an acre at Antioch to $11.94 at Aledo.

National Fruit Exchange

(*Continued from page* 13)

the National through an informal regional.

"It is the objective of the National to establish a co-operative sales agency which will be operated on a nation-wide basis. On terminal markets where the volume of Exchange business is sufficiently large, the Exchange will have salaried sales managers. Reliable brokerage representation will be used at other points. The plan of marketing fruits and vegetables also provides for the furnishing of shipping point sales service to member units which do not have their own sales personnel.

"All tonnage of the member units will be under contract to the Exchange. The structure and operation of the Exchange is such as to permit co-operative associations to affiliate with a minimum of readjustments in their sales policies and changes in personnel."

Coal Is Good Fertilizer German Chemist Finds

German farmers have proved they know more about chemistry than America's best scientists, says a recent dispatch from Berlin.

For generations the belief has prevailed among farmers that coal is a good fertilizer. Now a German professor has discovered that science is wrong and that the farmer who knew nothing about the chemical analysis of coal is right.

"Coal is the best fertilizer," Professor Rudolf Li ske, noted chemist, said. "When treated with a solution of ammonia it furthers the growth of plants to an astonishing degree.

"Beans, peas and cucumbers," he said, "attained a size three times as large as those left to grow without special treatment on ordinary sand soil."

Buys Soybean Oilmeal

Six cars of soybean oil meal have been bought co-operatively by Cook County Farm Bureau members, the Farm Bureau reports. Farm Adviser O. G. Barrett says that soybean oil meal, carrying 40 per cent protein, ought to give dairymen some profit when they are buying it at less than $1 a sack.

The marketing committee of the I. A. A. Board of Directors recommended at the October meeting that Farm Bureaus and Farm Bureau subsidiary organizations in feeding districts should be urged to purchase their soybean meal requirements from processors who are co-operating with the Soybean Marketing Association.

Marshall-Putnam 4-H Clubs Make Money

Record books of Marshall-Putnam 4-H Club members this year show that they made a profit of more than $3,000 from their 206 projects, according to the Marshall-Putnam Farm Bureau.

They own, or have sold, 87 beef calves, 154 pigs, 39 dairy cattle, 3,588 chickens, and 48 acres of corn. The total value of all crops and animals owned by members who completed their projects was $17,461. This includes $7,031 for beef calves, $2,701 for pigs, $4,577 for dairy cattle, $2,479 for poultry, and $672 for corn. The total cost of animals and crops grown was $14,050, making a net profit of $3,405.

Bureau county with 510 enrolled in 4-H Club boys' projects this year has the largest membership of any county.

Oil Company Managers Plan '32 Sales Campaign

THE forty-seven Farm Bureau service companies of the state are already laying plans for the distribution of 40,000,000 gallons of petroleum products in 1932, announces L. R. Marchant, manager of the Illinois Farm Supply Company.

More than 400 managers and salesmen representing the entire 47 companies attended three district meetings held at DeKalb, Peoria and Decatur, November 18, 19 and 20, to map out the year's campaign. The 1932 goal is 38,000,000 gallons of motor fuels, 1,500,000 gallons of lubricating oil, and 800,000 pounds of grease. These figures are approximately 20 per cent above 1931 sales.

L. R. Marchant

Marchant expects lubricating oil orders for future delivery to total 300,000 gallons by January 1. Reports were made at the district meetings on the progress already made in signing up orders for next year.

The Champaign County Service Company, under the management of Russell Stewart, was in the lead with future orders totaling 20,000 gallons. Three of his ten salesmen had a carload each to their credit.

When the contest closes January 1, the manager leading the state in the average number of gallons sold per salesman will receive a $100 Waltham watch. Second prize will be a $75 Waltham. The salesman with the largest total gallonage of future orders will receive a 22-inch genuine cowhide Gladstone bag and a ladies' overnight case to match. Runner-up will be awarded a leather traveling kit and ladies' hat box to match.

Information on motor fuels and lubrication was given by Dr. O. D. Horne, refinery technologist of Tulsa, Okla., and Henry Sagemiller, lubrication engineer of Chicago, who were the principal speakers at the meetings.

Everett Siegfried, a Hancock County Farm Bureau member, states that in checking the records for the past three years since he has been in the Dairy Herd Improvement Association, he finds he is making just as much profit now as he was three years ago. For every dollar expended for feed at present prices, $3.84 is returned to take care of labor, equipment and interest on investment.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL AUDITING ASSOCIATION

NOTICE is hereby given that the annual meeting of the members of Illinois Agricultural Auditing Association will be held on Wednesday, the 27th day of January, 1932, at the hour of 10 o'clock A. M., at the FAUST HOTEL, ROCKFORD, ILLINOIS, to elect directors, receive, and, if approved, confirm the report of the Board of Directors of the Association for the fiscal year ending December 31, 1931; and to consider and, if approved, ratify and confirm all the acts and proceedings of the Board of Directors done and taken since the last annual meeting of the members of the Association; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illininois, Dec. 3, 1931.

GEORGE E. METZGER, *Secretary.*

Dairy Marketing Director On Job Following Illness

J. B. "JACK" COUNTISS, formerly in charge of the Joliet branch of the Peoria Creamery Company, reported for work as I. A. A. dairy marketing director on November 16. Mr. Countiss had been convalescing at the hospital in Galesburg for several weeks following an operation.

Countiss was born and reared at Cookeville, Tenn. After attending the local college (Tennessee Tech) for two years, he came to Illinois where he was employed as supervisor of the Knox-Warren Dairy Herd Improvement Association from 1920 to 1922. He graduated from the College of Agriculture, University of Illinois in 1925. Before and during his college work he assisted Prof. C. S. Rhode in organizing dairy herd improvement associations.

J. B. Countiss

He was employed by the Peoria Creamery Company in 1925 where he has been engaged up to the present time. He established cream stations and directed the field work of the Peoria creamery for a number of years before taking over the company's branch office at Joliet.

Vermilion Livestock Co-Op. Brings Farmer More Cash

RECORDS of the Vermilion County Livestock Marketing Association for its first year of operations show that an efficiently organized livestock concentration point working as a part of the state marketing organization can actually raise the price level in its surrounding territory.

Danville prices are now approximately 70 cents per hundredweight higher in comparison with Indianapolis prices than they were when the marketing association began operations, declared Ray E. Miller, director of livestock marketing for the I.A.A.

R. E. Miller

He points out that on the day the association opened independent firms at Danville were buying hogs at prices ranging from 25 cents to $1.75 below the Indianapolis market. Quotations at Danville are now from 10 to 40 cents under Indianapolis. Competition of the association is credited with decreasing the spread from an average of around $1.00 to approximately 30 cents, or, in other words, with returning 70 cents more per hundred to the producers.

Saves Thousands

This means a saving of thousands of dollars annually to Vermilion county farmers, according to Miller. The cooperative alone handled more than 6,000,000 pounds of livestock this year.

More than 450 members are shipping through the co-operative agency Farm Adviser Otis Kercher recently reported. During the year stock was sold through 20 outlets, including six terminal markets and 14 packers. The terminal markets were Indianapolis, Chicago, Buffalo, Cincinnati, Pittsburgh, and Cleveland.

The Vermilion county association is a member of the Illinois Livestock Marketing Association, which recently opened headquarters at Decatur to coordinate the movement of livestock from county and district concentration centers throughout Illinois. Work toward extending this service to sections not served at present is being carried on by the I. A. A.

The Marshall-Putnam Oil Company, a subsidiary of the Farm Bureau, paid a patronage dividend of 24 per cent on all purchases made by Farm Bureau members during the fiscal year just ending.

Red Fox Deserves Some Protection

Cornell Professor Says Reynard Does Not Merit Bad Reputation

The red fox should be given protection as are skunk, coon, mink and other fur animals, before he goes the way of the passenger pigeons and other extinct forms of wild life. His good habits far outweigh his bad traits, says W. J. Hamilton, Jr., of the zoology department at Cornell University.

Generally, he says, the fox is not so black as he is painted. In analyzing the stomachs of more than sixty foxes, Dr. Hamilton finds that the principal foods of the fox are meadow mice; ground squirrels; fruits, especially apples and berries; insects; and other small forms of animal life. In only one stomach did he find chicken feathers or bird remains. A cat, he says, puts the fox to shame as a bird killer. Without question Reynard does take a bird now and then as the occasion demands. But what of it, when he eats about 600 medow mice in a year and keeps cottontails in check?

Young Like Kittens

In late March or early April the vixin, or she-fox, bears four or five young. For their arrival she utilizes some woodchuck hole or enlarges a rabbit retreat. At the end of four or five weeks the young are large enough to come out-of-doors. They have woolly coats quite unlike those of their parents and romp and play much like kittens. The mother is never far off and at any indication of danger an alarm sends the young tumbling into their retreat.

The brood grows rapidly and is fed by both parents. Young woodchucks, meadow mice, an occasional small bird or butterfly is brought to them, often alive. The young tug and worry their victim and get an early training in hunting in this manner, he says. By the end of summer the young are grown, and the den is a mass of bones and fur, some feathers, and offal from their food. The young scatter when cold nights come in the fall and are capable of having young before they are a year old.

Deserves Keen Reputation

The sharp, shrewd looking muzzle, the quick eye and the erect ears give the fox the characteristic expression of acuteness which it does not belie. Many tales are told of the cunning and craftiness of the fox in eluding pursuit by men and dogs. Reynard has been known, when hard pressed, to jump on the back of sheep or cattle which are stampeded, so they may carry the fox some distance before he jumps off and retreats safely.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL HOLDING CO.

NOTICE is hereby given that the annual meeting of the stockholders of Illinois Agricultural Holding Company will be held on Wednesday, the 27th day of January, 1932, at the hour of 11:00 o'clock a. m., at the Faust Hotel, Rockford, Ill., to elect directors, receive, and, if approved, confirm the report of the board of directors of the company for the fiscal year ending Dec. 31, 1931, and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Ill., Dec. 1, 1931.

GEORGE F. TULLOCK,
Secretary.

Proper Seed Storage Increases Corn Yield

The seed corn storage houses at Varna, Granville and Henry will be open on Tuesday, Thursday and Saturday afternoons during the season for seed selection, announces the Marshall-Putnam Farm Bureau.

The Farm Management Department of the University of Illinois has found that corn yields may be increased two bushels per acre where the seed is properly stored and not allowed to freeze. Proper storage and testing will give an average yield of five bushels more per acre. An increase of only 1¼ bushels per acre will pay for the service of storage and testing.

Public Forests Will Pay Their Own Way: Warren

Public forests in a densely populated state will more than pay their own way, according to Dr. George F. Warren, Cornell economist. They regulate the flow of streams and protect the water supply, as well as provide for hunting, fishing, and recreation, and improve the appearance of the state. None of these uses interferes with the growth of trees for timber products.

It is unfortunate, he says, that large areas of excellent forest land, that were never well adapted to farming were ever cleared. Abandonment of these areas began about fifty years ago and it has continued at an increasing rate. Fortunately the conditions which make land undesirable for farming often make it excellent for forestry.

Build Factory at Ames To Test Use Farm Wastes

Factory-scale experiments will be conducted in a factory at Ames, Iowa, by the U. S. Department of Agriculture with a view of developing commercial utilization and finding a more profitable outlet for various farm by-products, including corn stalks, straw, oat hulls, rice hulls, cottonseed hulls, and other similar materials.

Stressing the need for this work, Dr. W. W. Skinner, who will have charge of the experiment, said, "The farmer has to raise about 1½ pounds of waste material to every pound of grain he produces. This represents a loss of fertility and brings on an immediate problem of disposal. The cost of collecting such materials as corn stalks and straw is very great and one object of the factory-scale experiment now being started is to determine whether by additional chemical treatment we can produce value in excess of this cost."

Dr. Skinner stated that the small-scale laboratory experiments of the past have offered little opportunity for the solution of the problem. The recent Congress appropriated $75,000 for this work.

Corn Price and Pen Rent

In the last issue of the RECORD there appeared a statement which implied that commission firms are responsible for present pen rent, corn prices, etc., at the stock yards; that commission firms are charging $1.30 a bushel for corn fed.

It should be understood that the stock yards company, not commission firms, fixes the cost of pen rent, corn prices, etc. The price charged on corn includes delivery to the different pens and alleys in the stock yards. The packer and stock yards administration, U. S. D. A., has authority to regulate such charges.

In 1929 the Land O'Lakes Creamery handled $52,500,000 worth of dairy products; the National Cheese Producers Federation in 1930 $11,886,102 worth of cheese. The Dairymen's League Co-operative Association of New York in 1929 handled more than $89,000,000 worth of milk and dairy products; the California Fruit Growers Exchange the same year shipped fruit valued at $104,900,000.

Whiteside county increased cooperative shipments of livestock from 160 cars in 1929 to 254 cars in 1930. The increase will be even larger in 1931 reports the Whiteside County Farm Bureau. During the first six months 194 cars were shipped in comparison with 133 cars in the first six months of 1930.

Recently buyers on the market have complained that calves are being loaded in double deck trucks without sufficient head room, the upper deck being too low. As a result calves come in bruised on their backs. This shows up badly in the dressed meat.

Truckmen are asked to lend their cooperation toward avoiding this damage and loss in transit.

TAKE time to figure the proper weight, class, and especially grade of cattle to feed for the various seasons of the year, advises H. M. Conway, director of research for the National Livestock Marketing Association. Particularly select cattle that will be best for prospective market conditions and the supply of feeds available, he said.

Too frequently top choice feeders are selected for the late winter and spring market, whereas a lower grade animal will more likely make a profitable margin. For the summer market the reverse is true.

The choice feeders normally require a rather long feeding period and a heavy grain ration, while with common steers roughage should be the principal feed with little grain.

Shrink on Hogs

On 1,252 hogs marketed by truck (average haul 26.7 miles) the average shrink from a farm feedlot to market was 1.23 per cent; on 2,084 hogs shipped by rail (average haul 128.8 miles) the average shrink from farm feedlot to market was 1.19 per cent. In other words, no significant difference.

Hogs given less than a full feed at the farm appeared to shrink less both by rail and by truck—part of the shrink occurring before the farm weights were taken. Shrinkage by truck apparently tended to increase with the distance trucked, being 1.24 per cent on 89 hogs trucked 36 miles or more, and 1.37 per cent on 69 hogs trucked 55 miles or more. This information was obtained following a survey by R. C. Ashby of the University of Illinois.

NOTICE OF ANNUAL MEETING OF ILLINOIS FARM BUREAU SERUM ASSN.

NOTICE is hereby given that the annual meeting of the members of Illinois Farm Bureau Serum Association will be held on Wednesday, the 27th day of January, 1932, at the hour of 10:00 o'clock a. m., at the Faust Hotel, Rockford, Ill., to elect directors, receive, and, if approved, confirm the report of the Board of Directors of the Association for the fiscal year ending Dec. 31, 1931; and to consider and, if approved, ratify and confirm all the acts and proceedings of the Board of Directors done and taken since the last annual meeting of the members of the Association; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Ill., Dec. 2, 1931.

RAY E. MILLER,
Secretary.

Wolf Attacks Caribou; Dies on Enemy's Horns

In Alaska, where wolves have terrorized the timid reindeer and slaughtered them in great numbers, one bold wolf came to an inglorious end this summer when it tackled a bull caribou.

A report to the Biological Survey of the United States Department of Agriculture says: "Victorious in combat with the wolf but unable to free himself from the dead body of his foe, a big bull caribou was seen a few days ago on Birch Creek in the Circle country walking slowly along, bowed down under the wolf's weight. The wolf apparently had been impaled upon the caribou's horns and mortally wounded, but the caribou was unable to free himself from his burden. One of those who saw the caribou said the weight he carried was too great to permit him to run. Every time he passed a tree he would try to rub the wolf from his horns. He was accompanied by another bull, which would run ahead a few paces and then wait for his slower companion."

$2,000 Difference in Net Income Per Farm

Efficiency in livestock production is one of the most important factors accounting for the difference of $2,000 between the net income of the 41 most profitable farms and the 41 least profitable farms in the farm account project last year in the area comprising Marshall-Putnam, LaSalle and Grundy counties, reports the LaSalle County Farm Bureau.

"The operators of the more profitable farms secured $150 of livestock income from $100 worth of feed, while the least profitable had a corresponding income of $97.

"Since these farms had about the same market outlet, the difference in net returns means that the most profitable produced meat, eggs, milk, etc., at lower cost."

Farm and Home Week Slated for Jan. 11-15

Plans are already underway for the thirty-fourth annual Farm and Home Week to be held at the University of Illinois, January 11 to 15, according to an announcement received by the I. A. A.

Eugene Davenport, dean emeritus of the College of Agriculture, University of Illinois; President F. D. Farrell of Kansas State Agricultural College, and Dr. George F. Warren, head of the department of agricultural economics, Cornell University, are to be headline speakers.

Last year 3,146 farm folks from 97 counties registered during the week. An equally large attendance is expected this year. Recreation, inspiration, contests and entertainment, as well as instruction, will again be featured.

High School Boys Form Co-Op. Feed Grinding Co.

Students of vocational agriculture in the Jacksonville high school under J. H. Loomis have organized a co-operative feed grinding company. Its purpose is to grind feed for local farmers, help them balance live stock rations, to foster and develop the co-operative spirit among its members, and to help finance the outside activities of the high school agricultural department.

The feed grinder is a portable outfit, a Hammer mill mounted on a two-ton truck and driven by an International truck engine. It is taken from farm to farm where the feed is ground. The Farm Mechanics high school class did all the work in putting the truck and engine in good mechanical condition.

"The price of grinding is 15 cents per cwt. to patrons not members of the company, or 5 cents less than the price others are charging for similar service," says Loomis. "The average earnings per hour is about $4, with the cost of operating around $1 per hour."

Liability Insurance Applies in Farm Building

Accidents Indicate Need for Employers Protecting Themselves

The question of whether or not the liability insurance of the Illinois Agricultural Mutual Insurance Company covers injury or death of employees while working on new buildings is explained as follows by V. Vaniman:

"Our insurance will protect the farmer employer against liability to employees for work done on new buildings on farms providing the size of building and time involved does not bring employees under the provisions of the Workmen's Compensation Act.

"A new building built on a farm requiring over two or three weeks to build and of size to make the building of it a hazardous enterprise would not be considered farming operations. Therefore, farmers should not have employees working on jobs of this kind expecting protection under our insurance."

The ten high counties in total applications written up to November 1 are McLean, DuPage, Livingston, Henry, Cook, Tazewell, Vermilion, St. Clair, Fulton, and Kendall.

Some recent accidents are as follows:

Cass County—Employee was loading calves in truck when he was kicked by a calf and slipped on the floor of the truck. Muscles were torn at his ankle and the bone injured, making plaster cast necessary.

Menard County—Man was helping veterinary with sick mule when mule kicked him in left eye fracturing bone under eye, also cutting and bruising face.

Pike County—Employee working on hog shed when a 2 by 8 fell on his finger bruising it severely, making it necessary to be lanced several times.

Sangamon County—Hired man had legs scraped and bruised while driving wagon hauling beams. Injury caused by sudden start of team.

Cook county again led the field in the amount of automobile insurance written in the Illinois Agricultural Mutual Insurance Company during October. St. Clair, runner-up in September, was also second last month.

Other leading counties in October were Livingston, Ford, McLean, Henry, Logan, Marshall-Putnam, Champaign, and Sangamon.

Here are some of the accidents reported:

Crawford County — Insured was driving and smoking a cigar; turned head to spit out of window and car ran off left side of road. In turning back on his car turned over and injured lady passenger.

Jefferson County — Insured going south, about one block out of city, noticed car parked on east side of road. As he was passing car woman stepped out and was knocked to pavement, resulting in her death.

Montgomery County—Insured's car stopped on pavement during hard rain. Friend's car came along and in passing ran through water killing his engine before he could get off slab. Car following tried to pass and had head-on collision with truck. Party in car colliding with truck killed.

100% FARM BUREAU AND COUNTRY LIFE MEMBERS
Mr. and Mrs. Ray Stevens and their five children, all Country Life policyholders. Mr. Stevens is a member of the Boone County Farm Bureau.

60 Counties to Hold Jubilee Programs Dec. 12

Between 40,000 and 50,000 Illinois farmers will attend the 60 Farm Bureau jubilee programs to be held on the night of December 12 in conjunction with a radio broadcast over station WMAQ, Chicago, estimates V. Vaniman, director of insurance service.

Mr. Vaniman said most of the local programs would start shortly after 7 o'clock so that counties holding beauty contests might send in the names of winners in time to be announced over the radio. The broadcast is scheduled to occupy a half-hour between 8 and 8:30.

About two-thirds of the counties putting on programs will feature beauty contests as one of the chief attractions. Mr. Vaniman said that the term "beauty contest" had taken on a new meaning among Farm Bureau people who saw the contests last year.

He calls attention to the statement of an eminent psychologist from Johns Hopkins University that "the conservation of human beauty is the question of the hour, because physical beauty is directly associated with moral beauty, bodily well being, efficiency, and intellectual excellence."

Local program committees are already arranging their programs, said Mr. Vaniman. All the numbers except those on the half-hour broadcast will be given by local people. L. A. Williams, manager of Country Life Insurance Company, will speak on the radio program.

The "Brown County Farm Bureau News" recently made its appearance. It will replace "Farm Gist" as the Farm Bureau official organ.

Life Insurance

Country Life Insurance Company is attempting to establish a new world record by topping the list in millions of insurance gained in 1931. Country Life already holds world records for business gained in the first 30 days of operation and in the first year.

The twenty counties leading in new business in Country Life wrote almost a half-million dollars worth of insurance during the first three weeks of November.

Six agents each turned in more than $20,000 worth of new business during the three weeks ending November 21. They are E. A. Carncross, B. E. Mosier, Homer Hitchcock, Claude Hicks, J. D. Smith, and Ira Cottingham.

The ten leading counties during this period were Cook, Champaign, Livingston, Winnebago, Lake, Sangamon, Logan, Jersey, Henry, and Kendall.

Ira Cottingham sent in $20,000 in one day and L. R. Welk sent in $15,000 at once. Bernard Mosier wrote $19,000 in one week.

Country Life Declares Capital Stock Dividend

The Board of Directors of Country Life Insurance Company recently voted to declare a 9 per cent dividend ($9,000) payable to the Illinois Agricultural Holding Company, which owns all of the capital stock of Country Life. Stock in the Holding Company in turn is held entirely by Farm Bureau members, County Farm Bureaus, and the Illinois Agricultural Association.

Directors of the Illinois Agricultural Holding Company voted to pay dividends on the 7 per cent preferred stock to stockholders as of record December 1, 1931. The preferred stock in the Holding Company is issued as of December 19, 1929.

The subject of dividends to policyholders in Country Life will be considered at the January meeting of the Board.

Northern Illinois Farm Advisers to Boost Meeting

Seek to Get Out 5,000 Farm Bureau Members Within 60 Miles Of Rockford

A BOOSTER meeting of farm advisers and Farm Bureau presidents in northern Illinois to get out a large local attendance at the coming I. A. A. convention in Rockford, will be called in the near future, according to Farm Adviser Chas. H. Keltner, who visited the I. A. A. offices recently.

"We have plenty of accommodations for everyone at Rockford," said Keltner. "There is ample hotel room and the rates will be reasonable. We are asking that when making reservations, farm advisers specify the kind of accommodations wanted, including price of rooms, the number in a room, etc. We will try to fill every order as requested."

Hold Down Cost

Mr. Keltner states that the capacity of the banquet room on the twelfth floor of the Faust Hotel is rated at from 1,600 to 1,800 people. He is requesting that reservations be made early.

"Every effort is being made to hold down the cost of banquet and luncheon tickets below those of previous years," he said. "We have approximately 5,000 Farm Bureau members within a radius of 50 to 60 miles of Rockford, and we shall make every effort toward getting them out to the convention."

Where to Go

Delegates and members arriving in Rockford are asked to report at the hotel assigned where definite advance reservations have been made. Others must report at the registration desk in the lobby of the Faust Hotel.

The annual dinner and get-together for farm advisers, Farm Bureau presidents, I. A. A. officers and staff members will be held in the main dining room

of the Nelson Hotel on Wednesday night, January 27. The dinner is being financed by the local Chamber of Commerce.

Board of Delegates Is Governing Body I. A. A.

EVERY organized county in Illinois will be represented by one or more voting delegates at the annual meeting of the I. A. A., Rockford, January 28-29, if each takes advantage of its privilege. According to the present count there will be approximately 200 delegates from the 94 County Farm Bureaus.

The by-laws of the I. A. A. provide that "the members within a county in good standing and engaged in production of agricultural products shall be entitled to representation in the annual meeting of members, and in any special meeting, by one voting delegate, and one additional voting delegate for each 500 members in good standing engaged in production of agricultural products, or major fraction thereof."

Thus, the county with 251 members is entitled to two delegates; 751 members, three delegates; 1,251 members, four delegates; and 1,751 members, five delegates.

Who Is Eligible?

All delegates must be members in good standing (dues paid) and engaged in production of agricultural products. This classification includes both landlords and tenants, and parties who are

(*Continued on next page*)

See I. A. A. Convention as Clearing House for Ideas

One Place Where Man on Farm Gets A Chance to Tell What He Thinks About It

THE 17th annual meeting of the Illinois Agricultural Association to be held at Rockford, January 28-29, together with meetings of associated companies on January 27, will be a clearing house for ideas and suggestions offered by real farmers from all sections of the state on what they can and should do in an organized way for the welfare of the industry.

Of course there will be speeches and addresses as in past years by men of national prominence. But there will be a time also for the most obscure member to rise up and tell what he thinks his organization should and should not do in the next year.

Five Business Conferences

The five business conferences to be held simultaneously on Thursday afternoon as in former year, were arranged expressly for this purpose. The various sessions of the delegates, particularly the closing one on the last afternoon of the convention, are open for free discussion of resolutions and policies governing the Association and its work.

The opening morning of the I. A. A. meeting on January 28 will be largely devoted to the president's address, and reports by the secretary and treasurer about the work of the organization during 1931 and its condition today.

Banquet and Luncheon

The banquet and luncheon Thursday night and Friday noon respectively will be held in the Faust Hotel dining room on the top floor. A large number of leaders representing other business and educational interests in the state, cooperative marketing officials, and men in public life are being invited to attend.

(*Continued on next page*)

President Ed. A. O'Neal of the American Farm Bureau Federation, and Sam H. Thompson, former president of the I. A. A. and A. F. B. F. and now a member of the Federal Farm Board, have accepted invitations to attend the convention. Both will appear on the program sometime during the two-day meeting.

Had Prominent Men

A survey of the field reveals that nearly every man of national prominence in agriculture has addressed either an annual meeting of the I. A. A., or some other gathering sponsored by the Association in recent years. Yet an effort is being made to maintain these former high standards in the selection of outstanding speakers for the 1932 convention.

As we go to press the programs for meetings of the associated organizations and the sectional conferences are being made up. Further details will be released to the newspapers and carried in the Illinois section of the February Bureau Farmer, which will be published about January 18.

Board of Delegates

(Continued from page 3)

farming on shares. No salaried or paid employee or agent in regular and continuing employment of the Farm Bureau—I. A. A. or any associated or subsidiary company is qualified to serve as a delegate.

The by-laws of the Association may be amended, repealed or altered in whole or in part at any regular meeting by a two-thirds affirmative vote of the regular members in good standing represented in the meeting by qualified delegates present, or by like vote at any special meeting of which due notice has been given. A quorum must be present at such meeting and amendments shall be in the hands of the secretary at least 20 days prior to the meeting of the Association. The secretary shall have mailed at least 10 days prior to such meeting a copy of the proposed amendment or amendments to the last known post office and address of each member of the I. A. A. Board of Directors and to each affiliated County Farm Bureau.

The supreme power to elect the president and vice-president and board of directors and to shape and adopt policies of the Association is vested in the board of delegates constituted in accordance with the provisions above.

Mont Fox of Oakwood and John Leemon of Hoopeston were elected official delegates of the Vermilion County Farm Bureau to the annual meeting of the I. A. A., Rockford. George Lenhart and Ralph Mills are alternates.

Consider Income Tax Bill in House Next

Breakdown of Property Tax in Cook County Leads to More Favorable Attitude Toward Measure

EARLY consideration of the state income tax bill in the House, following the reconvening of the legislature on Jan. 5, will be asked by supporters of this measure which is the only legislation so far advanced offering substantial tax relief to property.

The long-heralded breakdown of the general property tax, particularly in Cook county, is expected to result in a more favorable attitude toward an income tax by Chicago members of the House.

Sen. Lantz

The income tax, the revenue from which will go to replace taxes now levied for educational purposes on property, passed the Senate by a vote of 29 to 17 on Dec. 16.

Lantz Calls Up Bill

Sen. Simon E. Lantz of Congerville called up the bill and briefly explained its provisions emphasizing the fact that this measure and those which accompany it provide for a replacement and not an additional tax. Speeches supporting the measure were made for the first time by Cook county members. Senators Adelbert Roberts and Arthur A. Huebsch of Cook county, Charles H. Thompson of Harrisburg, N. M. Mason of Oglesby, and Andrew S. Cuthbertson of Bunker Hill. Senators Victor P. Michel of Peoria and Earl B. Searcy of Springfield spoke against the measure.

"I have changed my mind about the income tax," said Senator Roberts, one of the foremost members from Chicago. "This is a changing world and while I have previously voted against the measure, I believe the time has come for us to inaugurate a fairer system of taxation and pass the income tax."

Senator Michel spoke against the measure "on constitutional grounds." His discussion indicated he had not read the measure, nor was he informed about the provisions in the companion bills which make this a replacement tax.

Sen. Thompson Speaks

Senator Thompson of Harrisburg, an attorney, said: "I disagree with Senator Michel. I believe this bill is constitutional. This is sound legislation because it is based on ability to pay. My only interest is that the exemptions be made high enough to spare the little fellow."

Senator Huebsch of Brookfield supported the constitutionality of the bill in which he pointed out that the State of Arkansas, which has an income tax, has a uniformity clause in the revenue section of its constitution much like that of Illinois. He read the list of states now having income taxes. He said: "We can't continue to maintain our government and talk real estate tax reduction without substituting something else for it."

Searcy Evades Issue

Senator Searcy said he was friendly to the income tax in principle, but against the extension of government at this time. He was evasive regarding the question of bringing relief to overburdened farm and home owners. He failed to recognize the fact that many people of large incomes but without tangible property are now paying nothing to support government.

Senator Woods of Chicago agreed that an income tax eventually should be part of our taxing system, but held that an effort should be made first to put teeth in present laws to get personal property on the tax rolls. "There is approximately $19,000,000,000 of personal property in Cook county," he said, "yet we have only $10,000,000,000 worth of property on the tax rolls, nearly all of which is real estate."

How They Voted

The bill which provides for a graduated tax of from one to six per cent on net incomes in excess of $1,000 for a single person and $2,000 for married couples would be administered by a Department of Revenue. All the money collected from this source except a small portion for administering the act would go to the public school fund.

The vote was as follows:

FOR THE BILL—Huebsch, Roberts, Adair, Baker, Barr, Bohrer, Carlson, Cuthbertson, Dunlap, Ewing, Gunning, Hamilton, Hanna, Kessinger, Lantz, Lee, Mason, McCauley, Meents, Meyers, Miles, Mills, Paddock, Smith, Thompson, Wilson, Wright, Finn, Monroe—Total 29.

AGAINST THE BILL—Serritella, Woods, Broderick, Carroll, Gillmeister, Graham, Huckin, Kielminski, Loughran, Maypole, McDermott, Mendel, O'Grady, Ward, Michel, Searcy, Kline—Total 17.

Some people notice that the days are getting longer; others that the nights are getting shorter.

McGinty: "I've a terrible corn on the bottom of my foot."

Pat: "That's a foine place to have it. Nobody can step on it but you."

Lake Co. School Districts Seek More Taxing Power

Consideration of Higher Tax Limit Bill Deferred Until Jan. 6

AN effort to increase the property tax limit for school purposes in Illinois was made by proponents of House bill 72 before the House Committee on Education at Springfield, December 16.

This measure amends sections 189, 190 and 191 of the school law and provides that exclusive of taxes to pay the principal and interest on bonds, school districts which heretofore might levy one per cent ($1.00) for educational purposes and three-eighths of one per cent (37.5 cents) for building and purchasing grounds may levy 1¼ per cent for all expenses and upon a referendum instead of 1½ per cent ($1.50) for educational purposes, and one-half per cent (50 cents) for building purposes and purchasing of grounds, may levy not to exceed two per cent ($2.00) and districts maintaining grades 9 to 12 in addition to grades 1 to 8 which heretofore might levy an additional tax of one per cent for educational purposes and three-eighths of one per cent for building purposes and for purchasing of grounds may levy an additional tax of one and one-fourth per cent.

Would Change Limits

In districts which were heretofore authorized by referendum to levy more than one per cent but not more than one and one-half per cent for educational purposes and more than three-eighths but not more than one-half of one per cent for building purposes and purchasing of grounds, may levy a tax of not to exceed one and three-quarters per cent and upon referendum may levy not to exceed two per cent and those districts maintaining grades 9 to 12 and heretofore authorized by referendum to levy an additional tax of one per cent for educational purposes and three-eighths of one per cent for building purposes and purchasing of grounds, may levy an additional tax of not to exceed one per cent and upon referendum may levy not to exceed one and one-eighth per cent. Provides that the levy for the payment of principal and interest on the bonds shall be in addition to the levy of taxes for the expense and maintaining and conducting schools.

The legislative committee of the I. A. A. has gone over the measure with its proponents taking the position that increases in taxes for educational purposes must not be allowed without approval of the people in a popular referendum.

A representative of the Central Lake County (Ill.) Taxpayers' Association from Lake Villa appeared against the bill, declaring that farm lands in Lake county were being assessed at 38 to 44 per cent of their fair cash value, whereas in Highland Park real estate was assessed at only 16 to 20 per cent of its fair cash value.

"We are not against the present salary schedule of teachers," he said, "but it's the frills in our schools that are costing too much."

Up Again Jan. 6

Representative Bolger of McHenry county moved that amendments proposed by friends of the measure to the bill be printed and placed in the hands of the committee on education before final vote.

Representative Luckey of Vermilion county opposed the measure and advised the school board representatives from Lake county to go back home and pay their just share of the taxes, then they would have enough money to run their schools.

The committee finally voted to postpone action until January 6.

Talk Over Problems 17th District Meeting

More than 40 delegates and members from the 17th district attended the I. A. A. sectional meeting in the Y. W. C. A. Building, Bloomington, December 16. The meeting was called by A. B. Schofield, I. A. A. director, who presided.

Among the subjects discussed were hog cholera control, livestock marketing, including the producers' sales agencies, and plans for financing the Illinois Livestock Marketing Association.

A. B. Schofield

Legislation now before the General Assembly, including the proposed state income tax, entered the discussion. "It was a meeting in which we talked over our local problems," commented Mr. Schlofield. "I believe such meetings have great value because they give everyone attending an opportunity to express themselves about Farm Bureau activities and policies. Such an opportunity is lacking in the larger state-wide meetings."

Farm co-operative marketing associations in the United States number approximately 12,000 at present with a total membership of 3,000,000.

Safety First Principle In Investment Policy

Bob Cowles Tells Agents How Funds Of Companies Are Invested

THE reserve funds of the Farm Bureau insurance companies are invested in "back-log" securities, with first consideration being given to safety of investments and second consideration to returns, R. A. Cowles, treasurer of the Illinois Agricultural Association, stated in explaining the investment policy of the companies to a group of northern Illinois agents in Chicago December 21.

Following the only sound policy for any new company, Country Life Insurance Company and Illinois Agricultural Mutual have wisely sacrificed possible larger returns for safe investments, a large part of which are made up of government and municipal bonds, Mr. Cowles said. Although Country Life is a capital stock company and the automobile insurance company is a mutual, the same investment policy has been followed in both.

Robt. A. Cowles

The committee of five, which has authority to make investments for both companies, has placed the funds in three types of securities, he explained. The first type is United States government obligations, such as liberty bonds, treasury notes, and other similar issues, which are readily convertible into cash and which fluctuate very little in value. The next type includes state and municipal bonds. The third class embraces utility bonds and first mortgage bonds on railroads.

At present the committee is confining investments largely to federal government securities. The committee meets once a month and considers offers of current issues. Business is done through the oldest and most reputable investment houses in Chicago and all bonds are delivered in safe keeping to the Continental Illinois Bank and Trust Company, where they are kept. Coupons are clipped by employees of the bank and cashier's checks issued to the companies.

The investment committee is headed by A. R. Wright, banker-farmer of Varna, vice-president of the Illinois Agricultural Association. Other members are President Earl C. Smith, Treasurer R. A. Cowles, and Directors M. G. Lambert and C. J. Gross.

Farm Taxes Rise 166 Per Cent Since 1914

Income Taxes Should Raise Half Public Revenues, Wisconsin Professor Says

SINCE 1914 taxes on farm property have risen by 166 per cent, while the price of farm produce is now down to 68 per cent of the war level, Dr. B. H. Hibbard of the University of Wisconsin told delegates and visitors at the recent American Farm Bureau Federation convention.

"While the discrepancy between the prices paid by farmers for goods bought and the prices received by them for produce sold may be the crux of the farmers' troubles," said Mr. Hibbard, "the fact remains that one of the large items of his outgo consists of the taxes he pays. It is demonstrable that these taxes are higher than they should be as compared with the general tax burden resting on people in general. It is true that the taxes on real estate are about equally high in city and country, and in state after state.

Real Estate Pays Taxes

"Real estate is taxed somewhere from 20 to 40 per cent of its annual rental value. In several states it was found that the taxation of both city and country real estate amounted to from one-fourth to one-third of the annual income **Before the present depression it was estimated that approximately 30 per cent, nearly one-third, of the net income on cash-rented farms was absorbed in taxes. No businesses other than those yielding profits can stand taxation as heavy as this.**

"The main hope of real, permanent tax relief for the farmer is in the prospect of a change from property to income as the main reliance in raising revenue," continued Dr. Hibbard. We have been timid and halting in this reform, although the need for a change and the justice of the income tax principles have long been accepted. Income is not based primarily on property. **Hence the folly of trying to reach the main sources of ability to pay merely by enumerating and assessing property. We should not rest content until half the public revenues are raised by income taxes. Not until such a reform is brought to pass is there hope of a genuine, adequate relief from the overload of taxes now resting on the farm.**

Taxes Cause Bankruptcies

Dr. Hibbard pointed out that the taxes paid by farmers have been a large contributing cause to bankruptcies and foreclosures. He said that the tax is often one-third or one-half as great as the interest payment required on mortgaged land, and it is reasonable to believe that the cause of financial wrecks among farmers has been attributable to taxes as well as to heavy mortgages, and in the proportion that taxes bear to interest charges. With farm income falling and promising to remain low for some time, taxes loom like a spectre over the farmers' horizon, he said.

An Illinois Editor On the Farm Bureau

"The history of the Vermilion County Farm Bureau illustrates the value of organization and co-operation of farmers," declared the Danville Commercial-News in a recent editorial. "The individual farmer stands alone. He accepts what the stock buyer and the grain dealer choose to give him for his surplus stock and grain. He is at their mercy. Likewise he is at the mercy of those from whom he buys his supplies. His trade is not worth dickering over.

"Acting in a body, the members of the Farm Bureau command the attention of the big dealers, the wholesalers and the heavy buyers, and procure the best terms on the markets. This is true in buying fertilizer, farm machinery, seed grain and other supplies that every progressive farmer must have. Likewise it is true in selling farm products.

"And a highly important work of organized agriculture is the influence it may wield in the matter of procuring favorable legislation, both state and national. Members of congress and state legislatures, even the president and his cabinet, listen attentively to the appeals of farm organizations and enact legislation designed to meet their demands. Organized agriculture is a power to be reckoned with by legislative bodies and administrative officers."

Donald Kirkpatrick, legal counsel for the I. A. A., was the principal speaker at the thirteenth annual meeting of the Edwards County Farm Bureau at Albion, December 16. Other speakers were F. E. Longmire and Mary Louise Chase, University of Illinois.

Correction

The monthly meeting of the board of directors, not the annual meeting of the Chicago Producers Commission Association will be held at Rockford on Tuesday, January 26, just prior to the annual meeting of the I. A. A.

The annual meeting of the Chicago Producers will be held in March in Chicago as in previous years rather than at Rockford.

Organization in Selling And Buying, Farm Need

Farmers Forced to Buy Co-Operatively to Cut Their Costs of Production

COMMENTING upon recent developments in co-operative purchasing of farm supplies before the Vermilion County Farm Bureau December 10, George E. Metzger, secretary of the Illinois Agricultural Association, declared that farmers were being forced into business in self defense.

"No business can succeed by purchasing everything at retail and selling everything at wholesale, which is virtually what the American farmer is doing and has been doing for a considerable period of years," he said.

Geo. E. Metzger

"A careful study of the commercial and semi-commercial projects of the Farm Bureau and the Illinois Agricultural Association will disclose that they are being set up on the chain principle. Co-operation in agriculture had its beginning with the local co-operatives. They succeeded in cutting assembling expenses, but they cannot reach far enough into the markets to bring to the producer his fair share of the consumer's dollar.

"It takes wider organization than the local co-operative, and the solution is the merging of local co-operatives into state-wide and national sales and purchasing organizations. The farmer cannot be blamed for taking this step. He has learned it from business interests. Business has found co-operation and organization to be advantageous and so will the American farmer find it so."

Regarding the extent to which the movement might develop, Mr. Metzger said, "The question is often asked, 'Where is this movement going to stop?' Our answer is that whenever we find the margin made by distributors so wide as to work a hardship on producers of farm products you will undoubtedly find the farmer getting into that line of business."

The Farmers National Grain Corporation is now getting from three-eighths to one-half of all the grain coming to the Peoria market, reports John Benson, manager of the Peoria office. There are about twenty firms buying grain on this market.

Social Justice Group Upholds Producers

Commisssion's Report Declares Contract of Pevely Dairy Co. "Indefensible," States Issues of Controversy

THE Social Justice Commission of St. Louis in response to an appeal from a religious leader, many of whose parishioners are members of the Sanitary Milk Producers Association who formerly supplied milk to the Pevely Dairy Company, arranged conferences between representatives of the Pevely Dairy Company and the Sanitary Milk Producers Association.

At these conferences it became evident to all members of the Commission that all of the issues which precipitated the conflict could and should be arbitrated. The Sanitary Milk Producers Association agreed to arbitrate. The Pevely Company refused to arbitrate. The Social Justice Commission did not propose that it would serve as an arbitration commission, but suggested some impartial group on which both sides could agree.

As a result of these conferences, and as a result of research in the entire field of co-operative marketing of dairy products, the Commission issues this statement:

States Issues

I. **That organizations similar to the Sanitary Milk Producers Association exist in many cities and function satisfactorily.**

II. **That such organizations are sanctioned by acts of congress and laws of Missouri and Illinois and are subject to legal control.**

III. **That in communities where such organizations function, the price of milk is not higher than in communities where they do not exist. Differences in price are generally due to local conditions.**

IV. **That the issues of the controversy are as follows:**

(A) A new contract issued by the Pevely Dairy Company on September 1, 1931, to members of the Sanitary Milk Producers Association, from whom it had been buying milk, precipitated the present "strike." This contract bound the farmer to supply his milk to the Pevely Company at a price **which the company assumed power to fix. The farmer had no power even to cancel his contract. This contract seems to us to be ethically indefensible.** Mr. Kerckhoff (president, Pevely Dairy Co.) has admitted that it was an error and he has given the farmer the privilege of cancellation, but the Pevely Company retains the power under the contract to set the price. Were it not for the protest of the farmers' organization, even the privilege of cancellation might not have been extended.

Request Is Just

(B) The Pevely Company also refused to permit representatives of the Sanitary Milk Producers Association to check the butterfat content of milk sold to it by members of the Association. The price of milk depends upon its butterfat content, which is determined in the first instance by the company at its plant in the city. The Pevely Company is willing to permit each farmer to make his own check, but this is impractical for thousands of farmers. The request of the Sanitary Milk Producers is just and equitable, and the Pevely Company has conceded as much in writing.

(C) The Sanitary Milk Producers Association has as its purpose collective bargaining on behalf of its members with the several distributors of milk in St. Louis. Such collective bargaining has been carried on for more than a year with the other distributors, and the desire of the association to bring the Pevely Company into the plan presents a fundamental, though not the most immediate, issue in the controversy. The existing plan in no sense "draws a ring around St. Louis." It permits the distributors to purchase as much milk as they please from any source, at any price not higher than that paid to members of the association. Moreover, the presence of consumers' representatives at the price conferences, which is an integral part of the plan, is an important assurance to the public against extortion. **We of the Social Justice Commission believe that the right to bargain collectively is an inalienable right of farmers as well as of workers and employers.** That principle has been widely approved. Among the religious bodies which have publicly approved it are: The Roman Catholic Church, through encyclicals or other official pronouncements by every Pope beginning with Leo XIII, the Federal Council of Churches of Christ of America, the Central Conference of American Rabbis, and others.

Pevely Is Wrong

(D) Under the plan which is followed in the collective bargaining arrangement, a base price for a portion of the milk applied by each farmer is fixed by agreement, and the price for the remainder depends upon the Chicago butter market. The Pevely Company insists that a price which varies with the Chicago butter market is the only price to pay for all milk sold. This price is subject to short-time fluctuations and gives the farmer no assurance of stability such as prevails in the retail price of milk. The Sanitary Milk Producers have agreed to arbitrate the whole matter of price basis. **It is not true that the price established by collective bargaining is independent of market forces, because necessarily it must be adjustd from time to time according to costs of production and market conditions.** Similar plans are in effect in numerous of the larger cities of the country, in which the present retail price of milk varies from nine cents to fourteen cents per quart. The price paid by the dealers to farmers has been decreased twice under the collective bargaining plan in St. Louis.

Does Not Approve Tax

(E) Collection of dues in the association by the dealers through withholding them from the purchase price of milk, together with payment of a correspondingly reduced price for milk purchased from non-members, is objected to by the Pevely Company. This practice has much to recommend it. The money appears to have been used for proper purposes. The Social Justice Commission, however, does not approve of a virtual tax upon non-members of the association. We believe the producers association should yield this point, and they have already expressed willingness to arbitrate.

(F) It has been charged that the Sanitary Milk Producers Association are engaged in racketeering. Violence against trucks and farmers supplying the Pevely Company has taken place. This violence is deplored by all parties to the controversy. We believe that the basic cause is a sense of social injustice which provokes some of its victims to reprehensible acts.

Starkloff's Moratorium

V. That we regard the "moratorium" issued by Dr. Starkloff, which suspended one of the city's sanitary milk regulations only for the Pevely Company, as unjustified, although it was declared in good faith. The Pevely Company was threatened with a shortage because of the "strike." The city was threatened with a disturbance of not over one-fourth of its milk supply. There was a sufficient total quantity of milk with adequate means for distributing it, after some readjustment. Although the actual quality of milk sold appears to have been safeguarded, this suspension was used and is being used against the farmers' organization.

It seems to be the intention of the Pevely Company to set up a new group of milk producers to replace members of the Sanitary Milk Producers Association with whom it formerly dealt. **This is unjust to those who have expended large sums, partly at the urging of the Pevely Company itself, in order to be able to supply the city with milk.** Not only is it bad social practice which ought to be unhesitatingly condemned but it leaves hundreds of families impoverished and socially embittered. The public must know that the milk producer in many localities, although to a decreasing extent because of improvements in transportation, must sell his fluid to the distributor who has a receiving station in his zone. He is more or less at the mercy of that company. Unless he organizes with others, he must remain in the company's power, because his investments are on land in the company's territory. To deny him the right to bargain collectively is to force him to remain in this position. Against such a condition American farmers have the right to protest, and their protest should be heard with sympathy.

Entitled to Justice

The Social Justice Commission has sought in fairness to all and in behalf of the consumer, producer and distributor to bring about arbitration. It has sought to eliminate friction and emotional resentment. In that it has failed. The Pevely Company insists that there is nothing to arbitrate, that its present producers are satisfied. We are still concerned about the principle in the controversy and about the fate of the hundreds of producers and their dependent families who now have lost their market for fluid milk. They are entitled to justice. This statement is our summary of the issues as they appear to us.

The report is signed by Professors FRANK J. BRUNO, PERCIVAL CHUBB, RALPH C. FLETCHER, RALPH FUCHS, CHAS. L. HODGE, JOSEPH KLAMON; by the following clergymen: DR. GEORGE A. CAMPBELL, D. R. CLARKE, DR. J. E. CROWTHER, FATHER RALPH GALLAGER, DR. GEORGE M. GIBSON, JR., DR. IVAN LEE HOLT, FATHER JOSEPH HUSSLEIN, RABBI FERDINAND M. ISSERMAN, DR. M. ASHBY JONES, BISHOP WILLIAM SCARLETT, FATHER THURBER M. SMITH, DR. JAY T. STOCKING, RABBI SAMUEL THURMAN, DR. WOFFORD C. TIMMONS, FATHER RUSSELL WILBUR; and by Deans G. W. STEPHENS, SIDNEY E. SWEET.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Prediction Come True

THE fact that 50,000 Illinois farmers turned out in spite of rain and muddy roads to attend some 60 County Farm Bureau Jubilee meetings the night of December 10 is convincing evidence that good cheer, confidence, and capacity to enjoy wholesome entertainment still abound on the farm.

Although more than 150 rural banks in this state have closed their doors, hunger and want are almost unknown in farm communities. Money is tight, buying of almost everything except necessities has about dried up, but of such essentials as food, clothing, and shelter farmers are comparatively well supplied. They are in a much better position to weather the economic storm than the majority of their 7,000,000 unemployed brethren now stalking the streets of the cities.

With 40 per cent of the buying power of the country represented by rural communities virtually out of the market, the farmer is using his most effective weapon in bringing down non-agricultural prices and distribution costs. There are signs that the gap between agricultural and other prices is gradually narrowing.

When liquidation and readjustment has run its course farmers may be in a stronger economic position than at any time in the past decade. Perhaps the country now believes that it cannot maintain for any length of time business and industrial prosperity in the face of an unprosperous agriculture. At least farmers are getting some degree of satisfaction in seeing their predictions of former years come true.

Who Is Crying "Wolf"?

"THE grain gamblers and their allies, who are fighting to ditch the Farm Board and the Agricultural Marketing Act, and any other law intended to help the farmer," said Senator Capper, of Kansas, in a recent broadcast, "cry, 'Take the Government out of business.' That is simply the old cry of 'Wolf'! The fact is they don't want to take the Government out of business, except to take its support away from the farm business. They still want to keep the Government in the banking business through the Federal Reserve Bank. They want to keep it in the railroad business through the guarantee of profits in the Esch-Cummins act. They want to keep it in the shipping business through the shipping act; they want above all, to keep it in industrial business through the tariff law. They want the protecting wing of the Government thrown around all of the business they are engaged in. But they don't want it thrown around agriculture or oil—the two big industries of the West."

Ten Years Ago and Now

MEMBERSHIP returns from counties which have held regular or supplementary sign-up campaigns are very encouraging in view of the present level of farm prices. While deflation has gone farther than during the post-war depression of 1921-1922 which followed a period of unprecedented prosperity, greater confidence in the Farm Bureau is being manifested today than in the less trying times of a decade ago.

This is as it should be. The Farm Bureau in Illinois has developed during the intervening period a broad service program of co-operative activities reflected in substantial money savings to members. There never was a time when the member received so many benefits for his annual dues as today.

Ten years ago the I. A. A. was only fairly launched on its work. Membership then was sold largely on promises and things hoped for. While it is too much to say that every dream of the founders of the organization has been realized, yet the organization has demonstrated its usefulness, and today can be and is being sold on its accomplishments.

Thinking farmers know that there is still more to be done than has yet been achieved, particularly in the marketing field. The opportunity for achievement in that field alone will justify the united support of every farmer in Illinois behind the Farm Bureau.

Observations

CERTAIN members of the grain exchanges who are violently opposed to farmers organizing to market their own products have from time to time blamed the Farm Board and the Grain Stabilization Corporation for low prices of grain "because they have driven the speculator out of the market."

Let's take a look at this assertion. Speculation in grain is more politely known as future trading. It is true that future trading has declined during the past year. The report of the Grain Futures Administration for the year ended June 30, 1931, reveals that future trading in grain on all of the contract markets combined aggregated 17,034,-201,000 bu. during the last fiscal year. This is the smallest volume since 1924, a striking decline from the 24,999,650,-000 bu. aggregate of 1929-1930.

The greatest decline in the volume of trading occurred in wheat futures with total sales of 10,063,139,000 bu. This is nearly 50 per cent less than the speculation in this grain for the year previous, but exceeds the low record of 1923-24 (when the Farm Board and stabilization were out of the picture) by about 38 per cent. "The decrease in volume of trading in wheat," reports Mr. Duvel, chief of the Grain Futures Administration, "was due in part to increased speculative interest in corn as a result of much closer adjustment between supply and demand for corn than for wheat. Stocks of wheat were abundant and burdensome, whereas the supply of corn was abnormally short."

In spite of the substantial drop in futures trading, however, it was less than the decline of trading on the New York Stock Exchange. Speculation in grain dropped 32 per cent, while trading in stocks declined 38 per cent. Incidentally, listed stocks dropped far more in price than grain. The middlemen would have us believe the Farm Board and stabilization in wheat and cotton were responsible for that, too.

Two stories were given wide publicity during the past year by agents of farmer enemies in the grain trade to undermine farmers' confidence in co-operative marketing. Both of them are revealed as false by the Grain Futures Administration report. One which broke on September 23, 1930, concerns a telegram transmitted from Winnipeg to Chicago contained utterly false information relative to the alleged financial difficulties of the Canadian Wheat Pool.

Tre Bell System Booth where messages from the I. A. A. offices were received.

Delegates attending the American Farm Bureau convention in Chicago December 7, 8 and 9 were supplied with the latest market news by daily teletypewriter direct from the I. A. A. offices in the Transportation Building to the Sherman Hotel. The news flashes were posted on bulletin boards as fast as they were received. A private line between the Department of Information and the A. T. & T. booth in the Sherman House was in use eight hours a day throughout the convention.

Investigation disclosed, continues Mr. Duvel's report, that the telegram was filed by telephone with the Canadian Pacific Telegraph Co. in Winnipeg and dispatched to two futures commission houses in Chicago, and to the Liverpool Corn Exchange. The spurious message, purported to bear the signature of a prominent Winnipeg grain firm, and its contents were disseminated widely over the private telegraph wires of many Chicago commission houses before its spurious character became known. Although the authenticity of the telegram was denied before the opening of the market, buying confidence was greatly weakened and the dominant wheat future declined 2½ cents for the day. A reward of $1,000 was offered for the identification of the person who filed the false telegram by the Winnipeg Grain Exchange.

Our readers will remember that such papers as the Chicago Tribune and Chicago Journal of Commerce played up this false information as a blow to co-operative marketing. On another occasion the anti-farmer propagandists gave much publicity to the fact that Arthur Cutten, prominent grain trader of Chicago, and other bull speculators were joining the Winnipeg Grain Exchange "because of government interference with future trading in the United States." On this point it is interesting to note the finding of the Royal Commission on Trading in Grain Futures headed by Sir Josiah Stamp, noted British economist.

Said the commission:

"In some cases at least these new members had already been trading through the Winnipeg exchange, and membership entitled them to receive the benefit of the preferential rates on commission accorded between members in their dealings on the exchange when acting on behalf of one another. The idea that it might be to escape regulation was inspired merely by inference from the fact that the list contained the name of a well-known speculaor. It transpired during the conversations that his motives in joining the Winnipeg Exchange were solely for the purpose of entitling him to the lower rates referred to."

All of which indicates that enemies of farmer co-operation will not stop at spreading lies to weaken farmers' faith in their own co-operative institutions. Such opponents have a selfish purpose. They fear that farmers will succeed in doing the job of marketing their own products better and at less cost than under the old system.—E. G. T.

Milk Producers Discuss St. Louis Market Situation

Approximately 30 to 40 representatives of milk bargaining associations in Illinois met at Bloomington Wednesday, December 16, to discuss their mutual problems. J. B. Countiss, dairy marketing director, represented the Illinois Agricultural Association.

Among the managers present were Forrest Fairchild of the McLean County Milk Producers; Wilfred Shaw, Illinois Milk Producers Association, Peoria; and N. E. Armstrong of the Champaign County Milk Producers Association. Harry Blotts represented Decatur Milk Producers; G. E. Dickson, Pure Milk Association, Chicago; Archie McFederan, president, and C. Neureuther, the LaSalle-Peru Milk Producers.

After hearing reports on the various markets, the group discussed the St. Louis situation and the controversy between the Sanitary Milk Producers and the Pevely Dairy Company. It was generally agreed that the bargaining associations and the I. A. A. should render every assistance possible to the organized dairymen of St. Louis in their effort to establish a sound milk marketing plan giving the producer as well as the consumers and distributors a voice in the St. Louis market.

Getting Electricity to Tenant Farmer, Is Aim

Engineer Would Have Utilities Be Real Public Service Institutions

ELECTRIC service will have to be put on a basis which takes into consideration the tenant farmer before rural electrification can be developed to its fullest extent, according to L. J. Quasey, director of transportation for the I. A. A.

At present, he said, the electrification programs consider only the wealthier farm owner, who is able to pay the construction cost of lines or a high minimum charge. He pointed out that approximately 43 per cent of the farms in the state are operated by tenants, many of whom cannot afford electric service under the present system.

He showed that 15 to 60 per cent of urban consumers are minimum users, but the utility companies connect them without complaining. The practice has been to spend 100 to 200 times the monthly revenue to take on small users in town, but to take on a farmer the utilities as a rule will not spend more than 50 times the monthly revenue.

Make More Business

J. Howard Mathews, chief engineer for the Illinois Commerce Commission, has suggested that when lines run past a tenant's house he be given an opportunity to have the service even though he cannot afford to pay the same rates charged his neighbors.

"Such payments as he could make would be pure 'velvet' to the company," Mathews told utility leaders recently. "This would help make the line pay even though the customer paid only a few dollars a month. Even if he does not bear his full share of the fixed costs, so long as the revenue from him exceeds the operating costs, the rest of the farmers will profit by his being on the line.

"As far back as I can remember the Commission has taken the position that as long as the whole is not a losing proposition and the utility is enjoying certain monopolistic privileges in the community, services should be rendered, although the immediate return from the specific extension does not pay its own way."

Mr. Quasey commends this plan and urges independent farmers to co-operate in extending electric service to tenants in their communities. Farmers who hold out against giving their tenant neighbors a lower rate are forcing themselves to pay more. The more business there is on a line, the more beneficial it is to everyone, he declared. Farmers should also consider that electric service is likely to get better tenants, thus giving them better neighbors and improving the community.

Farm Mortgage Situation

WHEN the full effects of the wheat and cotton situation commence to be realized foreclosures will doubtless increase and therewith will come increasing pressure to avoid them, writes George E. Anderson on "Delinquencies in Farm Mortgage Loans" in Barron's.

"What the effect of any such action would be on the $1,717,347,740 in Land Bank bonds now in the hands of investors need not be discussed, since both the Farm Loan Board and a safe majority in the two houses of congress will doubtless prevent any interference with the orderly operation of the Land Bank System.

"That the farm-mortgage-foreclosure situation may become serious before the year is out, however, is apparent from the increasing delinquencies in the repayment of loans, increased real estate holdings by the banks, and other evidences of forced liquidation of loans in the several varieties of Land Banks.

"The total delinquencies are but a small proportion of the loans placed by the banks, and cannot be taken as impairing in any similar degree the safety of the bonds of the Federal Land Banks or of those Joint Stock Land Banks which have been well managed and have been safely weathering the storm raging about them for the past five years."

Use Cotton Cloth for Letterheads in South

Numerous ideas have been suggested for developing new uses for cotton since the slump in prices, but the most practical appears to be its use for business and advertising letterheads. First introduced as a novelty, cotton cloth letterheads have become popular in the East and South and in a short time have accounted for the use of more than 3,000,000 yards of cotton cloth. A 500-pound bale of cotton will produce about 40,000 letterheads of ordinary size. Cotton menu cards have been adopted by southern railways.

Great Britain Abandons Free Trade for Tariffs

A bill authorizing the imposition of a 100 per cent tariff on manufactured goods from all foreign countries for the next six months was passed recently by the House of Commons. British farmers will seek early legislation to protect them with substantial tariffs against imported farm products.

National Fruit and Vegetable Exch. Growing

Rio Grande Vegetable Assn. and Florida Truck Growers Contract for Sales Service

THE Rio Grande Vegetable Co-operative Association of Westlaco, Texas, is the latest producers' organization to join the National Fruit and Vegetable Exchange. The new organization will receive full sales service, which includes shipping point as well as terminal service from the national body. A. B. Leeper, president of the National, announced that a salesman will be kept at Westlaco throughout the vegetable shipping season which lasts for approximately six months. The Florida Truck Growers' Exchange has contracted for sales service at the terminals only.

A. B. Leeper

The National Exchange recently established its headquarters on the 12th floor of the Transportation building, Chicago, in the space formerly occupied by the Mid-West Grain Corporation. The latter was bought out by the Farmers National Grain Corporation September 1.

Officers and directors of the National Exchange are: A. B. Leeper, president (general manager, Illinois Fruit Growers' Exchange, Centralia); H. L. Robinson, vice-president (general manager, Hastings Potato Growers' Association, Hastings, Fla.); F. P. Hibst, secretary-treasurer (general manager, Michigan Potato Exchange, Cadillac, Mich.); T. W. Bennett, director (general manager, South Carolina Produce Association, Macon, S. C.); Walter W. Maule, director (secretary, Mushroom Growers' Co-operative Association of Pennsylvania, Kennett Square, Pa.); C. L. Hunter, director (president, Rio Grande Vegetable Co-operative Association, Westlaco, Texas); Dudley Bagley, director (North Carolina Fruit and Vegetable Exchange, Moyock, N. C.); C. V. Cochran, director (Kaw Valley Potato Growers' Association, Topeka, Kan.); Lee M. Lampson, director (manager, Three Rivers Growers' Association, Kennewick, Wash.).

Mr. Leeper, who is now spending about half his time on business of the National Exchange, reports that approximately 60 per cent of the perishables marketed east of the Mississippi River are now sold through chain stores.

Job of Rural Pastor to Co-operate with Farmer

Father Nell of Effingham County Sees Need of Arousing Farmer To Action

CO-OPERATION between the parish and the Farm Bureau is a practical parish activity and will in no way detract from the religious leadership of the pastor, declared Rev. George M. Nell, director of parish activities service, Effingham, Illinois, at the second National Farm Women's Conference in Chicago December 4.

He said that the big job in improving the condition of the farmer today is to arouse him to action, and it is here that the thousand rural parishes scattered throughout the country have an opportunity to furnish much of the needed equipment, power and leadership.

Father Nell

"It is a wonderful opportunity," Father Nell said, "and we will be hurting ourselves and our cause, as well as holding back the farmers' progress, if the rural churches fail to act."

Pointing to the Farm Bureau as the strongest and most widespread of the farm organizations, he said: "It is the farmer's own organization, organized into county units which the farmer can locally control and dominate. These county units are in turn organized into state agricultural associations, controlled by County Farm Bureau delegates. These state units are organized into the American Farm Bureau Federation, controlled by state delegates.

Father Nell is emphatic in his belief that religion will not suffer through this type of parish activity. "The people will follow the religious leadership of their pastor all the closer for enthusiastically following him in outside matters," he explained. "Furthermore, the pastor's religious leadership will be improved through the practice he gets in these non-religious affairs. Besides, his viewpoint will be broadened, and he will understand his people better as they understand him better."

An increase in butter production in Canada, virtual cessation of Canadian exports of cream and milk to the United States, and the higher Canadian tariff on butter are the latest developments in the dairy world, according to the U. S. Bureau of Agricultural Economics.

Postoffice Salaries

Editor, I. A. A. RECORD:

For many years the postal employees as well as many other public officials and employees have been paid unnecessarily high salaries at the expense of needy and oppressed people. Now that the depression is on it seems that these salaries should be greatly reduced, as living costs also have been cut.

But we are told now by the postmaster-general that we have a huge deficit and recommends that the postal rates be raised to take care of this and keep others from occurring.

Now if these postal employees were being properly paid there never would have been a deficit. Why not reduce these salaries to the proper level and let a surplus instead of a deficit exist? Both political parties have been to blame for this waste of money and both should now unite in this salary reduction and keep down any further rate increases and let this be a government of, for and by the people. I believe that all farm organizations and farm papers should get busy and demand this reform.

Hamilton County, Ill.

Farmer Must Educate City People: Dr. Holt

Secret of Prosperity Is to Keep Farmer Able to Buy Goods

THE problem of the farmer today is that of educating city people to the needs and rights of agriculture in the affairs of the nation, declared Dr. A. E. Holt of the Chicago Theological Seminary at the National Farm Women's Conference in Chicago, December 4.

"It may be that the inability of the American farmer to buy will reveal to the city man that the formula for his prosperity is to keep the farmer able to buy his goods," he suggested, "and that prosperity comes when men get rich together and not off of each other."

Organization activities along the lines advocated by the Farm Bureau should be developed, Dr. Holt declared. "These organized rural communities, thoroughly democratic, completely co-operative and possessed with the spirit of common welfare, should be given every encouragement," he said.

Dr. Holt insisted that the farmer's right to market his goods should parallel the laborer's right to dispose of labor, a true self-determination being accorded to both. It is their right to market surplus labor and surplus farm products in an orderly manner.

"No attempt at industrialized farming which does not conserve all the human value of agriculture along with the more efficient production of crops, should be favored," he said.

Dr. Holt summarized the problem before American Agriculture today as first of all the development of a planned program, and second, such a vigorous education of public opinion that the nation will accept it.

How to Improve Farm Home and Community

Chief Subject Discussed at National Farm Women's Conference, Chicago

A SURVEY of the American farm home, its surrounding community and how to improve them was the general subject considered at the two-day National Farm Women's Conference held in connection with the American Farm Bureau Federation convention in Chicago December 4 and 5.

In addition to the long list of Farm Bureau officials who appeared on the program, talks covering various angles of the subject were made by C. A. Cobb, editor of the Progressive Farmer, Atlanta; Dr. Arthur E. Holt, Chicago Theological Seminary; Reverend Father George Nell of Effingham, Illinois; John Callahan, superintendent of education, Wisconsin; Ella Gardner, Children's Bureau, U. S. Department of Labor; Mrs. John E. Gardner of the Frontier Nursing Service; Mrs. C. V. Biddle, Knoxville, Tennessee; Mrs. Spencer Ewing, Bloomington, and others.

Mrs. Biddle, who is active in musical work in her home state and an accomplished singer and song leader, spoke on the subject, "Community Chorus Work in Tennessee." She is a sister of President Earl C. Smith. Mrs. Biddle led community singing during the women's conference, served as one of the judges of the quartette contest, and sang several solos during the A. F. B. F. convention the following week.

Secretary George E. Metzger of the I. A. A. appeared on the women's conference program Saturday morning to discuss how improvements in the rural community can be brought about through organization. George Thiem, director of publicity, told how advertising and publicity might be used more effectively to gain the desired ends.

The women's conference was organized by Mrs. Charles W. Sewell, director of home and community work for the A. F. B. F. It was well attended by both men and women.

A committee representing the Adams County Shippers' Association recently visited the livestock marketing concentration points at Danville, Champaign and Decatur to get a view of the new marketing system in operation. Several counties are considering the reorganization of their marketing machinery on the concentration point plan. At present there are ten counties in the state organized or being organized on this basis.

Milk Prices

(For December, based on 3.5% milk unless otherwise specified.)

Baltimore—Maryland State Dairymen's Association announces Class I basic $2.84 per cwt., f. o. b. city. Retail 12c. November Class II price was 19c per gallon, 4% milk, f. o. b. city.

Milwaukee—Milwaukee Co-Operative Milk Producers announces Class I basic $2.20. Retail 9c. Cash and carry 6c. Price of fluid milk reduced from $2.50 to $2.20 effective Dec. 1, 1931.

Pittsburgh—The Dairymen's Co-Operative Sales Co. announces Class I basic $1.70 del'd, $1.10 country pt. Class II manufactured $1.44 del'd, $1.05 country pt. Retail 9c. Cash and carry 7c.

DeKalb—Milk Consumers Association announces Class I basic $2.32 del'd. Class III butter 92 Chicago score market. Retail 11½c. Cash and carry 10½c. All customers subject to a 10% discount if accounts are paid on or before the 27th of each month.

Quincy—Quincy Co-Operative Milk Producers Association announces Class I basic $1.95. Retail 10c. Cash and carry 8c.

Rock Island and Davenport—Quality Milk Association announces Class I basic approximately $1.85.

Chicago—Pure Milk Association announces Class I basic $2.32 country pt. Retail 13c. Cash and carry 8c.

NOVEMBER PRICES

Philadelphia—Inter-State Milk Producers' Association announces Class I basic $2.96. Class II, all milk in excess of basic, $1.78. Retail 11c.

Peoria—Illinois Milk Producers Association announces Class I basic $2.13 f. o. b. Peoria. Class II manufactured $1.46. Class III surplus $1.04. Retail 9 and 10c. Cash and carry 10c. Producers received the following net prices after deducting Illinois Milk Producers Association dues for 3.5% milk in November: Basic $2.08—surplus $1.21.

Bloomington—McLean County Milk Producers Association announces Class I basic $1.70 del'd. Class II manufactured $1.56. Class III surplus $1.48. Class IIa $1.67. Retail 9¾c.

Pontiac—Pontiac Milk Producers Association announces Class I basic $1.92½. Class II manufactured $1.26. Retail 10c. Cash and carry 8c.

Decatur—Decatur Milk Association announces Class I basic $1.86 del'd. Class II manufactured $1.49. Class III surplus 92c del'd. Retail 10c. Cash and carry 8c.

Champaign and Urbana—Champaign County Milk Producers announces Class I basic $2.18 f. o. b. city. Class II manufactured $1.68. Class III $1.44. Class IV butter mfg. $1.05. Retail and cash and carry 11c.

Chicago—Pure Milk Association announces November Class II $1.26. Class III $1.04.

Milwaukee—Milwaukee Co-Operative Milk Producers announces $1.14 for all surplus Class II manufactured.

New York—Dairymen's League Co-Operative Association, Inc., announces a basic net pool price of $1.71 per 100 lbs. for 3.5 milk at the 201-210 mile zone.

Farm Bureau Membership Holding Up Well: Metzger

INCREASED Farm Bureau membership in many Illinois counties during 1931, in spite of low farm prices, was reported by Secretary George E. Metzger, following a recent state-wide check-up. Approximately 50 counties held membership campaigns during the year.

The LaSalle County Farm Bureau recently signed up 923 members within a few days through the efforts of 200 volunteer solicitors. Mr. Metzger estimated that membership in the county would surpass last year's total when the campaign is completed.

Farm Adviser S. G. Turner reported that a supplemental membership drive in Livingston county had brought in 120 new members. In Montgomery a similar campaign resulted in a 110 per cent increase in one township and 100 per cent increases in several others, H. H. Walker, district organization manager, reported. More than 60 members were added in Edgar county. In Whiteside county early returns showed 554 members signed with 12 townships still incompletely canvassed.

Seventy-three of the 94 County Farm Bureaus in Illinois are now on the continuing membership plan. Under this plan membership in the organization continues indefinitely until the member cancels by giving notice in writing during the last 60 days of the year.

"The broad service program of the Farm Bureau in Illinois is being appreciated more and more each year," said Mr. Metzger. "The development of co-operative activities has been such that members not only receive the indirect benefits which come from having a strong and vigorous organization to fight for their rights, but also the many direct savings and cash returns which more than equal the small annual membership fee."

Railroads Want More Cash for Livestock Haul

I. A. A. Will Oppose Increase When Case Comes Before State Commerce Commission

PROPOSED increases in rail rates on livestock in 30 western and northern Illinois counties would place an additional freight burden estimated at more than half a million dollars on livestock producers annually in that territory.

"This proposal is entirely out of line with current livestock prices and will be opposed by the Illinois Agricultural Association when it comes before the Illinois Commerce Commission for a hearing," said L. J. Quasey, director of transportation.

L. J. Quasey

"Present freight rates which have remained unchanged while livestock prices have declined 50 per cent or more since 1929, are equivalent to an increase in rates. Where, in 1929, the farmer paid a little over two per cent of the sales price for freight, the proposed increase coupled with the present price level would take between six and seven per cent of his receipts."

The counties affected by the proposed increase are north and west of the line from Chicago to Pekin, from Pekin to Ferris, and from Ferris to Burlington. This includes many of the leading livestock producing counties in the state and would cost some counties as much as $25,000.

"It is doubtful if the railroads would benefit from the increase even if the state commerce commission should approve their petition," said Mr. Quasey. "A large amount of livestock is already being trucked out of this area. We are of the opinion that any addition to rates would tend to increase trucking rather than increase the revenue of the railroads."

Following are figures from five representative shipping points showing proposed increased charges per carload of livestock shipped to Chicago: from Aledo, Mercer county, an increase of $15.40 per car on cattle, $10.73 on hogs, and $3.60 on sheep; from Galesburg, Knox county, $14.30 on cattle, $10.73 on hogs, and $3.00 on sheep; from Stronghurst, Henderson county, $16.50 on cattle, $12.38 on hogs, and $5.40 on sheep; from Annawan, Henry county, $14.30 on cattle, $9.08 on hogs, and $1.80 on shep; from Monmouth, Warren county, $15.40 on cattle, $10.73 on hogs, and $3.60 on sheep.

Too Much Spread in Live And Dressed Meat Price

The high cost of distribution which represents the many charges between the livestock market and the retail counter where the consumer buys the finished product, is an important factor in the present unduly low prices of cattle, hogs and sheep, according to H. M. Conway, statistician for the National Livestock Marketing Association.

"The tendency for packers and retailers to maintain past charges makes it necessary for them to take a much greater proportion of the consumer's dollar, thus making the present spread between the producer and consumer the widest on record," said Conway. "With free competition between foods, the consumer will pay only so much for the supply of meat available, with the result that the producer is now carrying the increased burden in the form of lower livestock prices.

"A similar change took place in 1920 and continued during the past 10 years. The further widening that is now taking place means continued agricultural depression with greater intensity."

Henry County Members Split a $13,386 Melon

THE third fiscal year of Henry County Supply Company closed September 30. The sales for the period exceed those of the preceding year by a good margin and total $98,314.24. The gain in sales of the different products ranges from 25% to 35%, according to a report given to the stockholders of the company on December 5 by R. T. Ferguson, manager.

A 7% preferred stock dividend and a 15% patronage refund, totaling some $13,386.49, have been paid to the Farm Bureau members of Henry county. George F. Hayes is president of the company.

Drive 10,000 Miles and Save Farm Bureau Dues

From figures compiled by several service companies in the state, it is shown that the average Farm Bureau member who has a tractor and an automobile, or who has no tractor but drives an automobile as much as 10,000 miles a year, received more from 1931 patronage refunds on petroleum products than his Farm Bureau dues cost him.

The Shelby-Effingham Service Company reports that the average patron this year made purchases amounting to $192.50. Some of the service companies refunded as much as 24 per cent of the total receipts from Farm Bureau members.

NOTICE ILLINOIS AGRICULTURAL ASSOCIATION ELECTION OF DELEGATES

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of January and February, 1932, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

During January annual meetings will be held in Carroll, Cook, Douglas, Fulton, Franklin, Greene, Knox, Lake, McHenry, Macon, Mercer, Peoria, Sangamon, Tazewell, Whiteside, and Woodford counties.

During February annual meetings will be held in Mason, Will and DeKalb counties.

Jan. 1, 1932.

Signed,
G. E. METZGER, Secretary.

Farm Crop Values Drop 49 Per Cent in Two Years

Based on December 1 prices, the total value of the crops produced in the United States in 1931 was estimated on December 16 by the U. S. Department of Agriculture at $4,122,850,000 compared with $5,818,820,000 in 1930.

The decline in crop values compared with two years ago is nearly $4,000,000,000, or 49 per cent.

The decrease is shared by practically all crops. About $1,043,000,000 of the decrease is in corn, $854,000,000 in cotton and cottonseed, $446,000,000 in wheat, $386,000,000 in hay, $263,000,000 in potatoes, $220,000,000 in oats and $130,000,000 in tobacco.

Move to Unite Counties

There is a movement in Minnesota to unite some of the smaller counties to reduce the expense of local government. This movement is also gaining a following in Illinois.

Commenting on the proposal an editorial in Commercial West says in part: "The idea is commendable. There are a number of areas in Minnesota where adjoining counties could well be united and the saving would be of large extent if the movement grows to proportions. Unwieldy counties, of course, should not be created, but where the counties are small the plan should work out satisfactorily to all concerned."

Uncle Ab says that most of us think that a man who is different must be wrong.

I. A. Auditing Association Makes 360 Reports in '31

Complete 20 Per Cent More Audits This Year Than Last

THE yearly growth of the Illinois Agricultural Auditing Association indicates that Illinois farmers are operating their co-operatives and county Farm Bureaus more and more on a sound financial basis made possible by regular and thorough audits.

An average of one account a day, or approximately 360 accounts, were audited by the Association during 1931, compared with 303 for the year before. This is an increase of 20 per cent. The Auditing Association serves only organizations with an agricultural connection, such as farmers' grain elevators, farmers' oil companies, marketing associations, and general farm organizations. It operates on a cost basis.

F. E. Ringham

The fact that the auditing and business service was the first subsidiary organized by the I. A. A. indicates the importance attached to the use of standard business methods in farmers' organizations from the very beginning. Even before the Association was formed in 1924, the I. A. A. offered auditing services to Farm Bureaus.

The Association now acts as purchasing agent for accounting supplies desired by member companies, and offers an advisory service on problems of accounting.

"Our big problem, like that of other auditing companies, is to get a proper distribution of accounts throughout the year," said F. E. Ringham, manager. "We have busy months and light months, making it difficult to maintain a full staff all the year. However, we have been working toward the point when we can get the fiscal closings of our member companies distributed evenly over the year."

The number of accounts audited by months during 1931 shows the variation: January, 67; February, 34; March, 25; April, 19; May, 17; June, 22; July, 25; August, 27; September, 21; October, 35; November, 27, and December, 41 (estimated).

The time to sell the unprofitable cow is when she is found to be unprofitable; and she should be sold to the butcher.

More than 60,000 voluntary memberships are backing the chain of I. A. A.--Farm Bureau services, each one an important link toward farm equality.

ILLINOIS I.A.A. SERVICE FARM BUREAUS

Buy Life Insurance From Your Own Company

I. A. A.–Farm Bureau Service provides thru Country Life Insurance Company low cost insurance giving you every safeguard. A Country Life policy offers an exclusive advantage of insurance rates so low that no longer need any farm family be without the protection it affords.

Among other advantages, a Country Life policy offers you:

Money for old age income;

Money to cover doctor bills, hospital and funeral expenses;

Money to cover debt emergency;

Money to create an estate, to educate your children, to take care of your family in time of trouble.

You Gain Because 60,000 Are Working Together

THROUGH the strength of cooperation, life insurance cost is kept down to the lowest possible point. Remember too—the premiums you pay for your Country Life policy are not expense. Month by month, year by year, they accumulate to your credit, with a constantly growing cash or loan value. Profits in Country Life are returned to policy holders in the form of dividends —an additional help toward lowering your insurance protection.

In Country Life Insurance Co.:—

1. **Your rates can never be increased.**
2. **Your claim is always sure to be paid at death.**
3. **At maturity your cash is certain to be paid to you.**
4. **Legal reserve life insurance is the one outstanding safe place to put your money.**

See your local Country Life agent or write for the clear and simple explanation of this modern insurance investment.

IN THIS ORGANIZED WORLD
ONE MAN CAN DO NOTHING ALONE

Court Upholds Hyde in St. Louis Livestock Case

A decision of a special court filed in East St. Louis the middle of December upheld the order of Secretary of Agriculture Arthur M. Hyde suspending 43 old-line livestock commission firms at the National Stock Yards, accused of boycotting two co-operative organizations.

The commission firms had appealed to the Federal Court after Secretary Hyde directed that their trading licenses be suspended for ninety days. The court at Danville rejected each contention of the dealers and upheld the constitutionality of both Packers and Stock Yards Act of 1921 and the Agricultural Marketing Act under which the Federal Farm Board was created.

It ruled the proceedings upon which Secretary Hyde's order was based were not irregular; that they did not violate the dealers' constitutional rights; and that the order was neither unreasonable, discriminatory, nor confiscatory.

John Miller Tells About St. Louis Milk War on WLS

JOHN E. MILLER, president of the Madison County Farm Bureau, told about the dairymen's fight for a square deal in the St. Louis milk shed, on radio station WLS, December 8, during the noon hour.

He discussed the constructive program of the Sanitary Milk Producers and the fact that all interests except one dealer, the Pevely Dairy Company, are co-operating to give the St. Louis consumer high-quality milk at a moderate price.

Comparing the organized farmers' effort to gain a fair price for his product to an army fighting for political justice, he said: "A deplorable condition we must admit does exist. All armies have traitors. There are men who have joined the ranks and then turned their backs on their own organization—on their own people who are trying so hard to gain for them the right to market their products co-operatively.

"These are the men who joined the organization and are now selling milk to the Pevely Dairy Company. It is unthinkable that some of our farmers today do not have any more co-operative spirit than to leave the rank and file of their own organization and work against everything the rest of us are fighting so hard to gain."

The Schuyler County Farm Bureau distributed more than twice as much anti-hog cholera serum and virus to members in 1931 than in any previous year.

I. A. A. Claims Dept. Collects $3,000 for 1 Man

ILLINOIS Farm Bureau members have received an average of $50 a day in claim settlements every day for 12 years through the claims department of the I. A. A.

Since 1920 when this service was inaugurated as a part of the transportation department, a total of $238,233.61 has been collected in claims and returned to members. Up to December 1 $19,420.82 had been collected for members in 1931. These claims include loss and damage, and overcharge. Claims are handled for members of the Chicago Producers, as well as Farm Bureau members.

A. E. Adams, assistant manager of the Sycamore Sheep Feeding Yards, in a recent letter to the I. A. A. wrote:

"We wish to express our appreciation of the service rendered us by your transportation department both through the Chicago Producers and the I. A. A.

"During the past three or four years this department has repeatedly collected claims from the railroads for us that would have been a complete loss. We have kept no track of the amounts, but feel certain they will run over $3,000. One thousand of this was collected recently on some sheep billings from the West.

"We believe that this service to your members should receive its just due and be continued, as it certainly is a valuable part of your service."

Cream Pools in White Co. Make Members Money

THE White County Produce Association through its two units at Norris City and Enfield handled more than 152,000 pounds of butterfat during the year ending December 1, reports F. A. Gougler, director of produce marketing for the I. A. A. The combined patronage refunds of the two units since they were organized totals more than $6,400.

The Norris City unit has just completed two and one-half years of operation. It now has 266 members, which is an increase of 23 per cent in the last year. This unit marketed a total of 92,999.9 pounds of butterfat, an increase of approximately 30 per cent over a year ago.

Since starting, the Norris City unit has made patronage refunds to its members totaling $4,481.28, or approximately $4 per cow represented. O. S. Hoskins of Norris City received a refund of $79.65 for the past four months. The operating costs are now slightly more than 2 cents a pound.

The Enfield unit is still less than two years old and has 174 members, an increase of 15 per cent over a year ago. A total of 59,048.5 pounds of butterfat went through the co-operative last year. The unit has made patronage refunds totaling $1,919.99 since it began operations. Handling costs are approximately 3 cents a pound.

Five Year Plan for Cream Marketing Urged

A five-year plan in cream marketing was urged by F. A. Gougler, director of produce marketing for the I. A. A., at the annual meeting of the Henderson County Produce Association at Stronghurst November 16.

"We must not only see to the development of our local association," he said, "but we must look forward to the development of a state sales agency which will market Illinois butterfat to net the producer a fair price."

He showed from the experience of some of the older associations that the produce marketing program has already narrowed the spread between the local buying price and the Chicago butter quotations.

Soybean Growers Get Second Advance on Crop

More than $55,000 has been distributed to Illinois soybean growers as a second advance on the 1931 crop handled by the Soybean Marketing Association.

An initial advance of 20 cents per bushel was made to member growers for No. 2 beans upon delivery to the contracting elevators. The second advance brought the total up to 24 cents per bushel. The Association's volume of soybeans for the 1931 crop has already exceeded the amount handled in 1930. Membership this year is more than 4,000.

The entire volume of beans handled by the co-operative during the year was marketed on a profit-sharing basis with one of the leading processors. Under this arrangement members participate in the earnings from the merchandising of soybean oil and soybean oil meal throughout the normal movement period of these products. Thus, they are benefited by any increase in prices on these products.

Christian county leads Illinois in soybean products with Champaign county second. More than half of the state's estimated production of 6,000,000 bushels for 1931 will be used for seed and feed. The remainder will be processed.

Sam Thompson Tells What Marketing Needs

SUFFICIENT volume, adequate credit and proper adjustment of production are the three things most essential for the complete realization of the co-operative marketing program, declared Sam H. Thompson, member of the Federal Farm Board, at the annual meeting of the American Farm Bureau Federation in Chicago, December 8.

Notwithstanding adverse conditions, co-operative marketing has grown rapidly during the past two years, he said.

"This showing has been made during a period when raw material prices throughout the world fell to levels representing the lowest buying price ever recorded for industrial products," continued Mr. Thompson.

"By availing themselves of the facilities provided in the Agricultural Marketing Act, farm groups are being brought into step with large-scale business, and consequently are able to support business management and exchange the products of their members on a strictly service basis, gradually but surely attaining marketing advantages that farmers have fought for for half a century.

"It is an advantage to both buyers and sellers to have organizations capable of delivering any amount, grade or quality at any time or place. Such sales service provides broader outlets and develops larger markets.

"Six active sales agencies, grain, cotton, livestock, wool and mohair, pecans, fruits and vegetables, have been developed by co-operatives as well as regional and state associations. The achievements of these national sales agencies make a record of which the farmers of the nation may well be proud, showing that farmers can successfully carry on business in a large way when properly supported."

New Stock Yards to Be Erected at Macomb

The McDonough Livestock Marketing Association is planning to erect modern stockyards at Macomb with a capacity for about eight double-deck carloads of livestock. The yards will be modern in every respect, with cement floors, running water, and electric lights. The greatest part of the yards will be covered.

Uncle Ab says a lot of folks work like blazes to get where they won't have to work—and never arrive.

65 Counties Join in Farm Bureau Frolics

50,000 Illinois Farm Folks Turn Out For Jubilee, Drive Through Rain and Mud

A ROLLICKING good time by an estimated 50,000 Illinois farm folks featured the 65 County Farm Bureau jubilee meetings held on the night of December 12.

Muddy roads and freezing rain over most of the state had no appreciable effect on the attendance, according to reports. Practically every meeting had a capacity crowd.

Champaign county reports that 1,000 people drove through the rain from all parts of the county to take part in the frolic. All seats and aisles at the Livingston county jubilee were filled before 7:30. DeKalb county had 2,500 present and turned many away because the building was too small. Lee county had 1,500; McHenry, 1,500; Peoria, 1,200; Stark, 1,200; and the others ranged from 250 up. Gallatin county prepared for an attendance of 200 and had a turn-out of more than 1,200.

36 Counties Contest

The outstanding event of the evening at many gatherings was the contest staged by 36 counties to choose local "Country Life Queens" for 1932. More than 600 farm girls entered the competition. Other features were story telling contests, liars' contests, old fashioned style shows, one-act plays, pageants, and dances. Refreshments were served at most of the meetings.

A half-hour radio program presented by Country Life Insurance Company over station WMAQ, Chicago, between 8 and 8:30 p. m. linked the county meetings, during which winners of the "Country Life Queen" contests and insurance returns by counties were announced. L. A. Williams, manager of Country Life, and V. Vaniman, director of insurance service for the I. A. A., made short talks. A musical program by the studio orchestra proved popular.

Doughnuts to Dunk

The following telegram from President Albert C. Kolmer of the Monroe County Farm Bureau in the St. Louis territory was typical of many:

FULL HOUSE IN MONROE COUNTY LISTENING. SORRY THE REST OF YOU CAN'T HEAR OUR FARM BUREAU GERMAN BAND. THERE ARE A DOZEN BEAUTY QUEENS HERE TO DANCE WITH AND A BARREL OF DOUGHNUTS TO DUNK. PLEASE SEND DIRECTIONS.

Mark Foster, general agent in Mercer county, writes that 14 girls entered the "Country Life Queen" contest at Aledo. Every township was represented. "Some folks drove nearly 25 miles over roads that were anything but good to be with us that evening," he said. "I know that folks were there who have never before attended a county-wide Farm Bureau meeting." Louise Langhead was chosen as "Country Life Queen."

THEY WERE ENTRANTS IN LAKE COUNTY'S "COUNTRY LIFE QUEEN" CONTEST.
Standing (left to right): Erlene Barron, Frances Dougwilo, Ella Grevel, Grace Umbdenstock, Leona Bloom (winner), Alice Wasko, Rose Henkel, Martha Tekampe, Margaret Van Zandt.
Seated (left to right): Vivian Davis, Mildred Elsbury, Hazel Dillon, Marie Duba, Ruth Thies, Alma Read.

Three hundred and eighty-five attended the Lake County meeting at Gurnee. Leona Anne Bloom won the title of "Miss Lake County" over 15 competitors.

1,500 in McHenry

McHenry county had 19 entrants in the "Country Life Queen" contest, which was won by Ruth Andreas. More than 1,500 gathered at St. Mary's gymnasium for the event. Among the other features on the program were an old time fiddlers' contest, an old time square dance, and modern dancing. Refreshments of cider, milk and doughnuts were furnished by the insurance department of the Farm Bureau and served by a committee of the Home Bureau.

About 350 attended the jubilee in Edwards county. Robilee Coad was winner of the beauty contest over nine entrants. A story telling contest was one of the most enjoyable events of the evening, according to Delbert Saxe, general agent.

29 "Queens" Here

Livingston county reports 29 entrants in the beauty contest, in which Mildred Fischer was named "Country Life Queen." The Roeschley Brothers quartette of Flanagan was featured in several selections.

John D. Bryant, general agent in DeKalb county, writes that nineteen girls entered the DeKalb beauty contest, representing every township. Marian McConaghie was winner. "The contest was enthusiastically received and will have to be held in a place twice as large next year," he said. An old fashioned style show, as the closing act of the evening, was a great drawing card.

St. Clair county had nine entrants in the contest, with Bernell Emmerich named as winner. The attendance was about 300. Community singing, a husbands' alibi contest, vocal numbers, and other features by local talent made up the remainder of the program.

The Winners

Winners of the "Country Life Queen" contest in other counties heard from are as follows: Bond county, 13 entrants, Rowena Stevenson winner; Champaign county, 15 entrants, Bernita Kurzweg winner; Effingham county, Evelyn Lloyd winner; Henderson county, 15 entrants, Angeline Painter winner; Henry county, 11 entrants, Evelyn McNeal winner; Johnson county, Thelma Reeder winner; Knox county, 17 entrants, Dorothy Woolsey winner; Marion county, Nora Michel winner; Montgomery county, Ruth Whitlock winner; Piatt county, Martha Hawthorne winner; Pike county, Virginia Riley winner; Pope county, Dorothy Layman winner; Rock Island county, 15 entrants, Ernestine Gifford winner; Shelby county, 6 entrants, Ruth Whitaker winner; Washington county, 6 entrants, Rose Pero winner; Wayne county, 11 entrants, Clara Clark winner; White county, 10 entrants, Mary Ridenour winner; Woodford county, Mary Park winner; Cook county, 62 entrants, Laura Schoenbeck winner.

Champaign Service Co. Aids Membership Drive

TRUCK salesmen of the Champaign County Service Company are credited with securing 25 new members for the Champaign County Farm Bureau this fall.

R. G. Stewart, manager of the company, believes that the employes of Farm Bureau subsidiaries should pull for the organization. When he drew up plans for a contest among his salesmen he allowed a number of points for each new Farm Bureau membership obtained.

The fact that more than 90 per cent of the 1,346 Farm Bureau members in the county are customers of the Service Company indicates that it has the whole-hearted support of the membership.

In addition to the new Farm Bureau members, 293 new customers were secured during the contest, and future orders were signed for lubricating oils, totaling approximately 25,000 gallons. Some 1,235 patrons of the company are non-members.

The annual meeting was held at Urbana December 16, at which time a 7 per cent dividend was paid on preferred stock and a 10 per cent patronage dividend to Farm Bureau members. Another 5 per cent patronage refund has been declared for payment later. The 10 per cent patronage refund, going to 725 members, totaled $8,231.44.

DeWitt Service Co. Pays 15% Dividends

Walker H. Thorpe, manager of the DeWitt County Service Company, reports that the Company, voted a 15 per cent patronage refund for the fiscal year which closed recently. Ten per cent was paid in December and the remainder will be paid early in 1932. A 7 per cent dividend was declared on all preferred stock. During the year the company handled $57,753.18 worth of petroleum products, weed killer, machinery, and automobile tires. About 75 per cent of the total was sold to Farm Bureau members.

Thirty-one service companies in the state have purchased 1151 Brunswick tires and 999 inner tubes during the last four months through the Illinois Farm Supply Company.

The 1931 corn crop was estimated on December 1 at 2,674,369,000 bushels as compared with 2,093,552,000 bushels produced last year. The five-year average, 1925-1929, was 2,760,753,000.

This bulk storage plant at Paloma is one of the three owned by the Adams Service Company.

Fulton County Members Profit by Co-Operation

FULTON Service Company closed its second fiscal year October 31 with a very substantial increase in business for the period. At the annual meeting of the company, held in Canton on December 4, Manager R. A. Garber reported an average monthly gain of 109% in gasoline sales, 78% in kerosene, 116% in lubricating oils, and 110% in grease in comparison to the corresponding months of the previous year.

Harry L. Leeper, president of the company, announced that a total of $9,572.36 in dividends and patronage refunds will be paid. This will include 7% on preferred stock and a 15% patronage refund to Farm Bureau members in good standing. In addition the patrons got higher quality petroleum products than they could buy at comparable prices elsewhere.

Thirteen Farm Bureau members received over $50 each, some eighty others more than $25 each, and approximately 100 members received refunds exceeding $15. Six hundred Farm Bureau members participated in the distribution of earnings. The customers of the company number 1,159.

Kane County Service Co. Pays $10,000 Dividends

THE patronage refund paid to Farm Bureau members by Kane County Service Company during its first eighteen months' business has averaged approximately $800 per month. At the annual meeting of the company, held in St. Charles on December 10, Fred H. Wilson, president, announced that the patronage refund for the fiscal year ending August 31, 1931, would exceed the amount of the membership fund of the Kane County Farm Bureau for the calendar year.

Manager G. C. Warne stated that the company has 781 customers, and patronage refund checks were written to 474 Farm Bureau member patrons.

The regular 7% preferred stock dividend and a 10% patronage refund have been declared, payable at a later date. These dividends will total over $10,000.

Rich-Law Service Co. Pays Cash Dividends

THE substantial dividend declared recently by the Rich-Law Service Company, operating in Richland and Lawrence counties, has served to give farmers in those counties more confidence in their ability to handle their own business co-operatively, according to Farm Adviser H. C. Wheeler of Lawrence county.

The company paid 7 per cent on preferred stock and a patronage refund of 10 per cent, and declared another 5 per cent patronage for payment later.

"The members were not expecting much of a refund," says Wheeler. "Everywhere I go I meet the expression: 'I was surprised we could make a refund at all due to conditions we have had during the past year and this being our first year of business.'

"There is another effect noticeable. It increases confidence in the ability of farmers to handle their own business. Some members are saying, 'If the oil company did so well I see no reason why certain lines of produce marketing handled by a good board of directors might not succeed.'

"I only regret that a larger number of Farm Bureau members did not avail themselves of Service Company purchasing."

Life Insurance

By L. A. Williams

IN a moment of strength or weakness, as you wish, you applied for a life insurance policy. The job was done, and your life was insured. No credit to the insurance man, for you were going to do it anyway. Just hadn't got around to it. Anyhow, you are and have been insured and have paid premiums, and for several years since had that feeling of security, which is of course the greatest of all reasons for carrying insurance. You know that feeling, "Well, if I go suddenly, honey, you'll get my life insurance."

Then, the year of D. P. 1931 came along, and you stopped just thumbing the bills over, and stopped saying "Pay 'em" until you did some tall calculating, and then some of them were thrown aside. Second notices appeared, and then some final notices before you said "Pay it."

No man intentionally, or at least thinkingly, deliberately lets his life insurance lapse until he has exhausted his last resources. He may postpone, he may forget, he may neglect, but not deliberately let it go by the boards. Little as you may think of the importance of that feeling of security that allowed you to say to your wife, "Well, if anything happens you'll get my life insurance," still, it is so big a part of your man's-protection role that you want it and want to keep it.

Savings? No, I don't think it is just the fact that you have some money salted away in legal reserve protection that appeals to you from a selfish angle. Nor do I believe it is the satisfaction of knowing that you would leave a lot of money at death. I think the manly man's part of a responsibility met and taken care of just as a decent citizen votes, or just as one educates his children or pays his bills, is more the thing that prompts you to want to keep that insurance in force even though the third notice comes before you pay it.

Regardless of why you bought it, or why you continue to pay it, this much is true, the insurance company is the insistent friend that keeps sending notices until it is paid. Friend! you say, and I repeat **Friend.** Life insurance is an exact science based upon premiums paid in advance on policies issued on selected numbers of lives. Some die each year. Who they are, matters little, technically speaking, because so many claims must be paid according to experience tables. Premiums must be collected so that policies are kept in force to as near the fullest extent possible. Claims can be paid if policies are in force, but a lapsed policy means no claim in case of death. The company's business is paying claims just as truly as it is selling policies and collecting premiums, but the collecting of premiums and selecting of good risks is of as much importance as the paying of claims.

It is friendly to send a second and a third notice, and a danger notice to you, if you know an added fact. That fact is, that the company does not lose money if you lapse the policy. It loses your future patronage, but that is all it loses. It can lose many policies by lapsation and never decrease its surplus to any extent. In fact, there would be an increase in surplus if the policies were not too old.

But, the act of insisting that you pay your premium on the policy you have carried is friendly again, when you realize that the day after your 30 days of grace expire may be the day you slip physically and are never again insurable. It may be the day, indeed, that you didn't look to the left as an oncoming car thought you would, and the end may be written in marble, and that date posted in Hope Cemetery.

If you have lapsed your policy, you can reinstate at any time by furnishing proof of good health and paying back premiums with interest regardless of how long ago you lapsed.

Ohio Farmers Tell How to Bring About Farm Relief

Lower taxes, better prices, and more co-operation among farmers!

These three things can do more than anything else to bring about farm relief, according to the opinions of Ohio farmers as revealed in a survey of 45 counties made by the Ohio agricultural extension service.

The largest number offering suggestions as to how to get out of the present depression in agriculture suggested co-operative marketing, purchasing supplies through farm organizations, and greater co-operation in all community activities. A program for the reduction of farm taxes was suggested by a large number. Others expressed the opinion that interest rates are too high, that farm machinery costs too much, and that farmers should solve their problems by more efficient production and by emphasis on quality of products.

Country Life Radio Party Routs Old Man Depression

Total Business Written for Year Exceeds $15,000,000

NEARLY a million and three-quarters dollars in life insurance written in the first twelve days of December brought Country Life Insurance Company's total written business for 1931 to more than $15,000,000.

"The $1,717,000 of reported business on 'Radio Night,' December 12, was enough to make Old Man Depression hide in his hole for quite some time," said L. A. Williams, manager of Country Life. "This gives a picture of what 100 organized counties can do when they focus on a given point."

Wm. E. Hedgcock

William E. Hedgcock of McLean county was first in amount of business reported for the 12-day period. He turned in $101,000 of life insurance. E. A. Carncross of Cook county was second with $87,000. Other outstanding records were: $65,000 from Effingham county; $61,000 from DeKalb county, and $60,000 from Livingston county.

"Every county in the state has produced some business during the year with the exception of three," said Williams. "We congratulate Farm Bureau members, Country Life policyholders, and agents on completing a marvelous year of production, which is more outstanding by comparison with the larger life insurance companies. Just where our position will be among the 338 companies cannot be given at this time, but it is certain to be in the top 10 per cent for millions gained."

Sen. Capper Would Pay Farm Debt with Life Ins.

The farm mortgage debt in the U. S., which has more than doubled since 1920, can be paid off within a generation by means of life insurance, says Senator Arthur Capper of Kansas.

He believes the plan to be both feasible and practical. "So much of the farm mortgage debt could be protected in this way that mortgages would no longer be a menace to agriculture and the future of the soil," he said.

"Business men now make a practice of covering their indebtedness with life insurance. It would be possible to provide for the farm mortgage debt in the same way. The farmer's mortgage could be cancelled with the maturity of the policy."

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

Number 2 | FEBRUARY, 1932 | Volume 10

I. A. A. Closes Year with Gain in Membership

Many Farmers Not Affiliated Heretofore Awakened to Advantages of Organization

THE Illinois Agricultural Association closed the year with a gain in membership in spite of unfavorable economic conditions which confronted membership work during the period, according to George E. Metzger, director of organization.

There are many farmers who believe in the organization and would like to become members, he said, but have not been able to see their way clear to obligate themselves for the amount of the membership dues. On the other hand there is a new group of farmers interested in membership who have heretofore thought themselves independent and self-sufficient. Many of the latter have experienced an awakening and now see an advantage in organization which had not impressed them before. A good part of the 1931 increase came from this class of farmers.

"An increase in membership is an unprecedented accomplishment in the first year of the normal three-year membership period, when fifty counties are required to put on membership campaigns," Mr. Metzger said.

Continuing Membership

The continuing type of membership contract is now in effect in 74 counties. A new type of contract, known as "a one-year continuing contract," has been approved and is recommended for use in counties which have heretofore signed on the three-year continuing agreement, when the latter contract has expired. The new one-year continuing type of contract has been used in a number of counties in the campaigns during the year.

The district plan of organization is in its fourth year of operation. During 1931 membership was maintained on a higher level than in any similar time in the last three-year period and at approximately 25 per cent less cost, Mr. Metzger said.

Earl C. Smith

Assistance was given by the organization department in the organization of oil companies, milk marketing associations, the Illinois Grain Corporation, the Illinois Livestock Marketing Association, the Auditing Association, and in a number of other projects.

During the year O. D. Brissenden assumed managership duties in District II, Clare Bradford in District I, L. B. Hornbeek in District VI, and H. H. Walker in District VII. L. F. Brissenden is manager in District VIII, A. B. Culp in District V, John C. Moore in District IV, and R. J. Hamilton in District III.

The Illinois Livestock Marketing Association will hold its annual convention at Bloomington February 17. C. B. Denman, member of the Federal Farm Board, will be the principal speaker.

More Thorough Organization Will Speed Solutions—Smith

Unorganized Farmer Pays in Decreased Revenues and Increased Costs for Failure to Co-operate

I HAVE previously stated and yet believe that unorganized farmers constitute the greatest obstacle operating to delay proper solutions to many of our difficulties, President Earl C. Smith declared in his address before the 17th Annual I. A. A. Convention at Rockford on January 28.

"If I am right in my conclusions," he continued, "organization, further organization and complete organization of farmers should be the keynote of the convention.

"The membership of the Farm Bureau of Illinois yet fails to include a majority of the farmers in most of the counties of the state. A minority of our rural people, which have included nearly all of the natural community leaders of the state have shouldered the responsibility and thus far maintained our organization. They could have accomplished much more if there had been included two or three times as many of our rural people with a unified spirit, information and purpose.

Influence with Members

"An adequately organized agriculture could have wielded far greater influence in the councils of both state and nation. Illinois and American farmers could not have been forced into a 12-year period of deflation with such an organization. Fast increasing and unjust portions of the cost of government could not have been shouldered upon agriculture. Their combined influence could and can operate to greatly reduce costs of government, particularly within the counties where most of our tax money remains.

"The increased purchasing power of agriculture resulting from such an organization would have lessened the severity of the present depression. The unorganized farmer or farm owner is

grievously mistaken if he thinks he has not been paying, and is not still paying for his failure to co-operate.

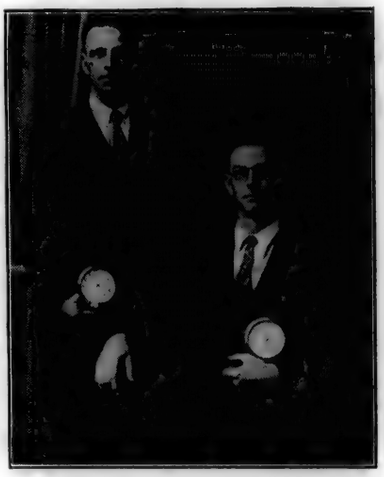
Pays Many Times

"He is paying in decreased revenues and increased costs. He pays many times as much every year as it would cost him to support an adequate organization able to cope on better terms with the most powerful organizations of other industries, capital and labor.

"Farm people should view with concern and become fully informed before lending support to new movements springing up under the guise of offering various forms of relief to farmers' difficulties. Some of these movements are known to be connected with and supported by men and organizations who, throughout the years, have benefited because of division among farmers.

New Movements

"The existing depression and resulting state of unrest seems to offer an opportunity for the stimulation of new movements which have for their purpose the retarding of the fast development of co-operative marketing. Solutions to farmers' problems will be hastened by the strengthening of present forces rather than by the development of new organizations.



"It was largely through farmers and rural people that the American republic was established. As thinking farmers, let us measure up to the responsibility which is ours, in maintaining a stable government, in resisting unhealthy radicalism which never builds but always destroys. The farmers of America have the reputation of being the most stable of any large group in our national life in periods of distress; and in this crisis, let us carry on and work for those high ideals, Equality of Opportunity and Government by the People, conceived and established long ago by the founders of this nation."

Reviews Achievements

Mr. Smith reviewed briefly the achievements of the associated companies during the year, discussed the legislative program of the association during 1931, and on the subject of the proposed state income tax said:

"I am inclined to think most of the opposition to the income tax is prompted and concerned by the fact it would cause them to commence doing something they have never before done—pay taxes. Farmers can expect a reduction of $7,500,000 in their tax bill if the income tax is enacted into law.

"Opponents of farmers' organized efforts sometimes refer to the cost of maintaining a militant organization. The income tax bill alone, if passed

James G. Gridley (standing) and Ellery Jones, Ustick Township, with the clocks they won for signing the most members in Whiteside County's organization drive.

by the General Assembly will save the farmers of Illinois an amount of money annually, equal to thirty times the annual cost of the Illinois Agricultural Association. Stated in another way, this bill alone will every year save the farmers of Illinois an amount of money sufficient to pay the total cost of the Illinois Agricultural Association for thirty years. Again may I ask, is this not conclusive evidence of the need for and opportunity of a constructive farm organization?

Reduce Cost Government

"By and through organization, farmers must insist upon a substantial reduction in the cost of all governmental units which can be realized by the discontinuance of extravagance and waste, and through improved or increased efficiency.

"Although the association carried a much heavier legislative program before the 57th General Assembly than at any previous session, a program covering a very wide range of subject matter; yet its percentage of success was much greater than ever before. Its influence on matters of public policy will continue to expand just to the extent its program is sound and well-merited, and is directed in such manner as will best serve the agricultural interests of Illinois."

Mr. Smith later drew an economic picture of the farm industry revealing the terrific deflation in farm values and income, the rapid rise in farm taxes, and the continuing efforts of organized farmers to secure the adoption of a national policy for agriculture.

The Missing Link

"The American people finally made a decision," he said, "and the Congress of 1929 adopted the first national policy for agriculture. That policy embodies many of the demands previously made by farm organizations, but left out the golden or missing link that was necessary to enable it to fully function.

"Although disappointed, the farmers of Illinois agreed to give their support in the development of this policy and to assist those charged with the responsibility of administering the act in every possible way. In promising this support, reservations were made, however, wherein and whereby should the act fail to meet certain of the essential needs of agriculture, our organization would seek to correct such weaknesses or limitations, should experience disclose the need therefor.

The Warning Unheeded

"Throughout this struggle, farmers insisted, when appealing to other industries for support, that unless agriculture was assisted in getting on a proper, sound and permanent basis, that sooner or later, the ill effects of such failure would be felt throughout all phases of our American economic life. Little attention was paid to this warning, but today I stand before this convention keenly recognizing, as does every thinking citizen, that we are in the throes of difficulty and distress, wherein there are no exceptions."

Whiteside County Organization Teams from Montmorency, Coloma, Hume and Hahnaman townships, who put their membership over the top in two days: Left to right—at back—Henry Olds, Ralph Bollman. Second row—N. H. Hand, Glenn Schutt, C. A. Gaulrapp, Jake Hine, Alfons Lippens, Lester Devine, Thomas Cooney, Peter J. Dietz, John Dirks. Front row—Edward Larson, Harry Butler, George Thome, Will Plauts, Frank Plauts, Frank Ufkin, Frank G. Plauts.

Kelly Plan Delays Vote on Income Tax

AS WE go to press the proposed state tax bill being sponsored by Representative Tice is expected to come up on third reading in the House on February 2 when the General Assembly reconvenes.

Although scheduled for consideration following the vote on the so-called Kelly plan bill on January 20, proponents of the measure decided to delay consideration because of the lateness of the hour. Debate on the Kelly bill for revising the taxing machinery of Cook county began at 10:00 in the morning and lasted until 8:30 that night. As a result the members were worn out and in no mind to take up the consideration of an important measure such as the state income tax.

Rep. Tice

Friends of the revenue bill believe it has an excellent chance of passage. The fact that the property tax has broken down in Cook county, and that property owners in many other counties of the state are unable to pay their taxes has led to more favorable consideration of this legislation which is based on ability to pay.

Chattel Mortgage Bill Passes House and Senate

H. B. No. 4 introduced at the request of the Illinois Agricultural Association by Representative Tice passed the Senate on Wednesday, January 20, after it previously had been passed in the House.

This bill requires all notes secured by chattel mortgages to so state upon their face. Such notes and the mortgage are negotiable, the mortgage being only an incident to the indebtedness which it secures.

When signed by the governor and so enacted into law this bill will make it possible for banks to rediscount mortgages on livestock through the Federal Reserve banks and so make available to Illinois farmers millions of dollars worth of additional credit.

Because of an antiquated act (1895) on the Illinois statutes, Illinois banks have been unable to rediscount such paper through the Federal Reserve banks. This situation has worked a hardship on the credit machinery of the state. When the matter was brought to the attention of the I. A. A. it immediately took steps to modify the law.

Illinois soybean growers will meet at Decatur March 10 for the second annual convention of the Soybean Marketing Association. The meeting will be held at the Orlando Hotel.

Three Kinds of Bosses

Employees know a good deal about efficiency which they never tell the boss because they are never asked. For years they have been subjected to all sorts of efficiency tests so that the boss may have a line on their habits and abilities An employee writing in *Nations Business turns* the tables and suggests an efficiency test for bosses.

He says there are three types of bosses: First, those who don't like to delegate authority; second, the one who delegates as much as he can, recklessly and indiscriminately; third the boss who knows how much to delegate and how to check results.

The first takes his loaded portfolio home at night and is tired and snappish the next day. An employee of this type of boss who makes a decision of his own risks his very job every time his mind works independently.

At the other extreme is the boss who shoves all responsibility on his help. He generally pretends to know everything but in reality scarcely knows his own job. This charlatan-boob type never admits an error and probably does not know that his employees are laughing at his bluff.

All employees know the third type. He is calm when the office has nerves. When he doesn't know he admits it—and it doesn't hurt his dignity a bit.

You do not feel frightened when you ask him for a salary raise which you think you deserve, nor shamed if he refuses it. When talking to you about your own job, he talks as an equal.

His working rule is to find the right man for the job and then leave him alone. He delegates responsibility for the work, but he retains responsibility for the workers. He is—and feels—answerable for the work done in his office because it was he who put the workers there. He is proud of them; he does not hire workers whom he expects to be ashamed of. He will instinctively go to the mat for his subordinates when his superior, or an outsider, criticizes them.

And when he is sure that all through the office the right man is in the right place, he is likely to play golf.

Carl F. Frey of Gilman was recently elected president of the Iroquois County Farm Bureau. Henry K. Johnston of Buckley was chosen as vice-president, and A. J. Gillfillan, secretary-treasurer.

Milk Prices

(For January, based on 3.5% milk unless otherwise specified.)

PHILADELPHIA—Inter-State Milk Producers announces Class I basic $2.71 del'd. Retail 11c.

PITTSBURGH — Dairymen's Co-operative Sales Co. announces Class I basic $1.70 del'd, $1.10 country pt. Class I manufactured $1.44 del'd, $1.05 country pt. Class III Chicago 92 extra average. Retail 9c. Cash and carry 7c—no bottle charge.

BALTIMORE — Maryland State Dairymen's Assn. announces Class I basic $2.84 f. o. b. city. Retail 12c.

ST. LOUIS—Sanitary Milk Producers announces Class I basic $1.90 country pt. Retail 11c. Cash and carry 10-11c. Prices are net, that is, the association 3c checkoff has been previously deducted.

CHICAGO—Pure Milk Assn. announces Class I basic $2.01 country pt. Class II 92 score butter x 3½ country pt. Retail 12c. Price drop effective Jan. 1. Class II dropped and all milk over 90% base figure at butter x 3c for 3.5 milk.

SPRINGFIELD, ILL.—Producers Dairy Co. announces Class I basic $1.70 city del'd. Class III butterfat plus 5c per lb. Retail 9 1-11c. Wholesale 8c.

ROCK ISLAND and DAVENPORT—Quality Milk Association announces Class I basic $1.85 del'd. Class III butterfat 90 and 92 score. Retail 10c. Cash and carry 8c.

QUINCY—Quincy Co-operative Dairy Co. announces Class I basic $1.95 del'd. Retail 10c. Cash and carry 8c.

PONTIAC—Pontiac Milk Producers Association announces Class I basic $1.92½ del'd. Class II manufactured $1.05 del'd. Retail 10c. Cash and carry 8c.

December Prices

ST. LOUIS—Sanitary Milk Producers announces Class II manufactured $1.19 country pt. Class III surplus 99c country pt. Above prices are net, that is, the Association 3c checkoff has been previously deducted.

PHILADELPHIA—Inter-State Milk Producers announces Class I basic $2.96 del'd. Class II manufactured $1.57 del'd.

PONTIAC, ILL. — Pontiac Milk Producers Assn. announces Class I basic $1.92½. Class II manufactured $1.22½. Retail 10c. Cash and carry 8c.

BLOOMINGTON — McLean County Milk Producers Assn. announces Class I basic $1.70 del'd. Class II manufactured $1.55 del'd. Class III surplus $1.16 del'd. Class IIa $1.65 del'd. Retail routes 9¾c. Cash and carry 10-11c.

CHAMPAIGN and URBANA — Champaign County Milk Producers announces Class I basic $2.06 del'd. Class II manufactured $1.53 del'd. Class III transfers to Ice Cream Co. $1.27 del'd. Surplus 90c del'd. Retail 11c.

DECATUR — Decatur Milk Association announces Class I basic $1.86 del'd. Class II manufactured $1.46 del'd. Class III surplus 87c del'd. Retail 10c. Cash and carry 8c.

PEORIA—Illinois Milk Producers' Assn. announces Class I basic $2.13 f. o. b. Peoria. Class II manufactured $1.45. Class III surplus $1.02. Retail 9 and 10c. Net price to members after deduction of Illinois Milk Producers' checkoff—basic $2.08 per cwt., surplus $1.19 per cwt. December usage in percentage figures: Class I 54%, Class II 7%, Class III 39%.

The Illinois Grain Corporation is scheduled to meet at the Jefferson Hotel in Peoria February 22 for its second annual convention.

Seventy-nine Illinois counties are now on the modified accredited list in tuberculosis eradication.

The Illinois Produce Marketing Association will hold its annual meeting at the St. Nicholas Hotel, Springfield, February 17. C. A. Brown, Department of Dairy Economy, University of Illinois, will give an illustrated address as one of the features of the meeting.

O'Neal Lauds I. A. A. For Accomplishments

Membership Expansion Necessary for Utmost Achievment, He Says

ILLINOIS farmers offer the nation an outstanding example of the power of organized effort to affect the welfare of agriculture, Edward A. O'Neal, president of the American Farm Bureau Federation, declared, speaking at the recent convention of the Illinois Agricultural Association in Rockford.

The Illinois Association, Mr. O'Neal said, is one of the two largest state organizations of farmers affiliated with the American Farm Bureau Federation and has attained its enviable position because of a very sincere desire on the part of its leadership to be of real service to the agricultural industry of the state.

Lauds I. A. A.'s Work

"Your accomplishments in co-operative marketing and centralized purchasing of farm supplies have few parallels elsewhere in the nation," Mr. O'Neal said. "Your campaign against unjust taxation has attracted the attention of the entire nation and so highly does the American Farm Bureau think of it that we have for a long time insisted on using the services of your taxation expert, John C. Watson, in the work which our national committee on taxation is doing.

"At your state capital, Springfield, the energetic work of your president, Earl C. Smith, in speaking for Illinois farmers when agriculture is concerned, has long been under our observation. Last spring opportunity came to annex him more closely to our national organization and now President Smith is doing effective work for the whole nation through his duties as member of the legislative committee of our national Board of Directors."

Membership Counts

Membership is what counts in making the work of any farm organization effective, Mr. O'Neal continued, and he added that few states offer more convincing proof of this than does Illinois.

"If that be true," he continued, "then how important it is that Illinois farmers continue their efforts to build a numerically great organization to serve themselves. At our national convention in Chicago early last month our voting delegates voiced the conviction that in this period of economic distress membership growth is of primary importance.

"But if membership increases come, they will come chiefly through the efforts of the individual volunteer solicitor. That thought I cannot impress upon you too deeply. Some of our County Farm Bureaus have made records in voluntary membership drives that we of the national organization are holding up as models for the entire nation to follow. If every county unit in the state would submit a record like that of McLean county and LaSalle county and some of your other counties, what a power the Illinois Agricultural Association could truly become."

Mr. O'Neal devoted some time to recounting the steps which led to a coalition between the Farm Bureau, the National Grange and the National Farmers Union, to secure congressional attention to the demands of the organized farmers for agricultural legislation.

Six-Point Program

The program behind which the "big three" are standing solidly, he explained, covers six matters. First of all, he said, the three farm groups have pooled their strength and are exerting their influence to push legislation that will make the work of the Federal Farm Board more effective. This, he said, means amendment of the Agricultural Marketing Act, to include the equalization fee and the export debenture plan for control of crop surpluses.

Stabilization of the monetary system and improvement of the rural credit machinery of the nation is the second project backed unanimously by the three groups, he stated, while tariff equality for agriculture, adjustments in the national tax program, control of speculation in farm products and Philippine independence are the other subjects on which the united power of the organized farmers will be brought to bear.

The Tax Question

Touching on taxation, Mr. O'Neal declared a whole day would be required for its adequate consideration. Mounting costs of government, through wasteful, extravagant expenditure of public funds, he pointed out, have resulted in running the nation's tax bills up to unbelievable proportions and the time is ripe for action.

The Farm Bureau, he said, has been in the forefront of the battle to bring about a recognition of the disaster towards which all branches of the government, federal, state, county and local, are drifting, and to halt the trend before it is too late.

On the income tax, he declared, the organization pins its faith as the only fair and just remedy for the intolerable burden of taxes now borne by real estate.

The farm radio program of the Illinois Agricultural Association is broadcast daily except Saturday and Sunday over station WJJD, Chicago (1,130 kilocycles), between 12:30 and 12:45 noon.

The next national Farm Bureau chain broadcast will be on Saturday, February 13, according to the American Farm Bureau Federation. This program is broadcast on the second Saturday of every month between 11:30 and 12:30 a. m. central standard time over the NBC chain. Stations in and near Illinois on the hook-up are KYW, Chicago; KWK, St. Louis; WIBA, Madison; WHAS, Louisville, and WHO-WOC, Des Moines-Davenport.

Approximately 400 requests for copies of a recent radio address on the proposed state income tax by President Earl C. Smith from station WLS were received. Mr. Smith explained the main features of the bill, gave examples of its application to various amounts of income, and answered criticisms made by opponents. Copies may be had by writing the Department of Information, I. A. A., 608 So. Dearborn St., Chicago.

The Paris Shipping Association in Edgar county at the time of its annual meeting, January 19, had 287 marketing agreements signed toward forming a concentration point as a unit of the Illinois Livestock Marketing Association, according to Fred L. Gumm, manager. During the past year the Paris association served 1,157 shippers, marketing 754 head of cattle, 624 calves, 3,950 hogs, and 1,192 sheep. The total value of livestock marketed was more than $100,000.

The Illinois Grain Corporation reports that 1,954 carloads of grain were shipped from 150 shipping points from September 1 to December 31, 1931.

The leading counties in carload shipments were McLean, LaSalle, Mason, Champaign, and Iroquois. September led the other months with 541 carloads.

The eighth annual meeting of the American Institute of Co-operation will be held in 1932 at the University of New Hampshire, Durham, N. H.

The open sessions of the Institute begin August 1. The Institute is an educational enterprise supported by the general farm organizations, farm co-operatives, and a number of branches of federal and state governments.

WANT TO PLAY VOLLEY BALL?

Marshall-Putnam Would Like to Schedule Contests with Other Counties

CARL Anderson of Granville, Putnam county, suggests that volley ball be added to the recreation program of the Illinois Agricultural Association as the official winter sport of farmers just as golf is the sport of professional men.

He says there is considerable interest in the sport in Marshall-Putnam county, where several teams have been playing this winter. He points out that volley ball is better suited to farm players than practically any other game, in which they would be interested.

"I have been wondering why the I. A. A. doesn't add this sport to its recreation program," he writes. "It comes during the slack season; it permits a large group from each community to play rather than just a few scattered players over the whole county; older folks can play as easily as young athletes; and it would permit county and district tournaments.

"The folks in my township have been playing volley ball one evening each week this winter. But now they want some outside teams to play. I understand there are several other communities in Marshall-Putnam county that are interested in the sport and we doubtless will get together before this winter is over.

"The size of the team can be flexible, making it fit the crowd. We have played as many as twelve to a team thus making it possible for twenty-four men to play at the same time. If our crowd is too large we prefer to choose three teams, playing them alternately, and resting one of the teams.

"The game makes an excellent mixer. Our Farm Bureau is a cross-section of the community, bringing together men from different churches, school districts and cliques. If we can get them to play together we won't have much trouble getting them to work together on our projects. I noticed one evening that we had men from five churches on the floor at one time.

"Volley ball is suitable for either sex, in fact, much more suitable for the average farm girl or woman than basketball. Ladies teams could be organized. Several ladies in our township have expressed a desire to play. Thus the Home Bureau could co-operate in popularizing the game."

Note: Is volley ball in your county? If so, would you be interested in forming a volley ball league. Write the I. A. A., 608 So. Dearborn St., Chicago, if interested.

Illinois Holstein Ass'n. Employs New Field Man

M. G. (Mike) Seath, formerly of Jefferson County, Wisconsin, began work as Field Representative of The Illinois Holstein Association, with headquarters at St. Charles, Illinois, in January, 1932. Mr. Seath, who enjoys a wide acquaintance and excellent reputation in the Holstein fraternity, will be engaged in extension work among the Association members in co-operation with Field Representative Jim Ball, who has been with the Association since 1927.

For the past three and one-half years, Mr. Seath has very successfully conducted the work of Secretary in Jefferson County, Wisconsin, Holstein Breeders' Association. He acquired there an outstanding reputation as a constructive worker in the field and as showman and calf club leader.

Mike Seath is doubtless most widely known as a showman having fitted and shown the Jefferson County show herd for five years, beginning in 1927, and having, in the course of this period, led into the ring such notable animals as Artis Madam Wayne Denver, Reserve All-American senior yearling in 1927, Inka Wayne Creamelle, All-American junior heifer of the same year, and Johanna Pietertje Artis Creamelle, National Grand Champion in 1927.

The Illinois Holstein Association expects to make 1932 its greatest year of service to the Holstein industry, extending particularly its service to the buyers of Illinois cattle and the help and consultation which the Association can bring to its members in meeting everyday problems of each individual in improving their herds and extending their dairy cattle market.

18% More Pigs Saved

About 18 per cent more pigs were saved in Illinois in the fall of 1931 than a year ago, and 21 per cent more were saved in the corn belt, according to the U. S. Department of Agriculture.

The survey was made through the rural mail carriers. Combining the spring and fall pig crops of 1931, an increase of about 10 per cent for Illinois and 9 per cent for the country as a whole is indicated. This increase amounts to about 4,500,000 heads of pigs in the corn belt where more than 80 per cent of the commercial hog supply is produced.

Uncle Ab says that the one form of expansion he grieves to see is the waistline.

I. A. A. Opposes Higher Rates on Soybeans

Letter to Commerce Commission Asks That Beans Be Placed in Grain Group Schedule

ON the ground that soybeans grown for commercial purposes should be classed with grain in freight rate schedules, the Illinois Agricultural Association has requested the Interstate Commerce Commission to re-classify this commodity so as to exempt it from the emergency increase which became effective early in January.

In a letter to George B. McGinty, secretary of the commission, L. J. Quasey, director of transportation for the I. A. A., set forth the objections of shippers to the increase and asked that soybeans be placed in the grain group in the rate schedule.

Under Grain Rates

"Soybeans have come into commercial prominence within the past five or six years," he said. "They have generally moved under grain rates, and the tariffs of the carriers generally make grain rates applicable on soybeans. The rail movement of soybeans is similar to that of grain. Some of last year's crop moved for export. The loading is practically the same as that of wheat or corn.

"A considerable quantity of soybeans are used for seed each year, not only for growing more beans but for growing soybean hay and for soil improvement purposes. A large portion of the crop is processed, the products being oil and meal. The oil has a wide range of industrial uses and the meal is used to feed livestock. The value of soybeans this past year and at the present time is approximately 35 cents a bushel, which compares favorably with the average price of grain.

Should Be Exempted

"From this it follows that soybeans should be treated the same as grain, and since grain was exempted from the application of the emergency increase primarily on the ground of being an agricultural product, soybeans should likewise be exempted."

Many corn belt farmers are now growing soybeans as a commercial crop instead of oats and wheat. Approximately 4,000,000 bushels go into commercial channels annually in the United States, about 2,500,000 bushels being produced in Illinois. Under the increased rates now in effect, Illinois farmers would pay an additional $25,000 a year in freight.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*
MAX HARRELSON, *Assistant Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for missent copy please indicate key number on address as is required by law.

Farm Board the Goat

IT seems to be popular to criticize and malign the Farm Board. Yet under the limitations imposed by recent economic trends and the Agricultural Marketing Act it is doubtful if any other group of men could have done better.

The Farm Board has been blamed either directly or by implication for the discouraging decline in the prices of wheat, cotton, livestock, dairy products, and produce. It is held responsible for the shortcomings of co-operatives, although even at their worst the overhead costs of co-operative sales agencies are decidedly less than the toll taken by the "trade."

The Farm Board is made the goat, and a most convenient goat so far as the middlemen and the commodity exchanges are concerned. The anti-Farm Board propaganda of the latter group and the newspapers and trade journals that front for them is easily understandable. They have a selfish interest in resisting inroads by farmer-owned agencies into the profits of distribution.

But public denunciation by farm representatives is not in good taste. If the Board has made some mistakes it is only human. Certainly it is no more responsible for the deflation in farm prices than it is for the tremendous shrink in stocks and bonds, the low price of copper and silver, the grasshopper plague, or drouths and floods. The Board has made a conscientious effort to assist the commodity co-operatives in co-ordinating and improving their sales service. It can exercise due authority in correcting mistakes which may have been made by organizations receiving Farm Board aid. More than that it cannot do until the Marketing Act is amended.

Government Policy and Agriculture

GOVERNMENTAL policies since the war and the indifference of the nation to the farm problem are responsible for the plight of agriculture, George N. Peek of Moline, Ill., declared in an address before the War Industries Board Association in New York City recently.

"Our policy for the excessive expansion of foreign trade in industrial products was a mistaken one," said Mr. Peek. "We have been trying to maintain our war-time industrial facilities at a capacity above peace-time demand. We have loaned abroad more money than represented by our entire war debt. We have put the facilities of our gigantic Department of Commerce behind the movement to expand foreign trade just as though we were a debtor nation, as we were before the war, instead of a creditor nation, as we emerged from the war.

"We have half the gold supply of the world, so that foreign nations cannot pay us in gold; and we have prevented their paying us in goods and services by our tariffs, although at the same time we have insisted upon the payment of war debts. We have gone even further; to the extent that we have captured foreign markets, we have interfered with the normal relations of other countries between themselves."

This intelligent and concise statement of facts brings out in bold relief the underlying reasons for the steady decline in agriculture since 1920. European war debts and excessive American industrial expansion have stimulated agricultural production abroad and dried up foreign markets for our farm products. And the concentration of wealth at home in too few hands followed by industrial retrenchment, fear, unemployment, and destitution for so many now have completed the rout of farm prices.

While post mortems on the cause of our troubles do not lead the way out, they are useful in helping us avoid the same mistakes again.

From a Rural Mail Carrier

Editor of I. A. A. RECORD:

In the January RECORD I noticed an article by Mr. F. J. McNair of Hamilton county with a heading "Postoffice Salaries." I should like to ask Mr. McNair if he was including rural route carrier when he mentioned "Postal Employees"? If so, on what grounds does he ask them to take a reduction in wages?

I wish it was possible for Mr. McNair to accompany me or any other carrier who has dirt roads to travel over. Am sure he would agree that the carriers earn their salaries.

I am a rural carrier, also a Farm Bureau member of Woodford county, and have always tried to help our county organization as much as possible.

At present the roads are frozen after several days of rain and heavy travel, consequently the ruts are deep and crooked and my car needs extra tall wheels to clear the bumps. But I try to give my patrons service with a smile even though my fingers get cold fishing pennies from the mail boxes.

So, Mr. McNair, why not try and reduce the cost of the government by reducing the salaries of persons who are not as closely connected with the farmer as the rural carriers are?

GEORGE T. CLARK,
Woodford County, Ill.

From a Postal Employee

Editor of I. A. A. RECORD:

As a member of the Farm Bureau and I. A. A., also an employee in the Postal Service, may I ask that you publish the following in response to the article written by F. J. McNair in the January issue on "Postoffice Salaries."

"I have served in the capacity of postal employee for the past 29 years and I think I know at least a few things with reference to this department—the responsibility attached thereto, the expenditure necessary to carry on this service, and also the rate of postage charged to meet this expenditure.

"I'll agree with you, Mr. McNair, the Postal Dept. does have a deficit, and has had for many years back, even during the best times. This department is not intended as a money-making proposition, although it could easily be made into one. This is a service to you, as you can go anywhere and you will not get one-tenth for your money as the service which the Postal Dept. gives you.

Salaries the Same

"You would still be getting this service cheap if the cost were five times as high, in which case the postal employees might be better paid. And still you think that postal salaries are too high. They are practically the same as when the farmer was getting six or eight times for wheat and corn over what he is getting now. And we, as well as everyone else had to pay the price for everything the farmer raised.

"You did not see any articles written at that time about the salaries of postal employees being raised in proportion to the raise the farmer got. No, I think not. You also never read a word from the postal employees, condemning the farmer because he was receiving ridiculous prices for everything he raised. The farmer received high prices for years, and the biggest reason that some are in bad today is, that because of his greed for more, he bought still more land, and he is now stuck with it. The farmer who is not in debt today is getting along all right and he will continue to do so.

The Army and Navy

"You speak of taxes being so high. Yes, we all know that they are. But do you really think that the Postal Department is at fault on account of it, even in a small way? I know it is not, and so do you. Also, do you really know just what government tax you pay? Look it up, you will find it one of your smallest tax items. Do you know where the heaviest tax burdens of the U. S. fall? No? Well, I'll tell you—the United States army and navy. Do you know the second largest tax burden? It is for the U. S. Department of Agriculture, a department created for the sole benefit of the farmer. And who do you suppose pays this tax? Just the farmer? Not by any means. Everyone helps pay, and the postal employees do their share?

"But why kick about that now? Considering all the wonderful improvements we have received the past 15 years, such as schools, roads, governmental services of various kinds and fine public improvements, what else can we expect? The Postal employees sincerely regret the deplorable condition of some of the farmers, but *who* is to blame? Should the regular standing salaries of postal employees be cut now, to meet 30c corn, and have nothing done about it when it sold for one and two dollars? That is certainly a very *'broad-minded'* view of the situation, isn't it? And to think that this so-called depression is less than a year old.

Once a Farmer

"I am glad to say that I am a Postal worker, an employee of the government, in the greatest business of the U. S. today. I have also been a farmer previous to this work, and with years of experience in the Postal Department serving farmers, I should know something about them, and I certainly am interested in them, anything which pertains to them, and above all, I like to see them prosperous and successful.

"I am associated with the I. A. A., and I must say it certainly does not behoove the farmer to continually present for publication through the columns of their farm journals articles antagonistic to the Postal employees, or any other class of laborers for that matter, but especially the rural carriers, who through the generosity of the Postal Department in creating the rural routes, is the farmers' best friend. And I fully believe any fair-minded person will bear me out in this statement, and I am glad to say that my experience has proven that the greatest per cent of the farmers are of the fair-minded type."

JOHN C. ALEXANDER,
Tazewell County, Ill.

More About Postal Salaries

G. W. WEEKS of Tazewell county expresses himself feelingly in a 3,200 word letter upholding the postoffice service and salary schedule. Space does not permit publication of the entire letter. Mr. Weeks says in part:

"I entered the Postal service in 1919 at a salary of $90 per month, and was sent to Chicago to work in the Union Terminal of the Railway Mail Service. At that time bread was fifteen cents per loaf, sugar was eighteen dollars per hundred, potatoes three dollars per bushel, and rent and other living expenses were correspondingly high. Mr. McNair, I suppose, lived during that period and should know what awful prices had to be paid for everything that was purchased.

Loses $50 a Month

"I worked in Chicago about three months when I was sent out on the railroads as a railway postal clerk. This service required that I spend at least a part of my time away from home, with the attendant necessary expense, all to be paid out of ninety dollars per month. In November of that year I resigned my position in the Railway Mail Service, after discovering that I had found it necessary to spend approximately fifty dollars per month more than I was getting.

"During the time we lived in Chicago we exercised the utmost care in providing for ourselves; in fact, we were unable to buy enough to eat in order that our rent might be paid and carfare provided. During that year and the next two to follow, many railway mail clerks found it necessary to quit the service because of inadequate pay. I wonder if Mr. McNair could have done any better than I did, or than the dozens of other clerks did. Also, I wonder if the years 1919, '20 and '21 come within the meaning of the word 'many' which he used when he stated 'for many years.' That much for the Railway Postal clerks who were paid 'unnecessarily high salaries.'

"Next, let us consider the case of the rural letter carriers. At the time of our entry into the World War in 1917, the rural carrier was getting $1,500 per annum. From that amount it was necessary to pay the expense of keeping a team of horses, for which he had to buy hay, corn and oats for feed, and straw for bedding. Also, he had to have a pasture for them during the summer months, which, as a rule, he had to rent. At that time the rural carrier was also using a car for delivery, when the roads were good, and in fact, the rural patrons demanded this service. Incident to the use of the car, was the necessary purchase of gas, oil and tires, in addition to the depreciation in value of the car.

"After our inception in the war, as everyone knows, prices of commodities went up and up, and continued that way until about 1922, when we had some decrease in certain articles such as sugar, bread and a few others, but high prices continued on other things until the beginning of the present depression in 1929. Did the salaries of the rural carriers follow this upward trend in prices? Not so that Mr McNair could notice it. Before the war the rural carriers got along fairly well on $1,500 per annum, but I don't know of any of them who got rich.

Rural Carrier in 1920

"On March 15th, 1920, I accepted a position as rural carrier at a base pay of $1,500 per annum, plus $30 a mile for excess mileage, purchased an automobile for $800, a team of horses for $200, a set of second hand harness for $25 and a mail wagon for $175. During that year I kept account of the necessary expense of serving my route, and found that it amounted to $810 per annum. On July 1st of that year my salary was increased to $1,800 base pay with excess milage, which made me a salary of $1,920, which, after deducting $810 necessary expense of running my route, left me a net income of $1,100 for my year's work. If Mr. McNair can explain why that was an 'unnecessarily large salary' with prices as they were at that time, he can do better than I can. I wouldn't be surprised to learn that he made more money than that himself, but what he made wasn't 'unnecessarily large.' Mr. McNair should have had to keep himself and family and buy everything he used on that salary, and then he would be able to realize just how 'unnecessarily high' it was.

"This salary pay continued until July 1, 1925, when it was again increased by the addition of a maintenance allowance, which increased the pay of carriers at our office approximately three hundred dollars. By adding this three hundred dollars to the $1,100 previous net pay, we find that the carriers were receiving a net salary of $1,400 after July 1st, 1925. But what about what had been happening to them the past eight years? With prices continuing the same as they were before, this increase was greatly needed, but still it failed to furnish the carrier with what might be considered an 'unnecessarily high salary.' However, now that 'the depression is on,' as Mr. McNair puts it, and prices have decreased considerably, the rural carrier is just

(Continued on next page)

finding himself in a position where he is receiving a salary adequately large to allow him to put away a few dollars each month, and pay off some of his past losses. And now at this satisfactory period, Mr. McNair insists that the salaries 'be greatly reduced.'

"Mr. McNair says at the last of his article that 'he believes all farm organizations and farm papers should get busy and demand this reform,' but a little before this statement he says he wants this country to be a government of, for and by the people. How does he coincide those two statements? Would it be a government of, for and by the people if the agricultural associations and farm papers could cause the postal employees to sustain a cut in their salaries? Aren't the postal employees as much a part of the people of this country as the farm organizations and farm papers? What would Mr. McNair say if the postal employees should be able to tell him how much he should get for his corn? Does he think the postal employees should have nothing to say about whether or not they should have a cut? I wonder what he would have said if, during the year 1921 when he was getting $45 per ton for alfalfa hay, the postal employees had demanded that he receive half that much. But did they do it? No. They peddled right along on their little old pre-war salaries and hoped for better times to come. Now those better times are here and the other fellow is yelping his head off about what unnecessarily large salaries the uncomplaining postal employees are receiving.

Farm Papers Subsidized

"He says that 'all farm organizations and farm papers get busy and demand this reform.' The farm papers and the farm organizations who are responsible for the edition of the farm papers might well consider that the Post Office Department is furnishing them a concession that is furnished to no other business. The Post Office Department allows newspapers and periodicals free transportation in the mails in the counties of publication, and bulk rates on mailings outside the counties of publication. These bulk rates are so ridiculously low as to be less than half the rates of postage on the same mailings if sent by individuals. Mr. McNair, as a member of one of these farm organizations, might do well to insist that his organization furnish a vote of thanks to the Post Office Department for these concessions, rather than write articles for his paper that will tend to cause the department no end of trouble by fostering a feeling of unrest among the readers of that paper and a misunderstanding of such vital things as postal employees' salaries. These concessions are of such financial value to publications that editors themselves should see to it that no article should appear in the columns which would tend to cause the Post Office Department the least trouble whatever.

School Teachers Cut

"Of course, the idea behind this desire to cut salaries is to lower taxes, and everyone knows that taxes are very high and should be lowered And in nearly every community there are those who think first of slashing salaries of postal workers and public school teachers. But if just a little thought is given to the matter, it will be readily seen that by doing so, very little will be accomplished in the way of lowering individual taxes. This salary slashing took place in our community last year and the victims were the public school teachers. Each teacher received a 10 per cent cut and a big blow was made about the first step in tax lowering. When it was all over and the community began to do some figuring, it was found that the salary cut had actually saved the average tax payer about ten cents. So the school teachers were called upon to lose from $100 to $180 in salary so that the individual tax payer could save a dime. That was what I call mighty poor judgment, for it disrupted the morale of the school faculty, and if kept up long enough, will completely demoralize the entire school system and our kiddies will be the sufferers. And the same thing will happen to the postal workers if their salaries are cut, and you men and women who demand this cut will lose a whole lot more in postal efficiency than you will save in taxes. Think it over."

Farmers in England Having a Hard Time

A recent editorial in The Field (London), a British agricultural journal, says: "Depression has settled in a heavy cloud over the farming industry. The markets last week were as cheerless as could be imagined. Wheat, salvaged from the rainstorms of a miserable harvest, was selling at 1 pound a quarter (fourth of a ton) which is barely half the cost of production. Fat cattle, pigs, sheep and even dairy cows, after the announcement of next year's contract prices, were down in price again. Farming in this country does, indeed seem a hopeless business at times.

But farmers must hold on. From Norfolk the answer may come that there is no option when two-thirds of the farms virtually belong to the banks, and they have no desire to foreclose. Holding on is a nerve-racking feat when the very foundations of business slip away. To-day there is no branch of British agriculture which can maintain its position. None has escaped the devastating competetion from abroad, where labor is cheap or exports are subsidized to maintain agriculture at all costs in this topsy-turvy world.

Low Milk Price

Even the milk market is assailed, and now dairy farmers have to accept no more than 9d. a gallon for their milk through the year because it has become hopelessly unprofitable to manufacture condensed milk, dried milk and cheese in competition with the bargain sales conducted by overseas producers in our markets. If we were competing on equal terms, farmers in this country would have no grievance. But we are not. The cleverest producers, men who do not waste a penny on superfluous labor or extravagant feeding stuffs, are beaten by the prices of imported produce.

If the encouragement of farming were regarded by our politicians as one means of righting the adverse trade balance, farmers could hold on with renewed hope. Once confidence in the industry is restored, there will be no lack of enterprise. We should be able to count on a great impetus to production, and this in turn would be reflected in many industries whose fortunes are closely bound up with agriculture."

"Too Much Salesmanship Responsible for Depression"

Dean-Emeritus Davenport Advocates Conference for Permanent Welfare of All

IN the next economic cycle, organized agriculture must resist the salesmanship of industry which is responsible for the present plight of the farmer, declared Dr. Eugene Davenport at the University of Illinois during Farm and Home Week. Industry brought on the collapse of agriculture by over-selling the world on extravagance, he said.

Dean Davenport spoke on the subject, "What Shall We Do with the Next Cycle?"

When Tide Turns

"When the tide turns, instead of permitting the man with something to sell to do all the talking and again bewitch the public with a false and dangerous psychology," he continued, "let the American Farm Bureau and the National Grange invite to a conference the biggest and best of our industrial fraternity, together with bankers and organized labor, to meet around a common table and discuss the situation as a whole.

"Such a conference should be guided by the permanent welfare of all classes, recognizing the natural danger of a gulf between the price level of that of manufactured goods and that of foods and the perils of artificial methods in trade as bound to force the situation to the dizzy and dangerous heights from which we have just taken our economic and social tumble.

Greedy for More

"The present crash all happened as a result of a desire on the part of all branches of industry to show each year a vast increase in volume of business done and of paper profits piled up, often regardless of methods or of consequences. It established and maintained an impassable gulf between manufactured goods and farm prices. It has wrecked thousands of young families whose inexperience was unable to withstand the onslaughts of high pressure salesmanship. And now it has broken down of its own weight, destroyed the farmers' market and brought distress everywhere."

A 15 per cent patronage dividend was declared by the directors of the Peoria County Service Company prior to the annual meeting of the company January 16. Six hundred ninety-two Farm Bureau members will participate in the distribution of $12,000 patronage refund.

Buy Enough Serum to Vaccinate 1,500,000 Pigs

Farm Bureaus Co-Operate to Protect 1932 Hog Crop Against Cholera

ILLINOIS farmers bought enough anti-hog cholera serum and virus co-operatively during 1931 to vaccinate 1,500,000 hogs, it was revealed at the annual meeting of the Illinois Farm Bureau Serum Association at Rockford.

"During the 12 months' period ending November 30, the association purchased for its 73 member counties a total of 49,321,245 cubic centimeters of anti-hog cholera serum and hog cholera virus," stated the annual report of Ray E. Miller, secretary-treasurer of the organization. "In addition to purchasing this large volume of serum and virus, the association secured prices from manufacturing companies on other biologic supplies and instruments.

"The 1931 volume represents an increase of approximately 50 per cent over the best previous year. Prices paid for the serum, which was practically all of the clear concentrated variety, are the lowest ever obtained for supplies of this quality.

"The quality of the serum is proved by the fact that less than 200 trouble cases from all causes were reported during the year in spite of the widespread cholera outbreaks in the state. In other words, the ratio of trouble cases reported to total herds treated was about six-tenths of one per cent."

In April the association was re-incorporated under the Agricultural Co-operative Act of Illinois, so as to give member counties control and ownership through the issuance of common and preferred stock proportional to the amount of business done by each county.

Contracts for 1932 supplies of serum and virus totaling 38,785,000 cubic centimeters have already been awarded the two successful bidding companies at prices substantially lower than those in effect during 1931.

Indianapolis Producers Earned $45,000 in 1931

Net earnings of the Producers Commission Association at the Indianapolis stock yards during 1931 were $45,000, according to Sid Cherrill, field representative of the I. A. A. in livestock marketing, who spoke at the annual meeting of the Producers January 26 at Indianapolis.

Since the organization started ten years ago cash refunds to member patrons have been 25 per cent of the commission fees. The year 1931 was one of the best years the organization has gone through, Mr. Cherrill said. Total net earnings for the ten years approximate $600,000 and more than $385,000 have been refunded. About one-third of all the livestock received in Indianapolis during the past ten years has been handled by this co-operative agency.

These women served a fine oyster stew at the annual meeting of the Tabor (DeWitt county) Shipping Association recently, writes G. E. Middleton of the Indianapolis Producers.

Indiana Farm Bureau Buys a Serum Plant

Co-Operative Ass'n. Buys Warehouse and Office Buildings

THE Indiana Farm Bureau operates the only plant in Indiana, which manufactures anti-hog cholera serum under government inspection, according to a recent statement. The Farm Bureau recently took over the plant operated by the Swine Breeders Pure Serum Company and began manufacturing serum shortly after the first of the year.

This company has been providing anti-hog cholera serum and virus to swine raisers of Indiana and other states for sixteen years. Approximately 3,000 Indiana farmers are interested in the plant either as stockholders or users of its products. The new plant, valued at $120,000, has an annual manufacturing capacity of 20,000,000 c. c. of serum and a relative amount of virus.

The manufacture of tankage will be carried on in connection and also the making of soaps for household uses.

Farm Supplies Also

Co-operative purchasing of farm supplies in Indiana is proving to be one of the most thriving projects of the state Farm Bureau. The operating facilities of the company, known as the Indiana Farm Bureau Co-operative Association, now includes three buildings in Indianapolis. A large volume of business has been developed in mixed feeds, field seeds, farm machinery, fertilizer, oils and greases and other farm supplies which figure in the cost of production.

The plant of the state co-operative is located near the entrance to the Indianapolis stock yards, which makes it convenient for livestock truck drivers to haul supplies back to their home communities on return trips.

Market 23,463 Cars Live Stock Co-operatively

Annual Report Reveals Trends in Marketing During 1931

THE outstanding developments in livestock marketing in 1931 were the expansion of trucking and the increase in the movement of livestock direct from country points to packers, according to the annual report of Ray E. Miller, director of livestock marketing.

"Both of these factors have resulted in a further decrease in the number of active livestock shipping associations in the state," Miller states, "and have made it imperative that producers develop a different type of machinery to assemble and ship livestock.

"The larger marketing units, or county marketing associations, have proved successful because they are able to make frequent and regular shipments, to practice greater selectivity in moving livestock of different grades and weights to the market where it is in most demand, and to broaden the market outlet."

Seven County Ass'ns.

Seven county marketing associations are in operation in Macon, Vermilion, Shelby, Iroquois, Champaign, McDonough, and Coles counties, and units of the state association are being organized in Edgar, McLean, Knox and Warren counties, Miller said.

The Illinois Livestock Marketing Association was organized to serve as a parent organization for these county units, to correlate their operation, to standardize their methods, and to prevent as far as possible competition between county associations.

Illinois farmers marketed co-operatively 23,463 carloads of livestock during the year. This was a decrease in volume in comparison with the previous year, but was a larger percentage of the receipts at the markets due to a decline in total receipts. Eighty Illinois County Farm Bureaus now have livestock marketing as a major project.

Kane Co. Service Co.

Kane County Service Company has called our attention to an error in the article about their company in the January issue of the I. A. A. RECORD wherein it was stated, "The regular 7% preferred stock dividend and a 10% patronage refund have been declared, payable at a later date." This should have read, "The regular 7% preferred stock dividend and a 10% patronage refund have been paid, and another 5% patronage refund has been declared, payable at a later date."

Tazewell Service Co. Pays 15% Cash Dividend

Annual Meeting First to Be Held In New Building at Pekin

THE Tazewell Service Company had sufficient earnings during the past year to pay a 15 per cent patronage dividend to Farm Bureau members who were customers of the company, it was revealed at the recent annual meeting in Pekin.

More than a million gallons of SERVICE petroleum products were distributed by the company. Approximately 2,800 gallons of kerosene, gasoline, oil and grease were sold daily to farmers of the county. These sales represent a gain of 214.9 per cent in gasoline, 138 per cent in kerosene, 115.9 per cent in lubricating oil, and 200.9 per cent in grease during the year in comparison with the seven months' period of operation during the preceding year, according to Clyde Woolsey, manager.

On the basis of volume of products handled by each of the 47 local service companies associated with the Illinois Farm Supply Company during the past year, Tazewell Service Company held seventh place in gasoline, twelfth in kerosene, fourth in lubrication oil, and fifth in grease.

Three Storage Plants

The company operates three bulk storage stations, located at Pekin, Delavan, and Richmond Crossing, with eight service trucks operating throughout the county. Further distribution is made from ten privately owned and operated filling stations located at various points in the county.

The net earnings for the year on the basis of paid in capital stock represents a profit of 97.7 per cent on the investment. The sum of $1,398.25 was paid in dividends on preferred stock in addition to patronage refunds totaling $15,648.25. More than $5,000 was added to the reserve fund.

One farmer will receive more than $500 in patronage refunds for the year's purchases, thirty members more than $50, 60 members more than $25, and 410 more than their annual Farm Bureau dues. Nearly 350 non-members bought supplies totaling $27,500 from the company, which was approximately 23 per cent of the sales. The profit on this made up most of the fund set aside as surplus. Walter Frazee is president and George Storey, secretary. Directors for 1932 are the same as they were last year.

Opening Event

The annual meeting of the service company was the opening event for the new Farm Bureau building at Pekin which is one of the largest and finest of its kind in the United States. It was built by the Tazewell County Farm Bureau and associated organizations to house the offices of the various companies and provide auditorium facilities for meetings.

Farm Bureau members came in such numbers from all corners of the county to dedicate the new structure that the assembly room and hall in the basement were crowded to capacity. The Tazewell Bureau deserves much credit for completing a venture like this in a year such as 1931. The building will serve as the permanent office for the Farm Bureau, the Farmers' Automobile Insurance Association, the Tazewell Service Company, and other subsidiary organizations.

Tazewell County Farm Bureau's new office building houses the organization's many activities.

Woodford Pays 18% In Patronage Dividends

The Woodford County Service Company announced an 18 per cent patronage dividend at the annual meeting of the Farm Bureau and Service Company on January 7, according to Manager G. G. Ludwig. Ten per cent dividend checks were distributed at the meeting and 8 per cent will be paid at a later date. The 536 Farm Bureau members who have patronized the company will receive approximately $9,000. The non-members patronizing the company are almost twice the number of Farm Bureau member patrons.

Refrigeration and Hard Roads Affect Dairying

Mergers in Milk and Dairy Industry Reveal Need for Producer Organization

ILLINOIS dairy farmers, more completely organized than most other producers, are faced with new problems resulting from recent important developments affecting the industry, J. B. Countiss, director of dairy marketing for the I. A. A., said in his annual report.

The development of a network of hard roads, improved refrigeration, and the tendency toward increased production of milk for the fluid market are at the bottom of some of the new problems which will have to be worked out in the near future.

A great merger is now taking place in the dairy industry, the dairy department report states. It makes possible a transfer of milk from one plant to another of the same company or from one milk shed to another in times of stress or disagreement.

Haul Long Distances

The development of hard surfaced roads and improved refrigeration makes possible the transportation of milk over long distances, which was not true a few years ago. The tendency toward increased production of this perishable product is also a problem confronting the farmer who undertakes dairying as a life work.

Bargaining associations resisted price declines in milk during 1931 and were far more successful than most of the lesser organized farm commodities in maintaining a reasonable income. In downward market trends, the price of fluid milk has not fallen as fast nor as far as most other farm products.

This situation created a new problem, however. It encouraged many farmers to go into milk production and their addition to the total production caused burdensome surpluses to appear near the close of the year. Much of this surplus was produced by farmers who had not had much experience in the milk business, and it is very questionable whether the milk they are producing and which is causing the disturbance on the markets is being produced at a profit.

This serves as an example of what happens when one industry becomes well organized and begins to benefit those who engage in that line of production.

Tonnage Limestone and Phosphate Lower in 1931

Quality Material Remains High, Annual Report of J. R. Bent States

ALTHOUGH agricultural limestone and ground rock phosphate for agricultural purposes were lower in cost in 1931, there was a substantial reduction in the tonnage used during the year, J. R. Bent, director of the limestone-phosphate department of the Illinois Agricultural Association, showed in his annual report released at the I. A. A. convention last week.

"Several factors have combined to cause this," he said. "Chief among them is low farm income which cut in on the phosphate and limestone demand during the latter half of the year when normally the greatest use is made of these commodities.

"During the spring the tonnage figures compared quite favorably with a similar period in 1930, but with the continual decline in farm prices, coupled with bank closings, farmers were unable to secure funds to purchase these soil improvement materials. As a result sales could not be made by the companies except on a basis of extended payment dates.

Drought Also Cause

"Another cause in the shrinkage in tonnage, especially in the southern part of the state, is the fact that the severe drought of 1930 resulted in clover failures in many fields which previously had been limed and these fields were put back into clover in 1931 instead of additional fields which normally would have been limed and used for that purpose.

"An estimate for the state indicates that the amount of these commodities used in 1931 was about 40 per cent of the amount used in 1930. Ninety-three County Farm Bureaus, representing 97 counties, signed limestone contracts with the I. A. A. at the beginning of the year to take advantage of the discounts secured through the organization.

"When it came time for the companies to submit prices for the second half of the year, the I. A. A. refused to accept them, and the final result was a general reduction throughout the state. Although there was struggle, which came near disrupting the agreement, all the prominent companies, except one, agreed to reduce prices and extend the agreement. But even the low prices failed to produce business.

"Under conditions such as prevailed in 1931, it was natural to expect that quarry operators would become careless and indifferent in the matter of the grade of the material. It is, therefore, gratifying to be able to report that instead the grade has been steadily improved. Under pressure from the I. A. A. various companies have installed finer screens and better methods of cleaning and preparation."

NOTICE ILLINOIS AGRICULTURAL ASSOCIATION ELECTION OF DELEGATES

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of February and March, 1932, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

During February annual meetings will be held in McHenry, Will and DeKalb counties.

During March annual meetings will be held in Kankakee, McDonough, Boone and Winnebago counties.

Feb. 1, 1932.

Signed,
G. E. METZGER, *Secretary.*

Armour & Co. Packers Report $23,000,000 Loss

THAT declining meat prices in 1931 hit the packers a hard blow is indicated by the $23,000,000 deficit recently reported by Armour and Company for the year just closed. The surplus of the company was cut from $43,000,000 to $20,000,000. An inventory loss of $22,000,000 was sustained.

Although tonnage sales were practically the same, price declines in various meat products ranging from 20 to 50 per cent reduced the gross income to about 70 per cent of the 1930 returns.

Despite the poor earnings, however, the company retired $5,000,000 of funded debts, nearly $7,000,000 of preferred stock of subsidiary companies, and $2,000,000 of Illinois preferred stock without additional financing, the annual statement said. Current assets on October 31 totaled $138,616,230, while current liabilities were only $13,724,177. Cash on hand was $33,208,706, an increase of $21,305,979.

"Current operating costs have been so adjusted that results for recent months have been on a more favorable basis," said T. G. Lee, president. "It is apparent that stabilization of commodity values and any subsequent improvement in general business conditions should be favorably reflected in the earnings of the company."

Soybean Ass'n. Handles Larger Volume in 1931

Quality of Crop Excellent, Report Membership Gain Over 1930

THE volume of 1931 soybeans handled through the Soybean Marketing Association showed a considerable increase over the 1930 volume, according to the annual report of Wilbur H. Coultas, manager of the association.

"The quality of our 1931 crop was excellent," said Mr. Coultas, "and most of the carloads handled were good enough to grade No. 2. A few cars graded No. 3 and only three cars graded sample. There were four carloads of outstanding quality which graded No. 1 and received a premium of one cent per bushel."

229 Elevators

He estimates that by the time the 1931 crop is disposed of, the association will have handled 1,500,000 bushels during the year. Last year the volume was 1,150,000 bushels. This year's beans were handled through 229 co-operating elevators located in 30 counties. The members' beans were handled and reported by the contracting elevators for an average handling charge of approximately three cents a bushel.

During the summer membership campaign, 1,118 new members were signed, bringing the total membership to 4,096. Four new counties signed a sufficient number of members to organize and elect advisory councils.

"Because there was some demand on the part of contract elevators to handle quantities of beans from non-member growers, the Soybean Marketing Association handled a large processor's daily bids on a brokerage basis," Coultas said. "Thirty-nine carloads of non-member soybeans were handled on this account.

Want to Get In

"There was an increase in acreage of harvested soybeans in other corn belt states in 1931 and there has been a large number of requests on the part of growers in other states to take advantage of the pooling privileges of the Soybean Marketing Association. In all probabilities, the board of directors and corporate management will arrange to broaden out their field to take in growers from other states, looking toward the formation of a central marketing association and the consequent control of a larger volume of the commodity."

Country Life Ins. Co. Makes Big Gain in '31

Adds Nearly $9,000,000 to Business In Force, Doubles Assets

COUNTRY Life Insurance Company finished its third year with approximately $44,000,000 of business in force, according to the annual report of Manager L. A. Williams given at the annual convention.

This company, sponsored by the Illinois Agricultural Association and the County Farm Bureaus, and owned and controlled by the 60,000 Farm Bureau members of the state, gained $9,000,000 in paid for business in 1931 to lead all Illinois companies and to place well toward the top among the 338 companies for actual gain in business.

Low Lapse Rate

Not only did the 1,100 agents write a good volume of business, but the lapse of policies was held down to 8.5 per cent, which is considered unusually low in a year like 1931, Mr. Williams said. A regular monthly gain in new business is shown by the report. There were two months during the year in which regular business written exceeded $2,000,000.

Dividends paid out in 1931 to policyholders totaled approximately $46,000, a distribution made one year earlier than the guarantees in the policy. This was due partly to the low death claim figure, which was only $130,000 for the year.

Assets Are Doubled

The assets of the company are now well over $1,000,000, or double the assets a year ago. More important than this, however, is the fact that the assets are in the most liquid form possible, Mr. Williams said. Highest type bonds constitute the entire holdings of Country Life.

"Although the company was organized at the beginning of the worst financial crisis in history, the more credit is due it for the great record made during such a time," he said. "Fortunately, life insurance came through this financial strain with flying colors, and proved that it could weather the worst of storms and maintain the highest known security for its policyholders."

Actuary's Statement

Lynn A. Glover, president of L. A. Glover & Company, actuaries for the company, made the following statement regarding Country Life:

"It is very gratifying, in reviewing the progress of Country Life through the stormy year of 1931, to see the company forging steadily forward, establishing new records in growth, persistency of business, and establishing itself more firmly as a conservative financial institution. Deriving its support entirely from the citizens of Illinois, it seems remarkable that in twelve months the company has doubled its assets, paid dividends to its policyholders, increased its surplus practically $100,000, and actually gained $8,500,000 to a total paid for amount of insurance outstanding of $43,768,000.

"The wisdom of its ultra-conservative investment program has been justified by the fact that not one security held by the company has defaulted in interest or principal. Its mortality gains continue to prove the wisdom and care exercised in the selection of the company's risks.

"The continued confidence of the people in Country Life, evidenced by its growth and the persistency of its business is well merited, and the management is to be congratulated upon the business-like, conservative and economical record it has established."

Grain Co-ops. Choose Advisory Committees

Ballots have been mailed by the Farm Board to approximately 3,500 co-operative associations who have been asked to establish new advisory committees for wheat and coarse grains. Elections were scheduled to be held January 26 at the offices of the Farmers National Grain Corporation, Chicago. The new committees will serve for one year beginning February 1, 1932.

The co-operatives will select seven members for each of the committees as provided in the Agricultural Marketing Act. Five will be chosen by districts and the other two who "shall be experienced handlers or processors of the commodity, will be chosen at large."

Members now serving on the wheat advisory committee include George S. Milnor, Chicago; Bert Lang, St. Louis; F. J. Wilmer, Rosalia, Washington; John Manley, Enid, Oklahoma; William Settle, Indianapolis; J. A. Schnitzler, Froid, Montana; and E. G. Tharp, Protection, Kansas.

Members of the present coarse grains advisory committee are S. J. Cottington, Stanhope, Iowa; George S. Milnor, Chicago; James Murray, Chicago; Wayland Magee, Bennington, Nebraska; Earl C. Smith, Detroit, Illinois; C. E. Huff, Chicago; and L. J. Taber, Columbus, Ohio.

Taking advantage of price decreases, Japan has increased importation of American raw cotton and now ranks ahead of Germany as the best market for this product.

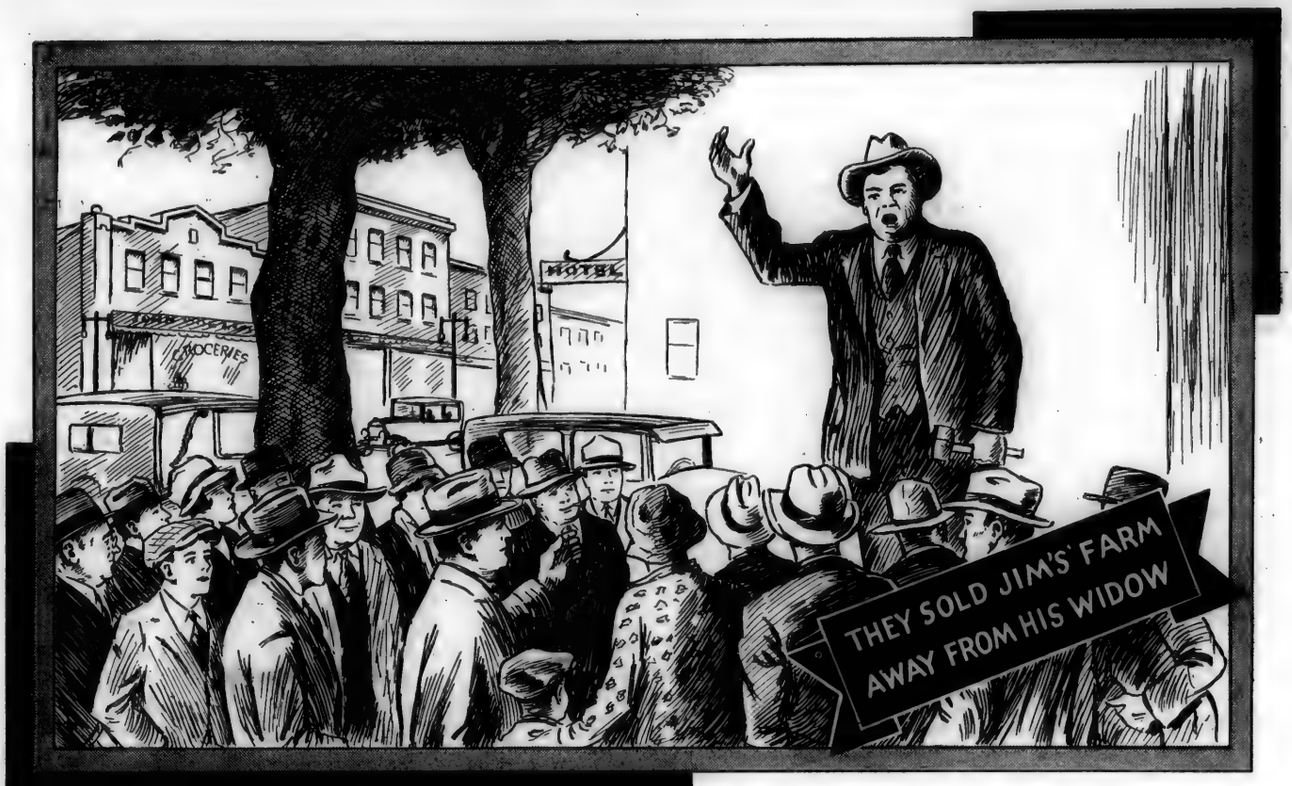
Illinois Grain Corp. Closes Year with 80 Elevators

Red Top Seed Growers Exchange Gains in Membership

THE Illinois Grain Corporation, a regional co-operative, closed the year 1931 with a membership of more than 80 co-operative elevators, representing an annual volume of 14,000,000 bushels of grain, Harrison Fahrnkopf, director of grain marketing for the Illinois Agricultural Association, said in his annual report for 1931 released on January 28 at Rockford.

At the beginning of the year there were only 32 member elevators, handling 5,500,000 bushels of grain, he said. In outlining the set-up he explained that the organization requires local elevators to operate as full co-operatives conforming to the Capper-Volstead Act to be eligible for membership.

Outstanding Year



"In grain marketing, the year 1931 will stand out from all past years in that for the first time we have gone through a full period of 12 months with a state-wide and nation-wide machine at the service of the individual producer through his local co-operative," Mr. Fahrnkopf said. "The elevators which have taken action to become members of the Illinois Grain Corporation might be considered as pioneers in the movement. They have given loyal support to the state regional and to the Farmers National Grain Corporation."

Membership Grows

Mr. Fahrnkopf also told of the growth of the Egyptian Seed Growers Exchange at Flora, Ill., another co-operative to which he gave considerable time during the year. This organization showed a marked increase both in membership and in the quantity of red top seed handled, he said.

953 New Members

"Nine hundred and fifty new member-growers were added to the Exchange during the year," his report stated. "The total is now 2,738 members. Although final records are not yet obtainable, the organization handled in 1931 one of the largest volumes of seed in its history. New cleaning machinery has been added to the plant and the exchange received the crop through 25 receiving points. Nine bonded warehouses are being used to handle the red top. C. H. James became manager of the co-operative last May." The red top seed co-operative is the only one of its kind in the world. Southern Illinois farmers grow around 90 per cent of the red top seed produced in the United States.

A Forced Sale can be prevented with Life Insurance

U.S. SENATOR CAPPER OF KANSAS SAYS —

"The farm mortgage debt in the U. S., which has more than doubled since 1920, can be paid off within a generation by means of life insurance.

"So much of the farm mortgage debt could be protected in this way that mortgages would no longer be a menace to agriculture and the future of the soil.

"Business men now make a practice of covering their indebtedness with life insurance. It would be possible to provide for the farm mortgage debt in the same way. The farmer's mortgage could be cancelled with the maturity of the policy."

"JIM would have paid for the farm if he had lived," everyone said. Too bad he didn't let life insurance finish his job. A COUNTRY LIFE policy would have cleaned up the mortgage, given his widow and children a deed to the farm.

Every forced sale is a record of someone's unfinished work. We never know what the future holds for us. "Unfinished business" describes all that many men thoughtlessly leave for their loved ones as a heritage.

Country Life's mortgage insurance policy provides a definite way to keep the farm in the family, to provide for the future. If you pass on it will mean that your plans will be finished. If you live, the policy can be converted into retirement income . . . a check every month to insure comfort and leisure in your declining years.

Don't delay, act now, get the facts, mail the coupon for full information.

COUNTRY LIFE INSURANCE COMPANY
608 South Dearborn Street Chicago

I am interested in Country Life's Mortgage Retirement policy. Send me all the facts about the use of life insurance in paying off the mortgage on my farm.

Lower Assessments Save $1,500,000 in Farm Taxes

Huge Losses in Farm Values Make '31 a Busy Year for County Tax Committees

LARGELY as a result of the efforts of County Farm Bureau tax committees, marked reductions were made in the assessed valuations of farm property during 1931, saving Illinois farmers approximately $1,500,000, as compared with what they would have paid under 1930 assessments, John C. Watson, director of taxation for the Illinois Agricultural Association, showed in his annual report released to delegates and members at Rockford last week.

Mr. Watson estimates that farm property will pay about $6,500,000 less in all taxes on the 1931 valuations than it would have paid if assessments had remained unchanged since 1920.

"Excluding Cook county, for which no information is yet available, valuations of lands and improvements as assessed for county and local purposes in 1931, decreased $268,286,585, or nearly 16 per cent," the report states. "It is impossible to separate assessments of farm lands from assessments of lands used for other purposes, but it is certain that nearly all the decrease in valuation noted above was made in farm lands.

Personal Property Lower

"Farm personal property also reflected in its assessments the huge losses in values suffered in 1930 and early 1931. Excluding Cook county, all personal property assessments decreased a total of $142,805,843, or more than 23 per cent of the assessments of such property in 1930. It may be conservatively estimated that at least 40 per cent of the total reduction was in the valuations of farm personal property.

"There can be no doubt that taxes on farm property have been substantially reduced by decreases in the 1931 valuations. The effect is most clearly seen in taxes for state purposes. If the high valuations of 1920 had remained unchanged relative to other assessments, farm property would have paid about $8,951,000 in state taxes in 1931. If the 1930 valuations had remained unchanged relative to other assessments, farm property would have paid $6,634,000 in state taxes on 1931 assessments. With the changes in 1931 assessments, farm property will pay about $5,776,000 in state taxes on 1931 assessments.

Tax Cut for State Purposes

"The cut of $3,175,000 in taxes on the 1931 valuations as compared with the amount that would have been paid on the 1920 valuations is due entirely to the adjustment in valuations. The cut of $858,000 in taxes on 1931 valuations, as compared with the amount payable on the 1930 valuations, is due to a similar adjustment.

"The effect of changes in county and local valuations in taxes charged against property could easily be computed for any taxing district in the same manner, but it is difficult to estimate the effect in all county and local taxing districts. There can be no doubt, however, that relative decreases in valuations of farm property tend to produce the same effect on taxes for county and local purposes as they do for state purposes.

"On the basis of previous tests of the effect of decreases in valuations on the amount of county and local taxes charged, the I. A. A. estimates that farm property will pay a total amount of $6,500,000 less on all taxes on the 1931 valuations than would have been paid if valuations had remained the same as in 1920, and at least $1,500,000 less than it would paid if valuations had remained the same as in 1930."

Farm Equipment Men Back the Farm Board

"SINCE our last convention the press of the country has been flooded with propaganda hostile to the Federal Farm Board, including vicious and groundless attacks upon the board and the government. The source and the purpose of this propaganda are obvious and unmistakable. The attacks come from a limited group of speculators and middlemen who have long fattened on the proceeds of agriculture without benefit to either the producer or the consumer; and their manifest purpose is to destroy the agricultural marketing act or so to cripple it that the American farmer will be denied government aid in regulating and distributing his products.

"At the next session of congress, and perhaps thereafter, concerted and well-financed efforts will undoubtedly be made to repeal or emasculate the agricultural marketing act or to tie the hands of the farm board. Therefore, be it

"Resolved, That we call upon all members in both houses of congress, and especially those from the agricultural states and areas, and upon the representatives of farmer organizations to make a vigorous resistance to this destructive campaign, so that whatever amendment may be made to the agricultural marketing act shall be written for the benefit of agriculture, and not to its detriment and injury." Resolution passed by National Association of Farm Equipment Manufacturers.

Sen. Cuthbertson Urges Support of Income Tax

McLean County Annual Meeting Reveals Many Farm Bureau ccomplishments in 1931

A. S. CUTHBERTSON, state senator from Macoupin county, speaking before 1,350 farmers at the annual dinner of the McLean County Farm Bureau, January 7, commended the work of the Illinois Agricultural Association in behalf of a state income tax and urged united support of the proposed measure.

The speaker said that the state continues to use a taxing system that was in force back in 1850, despite tremendous increases in population and in the burden of taxation and despite the fact that tangible property no longer represents ability to pax taxes.

A. S. Cuthbertson

The McLean County Farm Bureau and its auxiliary enterprises reported the following items of co-operative business transacted in 1931:

McLean Service Company

The McLean County Service Company had 2,500 patrons during the year. Its net profit was $61,483, and patronage refunds were $49,613, averaging $29.85 for each of the 1,670 Farm Bureau member patrons.

The Producers' market had 56 market days in 1931. The average amount of sales per market day was $820.98 and the total sales for the year were $45,974.89.

Hog cholera serum and virus totaling two million cubic centimeters was used by Farm Bureau members at a saving of $5,000.

The cream pools at Bloomington, Chenoa and Bellflower handled 175,000 pounds of butterfat. Co-operative grain and livestock marketing also received considerable attention in the county.

Life insurance business for 1931 was $452,000 bringing the total Country Life life insurance in force in the county to $1,750,000. Total automobile insurance policies in McLean county in the Agricultural Mutual number 1,189, which is exceeded by only one county in the state. Hail insurance for 1931 was $80,530. Fire insurance was $83,553, windstorm insurance $64,150. Nineteen new employers' liability policies were written during the year, making a total of 172 for the county.

85 Counties Given Aid on Public Utility Problems

Estimate Value of Organization at Half Million Dollars or More

AS THE result of advice and representation in public utility matters made available in 1931 through the Farm Bureau and Illinois Agricultural Association, Illinois farmers are at least a half million dollars better off than they would have been if they had acted alone, a review of the year's work on problems of this nature reveals.

According to the annual report of the I. A. A. transportation department, eighty-five counties shared in this service which includes such matters as freight rates, train service, shipping facilities, railroad station closing cases, railroad right-of-way cases, pipe lines, telephone complaints, electric transmission lines, and rural electrification.

Pipe line systems were in process of extension in 35 counties during the year. As a result of the combined efforts of the Illinois Agricultural Association and County Farm Bureaus, landowners of the state received approximately $350,000 more for pipe line easements and damages in construction than the companies originally offered. In LaSalle county alone landowners received $30,000 more for the pipe line right-of-way across the county than they were originally offered.

Dixon-Freeport Case

Early in the year through the joint efforts of committees from Stephenson, Ogle and Lee counties and representatives of the I. A. A. an agreement with power officials regarding settlement for an electric transmission line right-of-way between Dixon and Freeport procured for landowners $20,000 more than previously offered by the company.

A total of 42 complaints from 31 counties on telephone rates, service, and right-of-way matters were handled by the state association. Information was given during the year in response to 104 requests for quotations of freight rates and interpretation of tariff rules on such commodities as grain, livestock, fruits, vegetables, and agricultural limestone.

Other Service Given

The I. A. A. also handled 26 cases dealing with shipping facilities, 20 cases resisting the closing of local stations, and 159 cases pertaining to right-of-way problems such as railroad fences, cutting weeds on right-of-ways, repair of farm crossings, and drainage complaints.

Transportation service was also given to the Chicago Producers Commission Association, the Egyptian Seed Growers Exchange, the Illinois Farm Supply Company, the Ilinois Fruit Growers Exchange, the Illinois Grain Corporation, the Illinois Livestock Marketing Association, the National Livestock Marketing Association and National Order Buying Company, and the Soybean Marketing Association.

In addition to this service, the I.A.A. claims department collected 832 claims against public utility companies totaling $20,159.88.

Decline in 1931 Farm Income Shown by U.S.D.A

The year 1931 was reasonably productive of crops but was marked by another staggering decline in the price of farm products, says the Department of Agriculture in its January report on the agricultural situation. The decline in prices places farm products at approximately 50 per cent of their 1929 value.

Farm crops, although 10 per cent larger in 1930, had a gross value of $4,123,000,000 as compared with $5,819,000,000 in 1930. Packers paid farmers $1,103,000,000 for 10,834,000,000 pounds of meat the first ten months of the year, as compared with $1,553,000,000 for 10,759,000,000 pounds in the corresponding period of 1930. The price decline during the past year shrank the value of crops nearly $1,750,000,000 and of meat nearly $500,000,000, according to the report.

A. F. B. F. Working on Legislative Program

A six-point program covering the Agricultural Marketing Act, rural credits, the monetary problem, taxation, speculation, and Philippine independence covers the chief interests of the American Farm Bureau Federation in the present session of congress, according to a recent announcement by President E. A. O'Neal.

President Earl C. Smith is a member of the A. F. B. F. legislative committee which met in Washington several weeks ago with representatives of the Grange and Farmers' Union to develop plans for a joint program of agricultural legislation. Mr. Smith was unable to attend this meeting.

Farm Bureau policies as determined at the recent national convention in Chicago will guide the A. F. B. F. representatives in all their dealings, President O'Neal said.

Co-operatives in Illinois Handle Many Commodities

Huge Volume of Farm Crops Now Marketed Through Farmers' Own Agencies

CO-OPERATIVE marketing progress in all commodities was reviewed at the marketing conference held during the I. A. A. convention at Rockford on Jan. 28.

Illinois farmers now have agencies for marketing milk, fruits, vegetables, livestock, grain, soybeans, butterfat, red top seed, and other commodities. Several of these are affiliated with national marketing organizations.

More than 23,000 carloads of livestock were handled through Producers' Commission Associations or sold direct to packers during 1931. Early in the year the Illinois Livestock Marketing Association was organized to co-ordinate the work of county and district marketing associations and direct the movement of livestock to the best markets.

The Illinois Grain Corporation, organized in 1930, now has 80 member elevators as compared with 32 at the beginning of 1931. — These elevators have a combined business of 14,000,000 bushels of grain annually.

1,000 Cars Perishables

The Illinois Fruit Growers Exchange last year handled nearly 1,000 cars of fruits and vegetables, selling to 200 markets in 23 states and three Canadian provinces.

Practically every milk market in Illinois is now organized and it is estimated that around 85 per cent of the fluid milk in the state is marketed through co-operatives.

The Illinois Produce Marketing Association handled more than 3,000,000 pounds of butterfat during 1931 through its 48 member county associations. The first co-operative marketing of cream was begun in 1924.

The Soybean Marketing Association last year handled for members 1,500,000 bushels of soybeans as compared with 1,150,000 in 1930. This co-operative has operated only two years.

Nearly 1,000 new members were signed up by the red top seed co-operative, the Egyptian Seed Growers Exchange in 1931, increasing the membership to 2,738. In 1930 the volume was a little less than 700,000 pounds of fancy seed. The 1931 volume, although not yet determined, is expected to be larger than in any previous year.

Ask your neighbors to join the Farm Bureau.

Illinois Farm Supply Ranks High in '31 Sales

Distribute More Than $73,000 in Patronage Refunds to Counties

THE Illinois Farm Supply Company, co-operative purchasing agency organized to help Farm Bureau members to cut their costs of producing farm crops, ranked fifth in gasoline sales and second in kerosene sales among the 874 licensed petroleum distributors in Illinois during 1931, it was announced by L. R. Marchant, manager, in the conference of county service company managers and directors at Rockford January 27.

$5,000,000 Sales

More than 4,000 cars of petroleum products, or 33,000,000 gallons, were handled by the 47 farmers' oil companies affiliated with the state company. This totals more than $5,000,000 in gross sales. Out of the net profits, more than $73,000 was distributed on a patronage basis among the member companies.

Facilities Increased

"This growth and expansion has been brought about through increased facilities for distribution and a general improvement in the merchandising methods of the associated companies," Mr. Marchand said. "The organization began the year with 36 member companies, operating 92 oil bulk storage stations, and 243 truck tanks. At the close of the period 47 companies were in operation with 120 bulk storage stations and 351 truck tanks.

Big Gains Over 1931

"Sales included 22,807,333 gallons of gasoline, 8,436,442 gallons of kerosene, 1,059,504 gallons of distillate and fuels, 948,239 gallons of lubricating oil, and 642,785 pounds of grease. This represented gains of 74.8 per cent in gasoline, 57.4 per cent in kerosene and distillate, 69.49 per cent in lubricating oil, and 58.5 per cent in grease in comparison with sales during the previous year.

"The 47 companies associated with the Illinois Farm Supply Company, representing slightly more than one-twentieth of the co-operative oil companies in the United States, have almost one-sixth of the capital stock and handle one-seventh of the business transacted by organizations of this type. This financial strength of the associated companies is a credit to the entire co-operative movement in Illinois."

The Livingston County Service Company recently declared a 17 per cent patronage dividend on gasoline, 14 per cent on lubricating oils, 12½ per cent on coupon books, and 10 per cent on Blue gasoline, kerosene and grease.

Jersey County Supply Co. Pays 25 Per Cent Refund

THE 447 Farm Bureau members who patronized the Jersey County Farm Supply Company during the past year will receive in patronage dividends nearly twice the amount the entire membership pays in annual dues to the County Farm Bureau. A 25 per cent patronage dividend announced January 9 together with the preferred stock dividends of 7 per cent will total $13,231.45 for the year.

In less than three years this company has paid back to Farm Bureau members twice the amount originally invested in the company, the 7 per cent stock dividends annually, and set aside surplus and reserve funds in excess of the paid in capital stock. Among the refund checks on 1931 business was one for $275, one over $200, and another $175. The 474 checks issued averaged $26.46 per Farm Bureau member, according to Manager W. O. Wilson.

The company sold an average of 1,009.2 gallons of gasoline, 621 gallons of kerosene, 52.2 gallons of motor oil, and 21.3 pounds of grease per day during the year.

Wabash Valley Service Co. Cuts Melon at Grayville

Some 700 Farm Bureau members and their families assembled in Grayville, Wednesday, January 20, to enjoy the big melon cut by the Wabash Valley Service Company.

The announcement of the 20% patronage refund by Grant Broster, president of the company, was most enthusiastically received by those in attendance, reports L. R. Marchant.

Checks totaling $6,000 wer distributed at the close of the meeting and another $6,000 will be distributed at a later date.

Nine hundred thirty-six Farm Bureau members in Wabash, Edwards, White, Wayne, Gallatin and Saline counties will participate in this distribution of the earnings according to J. D. Bunting, manager of the company. The largest check issued was $138 and the average of all checks was $12.40 per member.

The sales of the company were substantially increased during the past year with a gain of 85% for gasoline, 56.6% for kerosene, 45.1% for lubricating oil, 49.5% for grease and 132.7% for miscellaneous products. Nine directors were elected from Wabash, Edwards, White and Gallatin counties.

Court Decision Strengthens Packer-Stock Yards Act

Commenting on the decision rendered recently by the Federal Court at Danville upholding the Secretary of Agriculture in ordering livestock commission firms at the St. Louis stock yards to stop boycotting co-operative agencies, counsel for the Department of Agriculture said:

"The decision rendered was one on injunction proceedings brought by the 'old line' commission firms operating at National stock yards. The secretary's order was approved, and permanent injunctions refused as to all the plaintiffs except four. The order which the court approved was issued last February and ordered the livestock firms to cease the unfair practices charged. The order also suspended their registration for a period of 90 days. They were able to get a temporary injunction which stayed the suspension provision of the order."

This decision, according to the legal counsel's statement, strengthened the Department in the enforcement of the Packers and Stock Yards Act. The court ruled that individuals or agencies offering a public or quasi-public service who refuse to trade with anyone on a public live stock market are violating the act even though conspiracy may not be proved; that concerted action without agreement is a violation; and even the action of a single agency or individual in refusing to trade makes him subject to disciplinary action by the Secretary of Agriculture, who may suspend his right to operate on the market. Jury trial of such offenses, the court ruled, is not essential to the proper administration of the law.

Three Essentials to Readjustment—A. B. A.

Three essentials to completing the readjustment to the lower level of prices and income now prevailing include: (1) lower government expenditures, indebtedness and taxes; (2) lower transportation costs, the largest item in which is railroad wages, and (3) lower building costs, corresponding with the drastic reductions in building materials, according to the American Bankers Association.

"None of these charges is immovable and time will doubtless bring them all back into line," states the association. "Purchasing power and prosperity never come from partial employment at nominally high wage scales, but from full employment at 'natural' wages, determined by supply and demand, be they high or low."

Number 3 | MARCH, 1932 | Volume 10

Organized Agriculture Scores Great Victory

State Income Tax Bill Passes After Many Years of Effort

THE organized farmers of Illinois scored their greatest victory on February 2, when as a result of their five years of continuing effort, the General Assembly of Illinois enacted into law a constructive State Income Tax bill. Companion measures were also passed, which provide and insure that all revenue derived from the Income Tax will be used to reduce or replace taxes now levied upon and collected from property.

On February 22, Governor Emmerson signed all bills having to do with this series of legislation. The legislation goes into effect on July 1 next.

The Illinois Agricultural Association prepared and sponsored its first Income Tax bill during the 55th General Assembly in 1927. Its efforts at that time were largely put forth to secure attention and study on the part of all who recognized and believed that taxes upon property were becoming unbearable and that something must be done to secure a more equitable distribution of the cost of government. The bill passed the Senate, but it was impossible to secure proper attention in the House and it was dropped from the calendar during the closing days of the session.

Second Effort 1929

The second effort was made during the session of 1929. Again the bill passed the Senate, but was unfavorably reported out by the House Revenue Committee. The House refused to concur in the committee report and placed the bill upon the calendar. When called up on second reading or the amendment stage, a motion was made to strike the enacting clause and it prevailed by a vote of 72 to 69.

The third income tax bill was introduced in the regular session of the General Assembly in the spring of 1931. Its rates were much higher than those of its predecessors, thus offering an opportunity for much greater relief to the property taxpayers than would have been afforded by the earlier proposals. It passed the Senate with five (5) votes to spare. In the House again it found rough sledding. After hurdling all efforts to seriously amend it and after reaching the stage of final passage, it failed by two (2) votes to secure the constitutional majority required.

The regular session of the 57th General Assembly adjourned in June of last year without enacting into law any measures directed toward permanent relief of the ever-increasing tax burdens upon property. Many municipalities were in dire distress for revenue, particularly Chicago and Cook County. Recognizing these conditions and that something must be done, the Governor of Illinois called together 43 men who were representative of the various economic interests of the state.

At that time, the Governor very frankly presented the problems confronting the state and its municipalities, the imperative need for revenue reform and requested this conference of citizens to undertake the responsibility for an intensive study of the problem and to bring forth suggestions for effective remedies. This conference of 43 citizens selected an Executive Committee of Eleven to undertake the job, with instructions to report back to the General Conference, if and when agreement could be reached. This committee consisted of eight (8) men from Cook County and three (3) from downstate, one of whom was the President of the Illinois Agricultural Association.

Recommends Income Tax

The Executive Committee met regularly over a period of four (4) months

(*Continued on next page*)

THIS issue of the I. A. A. RECORD is intended to convey to the membership brief, but authentic, information as to the voting record of members of the General Assembly, outside of Chicago, on the State Income Tax Bill.

The main issue involved in the Income Tax fight was by and between those seeking just relief from the ever-increasing tax burden upon property of the state, and those owning intangible property and others receiving substantial incomes who were under present laws escaping and failing to bear their just portion of the cost of government.

Property taxpayers owe a debt to all members of the General Assembly who voted for this legislation. The I. A. A. knows of no better way to discharge that debt than to go en masse to the polls on primary day and on election day and use the full power of the ballot in voting for those members seeking re-election who have stood by and with the property taxpayers of Illinois.

Government of the people, by the people and for the people can only be restored and maintained by electing and keeping in office men and women who refuse to be stampeded by reactionary oppositionists, and who stand firmly with and for progressive and constructive legislation.

Earl C. Smith
President.

and made its report late in October to the General Conference. Included in this report was a recommendation for a State Income Tax and the use of all revenue derived therefrom to be used in such manner as would reduce, dollar for dollar, taxes now levied upon and collected from property.

In every particular, this proposed income tax embodied principles supported by the Illinois Agricultural Association in its previous efforts. When the proposals of the Governor's Tax Conference were presented to the Special Session of the Illinois General Assembly, which was called by the Governor early in November, the President of the Illinois Agricultural Association was selected to present that phase of the conference program having to do with permanent tax relief, and particularly to explain in detail the proposed State Income Tax. The fact that he had been Chairman of the Sub-Committee of the Governor's Tax Conference on "New Sources of Revenue and Permanent Tax Relief," and the further fact that information upon which this legislation was founded had been compiled by the Department of Taxation and Statistics of the I. A. A. throughout several years, resulted in placing upon the Illinois Agricultural Association a large part of the responsibility for actively sponsoring this proposal during its consideration by the Special Session of the General Assembly.

JUST AFTER THE PASSAGE OF THE STATE INCOME TAX IN THE HOUSE
Left to right: Rep. Homer J. Tice, who led fight for bill in House; Earl C. Smith, and Senator Simon E. Lantz, sponsor of measure which bears his name.

Lead Fight for Bill

Senator Simon E. Lantz and Representative Homer J. Tice led the fight on the floor of their respective houses. Final passage was secured, with the legislation in substantially the form it was presented to the General Assembly. Minor amendments were adopted in both Senate and House, which will to some degree reduce the revenue; but that part of the proposal which had to do with the use of the revenue remained in its original form.

The Income Tax Bill provides for exemptions of $1,000, $2,500 and $300 respectively for single persons, married couples and dependents. Rates after exemptions are:

One per cent (1%) on the first.....$1,000
Two per cent (2%) from...$1,000 to $4,000
Three per cent (3%) from.. 4,000 to 9,000
Four per cent (4%) from... 9,000 to 16,000
Five per cent (5%) from....16,000 to 25,000
Six per cent (6%) on all income above 25,000

Property Tax Offset

The computed income tax may be reduced by any property taxes paid in the proportion that reported income derived from tax-paying property bears to the total reported income. In other words, if one-half (½) of any person's net income is derived from tax-paying property, he is permitted to reduce his computed income tax one-half (½). If his entire net income is derived from tax-paying property, there will be no tax on his income.

It is also provided that any person occupying his or her own residence as a home may deduct from the computed income tax the full amount of general taxes paid on such residence property up to but not in excess of $100. Any person either not entitled to or not claiming an offset may deduct any general taxes paid on property from his gross income in computing the net income.

All moneys collected under this legislation are to be placed in the Public School Fund of the State Treasury. Its distribution is to be made in the following manner:

Replacement Feature

Any moneys appropriated by the General Assembly for the State Distributive School Fund are to be taken from this newly created Public School Fund instead of being levied upon the property of the state as has been done in former years. This will immediately remove from property approximately one-third (⅓) of the requirements of the state levy during recent years. The balance remaining in the Public School Fund is to be divided between Cook County and the balance of the state in proportion to the assessed valuation of property.

The down-state's portion is to be divided among the various school districts of the state outside of Cook County in the proportion that the average annual expenditures by each district bear to the total average annual expenditures for the educational fund of the elementary schools during the preceding four (4) years. Unless otherwise provided by special referendum of the voters of any school district, the average annual levy of the preceding four (4) years becomes the maximum amount that can be levied upon property for the educational fund of each elementary school.

One of the companion bills also provides that after receiving the levy from the local school board or board of education, the County Clerk shall reduce the amount of such proposed levy by an amount equal to the sum received by such district from the Public School Fund in the preceding twelve months.

During recent years, the state has been levying from ten to ten and one-half million dollars ($10,500,000) per year for the State Distributive School Fund. The local school boards and boards of education have been levying approximately eighty million dollars ($80,000,000) per year for educational purposes in the elementary schools. It is believed that this newly enacted legislation will provided from twenty-five (25) to thirty (30) million dollars per year in years such as 1931, and from forty to forty-five million dollars per year in years of greater prosperity.

Replaces Property Taxes

As this revenue is to be used in its entirety to replace taxes on property previously levied by the state and by local authorities for educational purposes in the elementary schools, it can be readily seen that whatever may be the amount of revenue derived from the income tax, property will be afforded relief by the same amount.

The Association's members and readers of its publication should not fail to recognize that to secure the passage of this legislation, tremendous opposition had to be overcome. Many of those who have been enjoying privileges and benefits of Government without contributing to its cost recognized immediately that this legislation would bring them into the tax-paying class. Members of the General Assembly were importuned on every hand to oppose the legislation. To those members who stood up against all opposition and who overcame all obstacles obstructing its passage belongs a large share of the credit for these newly created statutes.

Get Out and Vote

The property tax-payers of Illinois owe these legislators a debt of gratitude and we know of no better way to discharge that debt than to go to the polls on primary day, and again on election day and use the full strength of the ballot to return to office those who, by their efforts and votes, made possible this first victory for the property tax-payers of this state. By so doing, thinking property owners of Illinois will not only be repaying in part what they owe to their representatives, but will be laying an effective ground work for future constructive legislation now in the making, which will bring about still greater relief to property. The time has arrived when the thinking voters of the state must lay aside party prejudices, or at least make them secondary to the economic interests of the people at large.

HOW SENATORS, REPRESENTATIVES VOTED ON THE INCOME TAX

Smith Appears Before Committees in Washington

Members of the Legislative committee of the A. F. B. F., including President O'Neal, and Directors Smith of Illinois, Hearst of Iowa, Settle of Indiana, Blackburn of California, and White of New York appeared before the Senate and House Committees on Agriculture recently in behalf of constructive amendments to Agricultural Marketing Act.

They urged amendment to the Act, authorizing the Farm Board to use the equalization fee, if and when needed, to control crop surpluses in the interest of orderly marketing of farm commodities, and to further provide that its use become mandatory, if and when two-thirds of the Advisory Council of any commodity requested it be put into effect. Evidence was presented to show that the equalization fee was the only device yet suggested that could be universally used for this purpose.

In the interest of harmonizing differences between farm spokesmen and farm organizations, they expressed a willingness also to have included in the amendment provisions, authorization for the use of the debenture if and when same seemed to be advisable and necessary.

While in no way criticizing legislation in the making that had for its purpose the further extension of credit, yet spokesmen for the American Farm Bureau Federation insisted that further credit could only operate to delay the day of reckoning or pay-day, and that what must be accomplished was to provide necessary legislation to stimulate and assist in bringing price levels of farm commodities to a basis that would offer substantial profits with which to pay debts already created.

The committees were urged to give immediate attention to this all important question and the farm spokesmen expressed the opinion that the present depression would continue until the basic industry of all—AGRICULTURE—could be restored to a normal and profitable basis.

More Than 500 Attend Public Relations Meet

State Legislation, Utility Problems Considered at I. A. A. Conference

DUE largely to interest in the state income tax bill which was pending in the general assembly at that time, the Public Relations Conference was the largest of the five "open forums" held at the annual I. A. A. meeting, Rockford, Jan. 28. Chas Black presided.

President Earl C. Smith and John C. Watson discussed this bill and the companion measures in detail, giving numerous examples of how they would relieve the property owner of a part of his tax load. They urged support of representatives voting for the income tax measure.

Chas. S. Black

Legislation of interest to agriculture passed during the last regular session of the general assembly also was reviewed by Mr. Watson. He explained the provisions of the act permitting general taxes on real estate to be paid in two installments and compared it with the old law; described the act requiring state institutions to purchase at least 75 per cent of their fat requirements in the form of butter and lard instead of substitutes; and outlined the amendments to the motor vehicle act, one of which provides for exemption from license fees of farm tractors using public highways in traveling from one field to another, the other providing a different schedule of license fees for smaller trucks.

Transportation and public utility problems were discussed by L. J. Quasey, director of transportation. The opinion of those taking part in the conference was that increases in the freight rates on livestock would curtail the movement of livestock by railroad, that reductions in the minimum weights per car would tend to encourage rail shipments of livestock, and that provisions should be made to take care of mixed shipments, which would still be made even if the minimum were reduced.

Members of the General Assembly who were presented to the audience included Senators Simon E. Lantz, Congerville; Harry S. Wright, DeKalb; Chas. Baker, Rockford, and Representatives Wm. H. Jackson, Toulon and Dennis Collins, DeKalb.

Agricultural Legislation in the Regular Session Of 57th General Assembly

THE legislative policy of the Illinois Agricultural Association in each session of the General Assembly, except in minor emergency matters, is determined by the delegates in session at the annual meeting. The major legislative projects approved at the annual meeting held in Springfield in January, 1931, were as follows:

1. Requirement that at least seventy-five (75) per cent of the fats purchased for food of inmates and employees of all state institutions be in butter and lard instead of substitutes therefor.

The Association prepared, sponsored and secured the enactment of House Bill 451 in the regular session of the 57th General Assembly for this purpose.

2. Relief of owners from liability for damages caused by livestock when the owner can show that he has used reasonable care in the confinement and restraint of such animals.

The Association prepared, sponsored and secured the enactment of House Bill 410 in the regular session for this purpose.

3. Relief of farmers from liability to prosecution and suits for damages for killing stray dogs found molesting livestock upon their premises.

The Association prepared, sponsored and secured the enactment of Senate Bill 761 in the regular session for this purpose.

4a. Exemption of farm tractors and farm implements and machinery drawn by tractors from the requirement of motor licenses when they use the highways only in moving between fields or farms in carrying on farm operations.

b. Establishing a more equitable schedule of license fees on the gross weight of smaller trucks and their loads.

The Association did not prepare legislation on these subjects but sought modification of one or two of the several bills already introduced relating thereto. After various bills were combined into one bill and were amended in different ways, the combined House Bill 1198, introduced by the House

Committee on Motor Vehicles and Traffic Regulation, was passed late in the regular session. This Act would be improved by the passage of an amending bill, Senate Bill 135, as amended, now pending in the first special session of the General Assembly, which divides trucks of between 8,000 and 12,000 pounds of gross weight (including weight of vehicle and maximum load) into two classes. The lighter trucks of 8,000 to 10,000 pounds of gross weight under this bill would pay a license fee of $24 instead of $35, and trucks of 10,000 to 12,000 pounds of gross weight would pay $35 as at present required of the entire class.

5. Appropriations to provide Boys' and Girls' 4-H Clubs with adequate, commodious and permanent quarters at the Illinois State Fair. The requirements of 4-H boys and girls at the State Fair were taken up with the proper authorities at Springfield. There was urgent pressure for substantial appropriations by the state to erect a suitable structure for the coming Century of Progress Exposition in Chicago in 1933. On the other hand, there was need of economy. It was, therefore, definitely agreed with responsible officials that all structural steel for a State building at the Exposition would be purchased with the understanding that after the close of the Exposition, such structural steel as would be necessary would immediately be removed to the State Fair Grounds and used for the erection of adequate and permanent quarters for the Boys' and Girls' 4-H Clubs.

6. State Income Tax.

The result of the I. A. A.'s many years' efforts to enact income tax legislation is discussed elsewhere in this issue.

The Association also prepared, sponsored and secured the enactment of House Bill 467 amending the Agricultural Co-Operative Act of 1923 in several sections in such ways as experience has shown necessary, in order that the Act may fully meet the needs of really co-operative farm enterprises.

Legislation Opposed

The annual meeting of January, 1931, also directed the Illinois Agricultural Association to oppose any regulation requiring vaccination by a licensed veterinarian before swine could be exhibited at any county fair or the State Fair; to oppose legislation proposing to substitute, for purposes of administration and revenue, a single school district in each county in place of all elementary and high school districts therein, until such time as local highways are sufficiently improved to make it possible at all times for children to be conveyed to central or consolidated schools and until the revenues for supporting the public schools are at least in part collected by a system of taxation levied upon ability to pay rather than by a system of taxation levied wholly upon property; to oppose the diversion of any portion of gasoline tax funds to cities, towns and villages, but to favor amendment of the Act relating to hard roads through or within cities, towns and villages in such a way as to authorize and direct the State Highway Department to maintain and when necessary to reconstruct such hard surfaced roads on streets or roads within cities, towns and villages as have previously been designated as state highways; and to authorize and direct careful study of the operation and effect of a Drivers License Law and to withhold support therefrom until further directed.

The first two named measures were successfully defeated, the diversion of the gasoline tax funds was defeated, but extension of the use of such funds was provided in the manner favored by the Association, and a Drivers' License Law in the State of Illinois is still in the stage of discussion and study.

Unemployment Relief Bills

MANY inquiries have reached the offices of the Association relative to the effect the unemployment relief bills will have upon down-state counties and also requesting information as to the attitude assumed by members of the General Assembly representing different sections of the state.

There was introduced in the third Special Session bills covering suggestions and requests of a Chicago Committee to provide immediate funds for use in meeting what was said to be a great emergency existing in Chicago and other metropolitan centers.

The evidence presented to the General Assembly disclosed a very serious situation in Chicago, due to the tremendous volume of unemployment and the necessity for funds to provide food for the hundreds of thousands of unemployed.

Chicago Funds Exhausted

It appeared that ten million dollars ($10,000,000) had been raised by private subscription in the City of Chicago to meet the situation up to February 1, that those funds were practically exhausted, and that immediate assistance was necessary. Evidence presented also disclosed the fact that bonds of the City of Chicago or of Cook County could not be sold due to the critical revenue situation prevailing in that county as a result of deferred tax payments which were tied up in the courts.

There were five bills enacted into law in the shortest possible space of time, which in effect, provide: (1) the creation of a state emergency relief commission; (2) a tax of twenty-five million dollars ($25,000,000) upon property in the 1932 levy for relief of residents destitute because of unemployment or otherwise; and for the issue of state anticipation warrants against such tax; (3) for appropriations necessary for the purpose of the bills; (4) for submission of a bond issue of twenty million dollars ($20,000,000) by the state in the general election in November, 1932—such bonds to be used to retire the anticipation warrants issued; and (5) payment of the interest and principal of such bonds by such counties as use state funds for unemployment relief, payment to be made out of the gasoline tax funds allotted to such counties under the Motor Fuel Law.

Pledge State's Credit

There was very evident resentment on the part of down-state representatives at what was called "unwarranted delay" in bringing this matter to the attention of the General Assembly if the need was so urgent and also at some of the alarmist statements used in bringing pressure to bear on down-state members for the support of these bills.

In effect, the series of bills pledges the credit of the State of Illinois and involves the possibility of a state tax on property for emergency relief. This tax on property can be avoided if a majority of those voting for the members of the General Assembly next November vote for the proposed issue of bonds. If this bond issue is approved, part of the gasoline tax funds will be diverted from the state aid roads in every county using the state funds so provided for relief, and in that manner retire the bonds. Such counties as do not use such funds for unemployment relief will not be affected, if the proposed bond issue is approved.

Representatives of the Illinois Agricultural Association neither supported nor opposed the unemployment relief bills. In their opinion, the situation was not only so difficult but involved so many angles of public interest, particularly the humanitarian side of the question that sufficient evidence was not available to justify taking a definite stand.

Support Bond Issue

It was reported that the Illinois Bankers Association, the Illinois Chamber of Commerce, the Illinois Manufacturers Association, the Illinois Federation of Labor, the Chicago press and much of the down-state press had agreed to actively support the bond issue when submitted to the people next fall and it was recognized that with

(*Continued on page* 12)

the passage of the bond issue, all counties not calling for funds under the legislation would not be affected in any way.

The Illinois Agricultural Association believes that, regardless of whether downstate members of the General Assembly voted for or against these bills, their interest in agriculture should not be challenged.

The Association urges all down-state citizens and particularly its members to actively support the proposed bond issue in the election next November.

Amend Grain Storage and Chattel Mortgage Acts

The Association prepared, sponsored and secured the enactment of House Bill 7 in the special sessions of the 57th General Assembly which repeals section 16 of the Grain Storage Act, so that insurance policies on grain stored on the farm can be made in favor of any person or bank lending money on such grain instead of in favor of the State Department of Agriculture.

The Association also prepared, sponsored and secured the enactment of House Bill 198, amending the Chattel Mortgage Act, so that notes secured by chattel mortgages on livestock are negotiable instruments, thus permitting legal loans to be made on such security.

Marketing Farm Products, Subject I. A. A. Conference

Geo. Jewett of Chicago, Chief Speaker, Tells Why Many Oppose Farmer Co-Operation

CO-OPERATIVE marketing of grain, soybeans, livestock, fruit, vegetables, produce, milk, and other farm products was discussed at the marketing conference held at Rockford in connection with the annual meeting of the Illinois Agricultural Association.

Sam Sorrells

George C. Jewett, Chicago banker, speaking before the conference, denounced enemies of co-operative marketing, charging that selfish reasons motivated their attacks. He urged farmers to give more serious consideration to the marketing of their products.

"The big problem before you," he said, "is better distribution of that which you raise. You have largely solved the question of production, but you have not solved the question of distribution. Organization is the only way; co-operative marketing is the way it is going to be done."

Harrison Fahrnkopf said the great need in grain marketing at present is to take the program to the individual producer, cited the impossibility in many sections of getting the co-operation of grain handlers. He reported that the Illinois Grain Corporation, which a year ago had a deficit, has entirely liquidated that indebtedness and expects to begin returning profits to stockholders in the near future.

Promotion of greater consumption of soybean products by Illinois farmers is necessary to improve the soybean situation, according to Wilbur H. Coultas. Considerable work has been done along this line in connection with the University of Illinois and processors cooperating with the Soybean Association, he said.

J. B. Countiss said that more than 33,000 farmers are members of the various dairy marketing organizations of the state. Although this is already the most thoroughly organized field in the state, membership showed a gain during the past year.

All Products Represented

Co-operative marketing of livestock last year was a major project in more than 80 Farm Bureaus in the state, according to Ray E. Miller. Organization work in developing the state marketing association took a great part of the department's time.

A. B. Leeper, describing the purpose and set-up of the National Fruit and Vegetable Exchange, emphasized the need for better correlation of the movement of fruit and vegetables into the consuming centers so as to avoid alternate periods of over-supply and scarcity.

F. A. Gougler outlined a program for increasing butterfat volume, urging that counties that do not now have produce marketing associations immediately take steps to provide this type of service. Samuel Sorrells, chairman of the marketing committee, presided at the conference which was attended by 350 to 500 people.

AT THE ANNUAL MEETING, ILLINOIS FARM BUREAU BASEBALL LEAGUE, ROCKFORD, JAN. 27, 1932.

200 Attend Farm Women's Conference at Rockford

THAT Illinois farm women have seriously attacked the problem of adjusting the home to present economic conditions and that they are assisting the men in the solution of their problems, was shown at the state-wide women's conference held in connection with the annual meeting of the Illinois Agricultural Association at Rockford.

Nearly 200 women took part in the conference, which had as its central theme "Meeting Present Economic Conditions in the Rural Home and Community." Mrs. Henry J. Mies of Pontiac, president of the Illinois Home Bureau Federation, presided.

Mrs. A. R. Wright of Marshall county covered the subject from the angle of food production, stressing especially the value of the long row garden; Mrs. Maude Watson, home adviser of Stephenson county, discussed wise food selection for the best nutritive values.

A subject especially appropriate at the present time, "Feeding the Needy," was discussed by Mrs. Edna Herbert of Livingston county. She showed that in many counties farm women were cooperating with relief agencies to administer aid. Mrs. William Riegel of Champaign county stressed the importance of play in times when people are engaged in serious work and serious thought. She outlined the possibilities of recreation through community meetings of the Farm and Home Bureaus.

Within the past few years Illinois farm women have become aware of the new responsibility of voting and accepted it as a part of their duty. Feeling that women should be interested in the tax situation, Mrs. Burl Hornbeek of Scott county discussed the income tax bill, at that time before the general assembly.

Help Restore Confidence, Iroquois Editor's Plea

Watseka Citizens Hold Mass Meeting and Solve Bank Problem

A PLEA to organized farmers to help restore confidence in downstate Illinois communities featured the address of C. W. Hinton, co-editor of the Iroquois County Times, Watseka, who spoke at the Organization-Publicity Conference at Rockford, January 28. C. E. Bamborough presided at the meeting which drew more than 300 people.

C. E. Bamborough

Hinton gave a striking illustration of the value and power of organized effort in meeting a local crisis.

"At 9:30 A. M. one morning," he said, "the last of our banks in Watseka closed. It meant that our city was to be seriously inconvenienced. The citizens got busy. By 11 o'clock a mass meeting had been called. The bank officials and directors laid all their cards on the table face up. The people of the community were shown the financial condition of the bank; that it was solvent, but that unusual heavy withdrawals had made it impossible to take care of all depositors.

Special Edition of Paper

"A plan was worked out, the citizens agreed to deposit all their money beyond immediate needs. Early in the afternoon a special edition of the local newspaper gave the details of the plan and announced that the bank was open again for business. As a result confidence in that bank and the community was restored and we are doing business again on a normal basis.

"The same plan we used in Watseka has been followed in several other towns in Iroquois county. Confidence was established through organized effort and information.

"I would like to leave this slogan with you," said Mr. Hinton in closing: "'32 is up to you.' I believe in that slogan. I believe that the new year will be just what we make it."

The title of Mr. Hinton's interesting address was, "As a Newspaper Editor Sees the Farm Bureau." He gave valuable pointers on news writing of Farm Bureau stories, told what constructive work the Farm Bureau was doing in Iroquois county.

Martindale Speaks

H. D. Martindale, director of organization for the A. F. B. F., who followed Mr. Hinton, said: "The I. A. A. is leading the way in organized agriculture. It is setting an example for all others to follow. You have a well financed organization. That is the secret of your strength."

Reviewing his experiences in Indiana and in other states, he said: "In one Indiana county they had between 1,000 and 1,100 members on a $10 membership fee. Then someone got the bright idea that they could get twice as many members if they would lower the fee to $5. What was the result? Not only did they fail to gain in membership, but the membership fell to around 500. Farmers of that county felt that an organization that was not worth at least $10 a year wasn't worth belonging to. I hope you are not considering any cut, for if you are I predict that lower dues will mean a certain decline in membership.

"In one state the Farm Bureau decided to get along without any dues, and in that state we had our biggest loss in membership."

Director of Organization George E. Metzger used an interesting chart in describing the many services now available through the Farm Bureau and I. A. A. He stated that when the question was presented in county meetings as to which services should be discontinued, if any, there were always those who insisted on retaining the services they appreciated most. As a result the members invariably voted against any reduction in the service program.

Thiem on Publicity

It is impossible to maintain organization without publicity, George Thiem, director of information, said in opening the conference program. "The I. A. A. would crumble and decay without it. You can't arouse or sustain people's interest in anything without consistently telling them about it. The founders of the Illinois Agricultural Association recognized the need for an informed membership when they provided in the membership contract that a definite amount be set aside annually for publishing an official organ.

"The fact that you are all here today is a testimonial of the effectiveness of publicity in organization," continued the speaker. "Without modern communication methods organization would not be developed to its present stage.

"The depression which is working a hardship on everyone was largely brought on by the wrong kind of publicity. Pictures of bread lines in the papers and stories of closed banks have undermined the confidence of the people in themselves and their institutions. Most of the banks are sound. But people have become frightened. National hoarding of currency is the result. When people fear for their jobs and their livelihood they stop buying.

"I believe the right kind of a publicity campaign would go far toward overcoming this situation."

REINFORCEMENTS

As a move to restore economic stability, President Hoover recently issued an appeal to the country to cease hoarding currency. Hoarded funds were estimated by the President at $1,300,000,000, every dollar of which, he said, meant the destruction of from $5 to $10 of credit. Heads of leading civic organizations were summoned to Washington to further the campaign.

the passage of the bond issue, all counties not calling for funds under the legislation would not be affected in any way.

The Illinois Agricultural Association believes that, regardless of whether downstate members of the General Assembly voted for or against these bills, their interest in agriculture should not be challenged.

The Association urges all down-state citizens and particularly its members to actively support the proposed bond issue in the election next November.

Amend Grain Storage and Chattel Mortgage Acts

The Association prepared, sponsored and secured the enactment of House Bill 7 in the special sessions of the 57th General Assembly which repeals section 16 of the Grain Storage Act, so that insurance policies on grain stored on the farm can be made in favor of any person or bank lending money on such grain instead of in favor of the State Department of Agriculture.

The Association also prepared, sponsored and secured the enactment of House Bill 198, amending the Chattel Mortgage Act, so that notes secured by chattel mortgages on livestock are negotiable instruments, thus permitting legal loans to be made on such security.

Marketing Farm Products, Subject I. A. A. Conference

Geo. Jewett of Chicago, Chief Speaker, Tells Why Many Oppose Farmer Co-Operation

CO-OPERATIVE marketing of grain, soybeans, livestock, fruit, vegetables, produce, milk, and other farm products was discussed at the marketing conference held at Rockford in connection with the annual meeting of the Illinois Agricultural Association.

Sam Sorrells

George C. Jewett, Chicago banker, speaking before the conference, denounced enemies of co-operative marketing, charging that selfish reasons motivated their attacks. He urged farmers to give more serious consideration to the marketing of their products.

"The big problem before you," he said, "is better distribution of that which you raise. You have largely solved the question of production, but you have not solved the question of distribution. Organization is the only way; co-operative marketing is the way it is going to be done."

Harrison Fahrnkopf said the great need in grain marketing at present is to take the program to the individual producer, cited the impossibility in many sections of getting the co-operation of grain handlers. He reported that the Illinois Grain Corporation, which a year ago had a deficit, has entirely liquidated that indebtedness and expects to begin returning profits to stockholders in the near future.

Promotion of greater consumption of soybean products by Illinois farmers is necessary to improve the soybean situation, according to Wilbur H. Coultas. Considerable work has been done along this line in connection with the University of Illinois and processors co-operating with the Soybean Association, he said.

J. B. Countiss said that more than 33,000 farmers are members of the various dairy marketing organizations of the state. Although this is already the most thoroughly organized field in the state, membership showed a gain during the past year.

All Products Represented

Co-operative marketing of livestock last year was a major project in more than 80 Farm Bureaus in the state, according to Ray E. Miller. Organization work in developing the state marketing association took a great part of the department's time.

A. B. Leeper, describing the purpose and set-up of the National Fruit and Vegetable Exchange, emphasized the need for better correlation of the movement of fruit and vegetables into the consuming centers so as to avoid alternate periods of over-supply and scarcity.

F. A. Gougler outlined a program for increasing butterfat volume, urging that counties that do not now have produce marketing associations immediately take steps to provide this type of service. Samuel Sorrells, chairman of the marketing committee, presided at the conference which was attended by 350 to 500 people.

AT THE ANNUAL MEETING, ILLINOIS FARM BUREAU BASEBALL LEAGUE, ROCKFORD, JAN. 27, 1932.

200 Attend Farm Women's Conference at Rockford

THAT Illinois farm women have seriously attacked the problem of adjusting the home to present economic conditions and that they are assisting the men in the solution of their problems, was shown at the state-wide women's conference held in connection with the annual meeting of the Illinois Agricultural Association at Rockford.

Nearly 200 women took part in the conference, which had as its central theme "Meeting Present Economic Conditions in the Rural Home and Community." Mrs. Henry J. Mies of Pontiac, president of the Illinois Home Bureau Federation, presided.

Mrs. A. R. Wright of Marshall county covered the subject from the angle of food production, stressing especially the value of the long row garden; Mrs. Maude Watson, home adviser of Stephenson county, discussed wise food selection for the best nutritive values.

A subject especially appropriate at the present time, "Feeding the Needy," was discussed by Mrs. Edna Herbert of Livingston county. She showed that in many counties farm women were co-operating with relief agencies to administer aid. Mrs. William Riegel of Champaign county stressed the importance of play in times when people are engaged in serious work and serious thought. She outlined the possibilities of recreation through community meetings of the Farm and Home Bureaus.

Within the past few years Illinois farm women have become aware of the new responsibility of voting and accepted it as a part of their duty. Feeling that women should be interested in the tax situation, Mrs. Burl Hornbeek of Scott county discussed the income tax bill, at that time before the general assembly.

Help Restore Confidence, Iroquois Editor's Plea

Watseka Citizens Hold Mass Meeting and Solve Bank Problem

A PLEA to organized farmers to help restore confidence in downstate Illinois communities featured the address of C. W. Hinton, co-editor of the Iroquois County Times, Watseka, who spoke at the Organization-Publicity Conference at Rockford, January 28. C. E. Bamborough presided at the meeting which drew more than 300 people.

C. E. Bamborough

Hinton gave a striking illustration of the value and power of organized effort in meeting a local crisis.

"At 9:30 A. M. one morning," he said, "the last of our banks in Watseka closed. It meant that our city was to be seriously inconvenienced. The citizens got busy. By 11 o'clock a mass meeting had been called. The bank officials and directors laid all their cards on the table face up. The people of the community were shown the financial condition of the bank; that it was solvent, but that unusual heavy withdrawals had made it impossible to take care of all depositors.

Special Edition of Paper

"A plan was worked out, the citizens agreed to deposit all their money beyond immediate needs. Early in the afternoon a special edition of the local newspaper gave the details of the plan and announced that the bank was open again for business. As a result confidence in that bank and the community was restored and we are doing business again on a normal basis.

"The same plan we used in Watseka has been followed in several other towns in Iroquois county. Confidence was established through organized effort and information.

"I would like to leave this slogan with you," said Mr. Hinton in closing: "'32 is up to you.' I believe in that slogan. I believe that the new year will be just what we make it."

The title of Mr. Hinton's interesting address was, "As a Newspaper Editor Sees the Farm Bureau." He gave valuable pointers on news writing of Farm Bureau stories, told what constructive work the Farm Bureau was doing in Iroquois county.

Martindale Speaks

H. D. Martindale, director of organization for the A. F. B. F., who followed Mr. Hinton, said: "The I. A. A. is leading the way in organized agriculture. It is setting an example for all others to follow. You have a well financed organization. That is the secret of your strength."

Reviewing his experiences in Indiana and in other states, he said: "In one Indiana county they had between 1,000 and 1,100 members on a $10 membership fee. Then someone got the bright idea that they could get twice as many members if they would lower the fee to $5. What was the result? Not only did they fail to gain in membership, but the membership fell to around 500. Farmers of that county felt that an organization that was not worth at least $10 a year wasn't worth belonging to. I hope you are not considering any cut, for if you are I predict that lower dues will mean a certain decline in membership.

"In one state the Farm Bureau decided to get along without any dues, and in that state we had our biggest loss in membership."

Director of Organization George E. Metzger used an interesting chart in describing the many services now available through the Farm Bureau and I. A. A. He stated that when the question was presented in county meetings as to which services should be discontinued, if any, there were always those who insisted on retaining the services they appreciated most. As a result the members invariably voted against any reduction in the service program.

Thiem on Publicity

It is impossible to maintain organization without publicity, George Thiem, director of information, said in opening the conference program. "The I. A. A. would crumble and decay without it. You can't arouse or sustain people's interest in anything without consistently telling them about it. The founders of the Illinois Agricultural Association recognized the need for an informed membership when they provided in the membership contract that a definite amount be set aside annually for publishing an official organ.

"The fact that you are all here today is a testimonial of the effectiveness of publicity in organization," continued the speaker. "Without modern communication methods organization would not be developed to its present stage.

"The depression which is working a hardship on everyone was largely brought on by the wrong kind of publicity. Pictures of bread lines in the papers and stories of closed banks have undermined the confidence of the people in themselves and their institutions. Most of the banks are sound. But people have become frightened. National hoarding of currency is the result. When people fear for their jobs and their livelihood they stop buying.

"I believe the right kind of a publicity campaign would go far toward overcoming this situation."

REINFORCEMENTS

As a move to restore economic stability, President Hoover recently issued an appeal to the country to cease hoarding currency. Hoarded funds were estimated by the President at $1,300,000,000, every dollar of which, he said, meant the destruction of from $5 to $10 of credit. Heads of leading civic organizations were summoned to Washington to further the campaign.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

It's Up to You

REPRESENTING the legislative interests of Illinois farmers in the General Assembly, and Congress of the United States is one of the important activities of the Illinois Agricultural Association.

This issue of the RECORD is devoted largely to a disscussion and review of legislation of interest to Illinois farmers in the regular session of the 57th General Assembly and in the special sessions of late 1931 and early 1932.

Legislation invariably tends to move in the direction desired by active and powerful organizations especially if those who may be injured thereby make no resistance. In former days many burdens were placed on farmers solely because they were not organized, and therefore could not make effective resistance.

Representatives of the Association examined every important bill and resolution offered in the 57th General Assembly. Besides sponsoring a constructive program of needed legislation, the Association opposed harmful bills and asked for modification of measures in the interest of agriculture.

The accomplishments of the Association in the recent legislative sessions are in large part due to the effective work of the County Farm Bureaus and their supporting membership. The continued prestige and influence of the I. A. A. in matters of this kind in very large measure depend upon the understanding, determination and united action of the membership throughout the state. Our future influence, likewise, depends upon the united support of farmers in returning their proven friends to office.

Study the records of your representatives as revealed on page 5 in this issue of the RECORD and regardless of party affiliation return your friends to legislative halls. Only by following such a policy can farmers render the most effective service in protecting their rightful interests in government.

RESOLUTIONS ADOPTED AT 17TH ANNUAL MEETING, ROCKFORD, JAN. 29, 1932

I

Experience has justified nearly all the policies previously adopted by the Illinois Agricultural Association. Except in those cases where new conditions have arisen or where it has seemed advisable to make some changes, we hereby reaffirm all previous pronouncements of the Association.

II

The Illinois Agricultural Association approves the policy resolutions adopted by its national organization in annual session assembled at Chicago, on December 9, 1931. For the purpose of emphasizing certain of such resolutions and reaffirming them at this time:

We specifically desire to call to the attention of the delegates four of such resolutions. *The substance of such resolutions is as follows*:

1. Rural Credits

It is imperative that substantial improvement be made in existing credit machinery serving agriculture. Joint Stock Land Banks should be separated from the Federal Land Bank System; the Intermediate Credit Bank should be controlled and operated apart from the Land Bank; the directorates of both should reflect a personnel representing the stockholders of such banks; the privileges of the Intermediate Credit system should be made available to agricultural co-operative purchasing groups; and that the debentures of the Intermediate Credit Bank should be made eligible for note issue or collateral for borrowing by banks in the Reserve System.

Federal Land Banks should be furnished additional governmental capital of at least one hundred million dollars, such capital to be redeemed as operations may justify, and thereafter maintained in a separate revolving fund for the purpose of stabilizing the system when necessary by (a) the acquiring of additional capital stock, and/or (b) the pur-

chase of Federal Land Bank Bonds; Land Bank Bonds should be made eligible for bank reserve investments; the capital stock of the Federal Land Banks should be held only by members of such banks and transfer of stock should follow loans.

The credit problem involves organization as well as legislative responsibility; the associational feature of the Federal Land Bank System should be preserved in building the agricultural credit structure of the country; to that end, we recommend that all state Farm Bureaus include in their programs (1) the strengthening of existing local farm loan associations, and (2) the organization, wherever necessary, of new local farm loan associations, local agricultural credit corporations and credit unions; in order to serve co-operatively and more completely the credit needs of agriculture, we recommend to State Farm Bureaus that they give consideration to this type of credit and that credit unions be organized and properly integrated into our rural credit structure.

2. The Monetary Problem

The present period of depression and the falling price level has increased the burden of taxes, interest, debts and other fixed costs on all producers to an intolerable degree; the principal cause of this deflation of values is monetary; the problem divides itself into two parts: first, the restoration of the prive level; and second, the stabilization of the purchasing power of money.

First—all the powers of the Federal Reserve System and the executive officials of the federal government should be used to bring about the restoration of the price level near the average level at which the present long-time indebtedness was incurred.

Second—permanent prosperity in this country demands that the dollar be made an accurate measure of value—that its purchasing power be always constant.

To effect this end it was recommended that Congress stabilize the purchasing power of money:

1. By directing the Federal Reserve System to use all its powers, following restoration of price level, to stabilize the purchasing power of money insofar as possible, using for that purpose *all its monetary and credit powers, including currency and credit control, open market operation, and changes in rediscount rates and in rediscount eligibility rules.*

2. By empowering and directing the Federal Reserve Board to *raise or lower reserve requirements of the Federal Reserve Banks and to raise or lower the price of gold.*

3. *By broadening the rediscount eligibility provision of the Federal Reserve Act.*

3. The Agricultural Marketing Act

We insist that the present congress amend the Agricultural Market Act by including the equalization fee or some other equally effective method whereby the cost of controlling crop surpluses would be borne by each unit of the commodity benefited.

We pledge our continued support to the Federal Farm Board in all efforts put forth to administer the Marketing Act in such manner as will best serve the American farmer and urge that in the development and administration of co-operative marketing organizations, the general farm organizations be properly recognized.

4. Grain Futures Act

The American public is being called upon for a return of confidence and to put forth every effort for the stabilization of American business, industry and agriculture. One of the greatest hindering influences to efforts being put forth in these directions is the continued system of short selling operating on the grain and other exchanges of the country. We favor such amendment to the Grain Futures Act as is necessary to give the Secretary of Agriculture full power and authority to regulate and, if necessary, to remove any further operations in short selling (except for legitimate hedging purposes) on the Grain Exchanges of the country.

III

We appreciate the cordial relationship existing between the United States and Illinois Department of Agriculture with the Farm Bureau movement of Illinois.

We particularly commend Secretary Hyde of the United States Department and Director Pierson of the Illinois Department for sympathetic and immediate action taken on all matters coming under their jurisdiction in behalf of farm people.

We pledge our continued co-operation and support to both Departments under their present leadership.

IV

The enactment of the Reconstruction Finance Corporation Act by Congress and the appointment of Charles G. Dawes as its president, justify the confidence and support of Illinois Agriculture.

The Illinois Agricultural Association stands ready to co-operate in every way with those charged with the administration of the Act to make its maximum service available to Illinois farmers.

V

Terminal livestock marketing costs are entirely out of line with the market price of livestock and general level of commodity prices. Yardage and feed costs are subject to regulation under the Packer Stock Yard Act. The Packer Stock Yard Administration has announced that it contemplates regulating practices followed and prices charged on the various livestock markets. This convention urges that the investigation be initiated at the earliest possible time and completed as speedily as possible, so that if the investigation should reveal that the charges should be lowered the benefit of the lower costs may be quickly passed on to the livestock producers.

We authorize, therefore, and direct the Board of Directors of the Illinois Agricultural Association to use its influence with the Packer Stock Yard Administration to commence its investigation and to order a reduction in terminal market costs at as early a date as possible and to the full extent the result of the investigation may justify.

VI

There is much organized opposition on the part of old line interests to co-operative marketing of farm products and the purchasing of farm supplies.

The controversy in the St. Louis milk shed is an outstanding example. Sanitary Milk Producers Association is organized for the collective bargaining of its members' product. The Association is able to secure the co-operation of all dealers except the largest on the St. Louis market. It is within the rights of farmers legally and morally to check weights and tests, to have a voice in the price of their product and to work in co-operation with dealers and City Health Departments in improving the quality of their product.

On this program the largest dairy company has steadily refused to co-operate. Sanitary Milk Producers Association has demanded nothing unreasonable. The attitude of the dairy company cannot be construed in any light other than intention to deny organized milk producers a voice in the marketing of the products of their own labor and capital

investment, in order that its own selfish interests may profit by fixing the price both to the producer and to the consumer.

We condemn this attitude on the part of the dairy company and serve notice to any industry taking this position that such a policy cannot be looked upon by the agricultural people of the country other than a desire on its part to deny to agricultural producers their rights under the constitution of the country and to impoverish one class of citizens for the enrichment of another. Such a policy will not be tolerated by American agriculture. It has not been the policy of this Association to encourage producers to enter into business activities on a wholesale scale, but such an attitude as has been displayed by the dairy company will force farmers into many lines of business activities which they otherwise would not enter.

VII

Farm people should view with concern and become fully informed before lending support to new movements springing up under the guise of offering various forms of relief to farmers' difficulties. Some of these movements are known to be connected with and supported by men and organizations who, throughout the years, have benefited because of division among farmers.

The existing depression and resulting state of unrest seem to offer an opportunity for the stimulation of new movements which have for their purpose the retarding of the fast development of co-operative marketing. Solutions of farmers' problems will be hastened by the strengthening of present forces rather than by the development of new organizations. Before aligning oneself with or contributing to any new movement, farmers should seek full information about such organization either from their County Farm Bureau, the Illinois Agricultural Association or a well established and recognized farm paper.

VIII

Because of the cost of construction of rural electric distribution lines is an important factor in the rate charged for the energy, members are urged to consider this subject by groups and to thoroughly investigate such construction costs and secure all possible reductions before signing up for service.

IX

Since group action by land owners has proven successful in dealing with public utility easement matters, all members are urged to benefit by this experience and to carefully study and obtain full information regarding their legal rights before signing any right-of-way contracts for pipe lines, electric lines, or telephone and telegraph lines.

X

In view of the greatly diminished purchasing power of the farmers, caused by the drastic reductions in prices for farm products, and in view of the decline in the costs of labor and materials, we urge that public utility rates be immediately reduced wherever possible and the principle of basing rates upon the cost of reproduction new less depreciation be adhered to as strictly as it has been during the past decade of rising costs.

XI

At the present time there is a substantial over-production of high quality agricultural products within the state. This is especially true in the production of fluid milk and dairy products. Under these conditions, insofar as circumstances will permit, state and local governmental institutions should purchase their supplies of such products from Illinois farmers.

XII

In view of the gross injustice of the present revenue system, widespread concern over the increasing burden it is laying on property, and the difficulty property owners have in paying such taxes, all of which are greatly intensified and aggravated by the present severe economic depression, we demand that every possible effort be made immediately to lighten the taxes levied on real estate and tangible personal property. For this purpose we favor a fairer distribution of the cost of government by immediate enactment of the Income Tax Bill, now pending in the special session of the General Assembly, and the use of the revenue derived therefrom, as provided in companion bills, to replace, dollar for dollar, taxes now levied on property for educational purposes in the elementary public schools.

We further recommend:

1. Legislation providing for proper budgeting, accounting and control of public expenditures.

2. Legislation providing for reduction in public expenditures as far as this can be done consistent with proper public service.

3. Immediate attention of taxpayers to public expenditures in their local communities, where the most of the taxes they pay are spent.

4. Reduction of taxes by consolidating taxing districts wherever this can be done without impairing essential public services.

5. Elimination of taxes for non-essential purposes.

XIII

We recognize that nearly all policies of government affect the welfare of agriculture either directly or indirectly. We also recognize that the per cent of population engaged in agriculture is steadily declining. When making selections of men to occupy public positions of trust and responsibility, farmers must stand together.

The Illinois Agricultural Association during recent years has given to its membership through the columns of its official paper the attitude of those occupying positions of trust, and particularly the voting record of members of our law-making bodies on all measures directly affecting the welfare of agriculture.

We approve this action of the Board of Directors of the Illinois Agricultural Association and urge the membership to carefully study these records, and to actively support all those seeking re-election, regardless of their party affiliations, whose votes and efforts have been responsive to the needs of our rural population.

XIV

The delegates and visitors of this Seventeenth Annual Meeting of the Illinois Agricultural Association held in Rockford, January 28 and 29, 1932, hereby express their grateful and hearty appreciation for the cordial welcome and for the unfailing courtesy and co-operation shown them by the Winnebago County Farm Bureau, the Mayor, the Chamber of Commerce, and the organizations of the City of Rockford, and the citizens of the City of Rockford and Winnebago County who have contributed so effectively to the comfort, convenience and success of this annual meeting.

RESOLUTIONS COMMITTEE,

A. R. Wright, Chairman,	Chas. Marshall,
Harold C. Vial,	Chas. L. Bates,
Frank Oexner,	C. R. Ford,
W. A. Dennis,	Grover Pierce,
A. B. Schofield,	John Carlson.

Some Observations on Agriculture

An Address Before the United States War Industries Board Association

By GEO. N. PEEK, MOLINE, ILL.

THE farmer, like many others in business, is suffering from too low a price, too much interest, too much tax.

In order to get a correct picture of his condition, it is necessary to refer to figures, although I realize that it is not popular to do so, particularly before an industrial group which has so many troubles of its own at this time.

The gross income of agriculture in 1919 was $17,810,000,000 (the highest of which we have record); in 1930 it was $9,400,000,000, and in 1931 it is estimated at between six and seven billion.* In May, 1928, farm commodity prices were 48% above the average for 1909-1914, and in September, 1931, they were 28% below this five-year average, while the prices of supplies the farmer buys, not including taxes and freight, were 27% above the pre-war level. It is estimated by competent authorities that farm products have now but 57% of their pre-war purchasing power.

Farm Debt Grows

The farm mortgage debt in 1910 stood at $3,600,000,000; in 1920 at $7,900,000,000 and in 1928 at $9,500,000,000. These figures do not include other debts, and are lower than they would be had not there been so many foreclosures and so much turning over of property in cancellation of debt. Land values have returned to 1913 levels.

Farm taxes in 1919 (the year of highest farm income) were but 30% higher than the average for 1910-1914, while in 1929 they were 167% higher. It has been estimated that in the state of Illinois tangible property receives but 10% of the total income of the state and pays over 96½% of all taxes. Delinquency in taxes in some of the agricultural states runs as high as 80% in some counties. The situation in the cities is better known to industrial groups.

Farm Migration

Summing up the foregoing, I may say, in general, that the farm debt is three times as much as it was in pre-war times, and taxes much more than double, while land values are no more, if as much, and farm products represent an exchange value for industrial products of little more than one-half. These figures tell an eloquent story.

Migration from the farms for the ten years beginning in 1920 was about 2,000,000 a year. It is true that about 75% of this number found their way back to the farms, but only after milling around in the cities looking for jobs and meeting with continued disappointments. I submit that their point of view was not the same as when they left the farms.

The Chamber of Commerce of the United States, through a special committee, recently suggested as one measure of relief from the unemployment situation the sending of men from the cities back to the farms, notwithstanding the fact that during the early period of this migration it was urged that the movement away from the farms was a natural one. The cities during the early part of this period mistakenly formed the impression that this influx was permanent, with the result that many new buildings were built to accommodate this new population, particularly office buildings, hotels and apartment buildings, which now are only partially occupied and which stand as a monument to the mistaken judgment of their builders.

Hole in the Bottom

Bank failures, starting in the country in 1920, have continued, and have extended to our largest cities, until they reached such serious proportions as finally to attract the attention of our national administration, resulting in the organization of a credit corporation for their relief. I think that this action was wise, but I believe that it is not a cure for the condition. We cannot fill a barrel by pouring water in at the top when there is a large hole in the bottom; and so long as the sources of new wealth—the mines, the oil wells, the forests and the farms—are all producing at or below cost, the condition is unhealthy, to say the least.

Unemployment Situation

The unemployment situation has resulted in national action. I refer to the organization and activity of the so-called Gifford Committee, and recently Ex-President Coolidge recognized the seriousness of the problem and asked us all to "Give all America is worth to you."

The present situation strikes at the very heart of our government—respect for property rights and the sacredness of contract. We now face in a large way inability to pay, which may be followed, if the situation continues, by lack of desire to pay; then repudiation; then chaos.

Communism and other "isms" cannot be combatted successfully with oratory, but only by our providing and maintaining a better system. Sacred regard for the property rights of a large number of small property owners rather than reverence for a small number of large property owners, is insurance of the highest type for the capitalistic or individualistic system.

The Marketing Act

The foregoing figures inadequately reflect a condition that has developed during the past 12 years, reaching its worst during recent months. A general demand for a national policy that would place agriculture on sound footing resulted in the passage of the Agricultural Marketing Act of 1929. The remedy it sought to offer differed from that offered previously by the farmers through their organizations. They recognized marketing as practical, hard-headed business, involving costs and risks of loss, particularly in dealing with crop surpluses, and proposed that such costs and losses should be distributed pro rata over the producers benefited, by a tax or fee, call it what you like.

Another plan much discussed would have provided for the issuance of treasury debentures on exports, amounting to part or all of the duty on a farm product, and receivable at par in payment of the duty on imports. In effect, this plan would draw indirectly upon the treasury of the United States, since it would divert to an export subsidy a substantial portion of the import duties that otherwise would be collected.

The plan enacted into law was based on the assumption that there would be no losses, but provided that if there were, they should be borne by the government.

A Step Forward

The Agricultural Marketing Act was a step toward an agricultural policy, but in failing to provide means for financing its operations other than by federal subsidy, it was like an automobile without the engine, it might look like the real thing but the means were lacking to make it go.

Presumably one of the objects, not only of what the farmers asked for but

*Note: Standard Statistics Co. of New York estimates the value of the 1931 agricultural income at $6,500,000,000, the smallest with one exception since 1910.

of the legislation they received, was to increase agricultural income. Yet I noticed that Secretary Hyde recently said that either the equalization fee or the debenture would raise prices, and that higher prices secured in this way would increase production. I submit that if production is increased, as he surmises, it is the price itself which will be the reason for it and not the method of raising the price, such as the equalization fee or the debenture. If he means that the farmer should not have a higher price he should say so.

Mellon's Comment

Secretary Mellon was more honest in voicing his objection to the equalization fee, when he said that it would raise the price of farm products in the United States above prices prevailing in other countries, and that the American manufacturer would be at a disadvantage as compared with European competitors in seeking foreign business. Of course, that is just what the tariff does on industrial products, but it is a point of view honestly entertained by many industrialists.

Among the administration remedies proposed, some of them very recently, are: (a) cut down production; (b) plow up every third row of cotton; (c) kill every tenth cow; (d) more and better golf courses. It should be borne in mind that acreage is only one factor in production; 75 per cent of the variation in yield of crops from year to year is beyond human control, being due to weather, pests, drought, flood and similar causes. It is hard to understand why the recommendation should be made of plowing up every third row of cotton. Why not advocate letting it stand in the field and not picking it? This suggestion would at least have the merit of saving the labor of plowing. If the recommendation "kill every tenth cow" were not so serious it would strike some of us as very funny, because it was only very recently that loaning corporations were being formed for the purpose of putting more farmers into the dairy business, even when attention was called to the possible effect of breaking down this industry through the over-stimulation of production in the manner which was undertaken. The recommendation for more and better golf courses will meet with the approval of our enthusiastic golfers, of course, but it cannot be regarded seriously as a measure of farm relief.

Corporation Farming

Corporation farming is discussed in many quarters as a way out of the present trouble. I think that while this method may in a few instances, under certain conditions, prove successful, in general the whole idea is wrong. I say this because of the social as well as the economic conditions surrounding the farm. The farm is a home and farming is a business. Corporation farming suggests the payment of wages, and I believe that farming has been possible at all only on account of the unpaid labor of the women and children on the farm. I think that this factor alone will prevent any great growth of corporation farming. The social aspects are being recognized in many states where legislation already has been passed or is under consideration for restricting this enterprise.

The Real Trouble

The real trouble with the farmer is traceable to our governmental policies since the war and the indifference of the last three national administrations to agriculture. Our policy for the expansion of foreign trade in industrial products was a mistaken one. We have been trying to maintain our war-time industrial facilities at a capacity above peace-time demands. We have loaned abroad more money than represented by our entire war debt. We have put the facilities of our gigantic Department of Commerce behind the movement to expand foreign trade just as though we were a debtor nation, as we were before the war, instead of a creditor nation, as we emerged from the war. We have had half the gold supply of the world, so that foreign nations could not pay us in gold; and we prevented their paying us in goods and services by our tariffs, although at the same time we have insisted upon the payment of war debts. We have gone even further; to the extent that we have captured foreign markets we have interfered with the normal relations of other countries between themselves.

10 Per Cent Foreign

Ninety per cent of our commerce is domestic. Ten per cent is foreign. Half of the 10 per cent is industrial and half agricultural. If we restricted agricultural production to the demand of domestic markets, as we have been urged to do by our recent administrations, the interest of the Middle West and South in exports would be hardly more than a fraction of 1 per cent of their commerce; and yet, as a result of the policy which has been followed, we have seriously impaired our home market, constituting the 90 per cent of our trade. It has been demontrated, I think, that such statesmanship is not in the best interest of America.

Evidence of what higher farm prices might do may be gathered from the immediate response in securities markets and commodity markets from the recent advances in farm prices. Farmer have not been in a position to buy their normal requirements since the war, and I predict that if it were possible to restore their normal poition, and by that I mean only the pre-war exchange value of their product with the products of industry, shortly we should see such a revival of buying and paying as we have not seen in many a year.

Amend the Act

The Farm Marketing Act should be amended, not repealed. It should be possible for farmers effectively to control the marketing of their own products, and that can only be accomplished by the concerted action of all of the producers of a particular commodity. Call the mechanism for accomplishing it the equalization fee or what you please, the principle is that the cost should be spread over the commodity benefited. The principle is not new. It is that the beneficiary of an improvement should pay his proportionate share of its cost. It is recognized in every drainage or irrigation project, paving project, or other improvement of this character.

The corporation form of organization does not lend itself to farmer co-operation, because of the large number of producers of farm products scattered throughout the length and breadth of the country.

France, apparently, has found a way to improve her agricultural situation, as is evidenced by the prices of her wheat in the last three crop years, for example:

August 1-July 31, 1928-1929—	
Low, December (1928)	$1.56
High, March (1929)	1.68
August 1-July 31, 1929-1930—	
February and May (1930)	$1.31
July (1930)	1.66
August 1-July 31, 1930-1931—	
October (1930)	$1.64
June (1931)	1.91

Contrast these figures with the prices and fluctuations during this period in the United States. This example is upon No. 2 hard winter at Kansas City:

July 1-June 30, 1928-1929—	
High, July (1928)	$1.20
Low, May (1929)	1.01
July 1-June 30, 1929-1930—	
July (1929)	$1.25
June (1930)	.89
July 1-June 30, 1930-1931—	
July (1930)	$0.80
June (1931)	.66

Shift the Taxes

Taxes on general property, particularly on the home, both in town and country, should be shifted largely to other forms of taxation. I am glad to say that this is under consideration in many states. In fact, 44 of our 48 states either have enacted state income taxes or had the tax subject under consideration in the last sessions of their legislatures.

Lower interest rates on the home should be made possible.

I would have the home the cheapest thing an American citizen could own, and I would make it as secure as it is possible to make it by law. I think that would be the greatest security for our government from the invasion of radical tendencies of any kind.

Controlled Inflation

We should have a measure of controlled inflation that debts may be paid with the same size dollar with which they were incurred, as far as that is possible. This subject is certain to be one of wide discussion in the coming months.

Finally, and I do not mean to be partisan, we should put the problems of America first in the minds of all of our citizens, and we should elect only such people to public office as have an understanding of them and the courage and the will to look after those unable to look after themselves—that is what government is for.

Ray C. Doneghue Heads Farm Advisers in 1932

Ray C. Doneghue, farm adviser of McDonough county and 1932 president of the Illinois State Association of Farm Advisers, attended the first meeting of the new I. A. A. Board of Directors in Chicago Feb. 12. He will represent the farm advisers in these meetings during 1932, succeeding B. W. Tillman, farm adviser of St. Clair county, retiring president of the Farm Advisers' Association. Mr. Doneghue is one of the oldest Illinois county advisers in point of service.

R. C. Doneghue

Other officers in the Association are R. E. Apple, Clark county, vice-president; V. J. Banter, Stephenson county, secretary; L. E. McKinzie, Schuyler county, treasurer; J. G. McCall, Jackson county; Alfred Tate, Scott county, and C. E. Johnston, Iroquois county, directors.

President Hoover recently signed a joint resolution appropriating $125,000,000 to increase the capitalization of the Federal Land Banks. Of the amount appropriated, $25,000,000 is to be used to facilitate postponement of mortgage installment payments of needy farm borrowers. This appropriation was sought by the American Farm Bureau Federation and other farm organizations.

Honest Dollar, More Cash Needed for Prosperity

Gregory Suggests Ways to Start Wheels of Progress to Better Times

THE real cause of the decline in prices, which is responsible for most of the farm ills today, is traceable to the shortage of money in circulation, according to C. V. Gregory, editor of Prairie Farmer, one of the principal speakers at the recent I. A. A. annual meeting, Rockford.

Mr. Gregory pointed to the fact that money is affected by supply and demand just as anything else. When it is plentiful it is worth less. When money is scarce it will buy more commodities and the price of commodities declines.

C. V. Gregory

To restore the confidence of the public, he says, the country must get back on a basis of honest money.

"While the value of any one commodity will always change to reflect changes in supply and demand, we have the right to expect that the purchasing power of the dollar will always be the same in terms of average commodity prices," he states.

Buying Power Gone

"It now takes so much of our products to pay debts, taxes and fixed expenses that there is little left to buy commodities. We cannot open factories, put men back to work, and get back to producing and exchanging commodities on a normal basis until the purchasing power of the people is restored to somewhere near normal."

This may be done, according to Mr. Gregory, either by reducing debts by bankruptcy and default, reducing taxes by the process of cutting down government expenses, and lowering wages and other fixed expenses in line with the present price level, or by raising the commodity price level to somewhere near what it was in 1929. The first would take from five to ten years; the second might be done very quickly.

He points out three things the Federal Reserve System can do to start prices upward: make open market purchases of government securities, lower rediscount rates, and broaden the rediscount policy. If these measures do not start prices upward, he suggests that the dollar be devalued or that further steps be taken to inflate currency.

"This country was built up by courageous, ambitious people who were not afraid to work and take a chance," Mr. Gregory said. "Most of the producers of the country are debtors. It is that class of people who are hurt worst by declining prices. Every dollar of debt in 1929 has become $1.46 in terms of the commodities that must be produced to pay the debt. When all the public and private debts in the country have been paid on the basis of 1929 dollars, we will still have 80 billion more to pay. No loan shark ever dreamed of legalized robbery in such terms as that."

Smith Is Named Member Coarse Grains Committee

Earl C. Smith, president of the Illinois Agricultural Association, was re-elected a member of the national Coarse Grains Advisory Committee January 28, according to an announcement from the Federal Farm Board. The committee, composed of seven members, will serve for one year beginning February 1, this year.

Other members of the coarse grains committee are as follows: Jess W. Wade, secretary of Inter-Mountain Grain Growers, Ogden, Utah; Joseph Ihde, president of American Wheat Growers Associated, Inc., Aberdeen, South Dakota; J. M. McNally, director of Farmers Westcentral Grain Company, Omaha; L. J. Taber, Master of National Grange, Columbus, Ohio; George S. Milnor, vice-president and general manager of the Farmers National Grain Corporation, Chicago; and James Murray, vice-president of the Quaker Oats Company, Chicago.

I. A. A. Board Names Meeting Dates for '32

All regular meetings of the Board of Directors of the Illinois Agricultural Association during 1932 will be held at the office of the Association at 608 South Dearborn street, Chicago, on the Friday following the second Monday of each month, unless otherwise ordered, it was determined at the February meeting of the Board.

The Board will meet on the following dates: March 18, April 15, May 13, June 17, July 15, August 12, September 16, October 14, November 18, and December 16.

President Earl C. Smith made the following committee appointments at the February session of the Board:

Finance—A. R. Wright, Varna; M. G. Lambert, Ferris; and C. J. Gross, Atwood.

DeFrees Is Only New Member of I. A. A. Board

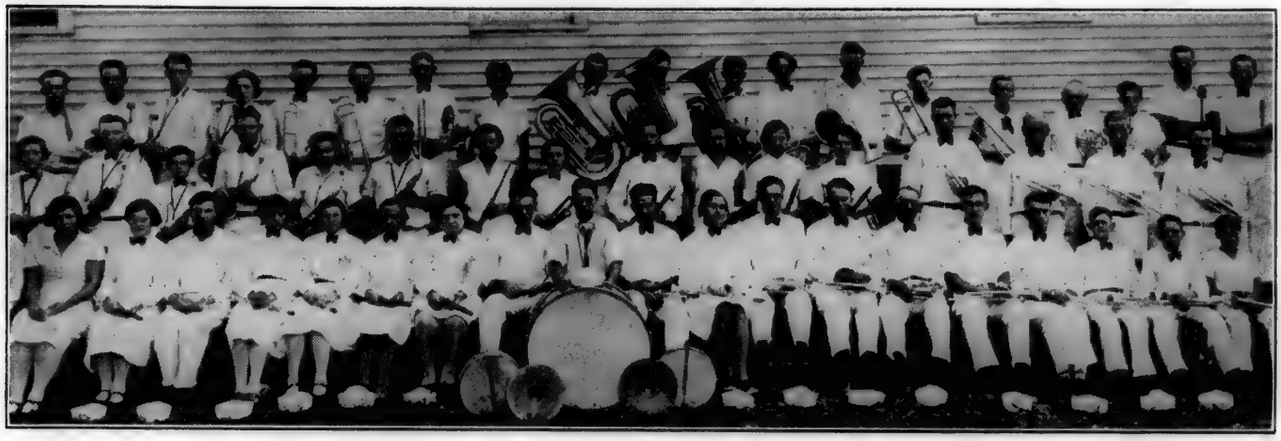
TALMAGE DeFREES of Smithboro, Bond county, serving his second term as president of the Bond County Farm Bureau, was the only new member of the I. A. A. board elected at the recent annual convention in Rockford. Re-elected were Geo. F. Tullock, M. G. Lambert, Geo. M. Muller, W. A. Dennis, Chas. S. Black, and Chas. Marshall.

Mr. DeFrees

Mr. DeFrees succeeds Frank G. Oexner of Monroe county who retired as director from the 22nd district.

Mr. DeFrees was born within two miles of his present home where he operates a 240-acre fruit and dairy farm. He has been a member of the Bond County Farm Bureau for the past 12 years, is a director in the Illinois Fruit Growers Exchange, and in the past season shipped 22 cars of fruit co-operatively through the latter organization.

As a young man Mr. DeFrees secured an appointment to the U. S. Naval Acadamy at Annapolis, but circumstances arose that made it impossible for him to go. His only brother, who went in his place and graduated at Annapolis in 1900, has had many promotions. He is now in the War College at Boston receiving special training preparatory to becoming an admiral in the navy this spring.



Mr. DeFrees attended Greenville College near his home, and later was educated at Drake University, Des Moines, and at the University of Chicago.

As one of the outstanding farmers of southern Illinois, he was awarded the Master Farmer medal by Prairie Farmer in 1930. Mr. DeFrees is an able platform speaker and has been prominent for years in the Farm Bureau and other agricultural organizations in southern Illinois.

Organization-Information—C. E. Bamborough, Polo; Talmage DeFrees, Smithboro; W. A. Dennis, Paris; and Farm Adviser J. E. Harris, Aledo.

Marketing—Samuel Sorrells, Raymond; Harold C. Vial, Downers Grove; A. B. Schofield, Paxton; W. L. Cope, Salem; and Farm Adviser R. J. Laible, Bloomington.

Financial Business Service—George F. Tullock, Rockford; Fred Dietz, DeSoto; Charles Marshall, Belknap; and Farm Adviser C. E. Johnson, Watseka.

BOONE COUNTY FARM BUREAU'S BAND WHICH PLAYED AT THE ANNUAL I. A. A. BANQUET, ROCKFORD, JAN. 28.

Insurance Companies All Report Gains During 1931

Illinois Farm Supply Co. Considers Establishing Feed Service If Demand Justifies

PROGRESS and problems in the co-operative handling of life insurance, automobile insurance, fire, windstorm and hail insurance, farm supplies, limestone and phosphate, and in co-operative auditing were reviewed in the Financial-Business Service Conference during the convention at Rockford on Jan. 28. Geo. F. Tullock presided. About 320 were present.

Geo. F. Tullock

The two most important problems in the life insurance field to come before the conference were those pertaining to county quotas, and of expanding Country Life Insurance Company to do business outside the state. It was decided to maintain the present quotas and to confine the company to Illinois. L. A. Williams, manager of Country Life, pointed out the trend in life insurance, particularly the tendency toward larger policies and the growing appreciation of life insurance as a secure investment.

Holds Rates Down

The fact that almost every automobile insurance company has increased rates recently, while the Illinois Agricultural Mutual Insurance Company has maintained its old rates, was cited by A. E. Richardson, manager of the auto insurance company, as evidence that the Farm Bureau member is a preferred risk. He attributed the reduction in accidents last year to the safety campaign put on by the County Farm Bureaus.

J. H. Kelker, manager of the Farmers Mutual Reinsurance Company, declared that this meeting was the best the casualty company had ever had both in interest and attendance. This is the first time the company has held its meeting with the other associated companies.

There is every reason to believe, according to V. Vaniman, director of insurance service for the I. A. A., that all three companies will make a satisfactory growth in 1932.

Three Plans Outlined

Three plans of financing service companies in unorganized counties were outlined by L. R. Marchant, manager of the Illinois Farm Supply Company. Under one plan the unorganized county can receive service from an established company in an adjoining county with a minimum amount of investment and no control of the business. A second plan enables an unorganized county to become affiliated with an established company in an adjoining county and have joint control. The third plan is the organization of a new company with full control within the county.

Announcement was made that Illinois Farm Supply had purchased several carloads of feeds recently in response to requests for this service, and that considerable study has been given to the possibility of establishing a feed service in the state, making available certain feeds under the trade-mark of the organization.

J. R. Bent, director of the limestone-phosphate department, reported that Illinois used only about 40 per cent as much of these commodities in 1931 as in the previous year, but that the state still used approximately as much as any other state had ever used in a year. The possibilities of direct purchasing and merchandising of limestone and phosphate by the Association were discussed and recommended for further study.

The Illinois Agricultural Auditing Association had its best year in 1931, according to F. E. Ringham, manager. Three hundred and seventy-one audit assignments were completed during the year. Ringham reported a decrease in the cost of audits as compared with former years. The cost of Farm Bureau audits decreased $4.93, while elevator audits decreased $5.81 and oil companies decreased $8.99 below the 1930 costs.

Boone County Farm Bureau Band Plays at Rockford

Farm Bureau members are frequently entertained these days at unit, county, and even state-wide meetings by talent from their own membership. A good example of the kind of entertainment they give was seen at the annual banquet of the Illinois Agricultural Association at Rockford when the 75-piece Farm Bureau band from Boone county played before 2,000 visitors and delegates.

This band is strictly a Farm Bureau project started less than two years ago to give the young people something worth while to do. The band is made up on the unit principle, having complete small bands in five different communities, which are all a part of the county band. In this way bands are available for local gatherings as well as for larger affairs.

Members of the band pay monthly dues, which are used to employ a band director and to purchase music and other supplies. Harold Luhman, director of the band, was a member of the Belvidere High School band when it won the state and national championships. He was also state champion soloist.

Uncle Ab says more good ideas have been killed by conference than by contempt.

Lieut.-Gov. Sterling Sees Need for Prison Reform

Advocates Modernization of Penal System in Address at Rockford

PROPOSED reform of the state prison laws so as to permit prisoners to share in the profits of their labor, were advocated by Lieutenant-Governor Fred E. Sterling at the recent annual luncheon of the Illinois Agricultural Association at Rockford.

He pointed out that such laws are now in force in several states in this country and almost universally in Europe. Under the proposed law the prisoner would receive half the profits and the state the other half. One-half the prisoner's share would be sent to his dependents at home, one-quarter turned over to him for his own use, and the other quarter credited to his account so that when he is released he will have something to start anew on.

Has Labor Approval

"This new law," said the lieutenant-governor, "will compel every political division in the state, cities, counties and villages to make requisition on the state for such articles as may be needed by them. No effort will be made to cut the prices of state-made articles under those made by free labor on the outside. This system has the approval of President Green of the Federation of Labor."

He believes that the $15,000 spent by the state in conducting the prison investigating tour of Europe will save the state not less than $1,000,000 a year and revolutionize the prison, probation and parole system now in force, if the general assembly will enact into laws the recommendations made by the commission.

Comparing the English prison situation with that in Illinois, he showed that Illinois with a population of 7,000,000 had almost as many inmates in its prisons as England with its 48,000,000 people. What Illinois needs to remedy this, he said, is a more liberal use of probation and less of the spirit of vengeance in its courts, especially when the offense is of a minor character.

"Our commission believes there is a great chance to improve the penal system of Illinois," he continued. "We believe all prisoners should be classified and advanced in grades as they earn it. We favor making the parole board a full-time board. The commission would make the old Joliet prison an institution for the more hardened prisoners. We would make a reduction in our prison population by a careful rehearing of all cases, releasing those who are deserving of another chance.

"Many inmates, the commission believes, have been lost in the great prison maelstrom, being without friends to intercede for their release. The commission believes there must be a more scientific study of the individual cases of men accused of crime. It is as intelligent for us to imprison a man without studying him and learning why he is a criminal as it is to treat a man for the fever shown by the thermometer without making an effort to discover the underlying cause."

NOTICE ILLINOIS AGRICULTURAL ASSOCIATION ELECTION OF DELEGATES

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the month of March, 1932, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

During March annual meetings will be held in Kankakee, McDonough, Boone and Winnebago counties.

No annual meetings will be held in April.

March 1, 1932.

Signed,
G. E. METZGER, *Secretary.*

Country Life Agents Meet at Bloomington

THE possibility of making Country Life Insurance Company a billion dollar institution within the next 20 years was envisioned by Donald Kirkpatrick, legal counsel for the I. A. A., speaking before 300 Farm Bureau insurance agents in the annual agents' round-up at Bloomington Feb. 16-17.

He quoted state insurance examiners to the effect that Country Life is in the best financial condition of any company examined in the past four years.

C. M. Cartwright, managing editor of the National Underwriter, the principal speaker at the agents' banquet, said: "You have made an outstanding record, and I have every confidence in the coming success of Country Life Insurance Company."

Other speakers during the two days included Prof. Fred Russell, University of Illinois; L. A. Williams, manager of Country Life; A. E. Richardson, manager of the Illinois Agricultural Mutual; V. Vaniman, director of insurance service for the I. A. A.; and members of Country Life's staff.

Denman Addresses Livestock Growers

Annual Meeting State Marketing Association Held at Peoria, February 17

"WE have not heard so much criticism of the Agricultural Marketing Act since the Reconstruction Finance Corporation came into the picture. The other crowd got over into our boat. And they seem willing to have the government lend a helping hand," C. B. Denman, member of the Federal Farm Board, told more than 300 delegates and members of the Illinois Livestock Marketing Association in their second annual meeting at Peoria, Feb. 17.

"There has been a lot of confusion about what the Farm Board has been doing," continued Mr. Deman. "Either ignorantly or purposely the stabilization operations in wheat and cotton have been confused with aid given the cooperatives. The latter is the more important work. It has occupied nearly all our time."

Speaking of the stabilization work, Denman said: "There was far more demand from the 'trade' that the Board support the grain market than from farmers. Yet most of the criticism of this work is coming from the commission men.

20 Cents Bu. More

"But let's take a look at the results of stabilization in wheat. Before the stabilization corporation was formed wheat in Liverpool sold at 16.5 cents above the Chicago market. Since then the Chicago price has averaged 3.5 cents higher than Liverpool. The two added together make 20 cents a bushel more for the American producer. That 20 cents if added to all the wheat sold in this country would be quite an item."

The speaker admonished the livestock growers that their only hope for securing a fair share of the consumer's dollar lies in organization. "Livestock growers unorganized," he said, "are forced to take what's left after the processor, the retailer, the organized laborer, the transportation agencies, and others take out their costs, and profits.

What a Packer Said

"A prominent packer spoke of this situation to me a short time ago," continued the speaker. "He stated frankly that the packer and the retailer must add their costs of operation and a profit to selling prices. He admitted that the farmer is entitled to do the same but because he is unorganized must take what is left.

"That's a great challenge to the livestock producer," said Denman. "The

Farm Board wants to help you, to put you in your own business—that of marketing products. Because others have taken over your duties they may look upon it as an inherent right. We insist that it is the producer's right to market and distribute his own products."

How waste in distribution of meat products is hurting the farmer's livestock income was illustrated by Mr. Denman.

A Retailer Cuts Costs

"A man named Straus who has 220 meat stores in the east told me some time ago," he said, "that following the depression many of his stores began losing money. Some of them declined to a gross income of only $300 a week. The less he sold the more he had to raise the price on meats to take care of the overhead. And the more he raised the price the less he sold. This condition kept growing worse. Straus began to study his business and finally closed all his stores for a period of two weeks.

"He decided that he was paying out too much for overhead at each store. So he established a central cutting plant employing three shifts of meat cutters working eight hours each. He surveyed each community and made an effort to supply each store with the particular kind of meats and cuts most in demand. All stores were serviced from the central cutting plant.

"As a result he was able to get along with much less labor in the outlying stores. Because of the saving he was enabled to cut the price in half on most meats. Meat sales shot up until the stores were averaging $3,000 a week gross sales. The unprofitable stores began making money and the consumer got his meat at lower prices.

Too Much Overhead

"An Indiana meat dealer wrote me a short time ago," continued Denman, "following a talk I made on the radio. 'I'll tell you what's wrong with the livestock industry,' he wrote. 'I counted 16 different packer salesmen who called on me in one day. In addition six different trucks stopped the same day to deliver meats. If I gave all my business to one packer I doubt if the profits would have paid for the calls of even two salesmen and the trucks. The distributors have been piling on costs and these costs are passed on to the farmer in lower prices for livestock.' "

Charles E. Ewing, president of the National Livestock Marketing Association, stated that every dollar the livestock co-operatives have borrowed from the Farm Board will be repaid. Competition offered old-line commission companies by co-operative agencies is only an incident, not an objective of organized producers, said Ewing. The farmer is seeking control of his own business to cut out the wastes of distribution, to gain market information, adjust production to demand, and coordinate the producing end of his business with that of marketing and selling.

"We still have a long way to go in co-operative livestock marketing," said Ewing. "Only about 10 per cent of the livestock of the country is being handled by members of our organization. The majority of our producers have not yet caught the vision."

Officers Report

Ray E. Miller, secretary-manager, reviewed the progress made during the past year in organizing and financing the association, and pointed out the reasons for the new movement.

R. W. Grieser, sales manager with headquarters at Decatur, stated that the association began selling for six district co-operatives holding membership in the state organization on October 7. He described the daily market and weather report service through which information about livestock movements and prices is obtained from the principal markets, and how this information is used to direct the movement from Illinois to the markets offering the best prices.

He stated that livestock is being moved in many cases direct to the packers as well as to order buyers and co-operative producer agencies. "We grade all our livestock and try to ship what the buyer demands," said Grieser. "The packers have been satisfied with our supplies. We are putting up the livestock as ordered. We are able to save in freight rates, and we can get more for stock by selecting our markets."

A motion was adopted to the effect that every effort be made to reduce commission charges, yardage fees, and costs at the terminal stock yards.

President Samuel Sorrells of Raymond, who presided, was re-elected as were all other officers and directors. Geo. F. Tullock of Rockford, treasurer, and Mr. Sorrells represent the I. A. A. on the Board of the Marketing Association.

Soybean Meeting

The annual meeting of Soybean Marketing Ass'n. will be held at the Orlando Hotel, Decatur, Thursday, March 10. Dr. W. L. Burlison, University of Illinois, and President W. D. McMillen of Allied Mills, will speak in addition to organization officials.

Kirkpatrick Cites Uses, Abuses of Corporations

Auditing Association Annual Meeting at Rockford Well Attended

DONALD KIRKPATRICK, counsel for the Illinois Agricultural Association, speaking at the annual meeting of the Illinois Agricultural Auditing Association at Rockford January 27, described the good and bad points of corporations in agriculture as they operate at present, also the possibility of their service to agriculture. The meeting was well attended.

A corporation usually represents a business concern, he said. A corporation is an identity which can sue and be sued. It protects the individuals who are interested in it and there is no liability resting on the individual stockholders over and above that prescribed.

D. Kirkpatrick

How Set Up

Most corporations are set up with non-assessable stock. An outstanding example of a corporation with assessable stock is a bank. Corporations can serve agriculture best when the board of directors and officers administer the business of the corporation from the standpoint of the company laying aside all personal feeling or personal business connections, he said.

Too many of our co-operatives and companies with farmer boards of directors are regularly controlled by a minority on the Board, he pointed out. This comes about in an administrative way, through a desire on the part of the president and members of the Board to have all matters passed on decided by a unanimous vote. In their operations the thing which commonly happens is that if the president feels the vote is not going to be unanimous he does not allow a decision to be made. Thus the minority gets exactly what it wants.

Officers and directors of the auditing association for 1932 are A. J. Gillfillan, Watseka, Iroquois county, president and director; Albert Heckle, Quincy, Adams county, vice-president and director; George E. Metzger, Chicago, secretary; R. A. Cowles, Bloomington, treasurer; Jesse L. Beery, Cerro Gordo, Piatt county; Henry H. Parke, Genoa, DeKalb county, and R. H. Vorhees, Jerseyville, Jersey county, directors.

A full report of Illinois Grain Corporation's Annual Meeting on Feb. 22 will appear in the April Illinois Bureau Farmer.

Farm Bureau Leaders Adopt Policies

450 to 500 County Presidents, Directors and Advisers Meet with I. A. A. Representatives at Decatur

LET the government take the $100,000,000 allotted to agriculture by the Reconstruction Finance Corporation and use it to get rid of crop surpluses now depressing farm prices. Loaning this money to buy farm seeds, feeds, fertilizers, spray materials, etc., will only result in more production to aggravate the surplus problem. And the extension of further credit will only drive farmers deeper into the mire of debt.

Such was the sentiment expressed and later adopted at a closed meeting of 450-500 Farm Bureau presidents, secretaries, directors, advisers, and I. A. A. officers, directors, and staff held March 25 in the Orlando Hotel, Decatur.

The government must stop subsidizing more farm production, cut out its reclamation work, and confine its assistance to helping farmers build a more satisfactory marketing system in which every producer shares his part of the cost. This summarizes the opinion expressed by a number of speakers from the floor and platform.

It was reported that limitations surrounding the loaning of R. F. C. money to farmers greatly weakened the value, if any, from such aid. The borrower is limited to a maximum of $400 per farm and must give a prior lien on the growing crop as security. Such loans may not be used for taxes and hired help. Loans are limited to $15 per work animal. The borrower will be virtually barred from securing credit from private sources since his entire crop would be mortgaged.

Possibilities of relief through the formation of agricultural credit corporations were viewed with more or less indifference when advantages and disadvantages of such organizations were weighed. It was pointed out first that stock in such corporations must be sold, and $1 in cash deposited for every $4 of stock subscribed for; that farmers would be forced to pay 7% interest on loans; that the credit corporation could not safely count on loaning more than six times its capital stock and if such corporation were capitalized at $25,000, only about $2,250 annually would be available to pay a manager, stenographer, office and other expenses even if no losses were sustained. The following explanation may be helpful.

Funds for making loans through credit corporations are obtained by the latter from Intermediate Credit Banks. Debentures floated by such banks have been selling to yield 4½% interest. The Intermediate Credit Bank must have 1% to pay its overhead. Thus when the local credit corporation gets the money it costs 5½%, and if the farmer borrower is charged 7%, the local credit corporation receives a spread of 1½%. Six times $25,000 (the capital subscribed) is $150,000 and 1½% of $150,000 is $2,250.

Where larger agricultural credit corporations can be organized, the stock sold, a substantial volume of good loans made, and able management secured it was believed that such institutions might be of service in communities where private credit sources are no longer available. It was agreed that the policy of the I. A. A. in offering legal aid and information, but not urging the organization of credit corporations, was sound.

Following a discussion of agricultural legislation now pending at Washington, by President Earl C. Smith, the meeting went on record unanimously calling on Congress to strengthen the Agricultural Market-

BOARD OF DIRECTORS OF I. A. A., 1919

Left to right: Back row—I. F. Gillmor, Mercer County; C. V. Gregory, DuPage county; John P. Stout, Sangamon; D. O. Thompson, secretary; Howard Leonard, Woodford, treasurer; J. W. Morgan, Henry; Henry T. Marshall, LaSalle; A. A. Hill, Macon; G. C. Johnstone, McLean. Front row—J. W. Kirkton, McLean; J. R. Fulkerson, Jersey; J. W. Robinson, Edgar; Harvey J. Sconce, Vermilion, president; J. W. Thier, LaSalle; Z. M. Holmes, Peoria, vice-president; and John Gummersheimer, Monroe.

ing Act by the adoption of the equalization fee and such other amendments as may be offered by friends of the measure to make it more effective. Also that Congress restore to the revolving fund an amount equal to the value of any commodity taken from the Farm Board for charitable and other uses.

The audience cheered the reported statement of Chairman James C. Stone that he would welcome a congressional investigation of the Farm Board providing a similar investigation was made of the grain, livestock, and produce exchanges and their members, and that a full and impartial report be made at the same time of both.

Clifford V. Gregory, editor of Prairie Farmer, pointed out some of the things that might be done to improve our national credit machinery. He gave a clean-cut analysis of the international economic situation before and following the war, and how the growth of European debts and poverty had destroyed the American farmers' foreign markets. "The people in this country cannot eat all we can raise," he said, "even in normal times. We must either find new foreign outlets for our surplus food products or else reduce our production."

Mr. Gregory expressed the belief that the depression had continued two years because the farmer financed it by supplying cheap food. Without cheap food we either would have had a revolution or else drastic measures would long ago have been adopted by the government to end it, he said.

He called on all Illinois farmers to vote for members of the legislature seeking re-election who had voted for the state income tax. "This is very important. If you as farmers are to have proper influence and retain the prestige you have gained at Springfield," he continued, "make every effort to see that these men and women are returned to office."

Gregory paid his respects to the "traitors to agriculture." "We don't blame the middlemen for fighting for their interests," said Gregory. "We would do the same thing. But I do blame those farmers and ex-farmers who, posing as friends and representatives of agriculture, are betraying their neighbors. They are traitors to the cause."

"Get out and vote on primary day and on election day," President Smith urged. "Farmers are fast becoming a minority as a group and to get a square deal we must stand together on matters affecting the welfare of agriculture.

"The I. A. A. does not endorse candidates for political office," he continued. "It does not enter into partisan politics. Its policy is to give full information on candidates for the legislature and congress and urge support of those whose records justify farmers' votes."

It was moved, seconded, and unanimously carried that this policy of the Association be continued.

In reviewing the history of the fight for legislation to make the tariff effective on farm products, it was stated that the very people from business and industrial groups of the country who strongly advocated the Agricultural Marketing Act are now attempting to crucify it.

Someone asked for information about the so-called "Federation of American Business," an anti-co-operative propaganda organization. A list of the directors giving their connections was read. The list revealed that nearly all the directors are either engaged in handling farmers' products on a commission basis or are closely affiliated as employees and associates of middlemen.

Secretary George Metzger reported that an advisory committee of five had been established to assist the Sanitary Milk Producers in their struggle at St. Louis. Illinois and Missouri farm and co-operative organizations are represented on this committee. It was reported that the Pevely Dairy Co. had dropped from first to second place as a milk distributor on that market, had lost approximately 54 wagon routes since last September. Financial assistance is being given the Milk Producers in their efforts to get their story before the consumers of St. Louis.

"I have faith in the agricultural leadership of Illinois represented here in this room," J. C. Spitler, state leader of farm advisers, said in a brief address at the close of the program. "The Farm Bureau is doing great things for agriculture but its greatest accomplishment is that it has developed and is developing thinking farmers."

In the morning session membership maintenance and collections policies were outlined by George Metzger, and Treasurer R. A. Cowles.

A Farm-Minded Editor

HOWE V. MORGAN, editor of the Sparta News-Plaindealer, is a firm believer in the value of organization for farmers. He is a member of the Randolph County Farm Bureau and a stockholder in the Randolph County Service Company and the Illinois Agricultural Holding Company.

Mr. Morgan's interest in agriculture comes naturally, since he was reared on a farm and knows what it is like to follow the plow and milk cows each night and morning.

H. V. Morgan

He has always used his editorial columns to help fight the battles of the farmers, believing, he says, that the welfare of the town and its business institutions are dependent upon the welfare of the farmer.

In a recent editorial he said: "Randolph county farmers have learned that the individual farmer stands alone. As long as he operates as an individual, he will be forced to accept what the stock buyer, the grain buyer and the milk buyer choose to give him for his surplus products. He is at their mercy. Likewise, he is at the mercy of those from whom he buys his seed, his implements and his other necessities.

"Acting as a body, the members of the Farm Bureau command the attention of the big buyers and the big dealer and procure the best terms on the market. This is true in buying as well as in selling. Thousands of dollars have been saved local farmers on their purchases of fertilizers, seed and other products through the Farm Bureau."

Mr. Morgan is a member of the Southern Illinois Editorial Association, the Illinois Press Association, and the National Editorial Association. He was president of the Illinois Press Association in 1930-31 and is now a member of the executive committee. He is also an honorary member of Sigma Delta Chi, national journalistic fraternity. His paper is one of Illinois' outstanding weeklies and won first prize for its interest and attractiveness in a recent newspaper contest.

Farm Bureau members can get fire insurance at low rates compared with rates of old line companies in the Farmers Mutual Reinsurance Company. This company was organized in 1924 by the I. A. A. and a number of local fire mutuals to give farmers this service at a saving.

Lower Minimum Weight Requirements on Livestock

Livestock producers in northern and western Illinois can now ship their livestock by rail in lots as small as one-third of a regular carload as a result of a decision of railroads in that area to lower the minimum weight requirements.

The area affected by this ruling includes more than 30 Illinois counties in which more than 50 per cent of the state's livestock is produced. The chief significance of the decision lies in the fact that it offers additional facilities to shippers who are unable to obtain full carloads.

The new minimum for all kinds of livestock is 6,000 pounds as compared with 22,000 pounds, the former minimum. These light carloads have special rates, although they do not go as low as regular cars. A 6,000 pound car is figured at 150 per cent of the regular carlot rate. Special rates range from 150 per cent down to 120 per cent, depending upon the weight of the load.

The purpose of the lower minimum weight requirement is to encourage rail shipment of livestock. These rates apply on single line traffic for a distance of 500 miles, which includes Illinois, and parts of Missouri, Iowa, Wisconsin and Minnesota.

Base and Surplus Plan for Selling Milk

Milk is usually sold to distributors or dealers by co-operative marketing associations on a classified or "use" basis. The dealers pay the association members one price for milk used as fluid purposes (commonly called base price) and a different price for milk used in manufacturing purposes, or pay according to the use of which they make of the milk.

If the dealers reduce the retail price of a quart of milk two cents, or 93c per 100 pounds, it would not be fair to reduce the farmer's price one-half or 46½c per 100 pounds on all milk sold because only a relatively small percentage of milk sold to the dealers is marketed in quart bottles. Price changes should depend upon the whole market, including that sold for retail and wholesale trade, and for manufacturing purposes.

The Cook County Farm Bureau recently held a meeting of fruit and vegetable growers, looking toward the development of some marketing plan to assist the producers of these commodities in the Chicago area.

Facts About Soybean Marketing

Annual Meeting of Growers' Association at Decatur Reveals Details of 1931 Crop Sales

HOW the organized soybean growers of Illinois handled 60 per cent of the 1931 commercial crop produced in the state largely on a profit-sharing basis with the larger processors, was revealed at the annual meeting of the Soybean Marketing Association in Decatur March 10. President John W. Armstrong presided.

J. W. Armstrong

Organized only two years ago, the Association now has a membership of more than 4,000 growers. Up to March 1 it had handled 1,513,150 bushels of soybeans.

The 1931 soybean crop was harvested in the face of a demoralized market for soybean oil and soybean oil meal, the two principal products in processing soybeans. The association early in the fall made a substantial advance to members of approximately 90 per cent of the country selling price at that time. Subsequently the association made an additional advance.

The profit-sharing agreement was worked out with the co-operating processors by which the latter financed the storage and advance on the 1931 soybean crop. Many non-members who sold their beans early last fall realized only 19 to 20 cents net. They are not now in a position to profit by the recent upturn in prices.

Raised Market Level

The Soybean Marketing Association has had a decided influence in raising the open market level on soybeans. After a conference with co-operating processors last fall, the Association opened up a brokerage department to handle these processors' bids on a commission basis. The processors agreed to go just as far as possible in advancing the market price. As a result of these bidding operations, the Association definitely forced the market up to 40 cents per bushel between Oct. 20 and Nov. 15, 1931.

Your organization was instrumental in another way to help bolster markets, Manager W. H. Coultas told the members. Early in November the Association closed a deal to export 50,000 bushels of soybeans to Germany, being the first handler of soybeans to enter the exporting field. The exported beans brought a higher price than those marketed at home because shipments from Manchuria practically dried up when China and Japan went to war. More recently an additional 150,000 bu. were sold to a foreign buyer at a very satisfactory price which will enhance the members' final returns for pooled beans.

Smith Reviews Facts

Further details of the soybean marketing association's operations in handling the 1931 crop were disclosed by Earl C. Smith, president of the management board, the last speaker on the afternoon program. He went back to the beginning of the soybean association and quoted H. G. Atwood, chairman of the board of Allied Mills, who raised the question when the subject of a contract between the association and the processors was considered: "Will farmers stick together and live up to a contract? That is the only question. Will they stick if losses are incurred, or only when everything goes smoothly and the price is high?"

"I am glad to say to you today," continued Smith, "that the soybean growers have stuck together. The organization is larger by more than a thousand members than it was a year ago. More beans were delivered this year than last. This fact is a great tribute to the co-operative spirit existing among the farmers of Illinois.

"Co-operative marketing can't sell all of the commodity at the highest price. I want to say emphatically that your association returned to its members more money for the 1930 crop than the average received by non-members during the year. And I will say now that unless the market for soybean oil and soybean meal goes much lower the average settlement to members for the 1931 crop will be larger than that average received by all non-members for their beans.

Rumors Only

"When we began negotiating for the sale of the 1931 crop last fall there were rumors of a 35 cent per bu. price being offered by one processor. We ran this down and later learned from the individual who had spread the report that he was not authorized to offer 35 cents a bushel, but that 25 cents was as much as his company could pay. With that and much other information we contracted with two processors for a 30-cent per bu. minimum price and entered an agreement that if the price went up we would profit to the extent of 50 per cent of the increased returns from the sale of soybean oil meal and soybean oil.

"The market went to 22 to 24 cents per bu. less the elevator handling charge which in the soybean territory averaged around 3.5 cents. As a result non-member growers who sold their beans at that time got from 19 to 20 cents a bu. But our processors stood by their contract in spite of the fact that the non-co-operating processors were buying beans from non-members for considerably less. Over in Indiana where the growers are not organized, beans sold for three to four cents less than in Illinois. And when the Indiana growers got wise to the true condition they sent a delegation to our office and begged us to allow them to get in on our contract. This we could not do because the outlet did not justify such action.

Why the Price Jumped

"You may wonder why the price later jumped to 38 cents per bu. We got word from an exporter at New York that Germany was interested in buying soybeans. Through an exchange of telegrams we learned that we could sell 50,000 bu. to net Illinois growers 38 cents at the country elevator. This was the first export sale on record. Your organization, because it had a large quantity available ready to sell, was enabled to take advantage of this situation. We recently completed a second sale of beans to Germany of more than 150,000 bu. to net a trifle over the country point price in Illinois today.

"People who are opposed to co-operative marketing for selfish reasons always like to tell about the high price someone sold for. But they never mention the low price that the majority of non-members got for their crop. What we get for the rest of our beans in storage will depend upon the price of meal and oil between now and the time the last of our holdings are sold. On exported beans we are getting 75 per cent of the profits above the guaranteed minimum. The processors get the rest.

"Some of our enemies are charging that the Soybean Association fixed the price of beans at 20 cents a bu. when the advance was finally determined. I know that before our advance price was announced non-members were netting 19 to 20 cents per bu. for beans

at country elevators. Some processors are responding and dealing with co-operatives, and others are not. By holding our forces intact and making a saving on procurement costs, I believe eventually the others will do business with us."

Use Soybean Oilmeal

Mr. Smith urged that Illinois farmers use soybean oil meal rather than other concentrates in supplementing grains fed to livestock. "Why don't we use our own home-grown feed," he said, "instead of paying freight for shipping in cotton seed meal, linseed meal, and other imported concentrates? Let's help ourselves and use what we have." He quoted Harold C. Vial who operates a large dairy herd in DuPage county, who has found soybean oil meal superior to any other concentrate for milk production.

At the conclusion of Mr. Smith's talk Frank J. Goodwine, soybean grower of Warren county, Indiana, who attended the meeting, arose and said: "I wish we Indiana farmers could get into your association. You got a better deal than we had. This is a better proposition than I ever thought farmers could get."

The meeting attended by 350 to 400 growers went on record by a unanimous rising vote giving their complete approval to the principles followed in the sale of the 1931 crop by the management.

Dr. Burlison Speaks

Dr. W. L. Burlison, chief of the Agronomy Department, College of Agriculture, Urbana, gave a highly interesting illustrated talk on the development of soybean production in America during the past 15 years. He discussed imports and exports of soybeans and soybean products as well as other vegetable oils, the domestic production of cotton seed, linseed, peanut, and corn oils, and the uses now being made of soybean oil in commercial products.

"Since 1922 the soybean acreage in Illinois has increased five-fold," he said. "Illinois leads all states in production, but there have been great increases also in other states. The potential production of soybeans in Illinois since 1922 based on acreage in this crop has jumped from 4,250,000 bushels to more than 11,000,000 bushels."

Imports of soybean oil, he showed, greatly decreased during the past decade. The same is true of soybean cake and the whole beans. The biggest drop came since 1929 when the new and higher tariff became effective.

"There are great possibilities in the further use of soybean oil," he said. "Soybean oil comprises only a small percentage of the total volume of vegetable oil produced in America." In 1929, Dr. Burlison showed, approximately 56 per cent of the soybean acreage in the U. S. was devoted to hay, 16 per cent grazed, and 28 per cent were harvested for beans. Of the 28 per cent, 9 per cent went for seed and 12 per cent for feed, the balance for commercial asd other uses.

Dr. Burlison's slide pictures, showing the results of using soybean oil paints at the University of Illinois, excited much interest. Tests were made of paints using 100 per cent soybean oil down to a comparatively small percentage of soybean oil mixed with linseed oil. He said that the soybean oil paint is standing up very well in nearly every case, and that many who have examined the results prefer paints containing soybean oil because of their luster.

D. W. McMillen's Address

D. W. McMillen, president of Allied Mills, discussed soybean market conditions during the past year. "If we had known six months ago that a war between China and Japan would bring about a substantial demand for soybeans abroad we would have shipped most of our supply to New Orleans for export," he said. "But without that knowledge large quantities of beans were processed here where the market for soybean products was so low as to bring about a low price for the beans.

"Processing soybeans has been no more profitable than growing them," he continued. "We are not counting on making any money on processing this year. We are attempting to build good will and to avoid losing too much money.

"When representatives came to us last fall the market was so poor that we said 30 cents a bushel looks like all we can pay. We hated to even offer so low a price. But other companies at that time offered only 25 cents a bushel. When we found the other companies were offering only 25 cents we thought we could pay the same, but your representatives held us to the 30 cents offered. We agreed to split the profits, if any, from the sale of oil and meal after being allowed the cost of processing."

Absorbs the Shock

"Think back a few months to the beginning of the harvesting of the 1931 crop and what the condition of the soybean market was at that time," President Armstrong said in his annual address. "Then picture in your mind what would have been added to the distressed condition had there been no co-operative to absorb the shock of the 1,500,000 bushels of soybeans dumped on the 20-cent per bushel market then in existence. You will be told in the various reports today what was done and what caused the soybean market to rise from 20 cents to 35 cents per bushel and more. You will also realize that none of these things could have been accomplished by growers acting individually. Some members have complained that the non-member benefits from our efforts and still bears no portion of the expense of operating our association.

"In fact a non-member if he be fortunate in selling at the highest peak of the market may realize more net for his crop than a member and very likely this non-member will boast of his astuteness and make himself very obnoxious. This condition must be recognized as one of the problems of co-operative marketing but is the same problem that has existed since civil government was set up. When you pay taxes or make contributions to any public welfare, the arrogant and loud-mouthed citizen who shuns his obligations to his comuunity enjoys all the benefits of your contributions and he is the fellow who usually has the most to say about how the country should be run.

The Opposition Propaganda

"We have also the organized opposition to all efforts toward co-operative marketing. It was to be expected that middlemen and those who profit from low prices to the producers, would resist our efforts, but it is surprising how successful they have been, in some cases, in poisoning the minds of uninformed producers against their own best interests.

"A few weeks before our bean crop began moving to market last fall there were a few cars of beans contracted at 35 cents to 45 cents per bushel. Prices of meal and oil justified such a price at that time, but a rapid decline in the value of both these commodities left the contracting party facing a loss on his transaction. Yet the prices of those few carloads have been referred to many more times than have the sales of many more carloads at 20 to 21 cents by non-members who were not fortunate enough to have contracted their crop when values were higher.

"Our plan of marketing does not contemplate selling at a price which will ruin the purchaser but does contemplate selling at a price at which the buyer will come out with a reasonable profit and yet the grower will receive on the average better prices than the average between the lucky fellow who did contract on higher values and the unfortunate grower who had to sell on a market made by the fellow who profits from low prices.

Mutual Confidence

"Relations with processors with whom we are now dealing are that of mutual respect and confidence. From an unknown group of growers venturing out on the uncertain road of co-operation in 1929 your association has rapidly gained recognition as a very important factor in the soybean industry of today.

"Indications too numerous to mention in this brief address point to rapid growth in the importance of our association. Expansion in our membership to the extent of reaching out into other states is not without probability.

"You loyal members have sacrificed both time and money to build up this organization. You have proved that producers will stand by their organization and deliver their product to be sold through their own marketing facilities.

"You have proved sound the theory of co-operation between producers and processors."

The board of directors chosen for the coming year is as follows: Burton King, Hancock county; Dan Smith, Shelby county; W. J. Sandusky, Vermilion county; J. F. Probst, Macon county; John W. Armstrong, Champaign county; A. M. Piatt, Piatt county; L. A. Reed, Morgan county; Parke Kerbaugh, McLean county; Sam Sorrells, Montgomery county; Dwight Hart, Christian county; W. J. McCormick, Douglas county; T. H. Lloyd, Macoupin county; Edgar Boynton, Sangamon county; M. D. Tomlin, Mason county, and John Albright, Moultrie county.

At the board meeting folloging the annual session of members all officers were re-elected as follows: John W. Armstrong, Champaign, president; Dwight Hart, Sharpsburg, vice-president; W. G. McCormick, Oakland, secretary; R. A. Cowles, treasurer, and W. H. Coultas, Chicago, assistant secretary.

The executive committee in addition to the officers includes Samuel Sorrells, Raymond, and W. J. Sandusky, Georgetown.

The board voted to change the annual meeting time to the fall. The next annual meeting will be held sometime between October 1 and January 1.

The Macoupin Service Company, organized in June last year, reports 1,100 customers after eight months of operation.

Seven per cent preferred stock dividends were paid at the end of the fiscal year and a 5 per cent patronage dividend was declared after funds equal to 25 per cent of the paid in capital stock were added to surplus. Patronage dividend checks were distributed to 448 Farm Bureau members at the annual meeting at Carlinville March 5. The company operates a station at Carlinville and six trucks serve farmers of Macoupin county.

More than 30,000 refund checks have been mailed out by the St. Louis Producers representing approximately $48,000. The Adams County Shipping Association received a check for $1,759, the largest received by any county shipping association selling livestock on the St. Louis market. John Pine of Scott county was the largest truck shipper selling through the Producers. He received a check for $70.21.

Farm Bureaus Succeed In Getting Tax Cuts

Tax Committees Vigilant in Reducing Burden on Farm Property

REDUCTIONS in taxes on farm lands are being reported from a great many counties following the completion of tax bills by county clerks. In almost every county the reductions can be traced directly to the efforts of Farm Bureau tax committees to adjust assessments on farm lands and property in line with present values.

Farmers in Sangamon county will this year pay $202,431 less taxes on land than they paid in 1931. In addition there has been a reduction of approximately $9,000 in the personal property tax levied in the rural townships.

Save $60 on 160 A.

"The reduction in taxes to be paid in 1932 was secured entirely through the action of the Farm Bureau and the co-operation of certain public officials," says the February issue of the Sangamo Farmer. "Provided no further reductions are secured, the saving to farm owners will average approximately $60 per 160 acre farm this year, or about $240 in the next four years."

Farmers in Marshall and Putnam counties are highly pleased with the results obtained by tax committees of the Farm Bureau, according to local reports. Following the report of these committees to the boards of supervisors in the respective counties, assessed valuation of land in both counties was reduced. In Putnam county the chief reduction was on the rougher lands; in Marshall county the valuation was reduced 25 per cent. Several of the levies were also lowered following the reduced valuation. Some actual savings reported in Marshall county are as follows: $68.89 saved on 200 acres, $67.25 on 160 acres; and $100 on 300 acres.

25% Cut in McLean

The McLean County Farm Bureau News comments upon tax reductions as follows:

"For more than ten years the Farm Bureau has been waging a fight in McLean county with the help of the Illinois Agricultural Association to secure lower valuations on farm lands. In 1931 an approximate reduction of 25 per cent in valuation was secured.

"Valuations on farm land in McLean county were $59,616,665 in 1930. On a basis of board of review final figures for 1931, land values were $45,273,336. This is a reduction in land valuations of $14,343,329.

"The state tax is 39 cents on $100 valuations. The reduction on valuations of farm land of $14,343,329 multiplied by the state tax rate of 39 cents makes a saving in state tax on McLean county lands of $55,938.98 this year. Each school district has a separate problem with respect to other taxes. We are informed, however, that the reduction in total taxes on farm lands this year averages 30 to 60 cents per acre."

Baseball League to Open on May 14

More than 50 Farm Bureau baseball representatives from some 20 counties gathered at Bloomington, March 24, for the spring meeting of the Illinois Farm Bureau Baseball League.

Lake, Kane, and possibly DuPage counties, plan to enter teams in the League this year for the first time. The executive committee was authorized to revise the plan for redistricting the counties to provide for all teams desiring to play. Official play is scheduled to begin Saturday, May 14. Playing rules adopted are similar to those followed last year.

County Service Companies Announce Cash Dividends

During its second fiscal year, the Lee County Service Company had 1,040 customers, 550 of which were Farm Bureau members, it was reported at the annual meeting of the company at Amboy March 10.

Preferred stock dividends of 7 per cent were paid prior to the annual meeting, and an 8 per cent patronage dividend has been announced for Farm Bureau members in good standing who patronized the company during the year. The company operates four bulk storage stations located at Franklin Grove, Harmon, Amboy, and Compton.

Twenty-five members of the Effingham County Produce Association received refunds of $5 or more at the annual meeting of the association March 5. Two members received more than $25, one between $20 and $25, seven between $15 and $20, five between $10 and $15, and ten between $5 and $10. The refund amounts to 4½ cents per pound of butterfat sold by Farm Bureau-Produce Association members between July 7 and December 31, 1931, and 2½ cents per pound sold by non-Farm Bureau members who are members of the Produce Association.

LaSalle Grain Co-Op. Making Good Progress

THE LaSalle County Co-Operative Grain Company during its first eight months of operation handled 94 cars of grain, according to the annual report of Manager E. L. Johnson. Every car of grain shipped was handled through the Illinois Grain Corporation and the Farmers National.

E. L. Johnson

The last sixteen cars of old corn shipped graded No. 1. During the same period about eight per cent of the corn inspected at the Chicago market graded No. 1. Other grain likewise graded higher than the bulk of the market. Johnson believes that this co-operative company is getting more money for the grain it handles because it is equipped with modern machinery for handling and cleaning grain, which is largely responsible for improving the grade.

Based on the volume of grain handled during the first eight months, the company expects to handle between 250,000 and 350,000 bushels when they have completed their twelve-month period.

Sweet Cream Butter Brings Most Money

If Illinois butterfat were sold on grade, three grades would likely be established as follows:

A. sweet,
B. No. 1 sour,
C. No. 2 sour.

Investigations show that on the average Illinois produces 13½% of sweet cream, 45½% of No. 1 sour and 41% of No. 2 sour. Taking a four year average, butter made out of sweet cream is worth 1½c more than butter made from No. 1 sour cream, while butter made from No. 2 sour cream is worth 3¼c less than butter made from No. 1 sour and 4¾c less than butter made from sweet cream.

These figures prove quite conclusively that producers of high quality cream are penalized severely when they get no more for their product than the producer of No. 2 sour cream. Stated in dollars, the average producer of sweet cream takes annually about $20 less for his butterfat than it is actually worth, while the poor producer gets from $20 to $25 more than he is entitled to. Co-operative produce marketing should correct this injustice.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*
MAX HARRELSON, *Assistant Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for missent copy please indicate key number on address as is required by law.

More Propaganda

ELVIN T. GODDARD, a Farm Bureau member, writes from Warren county enclosing a clipping reporting a speech made by one Frank J. Delany, a representative of the grain trade, at a meeting sponsored by the so-called Farmers Protective Association. Mr. Delany is reported to have advised farmers at Clinton in DeWitt county to abandon their organization, the Farm Bureau, presumably that the predatory instincts of grasping middlemen may have full sway undisturbed by effective farm organization.

Mr. Goddard warmly resents Mr. Delany's advice, rightly indicating that his intelligence and that of every organized farmer has been insulted. It would have been proper to ask the speaker who seeks to advise farmers on how to conduct their affairs, if the commission men are abandoning their exchanges, their "Federation of American Business Men," and their representatives in Springfield, Washington, and elsewhere; to ask him whether the commission men are reducing their charges for handling grain commensurate with the extreme decline in farm prices.

Farmers know that such "trade" associations and propaganda societies as are represented by Mr. Delany are flooding the mails and newspaper offices with material against co-operative marketing and all organized farm effort as never before. Such propaganda will serve to make farmers more thoughtful, determined, and respectful of their own accomplishments through organization.

Say It with Votes

PRESIDENT SMITH made the timely suggestion at the recent Decatur conference that every farmer leave his work long enough on primary day, April 12, to vote.

He pointed out that farmers represent a minority of the voters of Illinois which means that to gain proper representation and equal privilege in government they must think and act together in legislative matters affecting their interests.

The March issue of the RECORD presented the voting records on the state income tax of members of the 57th General Assembly most of whom are seeking re-election. The men and women in the legislature who supported this measure to remove part of the unfair burden of taxation on farm and home owners, stood firm against great pressure brought by opponents of this legislation to defeat it. They stood for the interests of the overburdened property taxpayers. Irrespective of party they should have the favorable votes of all farmers in the coming primary. Consult the March RECORD before you go to the polls, and vote to return your friends to office.

On Enjoying Life

FARM BUREAU baseball will have a good year in 1932 judging from the enthusiasm displayed at the recent spring meeting of the State League in Bloomington. Price levels need not interfere with the ability of people to have a good time.

It is well to remind ourselves that the things in life we enjoy most frequently cost the least. Happiness is not dependent upon wealth to those who have cultivated enthusiasm for health, outdoor life, a field of waving grain, thriving livestock, the beauties of nature, good literature, and wholesome fun.

Most of us take life too seriously. Organized recreation like Farm Bureau baseball makes life more interesting, aids us in attacking our work and problems with added vigor and hope.

While We Are Going Thru the Depression

By A. L. Goodenough, President, Whiteside County Farm Bureau

I suppose you have noticed that our clothes have not been pressed,
And you couldn't help but notice that our hats don't look the best.
And did you ever know the reason why our wives look so distressed,
It's just because we're going through the depression.

Hurrah, hurrah, let's wipe away the tears,
Hurrah, hurrah, let's stand and give three cheers,
We'll never know the difference
In half a hundred years
If any of us live through the depression.

I know that we farmers were stepping high and wide,
We thought we had all kinds of dough so buyed and buyed and buyed.
But the goose that laid the golden egg worked overtime and died,
And that's why we're going through the depression.

Hurrah, hurrah, O yes, we're all in debt,
Hurrah, hurrah, but we're hanging on, you bet.
If your banker says you're busted,
Aw, just tell him he's all wet,
It's just because we're going through the depression.

Of course there were city men who were hit just as hard,
Their autos and their golf clubs they almost had to discard.
And instead of eating butter, spread their bread with yellow lard,
While they were going through the depression.

Hurrah, Hurrah, I'm glad I'm on the farm,
Hurrah, hurrah, these times may do no harm,
They'll teach the public how to live
And our nation to disarm,
While we are going through the depression.

O yes, there are union men who can't quite see the joke,
They think we ought to pull the load, we're all so blamed well broke,
It's time we got together and slipped off that gosh-darned yoke,
While we are going through the depression.

Hurrah, hurrah, now's the time to sign,
Hurrah, hurrah, right on the dotted line,
If you don't you may as well go home,
Crawl in your hole and whine,
While we are going through the depression.

Note: Mr. Goodenough, accompanied on the piano by his daughter, Florence, sang this song to the tune "Marching Through Georgia" at the Farm Bureau presidents' dinner, Rockford, January 27, 1932.

Farm Bureaus May Use I. A. A. Emblem

I. A. A. Board Votes to Permit Use Of Trade Mark, But Only for Legitimate Purposes

Extension of the use of the Illinois Agricultural Association official emblem to County Farm Bureaus desiring to use it was approved by the board of directors of the I. A. A. in Chicago March 18. The action was recommended to the board by the organization-information advisory committee at the request of several counties.

The Farm Bureaus, however, must apply to the board for this permission giving each specific use to which the emblem is to be put and the emblem must not be used in any other way than specified in the request. It was also stipulated that cuts be ordered by the I. A. A. at the expense of the County Farm Bureau.

The board further decided that no changes be made in the emblem except possibly where a state-wide organization serving a particular interest might request some change of copy in the map of Illinois and that such a change must have the approval of the I. A. A. board.

The use of the emblem will also be granted to the subsidiary companies of the I. A. A. and of the County Farm Bureaus upon approval of each specific case by the board.

The board reserves the right to recall the use of the emblem upon 60 days' notice with or without cause.

It is the opinion of the organization-information committee that a wider use should be made of the emblem by the County Farm Bureaus and the Illinois Agricultural Association in publicity and advertising material.

It was further recommended that the officers of the association make a study of the possibilities and costs of developing a Farm Bureau membership sign embodying the official emblem.

The department of information was authorized to canvass the Farm Bureaus and subsidiary organizations to find out whether or not these organizations would be willing to proceed on the same basis in publishing a 1933 Farm Bureau calendar as they followed in the distribution of the 1932 calendar.

Chicago Producers Sell $18,500,000 of Livestock

Handle 4,145 Cars of Stock from Co-Op. Shipping Associations

DURING 1931 the Chicago Producers handled 15,072 cars of livestock, including 3,377 cars received by truck, it was reported at the annual meeting in Chicago March 8.

Receipts included 113,420 head of cattle, 44,878 head of calves, 579,132 hogs, and 402,911 sheep, having a total sales value of more than $18,500,000. The Producers handled 4,145 cars of Illinois livestock originating in co-operative shipping associations, or 32.8 per cent of the Illinois co-operative shipments arriving on the Chicago market.

H. H. Parke

A total of 6,827 cars of livestock coming from local shipping associations in Illinois, Iowa, Wisconsin, Minnesota, and other states went through the Producers Association. This amounted to 17.32 per cent of the co-operative receipts at Chicago.

Truck shipments to the Chicago Producers in 1931 were 22,086 head of cattle, 12,132 calves, 141,402 hogs, and 36,357 sheep, Mgr. Swanson said.

The Producers last year did business as far west as Washington and Oregon, as far south as Texas, and as far east as New York and Pennsylvania.

Earl C. Smith, president of the Illinois Agricultural Association, emphasized the need for co-ordinating the operations of all marketing agencies so as to avoid competition among themselves. Ray E. Miller explained that the Illinois Livestock Marketing Association is organized to co-ordinate and supplement the agencies on the market, and not to compete with them.

Other speakers were President H. H. Parke, Genoa, Ill.; Henry Wieland, Beloit, Wis.; Charles Hearst, president, Iowa Farm Bureau Federation; C. A. Ewing, president, National Livestock Marketing Association; "Farmer" Brown, Federal Farm Board; and R. F. O'Donnell, manager, Iowa Livestock Marketing Corporation.

Five hundred and ninety-five cars of grain were handled through the Illinois Grain Corporation during February. During the month the Hamel Co-Operative Grain Company of Worden, Madison county, was added as a member, making a total of 83.

McNair Writes Again

Editor, I. A. A. RECORD:

"I have had 10 years' experience on an Illinois mail route, also lived on a farm all my life. Hence I feel qualified to say what the necessary expenses of a mail carrier are. They are largely what they are made. I know that the farmer must be more conservative than the ones taking exception to my recent article published in the January RECORD.

"I know what a carrier gets and what a carrier does, his sweets and his sours, and what his necessary expenses are. He can spend more. I know from my ten years' experience.

"I began my carrying at $900 and got some increases later and I was frank enough to admit at the time that we were getting upward of $1,200 that we were getting too much under the conditions. Then came greater and greater increases which were practically gifts. The country was prosperous those days. Farmers were getting a living and paying taxes enough for himself and at least a part that his public servants should have paid. But they were working twice as many hours as the public servants. . . .

"We don't blame the carriers for taking this gift, but we do blame them for trying to make the public think they are rightfully entitled to the gift. We are not asking them how they would like to have a reduction, but we are asking the public to get behind the reform and stop the fattening of a few at the expense of a multitude of oppressed people.

"We are not asking that these public servants accept a reasonable reduction and go on for years more drawing public money. Bless your life no. There are millions more, fully as capable and worthy as these who would be glad to accept public jobs. When they are gone or retired on pension, the letter sack will get around fully as satisfactory as before. . . .

"It is a settled fact that if farm relief comes about, it must come by the farmers themselves and not by politicians or public servants. One of my opponents seems to think that the depression has just come. Mistake. It has been for several years and there is no human power that can lift it under years of time. Nor will the cost of living be raised until the depression begins to ease. . . .

"The wages of my opponent will each day buy approximately according to locality now two tons hay, 28 bu. corn, 40 bu. oats, 14 bu. apples, 12 bu. potatoes, a fair sized hog or half of a good beef, 45 bu. coal, a barrel of gasoline (enough to carry his mail for a month), a barrel of kerosene (enough to last a year), 10 gallons motor oil, enough flour to run three or four months, 15 bu. wheat, enough eggs to run three months, enough butter or oleo to run half a year, 100 lbs. lard, 500 or 600 lbs. corn meal, a good auto tire, enough tubes for the whole car including the spare, half dozen pairs overalls, four pairs work shoes, two pairs rubber boots, 150 lbs. sugar, a daily paper for more than a year, railroad ticket for 200 miles, 20 to 30 bu. peaches, his semi-annual taxes on his home in town or fire insurance for a year on it or many other common things. The annual salary will buy three automobiles. These are facts and cannot be disputed. . . .

"No person should have a public job who does not believe in the Golden Rule. The R. F. D. carrier is only a very small per cent of the 'public servants' which term my January article included. It includes all that are out of line from an election clerk or judge to U. S. Senator. Also P. M. Gen. Brown. Why pay election judges $6 per day when many would like it at $1.50? Yours for justice.

F. J. MCNAIR, Hamilton County, Ill.

Direct Selling of Livestock

The sale of hogs by farmers direct to packers or to packer representatives, results in disorganized marketing, throws one group of farmers against another group of farmers. The result is that the farmer not only sacrifices all control over the marketing of his own product, but also contributes to lower price levels because of this highly competitive and disorganized method of marketing. The Illinois Livestock Marketing Association, which is a Farm Bureau project, meets this situation by co-ordinating the movement of livestock from country points with sales operations by Producer agencies on terminal markets.

Three New Oil Companies Formed in Southern Ill.

Three new service companies have been organized since the first of the year and the 47 already in operation have done considerably more business to date this year than in the corresponding period a year ago, according to Manager L. R. Marchant.

The Fruit Belt Service Company, which started operations about March 1, will supply petroleum products and other commodities entering into the cost of production to farmers in Johnson, Union, Pope, Hardin, Massac, Pulaski, and Alexander counties; the Twin Counties Service Company, erecting bulk storage stations at Marion and Murphysboro at the present time, will do business in Jackson and Williamson counties; and the Madison Service Company is planning to locate at Edwardsville.

During February the Illinois Farm Supply Company received orders for more than 400 cars of petroleum products, representing an increase of 19.5 per cent for volatile fuels, 22.3 per cent for lubricating oils, and 83.8 per cent for grease over the same month the preceding year.

Marchant, comparing the extent of the company now to that of three years ago, states that in April, 1929, there were 16 companies associated with the state company, operating 42 bulk storage stations and approximately 100 trucks, while today there are 50 member companies, 125 storage stations, and some 360 trucks serving farm trade.

Milk Prices

(For March, based on 3.5% milk unless otherwise specified.)

Philadelphia—Inter-State Milk Producers announces Class I basic $2.34 f. o. b. city. Retail 10c.

Milwaukee—Milwaukee Co-Operative Milk Producers announces Class I basic $2.10 del'd. Retail 9c—cash and carry 8 and 9c.

Baltimore—Maryland State Dairymen's Ass'n. announces Class I basic $2.84 country pt. Retail 12c.

St. Louis—Sanitary Milk Producers announces Class I basic $1.35 country pt. (net). Retail 10c—cash and carry 9-10c. Gross price is $1.40, checkoff 5c cwt.

Quincy—Quincy Co-Operative Dairy Co. announces $2.20 per cwt. for milk del'd. Retail 10c—cash and carry 8c.

Moline, Rock Island and Davenport—Quality Milk Ass'n. announces Class I basic $1.85 country pt. Surplus 92 score butterfat price country point. Retail 10c. Cash and carry 8c.

DeKalb—Milk Consumers Ass'n. announces Class I basic $2.01 del'd. Class II 92 score market. Retail 11c. Cash and carry 10c. Ten per cent discount if accounts are paid by 27th each mo.

Chicago—Pure Milk Ass'n. announces Class I basic $2.01 country pt. Retail 12c. Cash and carry 10½c.

February Prices

St. Louis—Sanitary Milk Producers announces Class II 88c country pt. Class III surplus 73c. Retail 10c. Cash and carry 9-10c. Feb. base price was $1.78 net on 11c per qt. market.

Springfield — Producers Dairy Co. announces Class I basic $1.70 to Feb. 16, $1.55 after Feb. 15 del'd. Surplus 5c per lb. above butterfat. Retail 9 1-11c. Wholesale 8c.

Bloomington—McLean County Milk Producers Assn. announced Class I basic $1.70 f. o. b. city. Class II manufactured $1.28. Class III surplus 91c. Class IIa $1.28. Retail 9¾c.

Champaign — Champaign County Milk Producers announces Class I basic $1.88 del'd. Class II cottage cheese $1.24, Class III sweet cream sales to ice cream trade $1.05. Butter 70c. Retail 11c. Cash and carry 9½c.

Decatur—Decatur Milk Ass'n. announces Class I basic $1.61 del'd. Class II manufactured $1.26. Class III surplus 64c. Retail 10c. Cash and carry 7 and 8c.

It Paid

Powers Bros. to insure their crops against hail

A SUMMER hail storm may destroy all your growing crops. Ask Powers Bros. who live near Galesburg, Knox county, Illinois, about the hail on July 18 last year that riddled their 100 acres of growing corn. Hail insurance in the Farmers Mutual was all that saved them from nearly a total loss. The check for $999.04 made the difference between failure and a fair return for the season's work.

The adjuster estimated 75 per cent damage in the 38 acre field and 65 per cent loss in the 62 acre field. The claim totaled $1,032, which left $999.04 after the assessment. Fortunately the small grain crops had been cut.

Can You Afford to Lose?

Hail storms destroy crops every year somewhere in Illinois. If hail hits your farm in 1932, can you afford to lose?

Why take a chance when for an initial outlay of only $4 per thousand you can insure against loss? You pay the balance of the assessment October 1 after the crop is produced.

During recent years hail insurance in the Farmers Mutual has cost only $20 per thousand on corn and small grains—slightly more for soybeans. This cost represents a saving of at least 30 per cent compared with similar coverage in other companies.

All hail risks further reinsured to protect you. Also fire, windstorm and hail insurance on farm buildings and property.

Why I Believe in the Community Unit Plan

By AN IROQUOIS COUNTY UNIT DIRECTOR

THE Community Unit plan with a leader in each of the 19 local units has been in operation long enough in Iroquois county to prove its value. There is more interest shown by the membership of the Farm Bureau I think than ever before. I know that statement to be true for the past seven years as I have been a Farm Bureau member for that length of time.

When I was still at home my father was a member, paid his $15 yearly with only a vague idea as to why he did so. He never attended a meeting and I am satisfied did not know of the work his organization was doing. He got no direct benefit as he did not use his organization. What benefit he derived indirectly he knew nothing about. His job was farming and such matters as reduction in transportation costs, taxes, and other items which directly affected his income he took as a matter of course — knew he could do nothing about it.

Money Isn't All

Any organization to be effective must be backed by the interest of its members. You can't pay in $15 a year and then say, "I paid my dues, now let's see you do something to help me." That attitude taken by a membership won't get anywhere. You've got to take an active part in anything if you are going to get something out of it. Give your moral support as well as your money. You will have to know the problems of the people in your community, know what it is that they expect to achieve through co-operative effort or what information they want that can be had through the Farm Bureau.

Your Farm Adviser hasn't time to visit everyone and discuss his personal problems, whether it be how to select seed corn, how to feed dairy cows, or raise hogs according to the sanitation plan. Here is where your local leadership comes into the picture. For example, a resident of the community has been appointed leader in a project of dairy feeding. He will be required to attend a dairy feeding school along with other leaders from the various units. He will then be qualified to give the information to his neighbors. Thus all the people will have been informed, the organization helped, and the project leader will have had a gratifying experience by being able to serve his organization and community. Care must be taken, however, in choosing project leaders. The unit leader should consider carefully the qualifications necessary in a man for him to be able to serve in the project he intends to promote.

Shelby County Farm Bureau's New Home

Enthusiasm and Sincerity

The unit leader must have enthusiasm and sincerity to get the confidence of the people he is trying to serve. If as Unit Leader you find you have made a mistake in your appointment choose someone else and try again. An inactive or inefficient leader will get you nowhere. Remember, you want to develop interest among your members. You can do it through your project leaders if they are willing to make an effort.

So far I have spoken of the membership already in the organization. There is another reason for having an active community unit, namely, your neighbor who doesn't belong to the Farm Bureau. You need him and you will have to make your organization so attractive that he can't stay out.

He may not know what the Service Company, or Shipping Association is all about. He doesn't know that Farm Bureau members get their serum at cost or their auto insurance at a substantial saving, or that Country Life offers lower net cost life insurance. More than that, he doesn't realize that it was by co-operation that these things were made possible.

Interesting Non-Members

A good way to arouse the interest of the non-member who is your neighbor is through community meetings sponsored by the Farm Bureau and Home Bureau. I say this from experience for we have held our third community meeting in our unit. They have been interesting, well attended, and people are learning what the Farm Bureau and the Home Bureau have accomplished. We believe these meetings will be the means of adding to our membership desirable members who will have caught the co-operative spirit.

The development of Community Units will be the major project for 1932 in Iroquois county. It is, I believe, the most important work yet undertaken. It will require some time and effort in each community. But through this plan we can build a bigger and better Farm Bureau in 1932.

Shelby County Farm Bureau Has New Home

THE Shelby County Farm Bureau recently moved into its new home, the building formerly occupied by the Citizens National Bank at Shelbyville. Shelby is the eighteenth Farm Bureau in Illinois to buy its own building.

The Shelby-Effingham Service Company, the Shelby County Livestock Marketing Association, the Shelby County Produce Association, and the general agent of the I. A. A.-Farm Bureau insurance companies have their headquarters in the new building in addition to the Farm Bureau office, advises Walter S. Batson, farm adviser.

Members of the Shelby County Farm Bureau voted in their annual meeting in October to leave the matter to the board of directors, who were given full power to act. Upon the advice of Donald Kirkpatrick, legal counsel for the Illinois Agricultural Association, the Shelby County Holding Company was organized to finance the project.

The holding company issued 7 per cent cumulative stock and made a loan of $7,500 to the Farm Bureau, which in turn gave a first mortgage on the building and a promissory note. V. Vaniman, director of insurance service for the I. A. A., helped organize the project.

It is estimated by the board that allowing for all expenses and taking into consideration present rental income of the building, the monthly expense to the Farm Bureau would be only a little over $43.

The ladies' reception room, a feature of the new Farm Bureau home, was recently completed. Mrs. Charles Krile and Mrs. Carl Middleton supervised the decorating and furnishing of the room.

"Jim" Stone Replies to Co-Op. Salary Criticism

Steward Reveals High Salaries and Profits Old Line Grain Commission Men Make Off Farmers' Grain

LIMITATION by law of salaries paid by co-operative marketing associations would cause serious injury to the co-operative movement, declared James C. Stone, chairman of the Federal Farm Board, in a recent letter to Representative Louis Ludlow, who had asked his opinion regarding a bill the congressman had introduced.

"For co-operative marketing to succeed, the thing most needed is competent and honest management, a management equal to or better than that of the association's competitors in the private trade," he said. "The only way a co-operative can get such management is by paying salaries comparable to those offered by private business institutions engaged in the same line and handling a comparable volume of the product.

"In business, whether co-operative or private, brains and ability are sold to the highest bidder, and in most instances, I believe you will agree with me, they command pay in proportion to the service rendered. Those who object to farmers marketing their products in their own interest because it will interfere with huge private profits they have made in the past would like nothing better than for congress to place large-scale co-operatives in a position where they cannot compete for the caliber of men needed to run their business.

Not Public Servants

"I cannot agree that co-operative executives should be regarded as 'public servants,' for the function of co-operatives is to merchandise the product of their members and not to perform a public service. It is, therefore, hardly fair to compare the salaries of co-operative employees with those of government office holders or try to put the two on the same basis.

"Honor and glory are generally regarded as part of the compensation in government service. It is impossible to appeal to patriotism when an outstanding individual in his line or profession is asked to accept office at only a small part of what he can earn in private life, but generally speaking, when the directors of a co-operative, especially a large-scale organization, try to hire a man competent to handle the business of their members, it is hard cash, not sentiment, that talks."

Mr. Stone quoted from a letter addressed to him from Charles B. Steward, secretary of the Nebraska Farm Bureau Federation, president of the Farmers Westcentral Grain Company of Omaha, and a director of the Farmers National Grain Corporation, who said:

Astonished at Salaries

"I will state frankly that as I became conversant with the grain movement I was somewhat astonished at the salaries paid by competing private grain firms. As a business co-operative it was necessary that we secure the very highest type of expert grain men to direct the marketing and distribution of the grain of our co-operative members. As farmer producers I think you will agree that we are not conversant with the technical details connected with the successful marketing program. Naturally we must go to the regular grain trade where men have had a life time of experience in this business. . . . We had to compete with the privately-owned grain companies who because of the profits of their business had established a high level of salaries to their key men.

Gets $32,000 a Year

"One old-line firm at Omaha pays its president and general manager a salary of $32,000 a year, besides being a holder of a substantial amount of the company's stock, which has also been a good dividend paying proposition to him.

"Another gentleman who is managing one of our competing privately-owned grain companies on the Omaha market receives a salary of $25,000 per year. I have discussed the matter of salaries with these men and both of them have expressed to me their opinion that the salaries we pay our expert grain men are not unreasonable considering the volume of grain and type of service they render."

In closing his letter to Representative Ludlow, Mr. Stone said: "I wish to emphasize with all the force at my command that the proposed discriminatory salary restriction would be a most serious blow to the co-operative marketing program which the Farm Board is helping farmers to develop under the provisions of the Agricultural Marketing Act, a program that for the first time offers agriculture an equal opportunity to gain economic equality with other industries."

Illinois ranked first among the states shipping to the St. Louis Producers last year with a total of 6,527 cars of livestock. Missouri was second with 6,206 cars, and Iowa was third with 416 cars. In all 13 states contributed shipments to the St. Louis Producers.

Macoupin Co. Dairymen For Quality Improvement

Some dairymen believe that the best way to increase their sales is by cutting prices, but the dairymen at Carlinville in Macoupin county believe that the best way to increase their sales and maintain their market is to build up consumer demand by producing better milk.

For this purpose a group of dairy farmers handling about 90 per cent of the city's milk recently organized the Carlinville Retail Milk Producers' Association.

J. B. Countiss, director of dairy marketing for the Illinois Agricultural Association, attended the final organization meeting of the dairymen and assisted them in drawing up their program.

"Like most other markets of this size, they are not required to meet high standards because of any local ordinances," he said, "but these men are interested in their future milk market and they know that 'quality milk' is essential to maintaining and building good-will.

"Dairymen who belong to such an organization and who faithfully live up to its requirements and give service, will not have to worry so much about the price cutter. They will render the community a great service that cannot be measured by the yardstick of dollars and cents."

In order to become a member of the Carlinville Retail Milk Producers' Association, the dairyman must meet the following requirements: 1. Must have a healthy herd free from tuberculosis; 2. Must have a doctor's certificate certifying the health of all those coming in contact with the milk; 3. Must have a sanitary barn thoroughly cleaned daily; 4. Must sterilize all utensils with steam or boiling water; 5. Milk must be strained through sterilized cotton strainer pads; 6. Milk must be cooled immediately to 50 degrees F. or less; 7. Milk must have low bacteria count; 8. Milk must have minimum butterfat content of 3.5 per cent.

John D. Horton, vice-president of the Gwin Company in Chicago, has been appointed western sales supervisor for the National Fruit and Vegetable Exchange, according to A. B. Leeper, president and general manager. He will be located in the general offices at 608 South Dearborn street. For ten years Mr. Horton was district sales manager for the California Fruit Growers Exchange. More recently he has been connected with other co-operatives.

11 Cents a Day Pays for a $3,500 Ordinary Life Policy

Country Life's Thrift Policy *will* Teach Your Child *to* Save

LEARNING to save is one of the most valuable habits a child can acquire. It teaches him to handle money and paves the way for future independence.

Ability to save and meet obligations as they come due is necessary to success in any business . . . . in life itself.

Country Life's Thrift Policy for children, while low in cost, requires systematic and regular saving for premium payments. Premiums may be paid quarterly, semi-annually or annually. It is surprising how much insurance only a few cents a day will buy.

11 CENTS A DAY

Pays for a $1,000 20-Year Endowment Policy for child 1-15 years old;

or

Pays for a $3,500 Ordinary Life Policy for child same age;

or

Pays for $2,000 20-Pay Life Policy at ages 1-10 years, OR $2,500 Endowment at age 65 Policy.

5 CENTS A DAY

Pays for a $1,000 20-Pay Life Policy for child 1-10 years old;

or

Pays for $1,750 Ordinary Life Policy for child same age.

Ask the agent for a Country Life savings bank when you start your policy.

YOUR OWN COMPANY - - - INSURANCE AT COST

Pure Milk Ass'n. Pays $2.009 for 1931 Milk

Capacity Crowd Attends Annual Meeting

THE latter part of 1932 should find milk markets in a more healthy condition with sales possibilities on the upgrade, declared Don N. Geyer, secretary-manager of the Pure Milk Association, at the annual meeting of the organization in Chicago on March 15.

Volume of milk sales, due to economic conditions, dropped 25 per cent in the Chicago area last year, it was disclosed. The 19,000 dairy farmers producing for the Chicago market sold 1,464,439,532 lbs. of milk for a total of $29,413,572 through the association during 1931.

W. C. McQueen

Geyer reported that members of the Pure Milk Association had received an average of $2.009 per hundredweight for all milk sold in 1931, a decrease of 66 cents since 1929. He pointed out that other farm products are selling at one-third of their 1929 price, while dairy products as a whole are two-thirds of the 1929 price.

Must Restore Prices

President W. C. McQueen speaking of this said: "We believe that, in maintaining our present standard of prices to the farmers for their milk, we are taking the course that must be taken by all others who desire a return of prosperous conditions and that all efforts should be made to restore and maintain for the farmers a return for their products which will put them in the buying class."

Harry Hartke of Cincinnati, president of the National Co-Operative Milk Producers Federation, pointed out that dairying was better organized than any other branch of agriculture and was also the best paying. He said that if dairymen wished to continued selling at a profit they must regulate their production by culling out low producers and sending them to the block.

Equalization Fee Voted

The by-laws of the association were amended making possible a maximum assessment of 5 cents a hundred pounds on basic milk for reimbursing members whose markets are destroyed by the closing of plants after July 1. Such farmers will dispose of their milk at any price they can get and collect the difference between their receipts and the basic price from the fund.

A capacity crowd filled the old Chicago Auditorium. More than 1,600 were served at luncheon on the top floor of the Auditorium Hotel. Chicago milk distributors and other farm organization officials were luncheon guests.

Southern Illinois Producers Pooling Egg Shipments

COMMERCIAL egg producers in southern Illinois are now pooling their interests in the shipment of eggs to New York.

Some of the larger producers have been shipping to New York by express for several years, but they find that they can get a much better rate by using pick-up freight service rendered by some of the main railroads passing through southern Illinois to the eastern market.

Some 35 or 40 of the large producers in Edwards county are shipping twice a week and are loading around 85 cases of eggs each shipping day.

"With a little effort on the part of these shippers," said F. A. Gougler of the I. A. A., "it will easily be possible to interest enough producers to ship in carload lots. Shipments made during the past month have netted the producers from 3 to 6 cents a dozen more than the local market, depending upon the quality of the eggs."

Flora is another shipping point from which similar shipments will be undertaken shortly. Altogether there are nine counties interested in the project. They are Edwards, Richland, Clay, Wayne, Wabash, White, Lawrence and Crawford-Jasper. Grading demonstrations will be held in these counties from time to time as they take up the project.

A committee composed of the following members is developing the plan: Lyman Bunting, Edwards county; H. L. Eberhardt, Jasper county; L. E. Stoutenburg, Clay county; Curt Garrison, Wayne county; George Greiss, Edwards county; L. E. Boyd, White county; C. E. Harper, Lawrence county; C. Everett Wilson, Crawford county; and J. C. J. McCord, Jasper county.

Chicago stores prefer Pacific coast eggs because western eggs are of better quality and the supply is more uniform. To meet this western competition, Illinois farmers must produce eggs of better quality and market them more efficiently. This can be done best through co-operative marketing.

Illinois and Indiana Co-Operate in Wool Pool

Sales of 1931 Clip Made at Satisfactory Prices

THE Illinois Livestock Marketing Association will provide an opportunity for wool growers of the state to market their 1932 clip co-operatively through its wool department, the executive committee decided March 9.

A co-operative arrangement is being effected with the Indiana Wool Growers' Association to reduce handling charges and to cut overhead costs. Under this arrangement it is planned to ship Illinois wool to the warehouse at Ft. Wayne, Indiana, where it will be graded and stored until sold.

Present plans provide for an advance on 1932 wool marketed through the pool amounting to approximately 75 or 80 per cent of eastern market prices. Such an advance invariably equals, if it does not exceed, prices offered by local buyers.

Illinois produced approximately 4,700,000 pounds of wool last year, of which only a comparatively small percentage was sold through the co-operative, the National Wool Marketing Corporation. Final settlement for wool pooled last year was expected to be made by the end of March. When this wool was delivered growers received an advance of about 80 per cent of the Boston market price.

Due to the substantial advances made by the co-operative during the past two years, Illinois wool growers received from two to four cents more per pound than they would have received had the co-operative not been operating.

The U. S. production of wool in 1929 was 400,000,000 pounds. Approximately 27,000,000 of this was sold co-operatively through 13 of the larger co-operatives in existence at that time. Subsequently the National Wool Marketing Corporation was formed with the aid of the Farm Board. The National has 28 stockholder members and 33 wool growers' association co-operating with it.

In 1930 the National handled approximataely 116,000,000 pounds of wool which represented 38 per cent of the country's production. In 1931 it sold over 118,000,000 pounds of wool during the fiscal year. Sales of the 1931 crop have been very satisfactory, and growers who sold through this channel last year invariably will receive greater returns than farmers who sold to private dealers.

A. F. B. F. Board Acts On Legislative Matters

Outlines Policy on New Taxes, Names Committee to Draft Farm Planks for Nominating Conventions

CONSTRUCTIVE action on a wide range of subjects affecting every phase of the American Farm Bureau Federation's service program for American agriculture marked the regular spring meeting of the Federation's Board of Directors in Chicago, March 10 to 12. President Earl Smith of the Illinois Agricultural Association participated as one of the five representatives of the eleven states in the mid-west group of state organizations.

Urged by President E. A. O'Neal, the directors agreed to concentrate the major legislative effort of the organization on a three-point program covering the following matters: (1) restoration of farm purchasing power through legislation to correct inadequacies in the monetary system; (2) attainment of equality for agriculture, by bringing the farming industry into the American protective system; to be accomplished by amending the Agricultural Marketing Act to include the equalization fee for use of the Federal Farm Board in surplus crop control activities; and (3) reduction of the cost of government to a point proportionate to the income of the people.

E. A. O'Neal

Among resolutions approved by the national directors was one insisting that Congress in any consideration of the Marketing Act, "confine its efforts to strengthening the Act by adoption of the Equalization Fee, and such other amendments as may be offered by its friends to secure greater effectiveness; that the revolving fund provided in the Act be left intact and necessary funds be made available for its proper administration; further, that Congress restore to the revolving fund an amount equal to the value of any commodity taken from the Board and otherwise directed."

A second resolution restated the Federation's opposition to a general sales tax and declared that "only a national emergency and an absence of other sources upon which an equitable levy can be made, justify such a tax." To balance the budget, this resolution demands that Congress "confine its adoption of new forms of taxation to a selective luxury tax and gift tax and increases in rates of inheritance and income tax schedules."

A special committee was authorized to draft proposals for the agricultural planks in the platform of the two major political parties when they meet in Chicago in June. In this project an effort will be made to develop a joint program with the National Grange and the Farmers Union, so that the "big three" farm organizations can approach the conventions with a united front.

Another committee authorized will be known as the National Committee on Co-Ordination and Efficiency in Government. It will be commissioned to work out plans for securing greater efficiency in government, through co-ordination of the activitites of state and national units of government and through reduction of costs of government. The plan must be ready for consideration at the national convention in Chicago next December.

The date of this convention was fixed for December 5 to 7, and again, as last year a great, national exposition of agricultural progress will be conducted in conjunction with the convention.

By unanimous agreement the Board authorized another national Farm Bureau Muster Day, similar to those conducted in September for the past several years. Authorization was also given for conducting a nation-wide Farm Bureau Fourth of July picnic, as organized agriculture's contribution to the observance of the George Washington bicentennial anniversrary celebration.

Corn Credit Loans on Less Than 1% of Crop

ALTHOUGH loans made by the National Corn Credit Corporation have enabled many Illinois and Iowa farmers to meet pressing obligations without selling their corn on a forced market, the total amount of corn sealed as security for loans to date is less than 1 per cent of the 1931 production of the two states. The bulk of the crop from both states is fed to livestock.

Approximately 1,900 loans had been made up to March 23, according to Harry Laird, manager of the credit corporation. These loans went to 70 counties in Illinois and 38 in Iowa. The average loan is slightly less than $400.

"One of the most commendable features of the plan is the fact that loans are being distributed to a large number of farmers rather than to a few large producers," Laird said. "Thus, the corn credit corporation is serving the purpose for which it was created, namely, to give relief to the farmer who is hard pressed but who does not want to sell his corn crop at present prices."

The machinery for sealing cribs and handling applications is practically complete in both Illinois and Iowa. Up to December 15, Illinois counties had filed 83 requests with the state department of agriculture for the appointment of warehouse supervisory boards. Most of the sealers have been appointed and bonded.

Livestock Growers Get Freight Rate Reduction

I. A. A. Appeal to Commerce Commission Succeeds in Securing 8 Per Cent Cut

FREIGHT rates on cattle and hogs from southern and eastern Illinois counties were recently reduced approximately eight per cent through the efforts of the Illinois Agricultural Association and the Producers' marketing agencies at Peoria, Chicago, and East St. Louis. This will mean a saving of from $6 to $8 a car in many cases, depending on the distance from market.

The new rates became effective March 14 in the entire territory south of the line between Chicago and Pekin and east of the Illinois river.

Savings on cattle and hogs received by the co-operative Producers' agencies alone from this part of the state is at least $15,000 a year, and this is a comparatively small part of the total saving. Figures on the total amount of the reduction are not available due to the fact that it is not known what percentage of the receipts on Illinois markets comes from this area.

In 1928 the Interstate Commerce Commission reduced interstate rates in Central Freight Association territory about 12½ per cent, leaving intra-state rates unchanged. Interstate rates were later raised four per cent, but were still 8½ per cent below rates in southeastern Illinois.

After the I. A. A. had asked the railroads to adjust these rates without getting any action, a complaint was finally filed before the Illinois Commerce Commission requesting a reduction. As a result, the carriers immediately sought permission from the Interstate Commerce Commission to adjust rates in this area. Rates for the northern and western part of the state were not affected by the change.

According to G. W. Baxter of the I. A. A. transportation department, a farmer shipping a load of cattle from Lincoln to Chicago will save $6.60, or shipping a load of hogs from Lincoln he will save $3.68. From Mt. Pulaski to Chicago the saving on a car of cattle will be $4.40, or on a car of hogs $2.80. Champaign shippers will save $3.30 a car on cattle and $2.10 on hogs.

Shipping to East St. Louis from Eldorado a farmer will save $7.70 a car on cattle and $5.50 on hogs; from Anna to East St. Louis, $4.40 on cattle, $2.15 on hogs; from Clinton, $6.60 on cattle, $4.58 on hogs.

19th District Conference Is Held at Mattoon

Responsibilities of Farm Bureau and co-operative association boards of directors was discussed by G. W. Smith of Charleston at the recent 19th I. A. A. district conference held at Mattoon. Director C. J. Gross presided.

Mr. Smith expressed the belief that directors should attend all meetings, vote on all questions brought up, enter into the discussion, be willing to sacrifice time to solicit membership and patronage, and abide by majority rule.

C. J. Gross

Mr. Gross led in a discussion of Farm Bureau office administration and of relationships between employees and officials of the organization. It was generally agreed that Farm Bureau officers and directors should not hold political office and should avoid partisan politics to safeguard the best interests of the organization.

District Manager L. B. Hornbeek discussed organization problems, Frank D. Barton, co-operative grain marketing. Farm Adviser C. E. Gates reviewed the grain marketing program in LaSalle county. He told how new equipment was improving grain grades and reducing the expense of loading and handling grain. Air blower equipment for loading grain is now being installed in country elevators, it was reported.

A. B. Culp emphasized the need for progressive but sound thinking, for developing Farm Bureau leadership among the younger members who must carry on after present leaders retire.

Farm Adviser C. C. Burns and Mr. Fulk suggested that a nationalistic viewpoint be developed favoring tariff protection and trade restrictions. It was unanimously voted that the next district conference be held at Shelbyville.

Fahrnkopf and Vaniman Recovering from Illness

Harrison Fahrnkopf, director of grain marketing, has been ill since the annual meeting of the I. A. A. in Rockford. He has been troubled with sciatic rheumatism. Removal of his tonsils failed to correct the condition. He is still under the observation of physicians. More recently he entered the hospital in Bloomington for further examination, after which he had several teeth extracted.

Mr. Fahrnkopf hopes to be sufficiently improved by April 1 to resume work.

Vernon Vaniman, director of insurance service, is recovering at his home in Urbana from a kidney operation. An infection which developed following the operation is gradually subsiding. He hopes to be sufficiently strong to return to the office shortly after April 1.

Cold Weather Kills Peach Buds, Delays Crops

The cold snap the second week in March damaged peach buds in the southern Illinois peach belt from 25 to 100 per cent, according to Harry W. Day, of the Illinois Fruit Growers' Exchange.

The damage in Pulaski, Massac and Pope counties in the extreme southern part of the state is estimated at from 75 to 100 per cent.

While peach buds were not opened, they were swelled nearly to the bursting point, Day said. Most of the buds were turned black by the freeze. Extensive damage likewise is reported in the Arkansas and Missouri peach belts.

Asparagus and strawberries in southern Illinois will be delayed from two to three weeks. Some damage has been done to pear orchards.

Keltner and Winnebago Officials Did Good Job

CHARLES H. KELTNER, farm adviser, and President George F. Tullock of the Winnebago County Farm Bureau, together with the local committee on arrangements, deserve much of the credit for the outstanding success of the 17th annual I. A. A. convention held Jan. 27-28-29, in Rockford.

Chas. H. Keltner

Several weeks before the meeting Mr. Keltner called a meeting of northern Illinois farm advisers and Farm Bureau presidents with the idea of getting out a large delegation of members from each of the nearby counties. The results of this effort exceeded expectations. The crowd was estimated at 5,000, exceeding the attendance at most, if not all, previous convention.

Delegates and visitors were comfortably provided for and the three-day schedule of events went off without a hitch. Secretary Patrick of the Rockford Chamber of Commerce and the hotel managers co-operated most effectively to this end.

Over 800 at Annual Winnebago Co. Meeting

Geo. Jewett Defends Marketing Act, Warns Farmers of False Propaganda

URGING the extension of co-operative marketing, co-operative purchasing, and general agricultural organization as the only hope for a profitable agriculture in the future, George C. Jewett, vice-chairman of the board, Congress Trust and Savings Bank, Chicago, took up the cudgel in defense of the Agricultural Marketing Act at the annual meeting of the Winnebago County Farm Bureau at Rockford March 19.

The Act has been of material benefit to farmers in setting up their co-operative marketing system, he said, and although there may have been some mistakes in the administration of the measure, its enactment has been more than justified.

Mr. Jewett pointed to the stabilization operations of the Federal Farm Board as one possible mistake in the administration of the Marketing Act. He said that the purchasing of grain by the Stabilization Corporation, no doubt improved the market at the time of the purchases, but that the effects of these operations were likely to be detrimental in the long run.

He warned Winnebago county farmers to look carefully at those who were fighting the co-operative movement, pointing out that most of them were men who had formerly profited from the farmer's lack of organization.

President George F. Tullock and Secretary L. A. Frisby reported a successful year both for the Farm Bureau and the Winnebago County Service Company, which held its annual meeting jointly with the Farm Bureau. Between 800 and 900 were present at the luncheon held in the ballroom of the Faust Hotel, where the annual banquet of the I. A. A. was held the latter part of January.

It was reported that the amount of patronage dividends paid to Farm Bureau members by the service company in 1931 is equal to an average refund to each member of $23.93. A dividend of 10 per cent has been paid and another 10 per cent has been set aside for later distribution in 1932. The total refund amount to $15,125.32 for the year.

Eighty head of purebred Angus cows, heifers and bulls sold by the Mercer County Breeders' Association on March 16 average between $95 and $100 per head.

Farm Accidents Reveal Need Liability Insurance

Although the causes of farm accidents change with the various seasons of the year, there is not a month when farm employees get by without injuries of some kind. Thus, the employer is never relieved of his liability unless he is protected by insurance.

During February an employee of a Mercer county farmer was injured while building a fence. He was pulling a small tree with a team of horses when a small branch struck his eye, puncturing his eyeball and lid.

In Boone county an employee was seriously hurt when he was attacked by a bull and badly bruised, causing bladder hemorrhage. He had just taken hold of a rope fastened to a ring in the bull's nose to lead him away, when the animal charged.

A St. Clair farmer and his hired man were weighing cattle and in dividing them one ran against the hired man, knocking him down and spraining his wrist.

A farm employee in Winnebago county tore the ligaments on the back of his leg from the knee down while pushing a truck stuck in the mud.

These are typical winter accidents. The ones which will be reported in the next month or so will probably be of a different nature. Spring activities bring a great many new risks. Outside the busy harvest months, April is one of the highest months in accidents. July, August, September and October are the peak months.

More than 1,800 members have availed themselves of employers' liability insurance service offered by the Illinois Agricultural Mutual Insurance Company.

Five district meetings for Country Life agents will be held during the first two weeks of April, according to L. A. Williams, manager.

On April 1 a meeting will be held at the Cottage Cupboard, DeKalb; on April 5, Pittinger Hotel, Centralia; on April 6, Farm Bureau office, Bloomington; on April 8, Elks' Building, Galesburg; and on April 13, Dunlap Hotel, Jacksonville.

Skinner High Man

A. N. Skinner, general insurance agent in Knox county, was high man in the February contest for reinstating lapsed policies in Country Life Insurance Company, receiving as a reward a set of Rogers silverware. He reinstated 20 policies.

A. N. Skinner

Mr. Skinner was a valued member of the I. A. A. Board of Directors from 1927 to 1930, during which time he served on the finance committee. He has been an active Farm Bureau worker for many years.

At present he is vice-president of the Illinois Farm Bureau Baseball League and dictator in his district. He has won a number of prizes in Country Life contests during the past year.

"HOW ABOUT IT, TYKEE?"
Master Herbert Stockley, son of Will Stockley, a member of the LaSalle County Farm Bureau executive committee, is trying to convince his dog "Tykee" he should have a Country Life policy.

Life and Auto Companies Dedicate Policies to 'Van'

Both Country Life Insurance Company and the Illinois Agricultural Mutual Insurance Company dedicated all policies that arrived in the home offices on March 31 to V. Vaniman, director of insurance service, who is convalescing from an abdominal operation.

"Five years ago our old friend, 'Van', was jumping hither and yon, calling on telephone, driving at night, and trying to cover the whole state at once to get things in order so that we might start the auto insurance service to Farm Bureau members," said A. E. Richardson, manager of the auto insurance company, in a letter to members of the agency force.

" 'Van' has been constantly in touch with the field and office since that time keeping the pipe line open—as he calls it. He will return to the office in the near future. We want to give him a real thrill by having every man who represents the company, get an application on his desk April 1."

L. A. Williams, manager of Country Life, wrote to his agents on March 23 as follows: "Pin a 'Van' picture on each application that you write from now until March 30 and mail them all so they will arrive March 31. If all the agents think of 'Van' as I think they do, March 31 will be a great homecoming for him."

If you have not been able to understand how the I. A. A.-Farm Bureau auto insurance company can furnish insurance at lower net cost, the following incident reveals one reason:

A Farm Bureau member policyholder ran into a ditch, the result being a minor mechanical break. The adjuster recommended that the claim be paid as in his opinion the damage was caused by the car going into the ditch.

After a few days the policyholder returned the check stating that he had talked with the garage man whose opinion was that the car was not damaged by going into the ditch but by getting out. The policyholder did not feel that he was entitled to the check and returned it.

The Illinois Agricultural Association RECORD

Number 5 | MAY, 1932 | Volume 10

Addresses 2,200 at Kewanee

Farm Bureau Mass Meetings Well Attended, Discuss Leading Problems and Policies of Organized Farmers

IN an hour-and-a-half address before an attentive audience of 2,200 Farm Bureau members and their families, meeting in the Kewanee armory the night of April 19, President Earl C. Smith reviewed 10 years of effort by the Illinois Agricultural Association and the American Farm Bureau to arouse the nation toward establishing economic parity between agriculture and industry, outlined the cause of the current economic situation, and discussed the policies of the Farm Bureau toward effecting a solution and a way out of the dilemma.

Earl C. Smith

"When the powers of this country who control its finances make up their minds to end this depression, I firmly believe they can start us on the road to recovery," said Mr. Smith. "And that recovery, I am convinced, must begin with a movement to re-establish the buying power of 40 per cent of our population who depend on agriculture for a livelihood."

Not Adequate

Taking up the question of enabling legislation, he said, "the Agricultural Marketing Act is not adequate to do the thing that must be done to create farmer buying power and start the wheels of industry moving. The Act must be amended to include the equalization fee or something similar to remove the disastrous influence of crop surpluses and make the tariff effective on American farm products.

"To accomplish this does not necessitate the complicated machinery and red tape opponents of such legislation would have your believe. I suggest that the plan first be tried on wheat. I am convinced that wheat could be raised to $1 or $1.15 per bushel without advancing the price of bread. Prices of other grains and farm products would follow, and the start made toward recovery of normal prosperity."

Mr. Smith charged that the grain exchanges and middlemen's organizations, particularly the speculators, who vigorously opposed the equalization fee measure, were the ones indirectly responsible for the limitations in the Agricultural Marketing Act. "And now we see this same group which once favored a co-operative marketing bill bitterly fighting to repeal it," he said.

Look It Up

"Look up the Congressional Record of 1926-1928 and read for yourself," he continued. "Representatives of the grain exchanges and business groups active in Washington at that time repeatedly said it was all right to assist farmers in building their own marketing machinery with the assistance of a Federal Farm Board, but the equalization fee measure is all wrong.

"The Illinois Agricultural Association and the Farm Bureau never asked for the Agricultural Marketing Act. We never endorsed it as offering a solution to the farm problem. But when it finally appeared that this was the government's plan to end the farm depression that began in 1920 we said we would support it wholeheartedly and give it a thorough trial, but reserve the right, if found inadequate, to amend and make it effective. That is our position today.

Big Loans to Europe

"We said more than five years ago that the prosperity then being enjoyed by business and industry in this country could not endure with agriculture out of balance. For several years it appeared that we were wrong. Industry continued prosperous in spite of the fact that farmers had little buying power. And why? Largely because of an artificial European demand created by enormous loans of American money to Europe. The Wall Street bankers received substantial returns from these loans and the industrialists reaped enormous profits from the sale of American goods to these foreign people. Now pay day has come, and we find the borrowers unable to meet their obligations. And they can get no more credit.

"In the meantime our factories find that their old customer, the western farmer, is unable to buy. After years of going without there isn't a thing from the front gate to the farthest field but what the western farmer needs —lumber, roofing, fences, paint, farm implements, furniture, automobiles, and the rest. The demand from Europe no more stimulated by American capital has dried up, with the result that from 50 to 90 per cent of the factories in many industries are closed down and workmen turned out on the streets.

Thinking Needed

"If our leaders had been thinking, this situation could have been avoided; if they had listened to the plea of agriculture, we would not now be going through the worst depression in anyone's memory. If anything, industry has not only fallen to the level of agriculture but below it. Farm values are down, it is true, but they have not evaporated as have many investments in factories and business enterprises.

"There is a silver lining in the clouds of depression for agriculture. The farm-

Farm Accidents Reveal Need Liability Insurance

Although the causes of farm accidents change with the various seasons of the year, there is not a month when farm employees get by without injuries of some kind. Thus, the employer is never relieved of his liability unless he is protected by insurance.

During February an employee of a Mercer county farmer was injured while building a fence. He was pulling a small tree with a team of horses when a small branch struck his eye, puncturing his eyeball and lid.

In Boone county an employee was seriously hurt when he was attacked by a bull and badly bruised, causing bladder hemorrhage. He had just taken hold of a rope fastened to a ring in the bull's nose to lead him away, when the animal charged.

A St. Clair farmer and his hired man were weighing cattle and in dividing them one ran against the hired man, knocking him down and spraining his wrist.

A farm employee in Winnebago county tore the ligaments on the back of his leg from the knee down while pushing a truck stuck in the mud.

These are typical winter accidents. The ones which will be reported in the next month or so will probably be of a different nature. Spring activities bring a great many new risks. Outside the busy harvest months, April is one of the highest months in accidents. July, August, September and October are the peak months.

More than 1,800 members have availed themselves of employers' liability insurance service offered by the Illinois Agricultural Mutual Insurance Company.

Five district meetings for Country Life agents will be held during the first two weeks of April, according to L. A. Williams, manager.

On April 1 a meeting will be held at the Cottage Cupboard, DeKalb; on April 5, Pittinger Hotel, Centralia; on April 6, Farm Bureau office, Bloomington; on April 8, Elks' Building, Galesburg; and on April 13, Dunlap Hotel, Jacksonville.

Skinner High Man

A. N. Skinner, general insurance agent in Knox county, was high man in the February contest for reinstating lapsed policies in Country Life Insurance Company, receiving as a reward a set of Rogers silverware. He reinstated 20 policies.

A. N. Skinner

Mr. Skinner was a valued member of the I. A. A. Board of Directors from 1927 to 1930, during which time he served on the finance committee. He has been an active Farm Bureau worker for many years.

At present he is vice-president of the Illinois Farm Bureau Baseball League and dictator in his district. He has won a number of prizes in Country Life contests during the past year.

"HOW ABOUT IT, TYKEE?"
Master Herbert Stockley, son of Will Stockley, a member of the LaSalle County Farm Bureau executive committee, is trying to convince his dog "Tykee" he should have a Country Life policy.

Life and Auto Companies Dedicate Policies to 'Van'

Both Country Life Insurance Company and the Illinois Agricultural Mutual Insurance Company dedicated all policies that arrived in the home offices on March 31 to V. Vaniman, director of insurance service, who is convalescing from an abdominal operation.

"Five years ago our old friend, 'Van', was jumping hither and yon, calling on telephone, driving at night, and trying to cover the whole state at once to get things in order so that we might start the auto insurance service to Farm Bureau members," said A. E. Richardson, manager of the auto insurance company, in a letter to members of the agency force.

" 'Van' has been constantly in touch with the field and office since that time keeping the pipe line open—as he calls it. He will return to the office in the near future. We want to give him a real thrill by having every man who represents the company, get an application on his desk April 1."

L. A. Williams, manager of Country Life, wrote to his agents on March 23 as follows: "Pin a 'Van' picture on each application that you write from now until March 30 and mail them all so they will arrive March 31. If all the agents think of 'Van' as I think they do, March 31 will be a great homecoming for him."

If you have not been able to understand how the I. A. A.-Farm Bureau auto insurance company can furnish insurance at lower net cost, the following incident reveals one reason:

A Farm Bureau member policyholder ran into a ditch, the result being a minor mechanical break. The adjuster recommended that the claim be paid as in his opinion the damage was caused by the car going into the ditch.

After a few days the policyholder returned the check stating that he had talked with the garage man whose opinion was that the car was not damaged by going into the ditch but by getting out. The policyholder did not feel that he was entitled to the check and returned it.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rates of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Addresses 2,200 at Kewanee

Farm Bureau Mass Meetings Well Attended, Discuss Leading Problems and Policies of Organized Farmers

IN an hour-and-a-half address before an attentive audience of 2,200 Farm Bureau members and their families, meeting in the Kewanee armory the night of April 19, President Earl C. Smith reviewed 10 years of effort by the Illinois Agricultural Association and the American Farm Bureau to arouse the nation toward establishing economic parity between agriculture and industry, outlined the cause of the current economic situation, and discussed the policies of the Farm Bureau toward effecting a solution and a way out of the dilemma.

Earl C. Smith

"When the powers of this country who control its finances make up their minds to end this depression, I firmly believe they can start us on the road to recovery," said Mr. Smith. "And that recovery, I am convinced, must begin with a movement to re-establish the buying power of 40 per cent of our population who depend on agriculture for a livelihood."

Not Adequate

Taking up the question of enabling legislation, he said, "the Agricultural Marketing Act is not adequate to do the thing that must be done to create farmer buying power and start the wheels of industry moving. The Act must be amended to include the equalization fee or something similar to remove the disastrous influence of crop surpluses and make the tariff effective on American farm products.

"To accomplish this does not necessitate the complicated machinery and red tape opponents of such legislation would have your believe. I suggest that the plan first be tried on wheat. I am convinced that wheat could be raised to $1 or $1.15 per bushel without advancing the price of bread. Prices of other grains and farm products would follow, and the start made toward recovery of normal prosperity."

Mr. Smith charged that the grain exchanges and middlemen's organizations, particularly the speculators, who vigorously opposed the equalization fee measure, were the ones indirectly responsible for the limitations in the Agricultural Marketing Act. "And now we see this same group which once favored a co-operative marketing bill bitterly fighting to repeal it," he said.

Look It Up

"Look up the Congressional Record of 1926-1928 and read for yourself," he continued. "Representatives of the grain exchanges and business groups active in Washington at that time repeatedly said it was all right to assist farmers in building their own marketing machinery with the assistance of a Federal Farm Board, but the equalization fee measure is all wrong.

"The Illinois Agricultural Association and the Farm Bureau never asked for the Agricultural Marketing Act. We never endorsed it as offering a solution to the farm problem. But when it finally appeared that this was the government's plan to end the farm depression that began in 1920 we said we would support it wholeheartedly and give it a thorough trial, but reserve the right, if found inadequate, to amend and make it effective. That is our position today.

Big Loans to Europe

"We said more than five years ago that the prosperity then being enjoyed by business and industry in this country could not endure with agriculture out of balance. For several years it appeared that we were wrong. Industry continued prosperous in spite of the fact that farmers had little buying power. And why? Largely because of an artificial European demand created by enormous loans of American money to Europe. The Wall Street bankers received substantial returns from these loans and the industrialists reaped enormous profits from the sale of American goods to these foreign people. Now pay day has come, and we find the borrowers unable to meet their obligations. And they can get no more credit.

"In the meantime our factories find that their old customer, the western farmer, is unable to buy. After years of going without there isn't a thing from the front gate to the farthest field but what the western farmer needs—lumber, roofing, fences, paint, farm implements, furniture, automobiles, and the rest. The demand from Europe no more stimulated by American capital has dried up, with the result that from 50 to 90 per cent of the factories in many industries are closed down and workmen turned out on the streets.

Thinking Needed

"If our leaders had been thinking, this situation could have been avoided; if they had listened to the plea of agriculture, we would not now be going through the worst depression in anyone's memory. If anything, industry has not only fallen to the level of agriculture but below it. Farm values are down, it is true, but they have not evaporated as have many investments in factories and business enterprises.

"There is a silver lining in the clouds of depression for agriculture. The farm-

GRAND TOTAL	$4,877,315,309	100.00

er is better off than the majority of his city neighbors. He at least has a job. Which would you rather have: a piece of land on which you can live and produce a livelihood or stock in a closed factory that pays no dividends and has no earning power?"

Replying to a question regarding the forces directing propaganda against farm organization and co-operative marketing, Mr. Smith produced a list of the directors of the so-called American Federation of Business whose slogan is "Take the government out of business," but whose real purpose is to fight farmers' efforts to help themselves. Mr. Smith showed that every director is either a member of a grain or livestock exchange or else provides services dependent upon speculation or commissions from selling farmers' products.

The Middlemen's Solution

"What has the opposition to offer us as a solution to our troubles?" continued Mr. Smith. "A speaker, who recently appeared before a farm gathering under the auspices of the middlemen's organization, the American Federation of Business, advised farmers to abandon their organization, the Farm Bureau, and use their dues to pay off their mortgages. At the same time this group is spending large sums through propaganda societies to block farmers' efforts to help themselves.

"Farmers are willing to see the government get out of business provided it gets out of all business without discriminating against agriculture. Chairman Stone of the Farm Board made a commendable suggestion when in reply to critics, he said: 'Investigate the Farm Board and the co-operative associations all you like but at the same time investigate the middlemen and their exchanges and make a full and impartial report on both and compare them.'

"It is not strange that since Mr. Stone offered this suggestion we have heard little about a congressional investigation of the Farm Board."

The Tax Problem

Addressing himself to the tax situation, Mr. Smith disclosed that one member out of every four and one-half families is now on the public payroll. "Taxes have grown out of all proportion to ability to pay," he said. "Since 1920 farm income in Illinois has declined from $1,106,000,000 to approximately $315,000,000 last year. Thus 1931 farm income was less than one-third of that in 1920. But our tax bill has been going the other way. It has moved upward 40 per cent. This is something we can correct. The solution lies in organization. The place to start to reduce taxes is at home where from 80 to 90 per cent of your tax money is spent. Why should not every County Farm Bureau sit around the table with representatives of business, labor, and other groups, and work out a program to reduce the cost of local government?

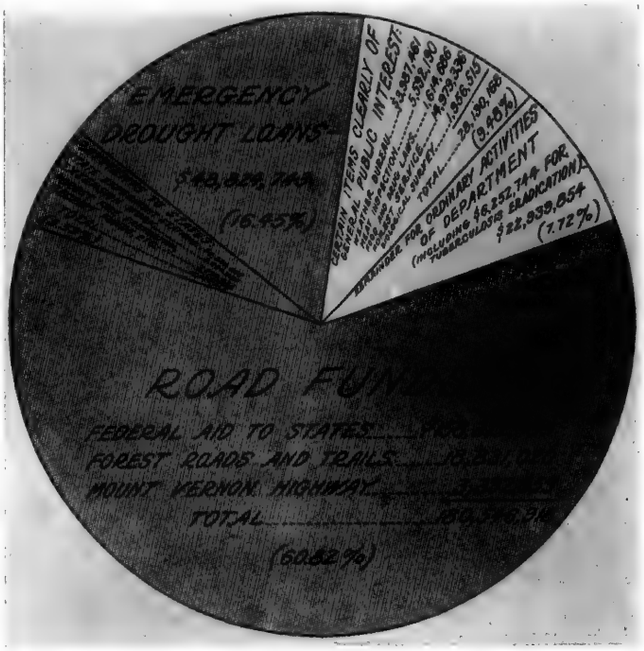
"The Illinois Agricultural Association is the only organization in the state that has worked for a constructive program in the state legislature to equalize the unfair system of taxation now crushing the property owner. And we have made some progress. We have brought the tax issue to the fore through the passage of the state income tax. I would not criticize the recent decision of the Sangamon county court on this measure, but I point to the fact that many state supreme courts have held that the income tax is not a property tax. It was on this point alone that the circuit judge's decision holding the Illinois act unconstitutional was made."

Mr. Smith then discussed in detail how the $4.50 per year per member paid into the Illinois Agricultural Association is spent. He showed that the member is getting four times as much service and benefits as he got in 1926.

"It is high time that all business men, bankers, and professional men realize that the farm problem has developed into the one big problem before the American people," he said. "We have the vision, courage, and ability to meet and solve this problem. The solution will come when leaders of various economic groups come to understand one another and co-operate in a spirit of mutual helpfulness."

The crowd which packed the armory in Kewanee came from the 10 adjoining counties including Henry, Bureau, Peoria, Mercer, Knox, Stark, Tazewell, Warren, Henderson, and Rock Island.

The Farm Bureau presidents of each county sat on the platform. George Broman, president of the Henry County Farm Bureau, presided. R. J. Hamilton, district manager, had charge of the entertainment. Joe Saunders ably served as song leader. Farm Bureau quartettes from Mercer, Rock Island, and Knox counties were applauded. Short addresses of welcome were made by Mr. Broman, Mayor J. J. Andrews of Kewanee, and President Steele of the local Chamber of Commerce.



The information presented by Mr. Smith at Kewanee is similar to that covered at other Farm Bureau mass meetings by I. A. A. speakers over the state.

CLASSIFICATION OF TOTAL EXPENDITURES CHARGED TO U. S. DEPT. OF AGR., FISCAL YEAR 1931, ON BASIS OF DAILY TREASURY STATEMENT, JUNE 30, 1931. TOTAL $296,865,945.

Hyde Discloses Facts About U. S. Dept. of Agriculture Budget

EXPENDITURES of the U. S. Dept. of Agriculture and the Federal Farm Board have been singled out recently as targets for attacks by middlemen's organizations and newspapers that front for them.

Everyone agrees that taxes must come down and unnecessary governmental activities cease, but fairness demands that the truth be disclosed and all federal expenditures be placed in their true light.

The accompanying chart received from a budget officer at Washington clearly reveals that of approximately $300,000,000 administered by the Department of Agriculture in the last fiscal year the greater part of it went for roads, emergency relief loans, and public service not confined to agriculture. The figures on the chart above vary slightly from those given below since one covers a fiscal year ending June, 1931, while the other (Mr. Hyde's) is for the calendar year.

Replying to a series of charts and other propaganda published some time ago by the Chicago Tribune Secretary Arthur M. Hyde presented these facts:

$174,000,000 of the 1931 Dept. of Agriculture expenditures went to the states as federal aid in highway construction. This money served the general welfare and relieved unemployment.

$50,000,000 went to farmers in drought areas as emergency relief loans. The Department of Agriculture did not ask for the money. It was no part of our regular program.

$14,000,000 went to the states for experiment stations, extension services, and forest fire prevention. The Department of Agriculture did not spend it. We were merely the channel through which the money passed.

Deducting these sums leaves $58,000,000 spent by the Department. This contrasts with the $30,000,000 spent in 1917. (All other moneys were either paid to the states direct, or were emergency funds for which this department made no request.)

But even this $58,000,000 is not a fair statement of the expenditures for agricultural purposes.

$4,000,000 in 1931 went to the Weather Bureau, including $1,200,000 for commercial aviation—only $50,000 of the entire appropriation being directly for agriculture.

$6,000,000 went for eradication of bovine tuberculosis—a public health service fully as much as an agricultural service.

$5,000,000 went for meat inspection—primarily for public health.

$1,600,000 was expended for enforcement of the Food and Drugs laws —another health service.

$15,000,000, in addition to payments to states for forest roads already counted, went to the Forest Service to conserve our national resources.

$2,000,000 went to Biological Survey, principally for wild life conservation.

These items add up to $33,600,000. Minor non-agricultural items bring the total well above $35,000,000. That leaves, of the $58,000,000, only $23,000,000 that can properly be charged against the Department of Agriculture for strictly agricultural expenditures. Of the $30,000,000 expended in 1917, about $11,000,000 was for strictly agricultural purposes.

The increase in expenditures by the Department of Agriculture for agricultural purposes from 1917 to 1931 was, therefore, about $12,000,000. Any other statement is unjust to agriculture.

(*Continued from page 4*)

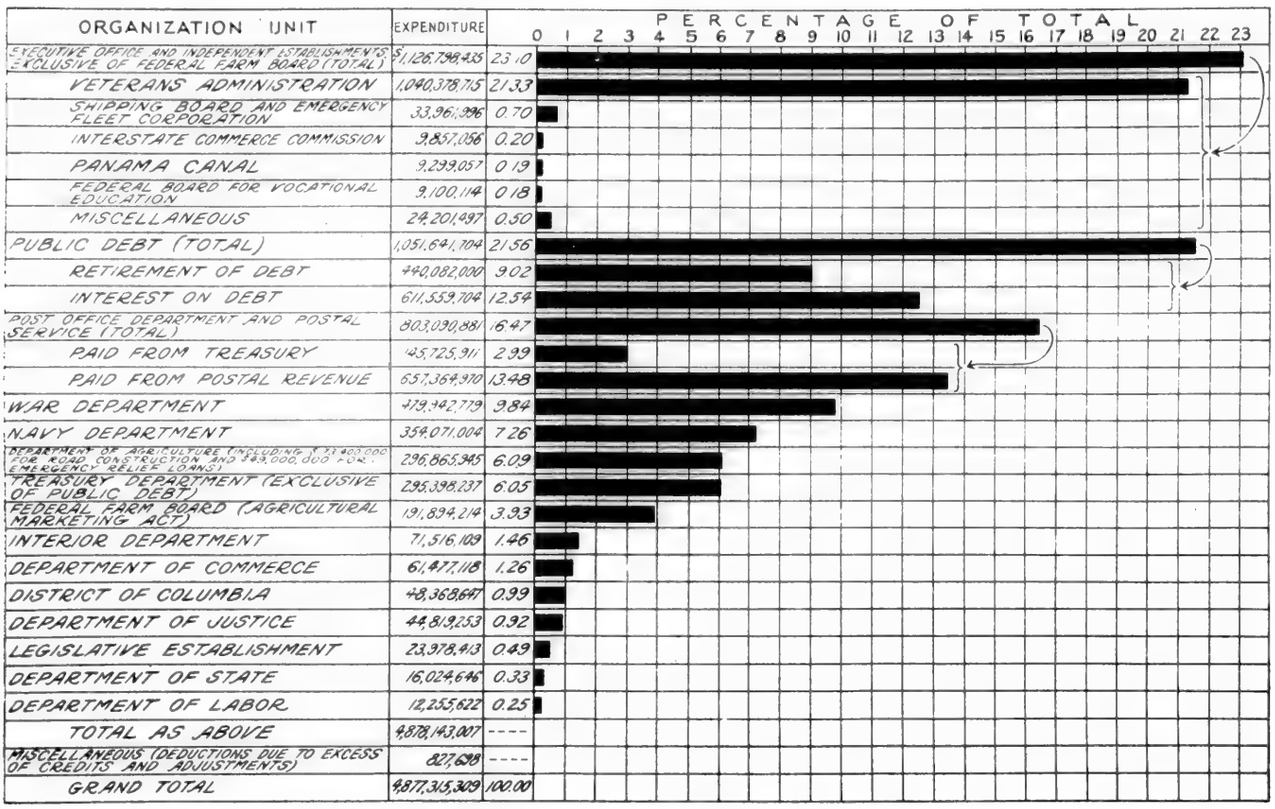
business is beginning to realize that industry cannot recover until the farmer regains his lost purchasing power.

"We see new cars in showrooms all over the country but not on the highways," Mr. Smith pointed out. "The value is there, but we haven't the down payment to make. It is a complex problem, but industry is beginning to realize that the farmer prostrated by two years' depression has to get up first."

Cut Budget $47,000

Polo, Ill., April 21.—Approximately 700 Farm Bureau members and their families from Ogle, Lee, Whiteside, Carroll, Winnebago, Stephenson, and JoDaviess counties gathered in the community high school here tonight to hear President Earl C. Smith review problems of chief interest to organized farmers. C. E. Bamborough, I. A. A. director from the 13th district, presided.

Answering a question from the floor regarding a misleading article that appeared in the Chicago Tribune the day before, Mr. Smith stated that since October, 1931, the I. A. A. and the companies it manages had reduced the annual budget $47,000; that in only two instances did co-operatives affiliated with the I. A. A. borrow funds from the Federal Farm Board, not one cent of which was used for organization purposes.



The I. A. A., he said, has borne all of the expense of organizing co-operatives affiliated with the I. A. A. In one instance (Illinois Grain Corporation) all the money borrowed from the Farm Board has been returned, and in the other instance (Soybean Marketing Association) substantial payments on the loan have been made and a definite plan adopted to liquidate this loan over a period of years.

Metzger at Ottawa

Ottawa, Ill., April 25.—Between 900 and 1,000 Farm Bureau members attended the Farm Bureau mass meeting held in the high school auditorium here tonight. The principal address was made by Secretary George E. Metzger.

Questioned from the floor as to how farmers could combat their enemies the audience cheered Metzger's reply: "Patronize your own co-operatives." Mr. Metzger disclosed the source of the opposition and challenged the middlemen to come forward with a constructive program that will bring agriculture out of the depression which began in 1920. Metzger substituted for Earl Smith, who was unable to attend because of serious illness in his family.

EXPENDITURES FOR ALL BRANCHES FEDERAL GOV'T. SERVICE, INCLUDING PAYMENTS FROM POSTAL REVENUES, FISCAL YEAR 1931, BASED ON TREASURY STATEMENT OF JUNE 30, 1931. TOTAL $4,877,315,309.

$174,000,000 of the 1931 Dept. of Agriculture expenditures went to the states as federal aid in highway construction. This money served the general welfare and relieved unemployment.

$50,000,000 went to farmers in drought areas as emergency relief loans. The Department of Agriculture did not ask for the money. It was no part of our regular program.

$14,000,000 went to the states for experiment stations, extension services, and forest fire prevention. The Department of Agriculture did not spend it. We were merely the channel through which the money passed.

Deducting these sums leaves $58,000,000 spent by the Department. This contrasts with the $30,000,000 spent in 1917. (All other moneys were either paid to the states direct, or were emergency funds for which this department made no request.)

But even this $58,000,000 is not a fair statement of the expenditures for agricultural purposes.

$4,000,000 in 1931 went to the Weather Bureau, including $1,200,000 for commercial aviation—only $50,000 of the entire appropriation being directly for agriculture.

$6,000,000 went for eradication of bovine tuberculosis—a public health service fully as much as an agricultural service.

$5,000,000 went for meat inspection—primarily for public health.

$1,600,000 was expended for enforcement of the Food and Drugs laws—another health service.

$15,000,000, in addition to payments to states for forest roads already counted, went to the Forest Service to conserve our national resources.

$2,000,000 went to Biological Survey, principally for wild life conservation.

These items add up to $33,600,000. Minor non-agricultural items bring the total well above $35,000,000. That leaves, of the $58,000,000, only $23,000,000 that can properly be charged against the Department of Agriculture for strictly agricultural expenditures. Of the $30,000,000 expended in 1917, about $11,000,000 was for strictly agricultural purposes.

The increase in expenditures by the Department of Agriculture for agricultural purposes from 1917 to 1931 was, therefore, about $12,000,000. Any other statement is unjust to agriculture.

(*Continued from page 4*)

business is beginning to realize that industry cannot recover until the farmer regains his lost purchasing power.

"We see new cars in showrooms all over the country but not on the highways," Mr. Smith pointed out. "The value is there, but we haven't the down payment to make. It is a complex problem, but industry is beginning to realize that the farmer prostrated by two years' depression has to get up first."

Cut Budget $47,000

Polo, Ill., April 21.—Approximately 700 Farm Bureau members and their families from Ogle, Lee, Whiteside, Carroll, Winnebago, Stephenson, and JoDaviess counties gathered in the community high school here tonight to hear President Earl C. Smith review problems of chief interest to organized farmers. C. E. Bamborough, I. A. A. director from the 13th district, presided.

Answering a question from the floor regarding a misleading article that appeared in the Chicago Tribune the day before, Mr. Smith stated that since October, 1931, the I. A. A. and the companies it manages had reduced the annual budget $47,000; that in only two instances did co-operatives affiliated with the I. A. A. borrow funds from the Federal Farm Board, not one cent of which was used for organization purposes.

The I. A. A., he said, has borne all of the expense of organizing co-operatives affiliated with the I. A. A. In one instance (Illinois Grain Corporation) all the money borrowed from the Farm Board has been returned, and in the other instance (Soybean Marketing Association) substantial payments on the loan have been made and a definite plan adopted to liquidate this loan over a period of years.

Metzger at Ottawa

Ottawa, Ill., April 25.—Between 900 and 1,000 Farm Bureau members attended the Farm Bureau mass meeting held in the high school auditorium here tonight. The principal address was made by Secretary George E. Metzger.

Questioned from the floor as to how farmers could combat their enemies the audience cheered Metzger's reply: "Patronize your own co-operatives." Mr. Metzger disclosed the source of the opposition and challenged the middlemen to come forward with a constructive program that will bring agriculture out of the depression which began in 1920. Metzger substituted for Earl Smith, who was unable to attend because of serious illness in his family.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

The Fittest Will Survive

IN the long run the slush funds, speech-making, printer's ink, publicity, and propaganda against co-operative marketing will not greatly affect the future of this system of selling farm products; the price received, savings effected, and service rendered are all that count and the producer is and will be the court of last resort. That's a safe bet. Nothing the opposition can do or say will stop farmers from patronizing their own co-operative institutions if they do the job better than the private enterprisers. If they fail farmers will discard them eventually. Truth will prevail. Darwin's theory of the "survival of the fittest" is the law of business as well as the law of the jungle.

Where the Money Goes

DURING the last fiscal year the federal government spent nearly five billion dollars. Where did it go? Read the Chicago Tribune and you'll get the impression it was all spent by the Farm Board and U. S. Dept. of Agriculture. Read the chart on page 4 that sets forth the facts, and you'll learn that more than 80 per cent went to pay disabled soldiers, their widows and orphans, war debts, national defense, roads, and to deliver the mail. Incidentally the government loses a good deal of money every year delivering newspapers and periodicals. Without this government subsidy metropolitan newspapers might not boast of their extensive country circulation.

A very small part of the five billion went for agricultural research, extension, and service confined to farmers as pointed out on page 5 by Secretary Hyde. And the Farm Board's loans to co-operatives are small compared with the government-owned Reconstruction Finance Corporation's loans to railroads, banks, and insurance companies.

Farmers applaud all sincere efforts to reduce taxes; in fact, the I. A. A. and Farm Bureau have been working on this problem for several years with creditable results. Tax reduction must come, but let it be applied impartially to all groups without discrimination against agriculture.

The Income Tax

ILLINOIS farmers will await with interest the decision of the State Supreme Court on the constitutionality of the state income tax. Judge Jesse Brown's decision, given in the Sangamon county circuit court, that a tax upon income is a tax upon property, hence is unconstitutional because not uniform, clashes with State Supreme Court decisions in Arkansas, Georgia, Idaho, Mississippi, Missouri, New Hampshire, North Carolina, and Wisconsin. All these courts have held that a tax upon income is not a tax upon property.

On Co-operation

THE early pioneers in co-operative marketing who fought to establish farmer-owned and farmer-controlled country grain elevators would turn over in their graves if they could witness how those principles of co-operation are being dragged in the mire by traitors to the cause within their own ranks today.

The fact that more than 1,500 farmers elevators in the United States are co-operating in the national co-operative grain marketing program is proof that the majority of elevators are still in good hands.

Business Relief

(An editorial from the Dayton (Ohio) Daily News, from the pen of Walter L. Locke, editorial writer.)

THE Reconstruction Finance Corporation bill —business relief—has gone to the President and received his instant signature. Within six weeks of the presentation of this measure of business relief, Congress has passed and the President has signed it while the entire country looks on and applauds.

This measure puts an injection of half a billion dollars of government money and a billion and a half more of government guaranteed credit into the arteries of business. Banks and insurance companies with frozen assets will find blowing over them the warm breath of government credit and government cash. Hard-pressed railroads will receive government aid. Frozen real estate securities will be thawed in what is to be essentially a government mortgage market. With this help of legislation, of government, prices are expected to start upward—the prices of commodities, of bonds, of lands, of stocks. The government's measure may not succeed in all this, but the country hopes it will and approves the effort. If it succeeeds, the depression is in hand.

Now, while we view so admiringly the strong action which, with big and little business insisting and consenting, the government takes, let us pause for a little smile at ourself. The smile may best be introduced by a remark which that wild "radical," Senator George W. Norris, of Nebraska, dropped in casting his vote against the measure now a law. Senator Norris said:

"I have been called a socialist, a bolshevik, a communist, and a lot of other terms of a similar nature, but in the wildest flights of my imagination I never thought of such a thing as putting the government into business as far as this bill would put it."

The words of the insurgent Nebraskan are true. He got himself written down a radical for insisting that the government operate a little power plant which it owns at Muscle Shoals. He has variously favored public operation of a public utility here and there. But put the government in control, through a control of money and credit, of all the business of the United States—such a thing as that the Nebraska radical, now a conservative protesting against the radicalism of his stalwart associates in Congress, never dreamed of. This is what has just been done.

We had to do it. The country was in a jam. Only the government, it seems, can break the jam. And so, under the leadership of the President who vetoed Senator Norris' Muscle Shoals bill as a violation of "rugged individualism," individualism is laid on the shelf and the most completely communistic measure ever adopted in time of peace passes hurrahing into law. It's all right. We had to do it. But as we do it, let's smile at ourselves; it will keep us sane. Let's smile at our "rugged individualism," at our insistent demand that the government keep out of business; and especially, as we set out now by law to increase the price of everything, let us smile at our old opposition to "price fixing." And as we smile, can we complain if over at Moscow, which we refuse to recognize because of its socialism, there are a few smiles more?

Smiling at ourselves, we can see why the farmers smile, the farmers we so sternly rebuked with vetoes, Mr. Coolidge's at Mr. Hoover's advice, for wanting to be helped by law. Remember how long we stood out against the sinking farmers—12 years. And when it was ourselves struggling in the water, how long was government relief in coming? Six weeks! Oh, there's very much to smile about in this connection; and, finally, when any of us hereafter in horror cry socialism at anything it will be more than a smile, it will be a snicker.

From Illinois to Europe by Water

THE recent shipment by the Soybean Marketing Association of 150,000 bushels of soybeans by water to Rotterdam provides an interesting illustration of the value of the Great Lakes-St. Lawrence Waterway to farmers of the middle west.

From Chicago via the Great Lakes and up the St. Lawrence river to Montreal where the beans were transferred to an ocean going vessel, the rate to Rotterdam is only 14 cents per bushel. This is the lowest possible rate obtainable to European markets. If the rail rate from Peoria to Chicago, which is approximately four cents, were added, the total cost of shipment would amount to 18 cents from Peoria.

The rate from New Orleans to Rotterdam alone is 13 cents per bushel, and if the beans were shipped down the Illinois and Mississippi rivers on barges to New Orleans and there transferred to ocean going vessels the rate would be 19.5 cents from Peoria to Rotterdam via this Southern route. By rail from Peoria to New Orleans the rate is approximately 13.5 cents per bushel (6.5 by water) or more than the cost of the ocean haul. With Europe back in the market for farm products water transportation will be of decided help to the corn-belt farmer.

Kirkpatrick Cheered at Mass Meeting in Pontiac

PONTIAC, APRIL 22.—Approximately 1,000 farmers and business men from Livingston, Ford, Iroquois, Woodford and adjoining counties gathered here tonight at the Farm Bureau mass meeting to hear Donald Kirkpatrick, general counsel for the I. A. A., discuss legislative and marketing policies of the Association, and disclose the source of opposition to farmers' organized efforts to help themselves.

Mr. Kirkpatrick charged that grain and livestock commission men, speculators, and other handlers of farm products organized as the Federation of American Business were seeking to destroy co-operative marketing under the guise of "getting the government out of business."

Mr. Kirkpatrick

Commenting on a meeting at Jerseyville April 15 sponsored by the Federation of American Business and the Farmers Grain Dealers Association of Illinois, Mr. Kirkpatrick disclosed that one Millard R. Myers, now reported to be in the employ of the grain trade, had written a fabricated story of the Jerseyville meeting in which he misrepresented what had happened; quoted Tom Cain of Jacksonville as having attacked the Farm Bureau when Cain was in Washington at the time; quoted Lawrence Farlow as presenting resolutions against co-operative grain marketing which were unanimously adopted when no such resolutions were even offered; and misquoted what other speakers had said.

Myers Confesses

"Our report on that meeting," said Kirkpatrick, "shows that it was largely attended by Farm Bureau members, that when the commission men (W. A. Moody, president St. Louis Livestock Exchange, and R. I. Mansfield, grain commission man) saw the temper of the audience they spoke in generalities for a short time and adjourned the meeting early.

"I challenge Lawrence Farlow, Robt. Orndorff, Millard Myers, or any of their associates to deny these facts," continued Kirkpatrick. Myers, who was in the audience, came forward and at first sought to deny the allegations, until Kirkpatrick reached in his brief case and pulled out a copy of Myers' story. When confronted with the evidence the latter admitted that he wrote the article and attempted to get it published in the local paper at Jerseyville.

Thunderous applause greeted the exposure of Myers and the middlemen in the Pontiac meeting. Farm Adviser S. G. Turner of Livingston county said it was the largest farm meeting held there in years.

500 at Olney

Olney, Ill., April 21.—Agriculture, the basic industry, is being viciously attacked by middlemen's organizations and certain metropolitan newspapers which are poisoning the minds of thousands of citizens by their misleading propaganda, declared Donald Kirkpatrick, legal counsel for the Illinois Agricultural Association, speaking before 500 farmers and business men at the Central High school gymnasium here tonight.

Kirkpatrick revealed that sources of opposition to co-operative marketing are the same today as they have been ever since the movement began. Middlemen are increasing their attacks because they see co-operatives growing. They realize that the farmer can handle his own marketing efficiently.

The Olney High School band provided entertainment. B. L. Hornbeek, district organization manager, presided.

800 at Carbondale

Carbondale, Ill., April 22.—Approximately 800 farmers and business men attended a mass meeting here tonight to hear George E. Metzger, secretary of the Illinois Agricultural Association, outline the policies of the association with regard to the Federal Farm Board, co-operative marketing, taxation, legislation, and economic problems now facing the farmer.

Metzger disclosed that the opposition to co-operative marketing was coming chiefly from middlemen and from uninformed or misinformed persons. He pointed out that some of the business groups which supported the co-operative marketing act were now fighting to repeal it because they could see that the co-operative movement was succeeding.

Fred Dietz of DeSoto, director of the I. A. A. from the 25th district, introduced Metzger and later turned the meeting over to L. F. Brissenden, district organization manager.

I. A. A. Radio Period Moved Up to 12:15 P. M.

The daily farm program of the Illinois Agricultural Association over station WJJD (1130 kilocycles), Chicago, has been changed to 12:15 p. m. central standard time. This change was made necessary by adjustments in the station schedule following the shift to daylight saving time in Chicago.

Metzger Addresses 400 At Meeting in Carmi

Carmi, Ill., April 21.—George E. Metzger, secretary of the Illinois Agricultural Association, explained here tonight to an audience of between 300 and 400 farmers and business men where the attacks on co-operative marketing were coming from.

Metzger was the principal speaker at the meeting sponsored by the White County Farm Bureau in co-operation with Farm Bureaus in adjoining counties to enable farmers in this part of the state to get first-hand information on some of the questions now before them. This was one of the series of eleven meetings in the state. Charles Marshall of Belknap, director of the I. A. A. from the 24th district presided.

Geo. E. Metzger

Tracing the development of the state organization and of co-operative marketing from the beginning, he laid bare the source of opposition which the farmer has had to overcome. He pointed out that the present attacks being made against the Farm Board were coming from the same source, the middlemen, whose slogan is "get the government out of business," but who in reality are fighting to put farmers out of business.

St. Jacob, Ill., April 20.—Legislative and economic questions of foremost interest to farmers were discussed here tonight before an audience of 800 by Donald Kirkpatrick of the I. A. A.

The meeting, sponsored by the Madison County Farm Bureau, was attended by Farm Bureau members and non-members from Jersey, Macoupin, Bond, Montgomery, St. Clair, Clinton, Marion, Monroe, Randolph, Washington and Jefferson counties. John Miller, president of the Madison County Farm Bureau, presided.

Kirkpatrick disclosed the source of opposition to co-operative marketing and denounced it as coming from middlemen and speculators. He also explained the policies of the I. A. A. with regard to legislation now being considered.

Music was furnished by a Farm Bureau women's quartette and a Farm Bureau men's quartette.

The Illinois Grain Corporation handled 666 cars of grain during March. This the largest volume of any month since August, 1931. These shipments came from 191 shipping points in 58 countries.

Grain Marketing

By Harrison Fahrnkopf

STOCKHOLDERS and boards of directors of farmers' elevators should know that their co-operatives can now become members of the Illinois Grain Corporation without any cost. In other words, the farmer, through his elevator, has an opportunity of building a strong terminal grain marketing agency without the necessity of advancing cash for the purpose.

When an elevator board of directors earnestly looks into the matter, it eventually becomes a member of the Illinois Grain Corporation. Some of the members have even visited other member elevators and perhaps made trips to the terminal markets to meet the personnel of the Illinois Grain Corporation and of the Farmers National Grain Corporation and to study the organizations at close range.

If your elevator is a member, you should keep yourself informed that your faith in the organization will not only be sustained but strengthened. If your elevator is not a member, you as a director are seeking information that will help you determine whether or not your position is in the best interests of your co-operative.

Illinois Grain Corporation has been in operation for more than a year, and during what might be termed an organization period of twelve months, succeeded in originating for market nine million bushels of grain. If your elevator is one of those not supporting it with a membership, just what is the reason?

Without attempting to enumerate a number of individual reasons, doesn't it cover it pretty well to say: "Our board has just not got around to the place where they felt it was the thing to do?" Further enlightenment on the question will probably reveal that the directors talked it over several months ago and have not again given it further serious consideration.

The Illinois Grain Corporation is an effort on the part of the farmer himself to render more efficient his system of marketing. Certainly no industry should be criticized for endeavoring to conduct its business more efficiently. Roger W. Babson, the well known financial adviser and business forecaster, said recently:

"The keynote to future prosperity is improvement in distribution methods. Distributors must cut costs and pass along to the consumers the saving already achieved in production. Progress in production has far outstripped progress in distribution. Our distribution system because of its high cost, is still the bottle neck which prevents the free flow of mass production which gets to the consumers. This business must attract that great potential market among the lower income classes to provide an adequate outlet for its huge producing capacity and to do this it must reduce costs. Authorities estimate that the avoidable waste in distribution is between $8,000,000,000 and $10,000,000,000 a year."

After all, success in farming is determined by a number of factors of which marketing is one. If in local co-operative marketing it is a good thing for individuals to join together, then in going beyond the local unit it should be a profitable thing for co-operatives themselves to join hands.

Uncle Ab says, no matter what economists may tell you, supply always equals demand.

PROPHECY DIDN'T COME TRUE

A PROPHECY made 30 years ago was scheduled to mature this year, but all signs indicate that the prophecy just won't come true.

At the turn of the century Sir William Crookes, eminent British scientist, predicted that unless yields per acre were increased, the world would have a shortage of wheat by 1931, even if all the potentially available wheat land were put in use.

Sir William noticed that wheat production in the United States had increased rapidly after the Civil War. Finally the expansion halted, and exports began to decline. Prices stopped falling, and began to rise. The world's wheat area, Sir William thought, could be increased by only about 100 million acres.

If Sir William were alive today he would see his prophecy lying in ruins. It has been battered, Doctor Stine of the Bureau of Agricultural Economics points out, by the contributions of science to wheat production, by the introduction of power machinery, and by the utilization of lands hitherto thought useful only for grazing.

Thirty years ago the average wheat yield of the world, so far as statistics are available, was 12.7 bushels per acre. In the last seven years it has averaged 14.1 bushels per acre, an increase of 1.4 bushels. On last year's wheat area, outside of Russia, this increased yield on 320 million acres makes a difference of nearly half a billion bushels, or approximately 13 per cent of the world's total production.

Charge Trade Board With Discrimination

Refusal of Membership on Chicago Market in Disregard of Law Alleged in Complaint Filed

A charge of discrimination by the Chicago Board of Trade against the Farmers National Grain Corporation, which, if sustained, places the grain exchange liable to a Federal order closing it under the Grain Futures Act, has been filed by the corporation with the commission of three cabinet members created by the act to hear such disputes, according to information made available April 15 at the Department of Agriculture and the Federal Farm Board.

The Board of Trade, it was explained, refused membership in the clearing house of the grain exchange to the Farmers National Grain Corporation on the ground that the corporation was not qualified. Rules of the exchange prohibit membership of corporations in the clearing house, it was stated, although the Grain Futures Act provides specifically that co-operative marketing associations shall be entitled to membership on the Board of Trade "and all privileges on" the Board, on terms required of other members. The following additional information was provided:

The Farmers National formerly employed the Updike Grain Co. to handle its clearing house transactions, but some months ago it decided to eliminate the commission charges involved in this procedure by acquiring the Updike company. Since the acquisition the Farmers National has done its clearing through its subsidiaries.

Recently the Board of Trade decided to investigate the status of the Updike company, now a subsidiary of a corporation, the Farmers National. The Farmers National then applied for membership for itself on the clearing house. Its application was rejected.

The Farmers National now has asked a hearing on this rejection, to be held before the commission composed of the Secretary of Agriculture, the Secretary of Commerce, and the Attorney General of the United States, as provided in the Grain Futures Act.

The Grain Futures Act authorizes the Secretary of Agriculture to designate any board of trade as a contract market under certain conditions, and only these contract markets may deal in futures. One of the conditions specified by the act is as follows:

"When the governing board thereof does not exclude from membership in, and all privileges on, such board of

(Continued on page 14 col. 1)

Nominations in Order A. F. B. F. Service Award

Nominations are now in order for candidates for the American Farm Bureau Federation's 1932 Award "For Distinguished Service to Organized Agriculture," according to an announcement from the Federation.

The award is given in recognition of service which called for personal effort and sacrifice far beyond the ordinary demands of duty. It is agriculture's highest recognition of individual devotion to the advancement and well being of agriculture through organized effort.

The winner is determined by a committee of three who examine the records of candidates submitted by their backers. Announcement of the winner is always a highlight of the great annual national assembly of the Farm Bureau Federation which will be held this year in Chicago on December 5 to 7.

In the past four years nine persons, including one farm woman, have received the honor, which is symbolized by a gold medal and a diploma. Nominations are welcomed from Farm Bureau workers and those in affiliated agricultural organizations, from the extension service, from farm paper editors, and all others interested in the welfare of agriculture. The closing date for entries is October 15, 1932, at midnight. Nominations should be submitted to M. S. Winder, Secretady, American Farm Bureau Federation, 58 East Washington St., Chicago, Ill.

(Continued from page 13)

trade, any duly authorized representative of any lawfully formed and conducted co-operative association of producers having adequate financial responsibility which is engaged in cash grain business, if such association has complied, and agrees to comply with such terms and conditions as are or may be imposed lawfully on other members of such board:

"Provided, that no rule of a contract market shall forbid or be construed to forbid the return on a patronage basis by such co-operative association to its bona fide members of moneys collected in excess of the expense of conducting the business of such association."

This paragraph has been upheld in a previous adjudication by the Supreme Court of the United States. The sole penalty provided for violation of the terms of the act is suspension of the designation of the offending board of trade as a contract market for a period not to exceed six months, or revocation of such designation. — United States Daily, April 16, 1932.

Tomato Juice Popular

Americans who have become tomato-juice conscious in the last two or three years should bear in mind certain simple facts when purchasing this popular beverage, says J. W. Sale, of the Federal Food and Drug Administration. The production of tomato juice and a number of so-called "cocktails" made from it has increased amazingly in the last year or two and now there are a score of firms offering these products for sale.

Playing upon the fact that the American consumer is greatly concerned about his vitamins, a few manufacturers have made absurd claims concerning the vitamin content of their tomato-juice product, says Mr. Sale. Statements such as "rich in vitamins" or "contains all the vitamins" are considered by Federal food officials as misleading and therefore illegal under the law.

Neither tomato juice nor tomato-juice cocktails contains all the vitamins. When making vitamin claims, the manufacturer, if he is to operate legally, must restrict his claims to those particular vitamins which are actually present in significant amounts. Fresh, ripe tomatoes contain vitamins A, B and C, but the extent to which these vitamins are present in the juice depends upon the methods used in its preparation.

A CONTRAST

Fifty years ago women wore hoop skirts, bustles, petticoats, corsets, cotton stockings, high-buttoned shoes, frilled cotton underwear; they did the cleaning, washing, ironing, raised big families, went to church on Sunday and were too busy to be sick.

Men wore whiskers, square hats, Ascot ties, red flannel underwear, big watches and chains, chopped wood for the stove, bathed once a week, drank 10-cent whiskey and 5-cent beer, rode bicycles, buggies and sleighs, went in for politics, worked twelve hours a day and lived to a ripe old age.

Stores burned coal oil lamps, carried everything from a needle to a plow, trusted everybody, never took an inventory, placed orders for goods a year in advance and always made money.

In 1932

Women wear silk "or no" stockings, short skirts, no corsets, an ounce of underwear, have bobbed hair, smoke, paint and powder, drink cocktails, play bridge, drive cars, have pet dogs and go in for politics.

Men have high blood pressure, wear no hats and little hair, shave their whiskers, play golf, bathe twice a day, drink poison, play the stock market, ride in airplanes, never go to bed the same day they get up, are misunderstood at home, work five hours a day, play ten and die young.

Stores have electric lights, cash registers and elevators, but never have what the customer wants, trust nobody, take inventory daily, never buy in advance, have overhead, mark up, mark down, quota, budget, advertising, stock control, annual and semi-annual, end of month, reports and audits, dollar day, Founder's Day, rummage day and economy day sales, and never make any money.—Anonymous.

Quality Milk Assn. Donates Milk to Poor

Undernourished Babies to Get 40,000 Quarts of Milk

THE Quality Milk Association, Farm Bureau organized milk marketing co-operative whose 800 members produce 85 per cent of the milk sold at Rock Island, Davenport, Moline and East Moline, recently donated 40,000 quarts of milk for undernourished babies. This is said to be the largest gift ever received by charity organizations in the quad-cities.

The resolution donating the milk follows:

"Whereas, the board of directors of the Quality Milk Association has learned that a number of babies and children of pre-school age in the quad-city area are undernourished because such organizations as the Daily Times and Davenport Visiting Nurse Association do not have sufficient funds to carry on this work,

"And whereas, there is an enormous surplus of milk being produced by the members of the Quality Milk Association who furnish the milk supply to the quad-cities,

"And whereas, the Quality Milk Association feels that no child should be deprived of nature's most perfect food because of present economic conditions. Therefore be it

"Resolved, by the board of directors of the Quality Milk Association that 40,000 quarts of milk be donated to these organiaztions in May and June to be distributed in any way they desire to the babies and children in the quad-cities. Be it further

"Resolved, that each member of the Quality Milk Association be asked to contribute out of his surplus one quart out of every 100 pounds of milk produced and sold in quad-cities."

A page-wide streamer and story announced the gift in a recent issue of the Daily Times, Davenport, Iowa. Dealers agreed to deliver the milk free.

Smith Named Member Of Conservation Board

President Earl C. Smith was recently named as the farmer member of the board of directors of "More Game Birds in America, Inc.," by Secretary of Agriculture Arthur M. Hyde.

This organization is devoted to the conservation of game and wild life, and supports the U. S. Department of Agriculture in its efforts to protect birds and game recognized as friends of the farmer. The organization has headquarters in New York City.

MOST of the nine districts in the Illinois Farm Bureau Baseball League held meetings within the past few weeks to work out schedules for the 1932 season, choose district dictators, and take up other problems preparatory to the opening of the season.

The dates for the opening games of the different districts vary from May 14 in the central part of the state to the latter part of May in the northern districts.

District V, which includes Knox, Henry, Henderson and McDonough counties, will open its schedule on May 21, it was decided at the recent district meeting in Galesburg.

Representatives of the four counties agreed to follow the 1931 schedule except that the games be reversed and dates changed to comply with the 1932 calender.

W. A. Stephenson of Henderson county was chosen as district dictator to succeed A. N. Skinner of Knox county, who declined to accept renomination on the ground that he is a member of the state arbitration committee.

It was decided that each county in the district submit the names of at least two umpires by May 1, and that if any county objects to any of the suggested umpires such objections must be made to the district dictator who will approve the umpires.

The following representatives were present at the meeting: Melvin Barclay and E. W. Runkle, McDonough county; W. A. Stephenson and E. D. Walker, Henderson county; J. R. Johnson and John Weston, Henry county; T. J. Sullivan, F. G. Campbell and A. N. Skinner, Knox county.

Thirty-five to 40 players with their managers and farm advisers from Grundy, LaSalle, Kendall and Will counties gathered at Morris the night of April 20 for the Division III meeting. George Thiem, secretary of the league, spoke optimistically of prospects for a good baseball season, reported results of the recent meeting of the league executive committee, and explained playing rules adopted at the spring meeting in Bloomington. He stated that the arbitration committee expected to interpret the eligibility rule in line with decisions made last year.

Because of the lateness of the season, it was decided to defer the opening game in Division III until Saturday, May 28. Each team will play other teams in the division at least two games, and the team having the highest standing on August 13 will be declared divisional champion. Farm Adviser Ray Watson of Grundy county presided.

The offer of Lowe & Campbell to provide 12 gold baseball watch charms for the divisional champion, provided each team orders three dozen baseballs, was accepted.

Boone county will have a team in Division II this year along with Lake, DeKalb and Kane counties, Mr. Thiem announced. He said there was also a possibility of McHenry and DuPage entering teams in this district. A meeting to organize the district and work out the schedule was held at Elgin April 28.

A meeting of Division VII, including Cass, Menard, Morgan and Greene counties, was held at Jacksonville April 18. By general agreement Sangamon will play in Division VIII with Macoupin, Montgomery and Christian. Mercer county is considering entering a team in the western division and Winnebago may organize a team to play in Division I.

The league is already assured of 34 teams, which is the same number competing last year. At least three additional counties are considering organizing teams.

Outlook Hopeful for Future Wool Market

The extremely low stocks of wool garments on the shelves of distributors of wool and woolen fabrics furnish the one refreshing inspiration for hope of an improved market, according to the National Wool Marketing Corporation.

"Growers who may still be waiting for final returns on their 1931 shipments will realize," says the co-operative, "that any effort to force wool on mills that are closed or partly employed would only result in further price demoralization, over-advances and great injury to the coming clip.

"The National is committed to a policy of orderly marketing, having for its first consideration protection of reasonable price levels. Its future strength and usefulness will depend on the willingness of the growers to support the continuation of this policy.

"If the establishment of still lower prices seems possible, the manufacturer will not go ahead with production schedules even if substantial orders are in prospect."

If we didn't have to work, what a lot of bother it would be to think up something to do with our time.

Wool Growers Receive Final Checks for '31 Clip

Cite Benefits of Co-operative Marketing in District Meetings

CHECKS covering final returns on 1931 wool marketed through the National Wool Marketing Corporation have been mailed to Illinois growers, according to Ray E. Miller, director of livestock marketing.

The average net price received by members of the Illinois pool for their 1931 clip was approximately 13 to 14 cents, some receiving as much as 15 cents net for grades in most demand.

Miller, who recently attended a series of wool marketing meetings, reports that a large number of counties have already completed preliminary steps in organizing county pools for the 1932 clip. Among these are Knox, Henry, Mercer, LaSalle, Livingston, Adams, Morgan and Shelby counties.

C. M. Allen, field representative of the national co-operative, accompanied Miller on the tour, explaining the operations of the National Pool Marketing Corporation and the advantages of its methods of marketing wool.

A specific example of the benefits the pool offers is found in the handling of burry and seedy wool last year. Instead of selling for the low price which this grade of wool brings, the National Wool Marketing Corporation had it scoured and made into tops. As a result this wool netted the growers only slightly less than the better grades. In this way growers received additional profits, which ordinarily go to processors and dealers. This is only one of the advantages of co-operative marketing.

During the week April 18 to 22 wool marketing conferences held at Ottawa, Galesburg, Quincy, Springfield, Fairfield, and Champaign were attended by representatives from about forty Illinois counties.

District Conference at Jacksonville April 18

Approximately 150 Farm Bureau leaders from nine counties in the 20th I. A. A. district met at Jacksonville April 18 for an all-day district conference. President Earl C. Smith and Secretary George E. Metzger were present.

Metzger addressed the morning session at the Fox-Majestic theater on membership problems. After luncheon at the Peacock Inn, President Smith spoke on problems and policies of the organization. Charles S. Black, director of the I. A. A. from the 20th district, presided.

Livestock Marketing

The Illinois Livestock Marketing Association is a state-wide organization of livestock producers set up to provide marketing service under co-operative control for farmers not now having that service because of the breaking up of co-operative shipping associations; to serve as a connecting link between livestock farmers, Producer agencies and the National Livestock Marketing Association; and to correlate livestock marketing at country points with the operations of Producer agencies on terminal markets.

The five units of the Illinois Livestock Marketing Association operating in Iroquois, McDonough, Macon, Shelby, and Vermilion counties handled during the month of March 1,909,225 pounds of livestock or 109 standard cars.

The McDonough Livestock Marketing Association at the close of its first month's business showed that it had handled nearly 600,000 pounds of livestock. This was made up of 2,388 head of all species. Hogs numbered 2,331 head, cattle 24 head, and calves 33 head.

Direct sales as well as sales on several terminal markets were used in disposing of the Association's livestock. H. W. Trautmann, manager, says that the livestock producers have supported the marketing association substantially, but he points out the advantages of having a still larger volume. This co-operative is affiliated with the Illinois Livestock Marketing Association.

Livestock Values Cut Three Billions in Two Years

Values of livestock on farms have been marked down nearly three billion dollars in the last two years, according to the U. S. Department of Agriculture.

Although the total number of flocks and herds increased slightly during 1931 the value dropped from $4,450,000,000 to $3,196,000,000 in the twelve months. This decline of a billion and a quarter dollars was due wholly to price decline, the statement said.

The average value of a farm horse is now $63, the average value of a dairy cow is now $40 as compared with $57 a year ago, and the average hog brought $6.14 on January 1 this year compared with $11.36 a year ago.

Fewer Cattle on Feed

In the eleven Corn Belt states there were about 16 per cent less cattle on feed for market on April 1 this year than on the same date last year, according to the U. S. Dept. of Agr.

In the area east of the Mississippi river there was an increase of 12 per cent, but in the area west of the river there was a decrease of 21 per cent. The number on feed in Illinois was 110 per cent of the number a year ago.

A. F. B. F. Offers Prizes To Contest Winners

FOR the third consecutive year a contest is being conducted by the American Farm Bureau Federation to determine the county with the largest paid-up membership on next November 30. The prize is a huge silver loving cup, which becomes the permanent possession of any county Farm Bureau winning it three times. San Joaquin County Farm Bureau, Stockton, California, holds the cup at present on a record of 2,301 paid-up members on Nov. 30, 1931. They also won it the year previous.

A new contest this year is to determine the county Farm Bureau which has the largest number of farmers in its membership in proportion to the total farm population of the county based on 1930 census figures.

Another contest is open to determine the nation's champion volunteer membership solicitor. The award is a free trip to the American Farm Bureau convention in Chicago next Dec. 5 to 7. Last year F. E. Pease, member of Niagara County Farm Bureau in New York state, captured this honor with 160 members to his credit.

Two national Farm Bureau quartet contests are to be conducted this year, one for male voices and one for mixed voices. Cash awards and medals accompany this contest.

For the women a national public speaking contest is to be conducted. Then finally for Farm Bureau publicity folks a contest has been instituted for which three silver loving cups will be the prizes. Complete details of the contest have been sent to county agents and to state Farm Bureau officials.

Membership in the Illinois Livestock Marketing Association at Galesburg, Bloomington and Paris, where organization work is being done preparatory to the establishment of co-operative concentration points, now numbers 1,064, 807 and 486 respectively.

Asparagus Growers Plan Tour of Chicago Market

ORGANIZED asparagus growers from Madison and Jersey counties are planning a tour of the South Water market in Chicago some time in the near future, according to Harry W. Day, director of fruit and vegetable marketing for the Illinois Agricultural Association. The date has not been definitely set, but will be around the middle of May, Day said.

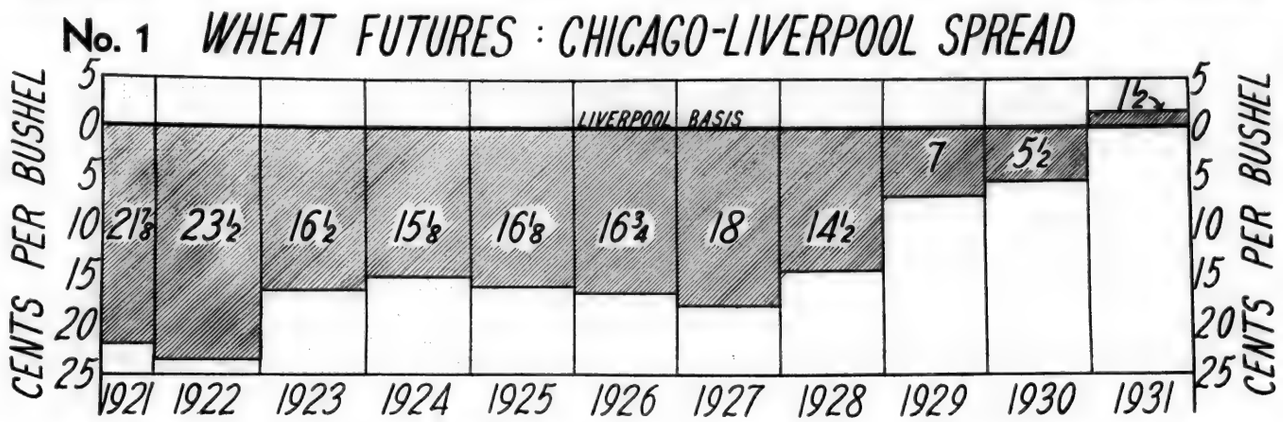
H. W. Day

The trip is being sponsored by the Illinois Fruit Growers Exchange, the Farm Bureaus, and the C. & A. railroad to familiarize the producers with merchandising on the terminal market. Asparagus growers in southwestern Illinois have for the past few years been marketing their commodity through the Godfrey Asparagus Growers Association, a co-operativee affiliated with the Illinois Fruit Growers Exchange.

Day became director of fruit and vegetable marketing for the I. A. A. on March 1, succeeding A. B. Leeper, who resigned to become general manager of the National Fruit and Vegetable Exchange. He also succeeded Leeper as manager of the Illinois Fruit Growers Exchange. Up to March 1 Day was production manager of the exchange and had been in charge of track sales for some time.

Demand for storage apples recently has enabled the Illinois Fruit Growers Exchange to dispose of all its storage holdings, according to Harry W. Day, manager. This is considerably earlier than the final holdings are usually sold.

New co-operative produce marketing associations are now being organized at Louisville, Clay county; Marion, Williamson county; Wyoming, Stark county; and Anna, Union county. A new unit was started in Lawrence county at Sumner recently.



Farmers Mutual Reinsurance Co.:

I wish to thank you for your prompt and courteous treatment in your settlement of my loss by fire covered by policy No. 4163.

Just four days after I mailed you the proof of loss I received the check covering the amount.

As I am a charter member of the company, I am certainly proud of the way the business is being taken care of. Please accept my thanks.

H. H. Webb,
Franklin County, Ill.

$200,000,000 More for Wheat

How the Marketing Act Has Narrowed the Chicago-Liverpool Price Spread and Helped the American Farmer

CHICAGO May wheat on April 1, 1931, closed at 84⅛ cents a bushel. On the same date Liverpool May wheat was 61¼ cents or 22⅞ cents a bushel under the Chicago price. Winnipeg May closed at 57⅛ cents or 27 cents under Chicago; and Buenos Aires 46¼ cents a bushel or 15 cents under the Liverpool price and 37⅛ cents a bushel under Chicago.

Had the Federal Farm Board not been supporting the market at that time it seems certain that wheat prices at Chicago would have been depressed to the world parity and reached approximately the same price level as obtained at Buenos Aires.

Another illustration will show further the benefits of the Agricultural Marketing Act during the latter part of 1930 and early 1931, when active stabilization operations were under way.

Stabilization Begins

The Liverpool May wheat future came on the board on September 19, 1930, the closing price on that date being 96⅝ cents against a closing price for the Chicago May of 91⅝, or 5 cents under Liverpool. About three months later, or on January 2, 1931, after stabilization operations had become fully effective, the May future at Liverpool closed at 61⅜ cents against 81 cents at Chicago.

The Chicago price at this time was 19⅝ cents higher than the Liverpool price as compared with 5 cents lower on September 19. During this period the Liverpool price declined 35¼ cents against a decline of only 10⅝ cents at Chicago.

During the five months immediately following, while stabilization operations were in full effect, the average closing price of the May future at Chicago was 83½ cents and at Liverpool 63⅜ cents, or an average spread of 20⅛ cents in favor of prices at Chicago, whereas under normal conditions the Liverpool price should have been 15 cents a bushel higher than the Chicago price.

Stabilization operations, as previously indicated, resulted in the price of wheat at Chicago being maintained at an average of 35 cents a bushel above world parity, and the American growers who marketed their wheat during that period benefited accordingly.

Liverpool Higher

Using the average of all active future prices, Chicago futures were 21⅞ cents below Liverpool for the year 1921. In 1922 Chicago futures averaged 23½ cents under Liverpool. These were two years of abnormally high transportation costs, especially in ocean freights. During the six years 1923 to 1928, Chicago futures averaged 16½ cents, 15⅛ cents, 16⅛ cents, 16¾ cents, 18 cents, and 14½ cents respectively, below the average prices of Liverpool futures, making a six year average spread of 16⅛ cents.

The Federal Farm Board was formally constituted July 15, 1929. On August 28, 1929, the policy of making loans to co-operatives was inaugurated. The average Chicago-Liverpool spread for the last four months of the year was 5.3 cents a bushel against 14.3 cents for the corresponding period in 1928 and 18.3 cents for the corresponding period in 1927.

In 1930 the effect of the Agricultural Marketing Act in keeping wheat prices at Chicago above world parity was still more pronounced. The average spread between Chicago and Liverpool futures prices for the year 1930 was 5⅛ cents, making the average price at Chicago approximately 10 cents a bushel above world parity.

Spread Narrows

In March, 1930, the Stabilization Corporation, under the direction of the Federal Farm Board began operations in support of higher prices through the purchasing of futures. This was followed by a very distinct narrowing of the spread between Chicago and Liverpool. A comparison of the prices of May futures alone shows Chicago 11 cents a bushel below Liverpool for the week ending January 10, 1930, whereas the average for the week ending March 1 shows the price of Chicago May futures 1 cent a bushel *over* the Liverpool.

These stabilization operations were suspended with the expiration of the May future with the result that the average all-future spread widened to 12⅝ cents a bushel for July. Beginning about the middle of August, 1930, support was again given to the market and the spread narrowed to an average of 2⅛ cents for October.

In December, Chicago was 8⅛ cents above Liverpool. For January, 1931, the average of all Chicago futures was 16 cents over the average of Liverpool futures. From the first of January to the end of May the weekly price differences ranged from 16 to 23 cents in favor of Chicago. The average difference for the five months was 20⅛ cents. Taking 1931 as a whole Chicago averaged 1½ cents a bushel over Liverpool, whereas under normal conditions Liverpool prices would have averaged about 15 cents a bushel over Chicago, making the Chicago price for the year average about 16½ cents a bushel over world parity.

Here Are More Facts

Summarizing the wheat price situation during the past three years, it is found that in 1929 prices for Chicago futures averaged 7 cents under Liverpool, and in 1930 the Chicago prices averaged only 5⅛ cents under Liverpool. In 1931 Chicago prices averaged 1½ cents a bushel over Liverpool. Combining the figures for these three years, an average price spread of 3.7 cents a bushel is shown. With normal transportation charges and other costs prevailing during that period, the spread should have been about 15 cents. In other words, for the past three years prices at Chicago average more than 11 cents a bushel above world parity.

The wheat crop of the United States in 1929 was 809 million bushels, in 1930 it was 858 million bushels, and in 1931 it was 892 million bushels. At 11 cents a bushel this figures to a total of $282,930,000 for the three years. After making allowances for the amount used for seed and feed there is still left an increased return of above $200,000,000 to American wheat growers.

The fact that the Agricultural Marketing Act has been the major factor in maintaining domestic wheat prices well above world parity with increased returns to growers completes only a part of the picture. The support given to wheat prices in turn helped the price of other grains and livestock, especially hogs.

Auto Insurance and Farm Supply Co.'s 5 Years Old

Tremendous Growth in Volume Business Revealed at Close of 1931

April 1 was the fifth birthday of two business enterprises of the Illinois Agricultural Association.

The Illinois Agricultural Mutual Insurance Company, organized to provide Farm Bureau members automobile insurance at cost, issued its first policies April 1, 1927. The Illinois Farm Supply Company, state purchasing agency for Farm Bureau co-operative oil companies, began operations on the same day.

The first automobile insurance policy went to Josiah J. Bait of Bond county. More than 3,000 Farm Bureau members had already sent in applications for insurance before the company started issuing policies. By the end of the first eight months the company had received 6,326 applications. Assets of the company at the end of this period were $125,000.

The Farm Supply Company started business with ten county companies already organized and a number of others in process of organization. By the end of seven months the company had 14 member companies and had handled for them a total of 3,500,000 gallons of petroleum products.

In contrast with its record at the end of the first year, the I. A. Mutual now has assets approximately $850,000 and has received to date more than 33,000 applications for insurance.

The Farm Supply Company in 1931 handled for its 47 member companies more than 33,000,000 gallons of petroleum products. Total capital stock in these county and district companies aggregates more than $900,000. Farm Bureau members received more than $500,000 in patronage dividends on last year's business.

Two other associated companies are older than these. They are the Illinois Agricultural Auditing Association, organized in 1924, and the Farmers Mutual Reinsurance Company, which started operations in 1925.

Plans for the expansion of the Shelby-Effingham Service Company have just been announced by Manager C. H. Becker. The program includes the building of a bulk storage plant in Effingham or nearby, and the addition of three new truck salesmen to the number already operating. More than $6,400 in preferred stock was subscribed for recently guaranteeing the success of the extension program.

JOHN REUTTER OF IROQUOIS CO. AND HIS THREE BOYS

"John Reutter and his boys have three cars and two trucks insured in the Illinois Agricultural Mutual," writes Carl Irving, special agent, "and all are policyholders in Country Life.

"Mr. Reutter is a progressive Farm Bureau member and takes an active interest in the welfare of his community. He is a real booster for the Farm Bureau."

The three boys left to right are: Orville, who drives an Iroquois County Service truck; Earl, who handles a milk route from Cissna Park to Kankakee; and Paul, who helps his father manage the farm and 20 fine Holstein cows.

March Leads in Farm Fires, Records Show

There are more farm fires in March than in any other month of the year. March also leads all the other months in the amount of fire insurance written on farm property. This information was gleaned from the records of the Farmers Mutual Reinsurance Company.

The fact that the company received applications for more fire insurance during the first week of March this year than in any week since it started business in 1925 indicates that hard times on the farm are not causing farmers to give up their fire protection.

The large number of fires at this time of the year is attributed to seasonal conditions many of which might be avoided by more caution on the part of the farmer. One cause of March fires is the fact that chimneys become stuffed with soot near the end of winter, creating an additional hazard.

Auto Insurance Company Has Earned Premium Gain

The quarterly financial report of the Illinois Agricultural Mutual Insurance Company shows an earned premium of $89,961.31 as compared with $79,248 during the first quarter of 1931, according to A. E. Richardson, manager.

This is evidence that Illinois farmers have not seen fit to go without automobile insurance. Approximately 1,000 new policies were taken out by Farm Bureau members during the first quarter. During the week April 18 to 23, 99 new policies were written.

There seems to be quite a bit of trading going on in the state, judging from the large number of transfers coming in now, Richardson said.

Country Life Increases Assets 25% in Two Mos.

Policyholders Achieve Outstanding Record in Paying 1932 Premiums

A 25 per cent increase in assets during the first two months of 1932 is one of the newest records established by Country Life Insurance Company.

Assets of the company grew from $1,201,000 on December 31, 1931, to $1,494,000 on February 29, according to Manager L. A. Williams. Country Life established an unusual record last year when its assets were doubled in twelve months.

This rapid growth of assets is partly accounted for by the fact that the company has experienced a very low mortality rate. Williams reported that on children between the ages 0-15 the mortality was only 11 per cent of the expected.

Another factor that Williams pointed out is that the entire assets of the company are invested in the highest type of bonds available. Country Life has not had a single investment default in principal or in interest.

"The confidence of the policyholders in Country Life is proved by the low lapse rate," Williams said. "Out of the $11,940,000 worth of insurance in force in 1929, on which the fourth premium was due in February this year, all but 1 per cent paid the premiums due. In other words, only $80,000 worth of insurance lapsed out of nearly $12,000,000 in force in 1929."

V. Vaniman, director of insurance service for the I. A. A., says it costs money to hurt people and to get hurt in automobile accidents. If for no other reason, the Farm Bureau auto accident prevention campaigns are worthwhile as a money saver, he says.

Marshall-Putnam members are making auto accident prevention a major project in 1932. Other counties are continuing their safety work. Last year work done by the County Farm Bureaus in accident prevention is credited with reducing farm auto accidents considerably. An extensive drive is being planned to make the 1932 auto safety program the greatest the Farm Bureaus have ever put over.

He also mentioned the fact that spring activity on the farm was causing a considerably number of farmers to avail themselves of the employers' liability insurance service, which costs Farm Bureau members only about 2½ cents a day per man employed.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Application for transfer of second class entry from Marshall, Ill., to Spencer, Ind., pending. Acceptance for mailing at special rates of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

Number 6 | JUNE, 1932 | Volume 10

Drive For Lower Taxes

I. A. A. And Farm Bureaus Direct State-Wide Campaign To Reduce Cost of Government

A STATE-WIDE campaign of study and investigation into expenditures of local governments where 80 to 90 per cent of the farmers' tax money goes will be carried on throughout June by County Farm Bureaus supported by the Illinois Agricultural Association.

The movement will be assisted in a series of district conferences. Its object is to cut out unnecessary public offices and services, promote reasonable reductions in cost of needed services, reduce and perhaps temporarily abolish certain levies on property, and so lower the farmers' tax burden.

Dates and places of District Tax Conferences were tentatively scheduled as follows: district 14, May 25, Aledo; district 15, June 2, Rushville; district 25, June 6, Murphysboro; district 24, June 7, Carmi; district 23, June 8, Olney; district 19, June 9, Tuscola; district 18, June 10, Danville; district 20, June 20, Jacksonville; district 22, June 21, Edwardsville; district 21, June 22, Springfield; district 16, June 23, Peoria; district 13, June 24, Oregon; district 12, June 27, Sycamore; district 17, June 28, Bloomington; district 11, June 29, Geneva.

Farm Bureau tax committees, which already have played a leading part in bringing about substantial cuts in assessed valuations in nearly all counties will be armed with facts. They will first check up the amount of bonded or other indebtedness in each taxing district, get the levy on property in each district, scrutinize annual expenditures, and secure balances in treasuries.

Money paid into the county general fund by the different fee offices such as the county clerk, circuit clerk, treasurer and sheriff, and amounts received by each school district from the state common school fund will be studied.

Stop the waste, if any, of public funds. Reduce or omit tax levies where there is a substantial balance in public treasuries. Postpone unnecessary equipment expenditures. Drive for reasonable salary reductions. These will be the principal aims of the tax committees.

What can be done to lower taxes by consolidating small taxing districts into larger units? What savings can be effected by combining country school districts and paying local taxpayers to transport children to school? Are poor relief funds being administered wisely? Is the county poor farm self-supporting and if not what can be done to make it so? These are some of the questions the Farm Bureau committees will dig into.

The Illinois Agricultural Association will concentrate its efforts on a study of state expenditures and laws determining county and local expenditures. The driving force behind the movement is the knowledge that in the past 10 years the tax bill on all Illinois farm property has decreased little or none in spite of heavy loss of values and repeated cuts in farm land valuations, whereas farm income in the same period dropped nearly 70 per cent.

The state-wide campaign to get the facts on which to build a sensible, constructive program of further tax reduction is a continuation of the tax studies initiated by the I. A. A. more than 10 years ago, the results of which are familiar to informed Farm Bureau members.

A slash of one and one-half million dollars from Illinois farm taxes this year in comparison with the 1931 tax bill is the latest accomplishment largely brought about by efforts of county Farm Bureau tax committees and the I. A. A.

The 1932 taxes on Illinois farm lands and improvements are at least $6,500,000 less than they would have been had the high valuations of 1923 not been reduced.

This means an average saving

(*Continued on next page*)

THESE MEN TOOK AN ACTIVE PART IN ORGANIZING THE I. A. A. ON ITS PRESENT BASIS IN THE MEMBERSHIP CAMPAIGN OF 1919-1920. HOW MANY CAN YOU IDENTIFY?

The large number of fires at this time of the year is attributed to seasonal conditions many of which might be avoided by more caution on the part of the farmer. One cause of March fires is the fact that chimneys become stuffed with soot near the end of winter, creating an additional hazard.

Auto Insurance Company Has Earned Premium Gain

The quarterly financial report of the Illinois Agricultural Mutual Insurance Company shows an earned premium of $89,961.31 as compared with $79,248 during the first quarter of 1931, according to A. E. Richardson, manager.

This is evidence that Illinois farmers have not seen fit to go without automobile insurance. Approximately 1,000 new policies were taken out by Farm Bureau members during the first quarter. During the week April 18 to 23, 99 new policies were written.

There seems to be quite a bit of trading going on in the state, judging from the large number of transfers coming in now, Richardson said.

Country Life Increases Assets 25% in Two Mos.

Policyholders Achieve Outstanding Record in Paying 1932 Premiums

A 25 per cent increase in assets during the first two months of 1932 is one of the newest records established by Country Life Insurance Company.

Assets of the company grew from $1,201,000 on December 31, 1931, to $1,494,000 on February 29, according to Manager L. A. Williams. Country Life established an unusual record last year when its assets were doubled in twelve months.

This rapid growth of assets is partly accounted for by the fact that the company has experienced a very low mortality rate. Williams reported that on children between the ages 0-15 the mortality was only 11 per cent of the expected.

Another factor that Williams pointed out is that the entire assets of the company are invested in the highest type of bonds available. Country Life has not had a single investment default in principal or in interest.

"The confidence of the policyholders in Country Life is proved by the low lapse rate," Williams said. "Out of the $11,940,000 worth of insurance in force in 1929, on which the fourth premium was due in February this year, all but 1 per cent paid the premiums due. In other words, only $80,000 worth of insurance lapsed out of nearly $12,000,000 in force in 1929."

V. Vaniman, director of insurance service for the I. A. A., says it costs money to hurt people and to get hurt in automobile accidents. If for no other reason, the Farm Bureau auto accident prevention campaigns are worthwhile as a money saver, he says.

Marshall-Putnam members are making auto accident prevention a major project in 1932. Other counties are continuing their safety work. Last year work done by the County Farm Bureaus in accident prevention is credited with reducing farm auto accidents considerably. An extensive drive is being planned to make the 1932 auto safety program the greatest the Farm Bureaus have ever put over.

He also mentioned the fact that spring activity on the farm was causing a considerably number of farmers to avail themselves of the employers' liability insurance service, which costs Farm Bureau members only about 2½ cents a day per man employed.

Number 6 | JUNE, 1932 | Volume 10

Drive For Lower Taxes

I. A. A. And Farm Bureaus Direct State-Wide Campaign To Reduce Cost of Government

A STATE-WIDE campaign of study and investigation into expenditures of local governments where 80 to 90 per cent of the farmers' tax money goes will be carried on throughout June by County Farm Bureaus supported by the Illinois Agricultural Association.

The movement will be assisted in a series of district conferences. Its object is to cut out unnecessary public offices and services, promote reasonable reductions in cost of needed services, reduce and perhaps temporarily abolish certain levies on property, and so lower the farmers' tax burden.

Dates and places of District Tax Conferences were tentatively scheduled as follows: district 14, May 25, Aledo; district 15, June 2, Rushville; district 25, June 6, Murphysboro; district 24, June 7, Carmi; district 23, June 8, Olney; district 19, June 9, Tuscola; district 18, June 10, Danville; district 20, June 20, Jacksonville; district 22, June 21, Edwardsville: district 21, June 22, Springfield; district 16, June 23, Peoria; district 13, June 24, Oregon; district 12, June 27, Sycamore; district 17, June 28, Bloomington; district 11, June 29, Geneva.

Farm Bureau tax committees, which already have played a leading part in bringing about substantial cuts in assessed valuations in nearly all counties will be armed with facts. They will first check up the amount of bonded or other indebtedness in each taxing district, get the levy on property in each district, scrutinize annual expenditures, and secure balances in treasuries.

Money paid into the county general fund by the different fee offices such as the county clerk, circuit clerk, treasurer and sheriff, and amounts received by each school district from the state common school fund will be studied.

Stop the waste, if any, of public funds. Reduce or omit tax levies where there is a substantial balance in public treasuries. Postpone unnecessary equipment expenditures. Drive for reasonable salary reductions. These will be the principal aims of the tax committees.

What can be done to lower taxes by consolidating small taxing districts into larger units? What savings can be effected by combining country school districts and paying local taxpayers to transport children to school? Are poor relief funds being administered wisely? Is the county poor farm self-supporting and if not what can be done to make it so? These are some of the questions the Farm Bureau committees will dig into.

The Illinois Agricultural Association will concentrate its efforts on a study of state expenditures and laws determining county and local expenditures. The driving force behind the movement is the knowledge that in the past 10 years the tax bill on all Illinois farm property has decreased little or none in spite of heavy loss of values and repeated cuts in farm land valuations, whereas farm income in the same period dropped nearly 70 per cent.

The state-wide campaign to get the facts on which to build a sensible, constructive program of further tax reduction is a continuation of the tax studies initiated by the I. A. A. more than 10 years ago, the results of which are familiar to informed Farm Bureau members.

A slash of one and one-half million dollars from Illinois farm taxes this year in comparison with the 1931 tax bill is the latest accomplishment largely brought about by efforts of county Farm Bureau tax committees and the I. A. A.

The 1932 taxes on Illinois farm lands and improvements are at least $6,500,000 less than they would have been had the high valuations of 1923 not been reduced.

This means an average saving

(Continued on next page)

THESE MEN TOOK AN ACTIVE PART IN ORGANIZING THE I. A. A. ON ITS PRESENT BASIS IN THE MEMBERSHIP CAMPAIGN OF 1919-1920. HOW MANY CAN YOU IDENTIFY?

of nearly $33 in taxes on each of the 214,000 farms of three acres or more in the state. In a number of counties the actual reduction amounts to this much from 1931 to 1932 alone.

Assessed valuations of Illinois farm lands and improvements were cut more than $286,000,000 in 1931, it is shown in a survey recently completed. This means that the total assessed values of these farm properties, excluding Cook county, are now approximately 15.9 per cent below 1930 values.

All Except Six

Every county in the state except six received reductions in lands during the past year ranging from less than one per cent to as much as 37 per cent. In some instances land was assessed as much as $20 to $25 an acre lower. The greatest decrease in dollars per acre was in Ford county, where $25.16 was cut from the old valuations. Reductions in McLean and Stark counties were $19.84 and $19.83 respectively.

Hamilton county reduced land values a greater per cent than any other county with a slash of 37.5 per cent. Fayette county cut valuations 32.59 per cent and Clay county came next with 30.24 per cent. Fourteen counties had reductions of at least 25 per cent.

Valuations of farm lands and improvements in McLean county were actually reduced more than $14,500,000, or from $59,581,775 to $44,883,425. In Iroquois county the cut totaled approximately $11,739,000.

Even with these drastic reductions in assessed valuations, they are still out of line with present selling values. Figures just released by the Bureau of the Census show that during the decade from 1920 to 1930 farm property valuations declined 26.5 per cent. Since 1930 there have been more rapid declines in values.

Piatt county offers a typical example of the influence of the Farm Bureau tax reduction program. "Taxpayers in Piatt county are paying $107,714 less taxes this year than a year ago because of lower assessments secured largely through efforts of the Farm Bureau," according to M. F. Walsh, a member of the 1931 Farm Bureau tax committee.

"It was not easy to secure lower assessments," stated Mr. Walsh, "and very likely we did not get as great a reduction as many would have liked or as should be secured in the future. *We would have greater effectiveness if we could state that we represent almost all the farmers in the county rather than a little less than half of them.*

Also Lower Taxes

"We not only got lower valuations but also lower taxes. The decrease of $2,808,510 in valuations spread over the 275,557 acres of farm lands in the county means an average decrease of $10.19 an acre and an actual reduction of taxes on farm lands averaging 31¼ cents an acre.

"It goes without saying that the tenant as well as the owner will benefit from this tax relief of about $50 per quarter section. Credit must be given to local taxing units that helped work out such sensible and constructive movements."

Thirty-six farms picked at random from various townships in Rock Island county show how the fight waged by the Farm Bureau last December succeeded in lowering farm taxes. All the farms examined except one paid less taxes for 1931 than for 1930.

The only farm among these 36 to show an increase in taxes is one of 185 acres which paid $2.88 more than last year. The others ranged from $3 to $80 less. One 90-acre farm saved $20 on its 1931 tax bill; a 320-acre farm saved $40; a 250-acre farm, $14.61; and a 160-acre farm, $80.88.

From $2 to $72

In a similar test in McDonough county, every one of 36 farms showed a reduction in taxes. The actual dollars-and-cents savings ranged from $2 to $72 per farm. In 10 cases out of the 36 the reduction was more than $50 per farm. This saving is in the most part accounted for by the 25 per cent reduction in assessed valuations secured through the efforts of the public relations committee of the McDonough County Farm Bureau.

Sangamon county is another example of the influence of the Farm Bureau in securing tax equalization. There the cut in valuations on farm lands and improvements last year was 26.89 per cent, a reduction of $18.88 per acre on the assessed valuation of lands. On a quarter section of land with a total tax rate of $3 per $100 the saving amounts to more than $90.

The following table lists the percentage reductions (or gains) in valuations of farm lands and improvements from 1930 to 1931:

REDUCTIONS (OR INCREASES) IN ASSESSED VALUATIONS OF ILLINOIS LANDS AND IMPROVEMENTS, 1930-1931

G. L. Clarke of McLean county was chosen dictator for District VI, Illinois Farm Bureau Baseball League, at the organization meeting held at Bloomington. This division includes McLean, Livingston, Ford, and Logan counties.

At the annual spring meeting of Illinois Farm Bureau Baseball League, Bloomington, where plans for the 1932 season were worked out.

Most of the 36 teams in the Illinois Farm Bureau Baseball League went into action Saturday, May 21, when the ninth season of the league was officially opened in most of the nine districts.

Although several of last year's teams failed to enter the league this year, a number of new counties organized teams to take their places. Last year 34 teams were affiliated with the state organization.

Games within divisions will continue until about the middle of August. At that time winners in the nine districts will start the elimination contests for the state finals.

The general practice is for each team to play every other team in its district at least two games during the season. District winners are then chosen on their percentage of games won and lost.

Ford county defeated McLean in the opener of the season May 21 by a score of 16 to 2. McLean was held to six hits, three of which were doubles by Builta. Read, the Ford county hurler, struck out six batters. The game was played at Purdueville in Ford county. Weinzeirl and Caton pitched for McLean.

Winnebago took JoDaviess for a cleaning 14 to 5 in their initial game. Winnebago is a newcomer in the league this year. The heavy hitting of the Winnebago team (19 hits) was an outstanding feature. JoDaviess got nine hits. Batteries for Winnebago were Rhyner and Walch; for JoDaviess C. Ware, Bonjour, and F. Kupersmith.

Honefinger of Christian county turned in the best pitching record for the day when he let Montgomery county down with only 4 hits, resulting in a 13 to 1 victory for Christian at Hillsboro. E. Ray and Claykamp pitched for Montgomery. Hawkins and Unser were the heavy hitters for Christian with three hits each.

Carroll county defeated Lee 12 to 6 in an evenly matched hitting contest in which 7 errors by Lee played an important part. Carroll got 12 hits and Lee 10. Vivian, pitching for Lee, turned in eight strikeouts. E. Rahn and Levan hurled for Carroll.

DeKalb hitters swamped Kane county with 22 hits to win 20 to 15. C. Johnson, pitching for Kane, was unable to halt the DeKalb nine in spite of ten strikeouts. DeKalb used Nelson, R. Challand, and McKenzie on the mound. The three pitchers together struck out 17 batters. Bartelt, Kane county short stop, hit a homerun; Gramley, Kane third baseman, got a double and two triples; Decker of DeKalb got three doubles and two singles.

Lake county defeated Boone in a 10-6 game at Belvidere. Lake got ten hits to Boone's seven. Dowell pitched for Lake; Camp for Boone. Wallace and Paddock of Lake and McEachran of Boone hit homeruns. The game was tied 2-2 at the opening of the eighth inning. Lake then ran in six runs and two more in the ninth to make Boone's four-run rally in the ninth ineffective.

McDonough county wound up on the long end of a 6 to 5 score in a see-saw game with Knox county at Macomb. Knox went into the sixth inning with a 4 to 1 lead, but two errors, a hit batter, and a single gave McDonough two runs, and in the seventh two walks, an error, a single and a double scored three runs to give them the lead. Ross Sornberger did the pitching for Knox and Arntzen was on the mound for McDonough. Sornberger turned in three singles and a homerun to complete his day's work.

Henderson county's six errors and the 16 hits produced by the Henry county nine resulted in a 13 to 4 victory for the latter in a game at Carman. Henry played errorless baseball behind Vandersnick and Robson, who allowed nine hits. Anderson and Samuelson of Henry produced homeruns. Pogue, Leinbach, and Chandler pitched for Henderson.

Commission Men Trying To Ditch Co-op Marketing

Agr. Marketing Act Working Too Well To Suit Them, Kirkpatrick Says

PRIVATE operators in farm products, who helped get the Agricultural Marketing Act enacted, are today trying to ditch the whole program of co-operative marketing because they now see that it is succeeding in spite of the limitations of the Act, Donald Kirkpatrick, legal counsel for the Illinois Agricultural Association, declared before 600 farmers and business men at Decatur May 3.

"The law is not working to the full satisfaction of the farmer," he said, "but it is working so well that those who originally were for it because they thought it wouldn't work, are now using every effort to get rid of co-operative marketing."

Kirkpatrick explained that the group especially interested in the repeal of the marketing act was made up principally of grain and livestock commission men and was organized as the Federation of American Business Men.

"This group does not attack co-operative marketing directly," he said. "It attempts to cover up its activities by blaming the Agricultural Act and the government in general. They use every means to deceive farmers as to the actual results that are being accomplished by co-operative marketing.

"Co-operative marketing tends to stabilize prices which is just what the speculative grain buyer does not want. He wants the prices to bob up and down.

"The Agricultural Marketing Act was not what farmers asked for through their organizations. The Farm Bureau leaders, however, agreed to use the legislation and try to make it work, with the understanding that if it was found incomplete amendments would be asked to make it effective.

"This is the position of the Farm Bureau today. It is not asking that the act be repealed, but that it be amended with the addition of some devices by which surplus may be controlled."

An attorney named Hensley from Decatur, and Fred Cummings of Mazon, formerly an organizer for the Farm Bureau, engaged Mr. Kirkpatrick in friendly debate at the close of the meeting. Hensley and Cummings are trying to get a new organization started known as the Farmers Protective Association.

It was generally agreed that farmers wouldn't get anywhere by dividing their forces among new organizations. Kirkpatrick pointed to the record of the Farm Bureau and invited non-members to join and lend their influence for the good of the industry.

Jim Stone Replies To Grain Trade Criticisms

Charges Grain Gamblers Trying To Get Stabilization Wheat Because It's Going Higher

James C. Stone, chairman of the Federal Farm Board, bowled over spokesmen for the grain trade who have been criticizing the methods of the Grain Stabilization Corporation in disposing of its wheat holdings, in a recent statement.

He charged that "grain gamblers" running true to form are trying to get hold of the stabilization corporation's grain at bargain prices because the outlook is for higher wheat prices. He challenged the grain trade to explain how it is that wheat has been held from 5 to 15 cents a bushel above the world market, whereas before the stabilization operations the American price ranged considerably below the world price.

"Newspaper reports of statements of Mr. Peter B. Carey, president of the Chicago Board of Trade, in regard to methods of disposal of the stocks of the Grain Stabilization Corporation, indicate an attitude towards liquidation of these stocks strictly in conformity with the long established viewpoint of board of trade members," said Mr. Stone.

"They look upon themselves as middlemen, entitled by custom to take a heavy toll from American wheat producers for so-called services, which consist chiefly in the pocketing by themselves of the largest possible share of the consumer's dollar. Every suggestion so far made in the present depressed situation to this board for their assistance has contained as its chief element personal profit to those tendering aid either by buying at prices ridiculously below the market or for commissions on huge volume.

Calls Liquidation Orderly

"Liquidation of the stocks of the Grain Stabilization Corporation under the plan announced on June 30, 1931, has proceeded in such a manner that American wheat prices have been maintained at substantially 5 to 15 cents a bushel higher than world market price parity in the face of the most trying marketing conditions known to any living man. Let the grain gambling critics explain to the public how and why this happened.

"The crop outlook today leads qualified observers to conclude that brighter days are in prospect for our wheat producers. Winter wheat reports indicate low production. Spring areas do not promise excess supplies. No wonder the speculatively inclined seek wheat stocks on the bargain counter. The Grain Stabilization Corporation has none to offer on that basis.

Predicts Upward Swing

"Wheat is the only great major commodity which for the last five months has shown a definite upward tendency. Its influence under the present favorable statistical position may well lead other commodities to higher ground. That opportunity will not be risked in the hands of people in a group representing those who have grown rich from the profits gained by market manipulation. The recent disclosures as to the operations of brother speculators in stocks do not encourage the placing of great power in such hands. The orderly method of distributing as demand arises will be continued.

"The public should not be fooled by such attacks on the farm board as those of Mr. Carey. Their purpose is not to help in the present situation but to prevent the farmer organizing his business so that he, in a measure, can control the method under which his products are sold."

Packers Shall Not Enter Grocery Business

The Supreme Court of the United States recently denied the meat packers the right to pack and distribute other food products. The decision upheld the packers' consent decree of 1921.

"Size and aggressions induced the fear in 1920 that the defendants (the packers), if permitted to deal in groceries, would drive their rivals to the wall. Size and past aggressions leave the fear unmoved today," the court stated in its majority opinion, written by Mr. Justice Cardozo. The packers contended that there no longer is need for any restraint against their handling groceries at wholesale and that this prohibition is oppressive and unjust.

A dissenting opinion by Mr. Justice Butler was concurred in by Mr. Justice Van Devanter. Chief Justice Hughes and Mr. Justices Sutherland and Stone did not participate in the case, having engaged in prior proceedings.

Pres. Smith In Washington Working For Legislation

Seek Congressional Action On Measures To Raise Farm Prices

As we go to press President Earl C. Smith is in Washington with other Farm Bureau officials to urge the passage of emergency crop surplus control legislation, and other measures designed to raise farm commodity prices.

"I expect to stay on the job until something effective is done to raise the price of farm products," he said before his departure. "The terrific decline in the price of farm products has wiped out the farmer's debt-paying ability and buying power. In my judgment the wheels in the factories will not start turning until Congress acts to restore farm prices to a reasonable level. Farmers are in the market for almost everything. They have no money to buy. It's time our industrial, financial and political leaders came to a full realization of the fundamentals of this problem.

Pleaded in Vain

"Farmers have pleaded in vain for nearly ten years for effective surplus control legislation. They have been given half loaves long enough. We are approaching the end of our rope. Until this issue is met and met squarely industry as well as agriculture cannot hope for substantial improvement.

"There must be more concerted effort and determination at Washington than has yet been apparent. Some leaders have suggested that the farmer will be taken care of at the national political conventions. We believe that Congress can and should do something before it adjourns."

Before House Committee

The senate agricultural committee approved the measure authorizing the Farm Board to use the equalization fee, export debenture, or crop allotment plan at its discretion in raising the domestic price on farm products. The bill at this writing lies in the house committee on agriculture where sentiment is divided for and against it.

Six Cities Invite I. A. A. For '33 Annual Convention

Competition Narrowed After Vote to Peoria, Decatur, Danville

SIX Illinois cities including Peoria, Danville, Decatur, Springfield, Moline, and Joliet asked for the next annual convention of the Illinois Agricultural Association to be held January 25, 26, 27, 1933. The invitations were extended at the May meeting of the I. A. A. board of directors by representatives of County Farm Bureaus and chambers of commerce from Peoria, Vermilion, Macon, Sangamon, Rock Island, and Will counties.

Delegations from the various counties were led by Albert Hayes, president, Peoria County Farm Bureau; Mike Finn, Peoria Association of Commerce; Farm Adviser Otis Kercher of Vermilion county and Assistant Secretary Gage of the Danville Chamber of Commerce; M. C. Hamilton, secretary and E. H. Walworth, farm adviser of the Macon County Farm Bureau; C. C. Koller, Springfield Chamber of Commerce; B. H. Bollman, president, Farm Adviser John Spencer, Edgar Walther, director, Wm. H. Moody of the Rock Island County Farm Bureau and Secretary Darland of the Moline Chamber of Commerce; and James Bell, manager convention bureau, Joliet Chamber of Commerce.

Mr. Finn stated that hotel rates at Peoria have come down and 150 rooms have been added to the principal hotel; that facilities are available for handling a banquet for 2,000 people.

Decatur offered its armory, the new Masonic Temple, and plenty of hotel facilities. Danville has an armory with improved acoustics to seat 1,800 people at the dinner table with a balcony for 1,500 spectators.

Moline offered its mammoth Field House to seat 2,000 people with room for 1,200 to 1,400 on the sides. Joliet called attention to its new hotel and offered the mammoth high school auditorium and gymnasium for the larger convention. Springfield based its claim for recognition on the service rendered at previous annual meetings.

The board of directors narrowed the competition to Peoria, Danville, and Decatur and appointed a committee to investigate facilities in each city and report at the June meeting of the board.

UNEMPLOYED MEN TURN TO GARDENING

The International Harvester Co. seeking to aid 4,500 former employees of their factories in Chicago leased over 1,000 acres of land on the outskirts of the City, and furnished it with modern gardening machinery. Each man was given one-fourth of an acre with seeds and instructions for raising and storing vegetables.

The men will be forbidden to sell their crops. Transportation in busses will be furnished to and from the plots and the gardens will be constantly guarded against thieves.

Expect Decision Soon On Chicago Milk Price

DR. Clyde L. King of the Wharton School of Commerce, Philadelphia, serving as milk price arbitrator at Chicago, is expected to make a decision shortly as to whether the present distribution of the 11 cents per quart price bebetween the producers and distributors shall stand.

The 11 cent price went into effect on May 10 following a decision by Dr. King when he took under advisement the question of the price of milk to the farmers. He asked for time to study the effect on the market of the one cent change on quarts.

Said Dr. King, "I have grave doubts whether the dealers can live under the small margin left them. Market factors must also be considered. This change from 12 to 11 cent milk passes on to the consumer under present farm prices more than the dealers saved under the recent wage agreement."

The present base price at Chicago is $2.01 per cwt. for 3.5 per cent milk f. o. b. country. Farmers already have taken two cuts amounting to more than 30 per cent, the Pure Milk Association pointed out, whereas organized labor took a cut of only 10 per cent.

An effort to get milk wagon drivers to take a cut of $50 minimum per week to $40 per week was rejected. The milk wagon drivers' union compromised by taking $45 per week. The dealers did not press the point apparently but asked farmers to take an additional cut to $1.75 per cwt. The organized producers refused and so Dr. King was called in to arbitrate the matter.

Seek To Protect People Going Back To The Land

A REQUEST that Congress direct the Secretary of Agriculture to provide the services of his department in guiding and safeguarding both public and private movements to put the unemployed back on the land, was made by the National Advisory and Legislative Committee on Land Use during a recent meeting at Washington. President Earl C. Smith sat as a member of the committee during its deliberations.

Because of the personal tragedies and the group distress that have resulted from wholesale, indiscriminate back - to - the - land movements in the past, the committee reported, the guidance of some well-equipped national agency is necessary. Business, civic, and relief agencies have been active recently in advancing plans by which the unemployed can be put on the land.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Regulated Production For Agriculture

PERHAPS the biggest news that has come out of Washington recently is the Supreme Court's approval of the oil proration plan adopted by the State of Oklahoma.

The Supreme Court in a unanimous opinion written by Mr. Justice Butler, said relative to the argument that the Champlin Refining Company "has a vested right to drill wells upon the lands covered by its leases and to take all the natural flow of oil and gas therefrom so long as it does so without stated physical waste, and devotes the production to commercial uses," that **"if plaintiff should take all the flow of its wells, there would inevitably result great physical waste even if its entire production should be devoted to useful purposes."**

While granting that every person has the right to drill wells on his own land and take from the pools below all the gas and oil he may be able to reduce to possession including that coming from land belonging to others, the court said: **"The right to take and thus acquire ownership is subject to the reasonable exertion of power of the state to prevent unnecessary loss, destruction or waste."**

This far-reaching decision has great future significance to agriculture. It sets a precedent for a land policy to control crop production "in the interest of soil conservation." Informed people know that the real reason for the Oklahoma statute was to control the surplus production and so improve prices. Conservation of oil was a factor but this argument was merely used as an excuse to compel the consuming public to pay more for petroleum products. At any rate the proration plan is helping to put the oil business back on a profitable basis. One large company announced that it had made a profit in April—the first in more than a year.

There is as much if not more reason for controlling crop production and conserving soil fertility as there is for limiting oil production. A far greater percentage of our population is dependent upon agriculture than on the oil business. Soil fertility, moreover, is not inexhaustible. Plant food is now being taken from the soil and wasted in the production of crops for which there is no profitable market.

Government regulation of crop production and soil conservation may be the solution to the farm problem. Oklahoma has pointed the way.

Mr. Stone's Reply

CHAIRMAN "Jim" Stone has proved repeatedly his ability to handle critics of the Farm Board and its policies.

Answering Peter Carey, the president of the Chicago Board of Trade who would have the Farm Board disband and turn over its wheat to "six Chicago grain traders who could dispose of it at a steadily advancing price," Mr. Stone said:

"Reported statements of Mr. Carey indicate an attitude towards liquidation of these stocks strictly in conformity with the long established viewpoint of board of trade members.....

"They look upon themselves as middlemen entitled by custom to take a heavy toll from American wheat producers for so-called services, which consist chiefly in the pocketing by themselves of the largest possible share of the consumer's dollar. Every suggestion so far made to this board for their assistance has contained as its chief element personal profit to those tendering aid either by buying at prices ridiculously below the market or for commissions on huge volume.

"The public should not be fooled by such attacks on the Farm Board as those of Mr. Carey. Their purpose is not to help in the present situation but to prevent the farmer organizing his business so that he, in a measure, can control the method under which his products are sold."

The public may be fooled by such statements but we are sure farmers are not. Grain trade attacks are making more friends for the Farm Board and co-operative marketing than they ever could hope to make without such aid. People are judged oftentimes by their enemies. The Farm Board has been fortunate in the selection of its enemies.

Mr. Stone's reply presented more fully on page 6 is sharp but refreshing and suited to the demagoguery and intemperance of his critic's reported statement. The Farm Board and some of the cooperative agencies it has sponsored may have made mistakes. Most young organizations do. But they are making progress that already is benefiting the man on the farm. And the enemies of organized agriculture know it.

In Union There is Strength

Clayton L. Patterson, editor and publisher of the Brown County Press, Mt. Sterling, Ill., who wrote the accompanying editorial, served for fifteen years as executive secretary of a trade association in Chicago before entering the newspaper business. "I feel that I know something of the value of organized effort," he writes in granting permission to reprint his discerning statement.

LESS THAN ten per cent of the farmers of the United States are members of any co-operative organization. There are approximately 210,000 farmers in Illinois of which about 30 per cent are organization members. About 25 per cent of the farmers of Brown county are members of the county Farm Bureau.

The farmer is not naturally gregarious. The very nature of his occupation tends to make him a more or less solitary individual, independent, inclined to depend upon his own efforts for success, rather than upon a united or co-operative activity.

But this natural instinct has been changed to some extent in recent years, due to closer contact with his fellow-man, through the influence of rural free delivery of mail, hard roads, the radio, the daily paper, the automobile, and last but not least, the college trained agriculturists. The farmer today takes a far more active interest in the affairs of the community than formerly and his occupation no longer isolates him from social influences.

We need only to compare the condition of the laborer today with that of fifty years ago to be convinced of the effectiveness of organization. There is no influence in government, in business, in politics, in commerce today as great as that of organized labor. Industries have been compelled to organize to maintain their position as between employer and employe. Bankers, manufacturers, musicians, government employes, railroad men, sailors, all are organized for their own protection and welfare and the promotion of the best interests of their industry or trade.

Farmers, who are both producers and laborers, have been slow to realize the strength of organized effort, and because of lack of centralized and directed effort, have been the football of politicians and unwilling victims of both organized capital and labor.

The number of farmers in the United States far exceeds that of any other single industry or organization. If farmers were organized to the same extent as are the manufacturers, bankers, merchants and workers of the country, their power and influence would be unlimited. They could elect or defeat presidents and legislators, make or destroy political parties, dominate the control of transportation and distribution and fix the prices of food and clothing as well as machinery and power. Organize the agricultural industry of the country and the farmer would be the czar of trade and commerce, no longer its victim.

A Brown county farmer, no matter what his economic situation may be, can in one year save considerably more than the cost of a year's membership in his county Farm Bureau through rebates on the purchase of gas and oil; through increased prices for his dairy products; through higher market prices for his livestock and through less costly insurance on farm property, life and automobile. A year's Farm Bureau membership pays for itself and enables the agricultural industry of county, state and nation to function as a whole for the advancement of individual interests.

There has never been a time in the history of our country when every farmer in this country should more firmly stand shoulder to shoulder with his fellow husbandmen for the upbuilding of the industry of which he is a part and upon which he depends for a livelihood and he can best play his part in the game of existence between agriculture, manufacturing and commerce by becoming a member of his county Farm Bureau, co-operating with state and national organizations, working for the recognition of agriculture as a basic industry of the country.

The Illinois Agricultural association has demonstrated its ability, its strength, its wisdom and its economy of operation with but thirty per cent of the farmers of Illinois on its membership roster. The county Farm Bureaus are the county branch of the state organization. **When one hundred per cent of the Illinois farmers join their county Farm Bureau, the farmers of Illinois will play an important part in the affairs of the state and their membership fee will be returned to them a hundred-fold.**

"So it's all for each and each for all. United, we stand; divided, we fall."

Higher Farm Prices And Stabilized Dollar, Aim

A. F. B. F. President Defines Object of Farm Bureau

"THE ultimate object of the Farm Bureau program is the restoration of farm purchasing power. The price the farmer receives for his commodity determines that purchasing power. Farm Bureau effort is directed at this phase of the program, and it is a matter directly concerned with what you receive for your farm produce that takes me to Washington next week," Edward A. O'Neal, president of the American Farm Bureau, said in a recent radio address to farm people.

EDW. A. O'NEAL

"Today the price level not only of farm commodities but of all goods of industry and commerce is below the 1921-'29 level. This deflation in price level is crushing farmers, merchants, and transportation agencies, and has caused such a decline in property values as to seriously impair the stability of our banking and insurance institutions and endanger the welfare of the general public.

"The chief cause is the failure of our monetary system to properly function as a free medium of exchange. There is not sufficient actual money in circulation to meet every-day demands. In a time of great plenty people are starving and hungry because of the breakdown of distribution and the distribution instrument that has failed has been our monetary system."

A committee of the American Farm Bureau Federation has been at work for some time studying federal government expenditures and services with the idea of recommending ways and means of reducing costs and securing greater efficiency.

The board of directors of the Farmers Mutual Reinsurance Co. recently voted to offer a five per cent discount for hail insurance policy-holders paying their assessments promptly on October 1.

Observations

More than a million dollars in patronage refunds and savings. That's what co-operative buying and insurance companies set up by the Farm Bureau in Illinois returned to members last year. More than the dues paid in to the organization, county, state, and national, by a wide margin. So have organized farmers helped themselves, kept more of their money in the country where it is sorely needed.

If the earnings, savings and refunds of co-operative marketing associations organized by the Farm Bureau were included, this figure would easily be doubled. But because marketing associations usually pay their "dividends" by compelling private buyers to offer better prices for farm products, the value of the co-operative selling agency is less appreciated and frequently denied by people who are either intellectually dishonest, thoughtless, or uninformed.

The patronage refund is a useful device to teach doubting Thomases the value of organized buying and selling. The refund check is tangible evidence that it pays to co-operate. Unfortunately it isn't possible for all co-operatives because of their nature to offer such proof of their ability to narrow the spread between producer and consumer prices. Thus they must rely on the intelligence of their members for continued support and patronage.

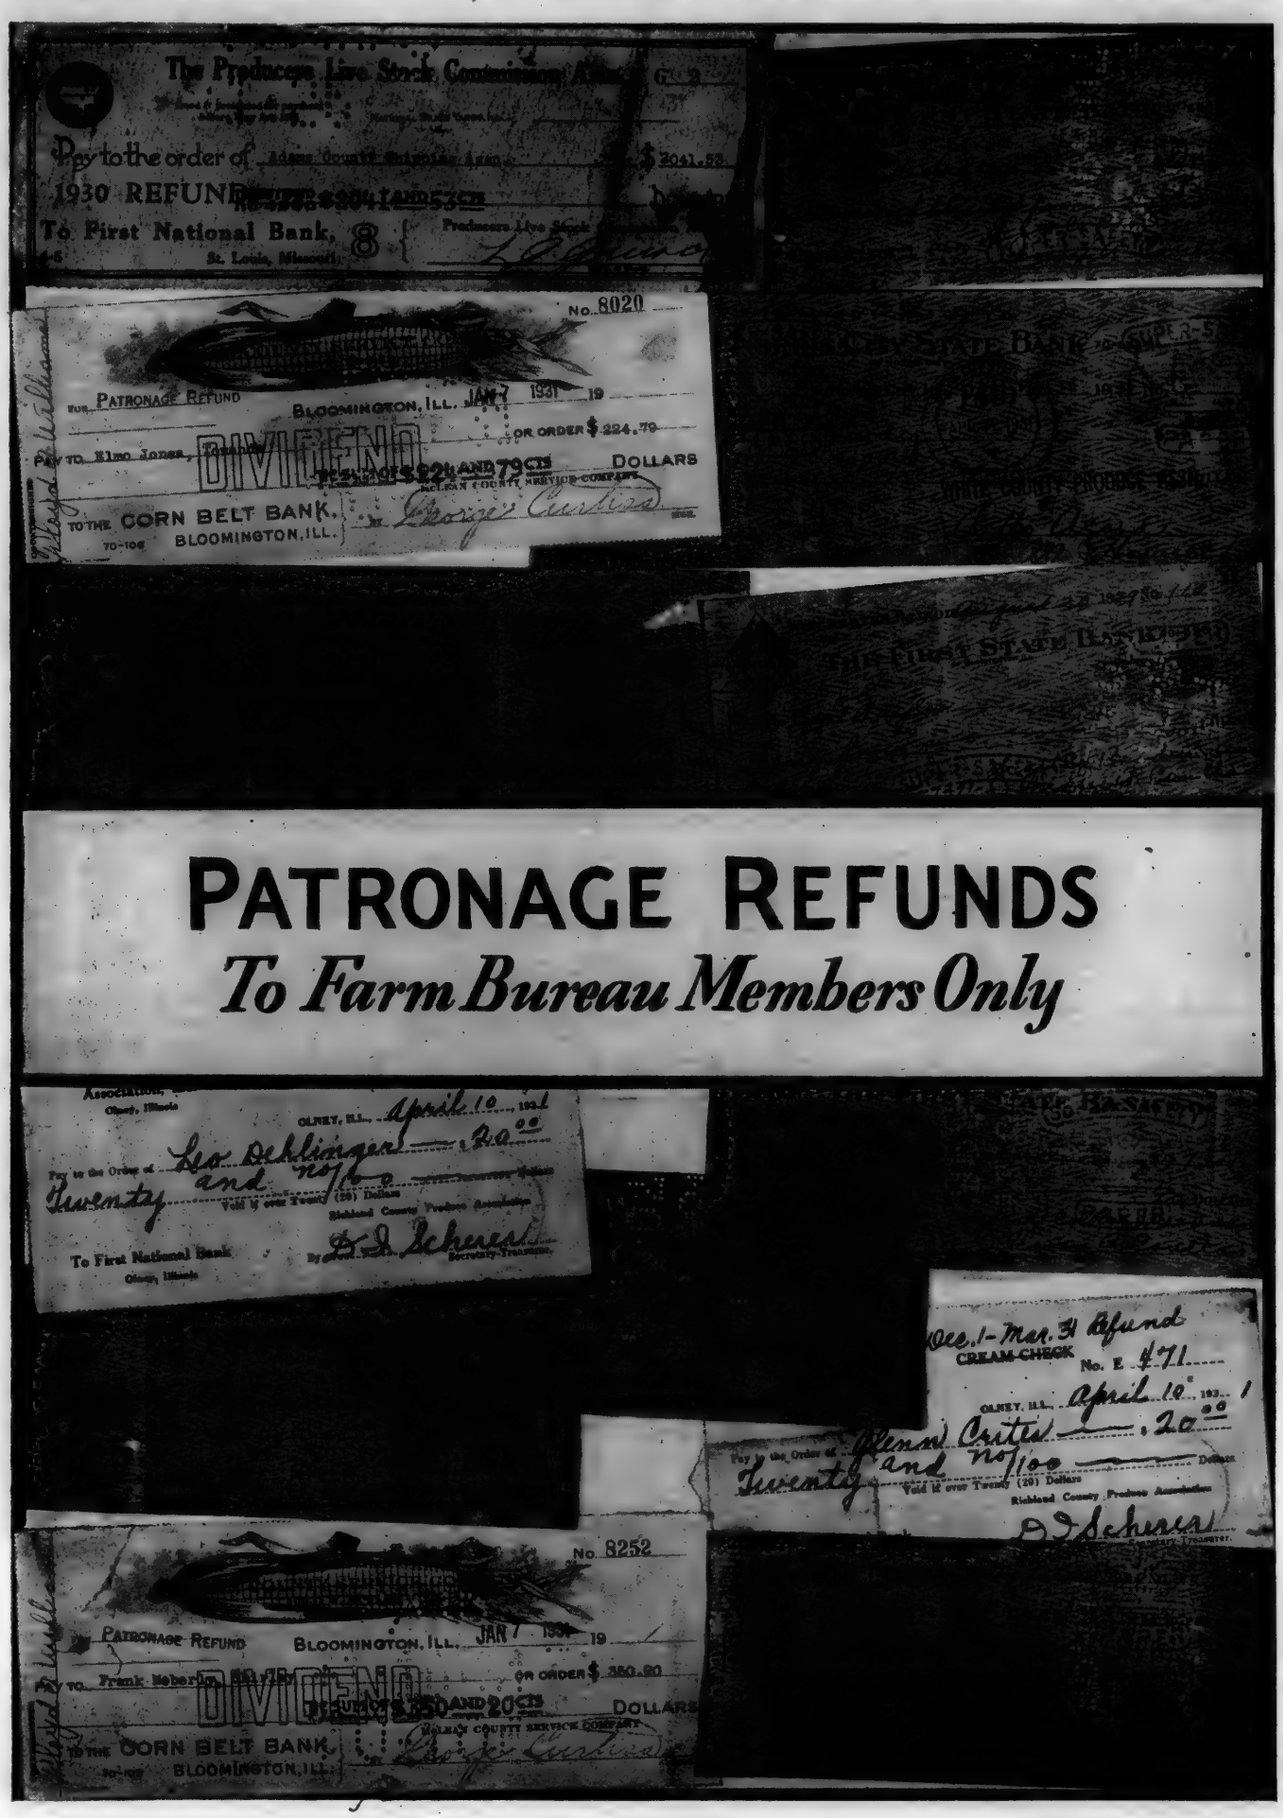
Fluid milk producers in the Chicago milk shed have learned something about the need for and value of organization in maintaining a fair price for milk. They know there is a constant economic struggle underway between the producer, the distributor, and the organized worker for the consumer's dollar, with the battle invariably going against the one offering the least resistance. Chicago's organized milk wagon drivers know it pays to be organized. Asked to take a 20% cut in pay, they said "NO! we'll take only a 10% cut, or Fight." So milk wagon drivers continue to get a minimum of $45 per week plus commissions, more than $190 a month when many a man out of work would be glad to take the job for much less. The law of supply and demand works—sometimes.

Unorganized, unprotected people always pay dearly in this organized world for their failure to defend themselves. They are pushed around by organized groups bent on taking care of their own interests first.—E. G. T.

July 4th Picnics To Honor George Washington

Farm Bureau Asked To Organize Agriculture For Ceremony

ILLINOIS county Farm Bureaus planning Fourth of July picnics as their part in the national celebration of George Washington's 200th anniversary, are asked to keep a record of attendance and publicity material for the George Washington Bicentennial Commission, states the American Farm Bureau Federation.



Numerous requests have been made by Illinois Farm Bureau folks for program material and picnic suggestions available at the A. F. B. F. offices in Chicago, it is learned, so that Illinois will probably be well represented in the bicentennial celebration.

National officers are requesting that all Farm Bureaus keep them in touch with the development of local plans. This is an official celebration, sanctioned by Congress. The American Farm Bureau Federation has been officially assigned the task of organizing agriculture's contribution to the ceremonies.

Indiana Farm Bureau Fights High Taxes

Court action will be instituted in a test case or cases where farm land appraisals seem to be unreasonably high, announces the Indiana Farm Bureau. The directors voted in favor of such action at a recent meeting in Indianapolis.

The farm organization has taken the stand this year that farm land appraisals for assessment purposes shall not exceed true cash values. Taxing authorities in many instances have assessed farms at higher values, probably with the view of meeting anticipated budgets of normal government expenses without materially raising the tax rates.

Commission Rates Cut

New rates for buying and selling livestock on commission at the Kansas City and St. Joseph stockyards have been prescribed by the U. S. Department of Agriculture. It is estimated that producers shipping to Kansas City will save $250,000 this year, and those shipping to St. Joseph $100,000.

The order came as the result of a long inquiry. The reductions on both markets are practically the same. For example, the minimum for rail shipments of cattle has been $15 and the maximum $19; the minimum is now $13 and the maximum $15.50.

On truck-in consignments to Kansas City the per head rate on cattle was reduced from 75 cents to 70 cents, on hogs from 30 cents to 25 cents, and on sheep from 25 cents to 20 cents. St. Joseph's reductions were practically the same. The Department of Agriculture is now investigating a number of other stockyards, including the Union Stock Yards, Chicago.

The Indianapolis Producers handled a total of 1,032 carloads of livestock during April, the largest volume for this month in the history of the organization. This was 135 carloads more than the combined total of the next three largest firms on the market.

The last thirty days have seen several new all-time records hung up by the Chicago Producers. The cattle department handled 140 cars of cattle during the week ending May 13, which represents 9.36 per cent of total receipts for the week. The following week the Producers again handled 140 cars, equalling 9.56 per cent of total receipts.

A new record for the hog department was established in April when on 20,028 head of hogs on which home weights were available they showed an average shrink of only .9 pounds per hundredweight, the lightest for the month of April on record.

Still another record was made during the last week in April when the Producers received an equivalent of 118 carloads of livestock in trucks. This livestock belonged to 980 different farmers, with stock from 271 coming in on one day. They report that every account of sale and check was in the mail the same day.

During the four weeks ending May 21, the Cincinnati Producers sold 608 cars of livestock representing 35.17 per cent of the total market receipts. Last year 487 cars moved through this agency during the same period. They recently added to their sales force Charley Rose, who has had more than thirty years' experience in selling and handling cattle. During the past four weeks more than 27 per cent of the cattle arriving for sale at Cincinnati was handled by the Producers as compared to 17 per cent a year ago.

All steers shown at the 1932 International Live Stock Exposition will be classified by weight rather than age, announces Manager B. H. Heide. No steer weighing less than 750 pounds nor more than 1,350 pounds will be admitted to competition.

The four different classes are as follows: 750-875 pounds; 876-1000 pounds; 1001-1150; and 1151-1350 pounds. No steer calved prior to January, 1931 will be permitted to enter.

Eat Plenty of Meat For Health Says Dr.

DR. Glen Wakeman of the University of Colorado, investigator for the American Chemical Society, recently announced that meat and lots of it is necessary for health.

Dr. Wakeman made exhaustive tests over a two-year period of 70 persons who lived on vegetables exclusively. All of these had a low basal metabolism, "which in plain language means that their bodies produced less heat and energy than those of meat-eaters," reports the Chicago Herald & Examiner. The average was 10 per cent lower. In some cases it was much more.

Most vegetarians assert that their diet gives them not only health, but "peace of the soul." Dr. Wakeman remarks that this "peace of the soul" is usually sheer laziness. He mentions the Hindus of India, who live almost solely on vegetables, as an example.

The ordinary man to succeed in the strenuous ordeal of life needs plenty of energy and hence plenty of meat.

Co-Op. Marketing Narrows Butterfat Price Spread

The average production of butterfat on Illinois farms is approximately 800 lbs. annually. Co-operative marketing is credited with raising the average price level three cents per pound in communities served by co-ops, based on present and past spreads between country point and Chicago butter prices.

This means that the average gain to Illinois butterfat producers in co-op. communities approximates $24 per farm, according to Frank Gougler, director of produce marketing.

De Frees Elected Head Fruit Growers Exchange

TALMAGE De Frees of Smithboro, I. A. A. director from the 22nd district, was elected president of the Illinois Fruit Growers Exchange at the recent annual meeting in Centralia. Mr. De Frees has been a director of the Exchange for the past two years.

MR. DE FREES

R. B. Endicott of Villa Ridge, president for the past six years, was elected vice-president, and Joe W. Cummins was chosen secretary-treasurer.

General feeling toward co-operative marketing of fruits and vegetables in Illinois is improving rapidly, and growers are now more than ever feeling the need of co-operative selling, according to Harry W. Day, manager. He reported that the morale of the membership is exceptionally good in spite of the prospects for a very light crop of most tree fruits in Illinois this year.

Prof. R. S. Marsh, University of Illinois, the principal speaker, talked on improved methods of marketing fruits and vegetables. A. B. Leeper, former manager of the Exchange, explained the set-up of the National Fruit and Vegetable Exchange, with which he is now connected as general manager.

During the morning Joe W. Cummins, field secretary, led a discussion and pointed out the problems concerning truck sales. Reports of officers and directors were also made at the morning session.

The new directors of the Exchange are as follows: William E. Williams, Sandoval; George E. Adams, West Liberty; W. L. Cope, Salem; Fred Hawkins, Texico; Logan N. Colp, Carterville; L. R. Allen, Carbondale; E. G. Kinsey, Centralia; Arthur Foreman, Pittsfield; D. R. Wade, Griggsville; Harry Fulkerson, Grafton: H. B. Koeller, Godfrey; and Prof. J. W. Lloyd, Urbana.

An acre of alfalfa or clover saves about 1,150 pounds of corn and 468 pounds of tankage compared to feeding pigs in a dry lot.

Ill. Auditing Association Distributes Paid-Up Stock

Cash Dividends Paid To Members, Completed 371 Audits In 1931

Two hundred and forty-eight co-operative agricultural organizations—chiefly Farm Bureaus, farmers' elevators, and farmers' oil companies—now hold paid-up capital stock in the Illinois Agricultural Auditing Association.

Stock amounting to $12,080 was recently distributed following the reorganization of the association as a stock company. All stockholders are patrons of the company. The stock was paid for out of reserves accumulated during the past five years and is distributed in proportion to the amount of service charges each company paid in during the period.

In addition to the stock issue, the association also distributed $3,141.27 to 95 organizations as cash refunds on service rendered in 1924, 1925, and 1926. Stock issued on 1927 business will be redeemable at the end of 1932; stock on 1928 business at the end of 1933, etc.

The contracts provide that each company using the services of the auditing association will take an amount of capital stock at the end of each year equal to 10 per cent of the sum it paid for auditing during the year. All stock is to be turned in and redeemed five years after date of issuance.

Cash dividends paid this year were distributed as follows: 41 Farm Bureaus received $814.92; 28 farmers elevators received $1,056.17; two oil companies received $43.06; and 24 other agricultural organizations received $1,227.12.

Stock issued for the five-year period 1927-31 was as follows: 65 Farm Bureaus $2,195; 66 elevators $3,175; 50 oil companies $3,090; and 67 other organizations $3,620.

During 1931 the association audited 371 accounts, the largest number ever handled in a year. The service was established in 1924 to provide a reliable audit to farm organizations and co-operatives at cost.

Uncle Ab says that of all the mathematics he ever studied, he has never had to use much that he learned after the fifth grade.

Champaign County Grain Ass'n. Opens New Elevator

The Champaign County Grain Association now has two plants in operation following the opening of the air-force elevator at Mayview, April 14. The first plant has been operating at Glover since the middle of February.

About 200 farmers attended the opening of the Mayview elevator and saw the first grain received, weighed, put in storage tanks, and loaded into cars for shipment.

After a luncheon served by ladies of the Mayview Church, a program was held with Klaas Saathoff, president of the association, presiding. Among the speakers were G. C. Johnstone, president, and Frank Barton, field man for Illinois Grain Corp.; E. L. Johnston, manager of the La Salle County Co-operative Grain Company; O. M. Kornmeyer, manager of the Penfield Elevator; and A. E. Peterson, manager of the Air-Force Conveyor Company.

50 Per Cent Loan On Farm Lands Too Much

So long as the policy of lending approximately 50 per cent of the value of land continues, it will continue to provide inadequate protection against severe price recessions, according to David L. Wickens of the Bureau of Agricultural Economics. The continuing nature of farm-mortgage debt requires that farmers guard against such dangers by limiting their borrowings in periods of high prices. They should not be guided by the sums lenders are willing to advance.

In 1928 owner-operated farms had nearly 59 per cent of all farm mortgage debt as compared with 38 per cent for tenant-operated farms, and less than three per cent for manager farms.

The Quality Milk Association at Rock Island, Davenport, Moline and East Moline is at work on a project to handle the surplus milk of its 800 members. J. B. Countiss, director of milk marketing for the Illinois Agricultural Association, has met with representatives of the association several times and is assisting in working out the details of the plan.

Illinois Grain Corp. Third Among Regionals

National Sales Co-operative Gives Producers Control To Point of Final Sale

In spite of the fact that organized commission men have centered their opposition to co-operative marketing in Illinois and spread volumes of propaganda throughout the state to discredit farmers' marketing agencies, the Illinois Grain Corporation stands third among the 25 regional co-operatives in volume of grain handled through Farmers National Grain Corporation.

During 1931 approximately eleven million bushels of grain was marketed co-operatively through Illinois Grain Corp. At least 60 of the 102 counties in the state have used the terminal facilities of the national co-operative, sending grain from more than 200 shipping points.

Within the past eight months 13 counties have passed the 100-car mark in grain marketed co-operatively, 25 counties have sent more than 40 cars each through this agency, and 40 counties have shipped more than ten cars each.

The average volume from Illinois for the last three months is more than 600 cars a month, with each of these months higher than any other month since August, 1931. March was highest with 666 cars.

The establishment of a national selling agency removes many of the limitations that have surrounded local efforts to market co-operatively. It enables the farmer to control his product all the way from point of production to point of final sale, minimizing speculation, handling costs, and other charges so as to return a greater part of the consumer's dollar to the producer without injuring the consumer.

The farm value of American agricultural exports in the fiscal year 1930 to 1931 was the smallest in more than a decade, $696,000,000 as compared with $1,215,000,000 in the preceding 12 months covering the crop year 1929-'30.

Exports of cotton, lard, pork and hogs, wheat and flour, and unmanufactured tobacco constitute about 85 per cent of the value of all American agricultural exports.

A Few of the Girls Who Will Compete in State "Country Life Queen" Contest at the Illinois State Fair

Beauty Contest Feature Farm Bureau Day Aug. 26

37 Counties Enter State-Wide Competition To Select Country Life Queen

VISITORS at the State Fair on August 26, the date set aside as Farm Bureau Day, will have an opportunity to see winning farm girls from 37 counties compete for the title as "Country Life Queen of Illinois."

A similar contest with 10 counties competing was held last year before a crowd which filled the Farm Bureau tent to capacity.

"If the increased interest in the counties as shown by the number of county contests is a true criterion, we expect this feature to be one of the high spots of the day," declared V. Vaniman who has charge of the contest.

More than 600 girls entered the county contests last December for the privilege of representing their respective counties in the state contest. Entrants were judged on beauty, poise, personality, style, accomplishments, and character. One of the requisites is that contestants be members of Farm Bureau families or members of families holding policies in Country Life Insurance Companies.

The state contest is being planned as a part of the activities at the Farm Bureau tent on the fair grounds. The location of the tent will be the same as last year, south and east of the race track.

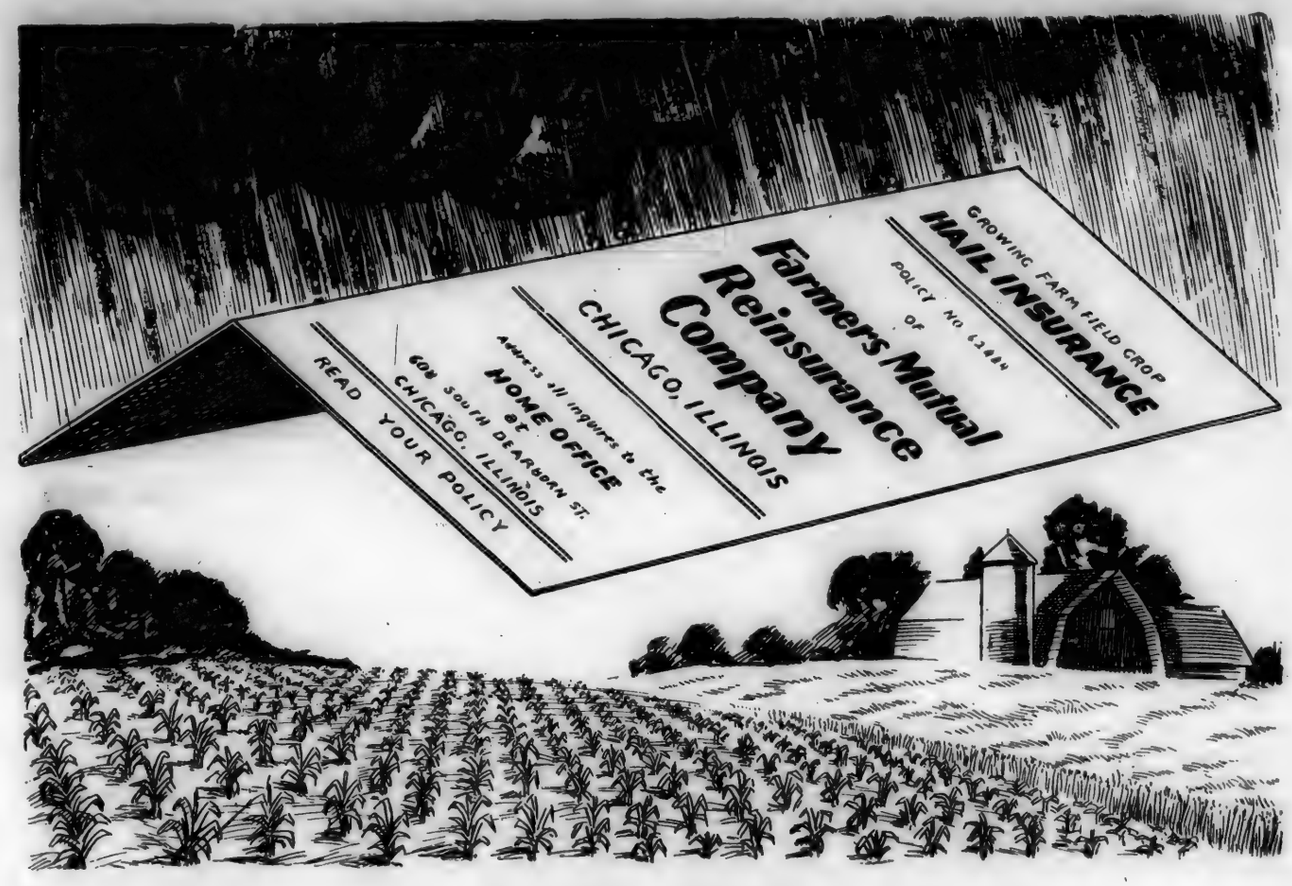
The tent will be provided with plenty of chairs for visitors, a free check room, and other facilities. The I. A. A. and associated companies will have displays showing their activities and progress during the year. Most of the officers, directors, and staff members of the I. A. A. will be in Springfield on Farm Bureau day.

Winners in the county contests, who will enter the state competition, are as follows:

Rowena Stevenson, Bond county; Irene Hill, Boone; Bernita Kurzweg, Champaign; Anna Homann, Coles; Laura Schoenbeck, Cook; Marian McConaghie, DeKalb; Robilee Coad, Edwards; Evelyn Loy, Effingham; Lucille Duffey, Gallatin; Norma Hicks, Greene; Angeline Painter, Henderson; Evelyn McNeil, Henry; Maude M. Bonnett, JoDaviess; Thelma Reeder, Johnson; Dorothy Woolsey, Knox; Leona Bloom, Lake; Rita Downs, Lee; Mildred Fischer, Livingston; Ruth Andreas, McHenry; Nora Michel, Marion; Louise Laughead, Mercer; Myrtle Ruhl, Monroe; Ruth Whitlock, Montgomery; Marjorie Wilmot, Peoria; Martha V. Hawthorne, Piatt; Vera Riley, Pike; Dorothy Layman, Pope; Mildred Fritchley, Richland; Ernestine Gifford, Rock Island; Ruth Whitacre, Shelby; Bernell Emmerich, St. Clair; Mabel Oertley, Stark; Rose Ann Pero, Washington; Clara Clark, Wayne; Mary Olive Ridenour, White; Maxine Chamness, Williamson; and Mary Parks, Woodford.

W. A. Herrington, formerly farm adviser in Stephenson county, has been employed to do special work as field man for the Illinois wool pool. He will continue the work until the end of June, visiting all the counties in the wool producing area giving information and instructions to wool marketing committees and individual growers.

Illinois Farm Supply Co. Breaks Record In April



Illinois farmers during the month of April purchased more than five and one-half million gallons of petroleum products, or more than 700 carloads, through the Illinois Farm Supply Company, central buying agency for the 52 co-operative service companies in the state.

This is the largest volume of any month in the five years the company has operated, all commodities showing an increase over the corresponding month in previous years.

Gasoline sales were 3.6 per cent higher than in any previous April, kerosene sales 29.1 per cent better, tractor and burner fuel 449.9 per cent, and lubricating oil 5.5 per cent.

The gallonage of all petroleum products handled during the first eight months of the present fiscal year exceeds the volume for the same period last year by a substantial margin. The volume during the last eight months was more than the entire gallonage during the fiscal years of 1929 and 1930. This indicates that farmers are realizing more and more the economic value of co-operative purchasing as a means of reducing production costs.

The Egyptian Service Company, with headquarters at Salem, began operations the middle of May with four trucks working in Marion county and adjacent territory. Vermilion County Service Company has been incorporated, a manager employed, and property leased in Danville for the installation of bulk station equipment.

LIKE A ROOF *over your Growing Crops....*

.... is a HAIL INSURANCE policy in the Farmers Mutual

More than 50 hail storms wiped out farm crops in Illinois last year. Thousands of dollars worth of growing corn, small grains, soybeans, were destroyed. In many cases the work and investment of an entire season were lost.

Are you willing to bet that hail will not come your way this year? Why take the risk when at small cost—30 per cent less— you can take out a policy in your own company. Only a small deposit with application. You pay the balance Oct. 1 when the crop is produced.

During the last three years hail insurance on corn and small grains has cost only $20 per thousand . . . slightly higher for soybeans. An additional five per cent discount will be given this year on premiums paid when due. Fair and prompt adjustments based on actual percentage loss.

Also fire, windstorm, and tornado insurance on farm buildings and property. We reinsure local mutuals for all or any part of acceptable risks.

Yale Prof. Advocates Swing To Income Tax

Intangible Property Should Pay Its Share and Lighten Burden On Real Estate

FIFTY-THREE per cent of the revenue of cities of more than 30,000 population is produced by the tax upon real property, according to Professor T. S. Adams of Yale University. Nearly two-thirds of the revenue of the average city comes from the general property tax, more than four-fifths of which is laid upon real property including land and buildings.

Nineteen per cent of the real property tax comes from land and 34 per cent from buildings.

"With real estate carrying its present burden, and with tangible personal property taxed as recommended, there can be no justification for the complete exemption of securities and other intangibles in the hands of individual investors," Prof. Adams says. *"Intangible property should be taxed upon the basis of income at a rate not to exceed six per cent as an adjunct of the personal income tax."*

A tax of this kind is effective in Massachusetts. A progressive personal income tax is recommended as a major remedy for the present undue concentration of taxes upon real estate. "In Massachusetts the present income tax produced $28,000,000 in 1929 or 7.69 per cent of the total taxes collected. In New York it yielded $84,000,000 or 7.83 per cent of the total tax bill. *But the state income tax should be made much more productive than at present.* To accomplish this it will be necessary to make personal exemptions lower, and the rates on moderate incomes higher than in most of the state income taxes now in force."

Phosphate Sales

In spite of low farm prices ground rock phosphate is moving into Illinois from the phosphate mines of Tennessee. Twelve cars were shipped out in one week in April, according to J. C. Lowman in charge of weighing and inspection at the mines.

Uncle Ab says there are times when the intelligent listener excels the intellectual talker.

Hyde Cites Needs For A Prosperous Agriculture

Emergency measures dealing directly with agriculture are not necessary, Secretary of Agriculture Arthur M. Hyde stated May 16, United States Dairy reports. Markets for farm products, he said, are the real need. This may be accomplished only by restoration of business and agriculture by the use of credits available through the Reconstruction Finance Corporation and other federal agencies which are ready for these functions as soon as business emerges from its frightened condition.

He said the federal government has laid the foundation for the recovery of agriculture and industry and the actual use of immense reservoirs of credit is all that is needed now. He said bankers are afraid to lend and borrowers are afraid to obtain loans to finance their projects.

Four things only are required to make agriculture prosperous, according to Hyde, "and three of these have been provided." They are the tariff, Federal Farm Board, organization of farmers, and the land utilization policy. The last of these would have prevented the present extreme depression of agriculture if it had been applied 10 years ago, he said.

Investigate Telephone Rates In La Salle Co.

The telephone committee of the La Salle County Farm Bureau has been very active during the past few weeks investigating rates. At a recent meeting it was disclosed that the increasing number of telephones being removed was making it more expensive for other subscribers and at the same time was making the phone less valuable.

It was decided that the committee should make an investigation to determine how much the telephone companies could reduce their rates. Sub-committees were appointed to secure information about different companies. As shown by a summary, costs varied from $1.35 to $2.25 per month.

The committee also discussed the advisability of working with the mayors of the various cities and securing their opinions as to the number of phones removed and the sentiment as to rates.

Vaccinate Pigs While Young and Save Money

The eight per cent increase in anti-hog cholera serum and virus purchased through the Illinois Farm Bureau Serum Association during the first three months of 1932 over the corresponding period a year ago is not as great as it should be under present conditions, according to Ray E. Miller, director of livestock marketing.

"Considering the fact that farmers can now vaccinate their own hogs at a lower cost than at any time in history, they should take advantage of this opportunity to insure their herds against cholera," Miller said.

"If we are to profit by the experience of 1931, when serious outbreaks of the disease appeared in practically every section of the state, we must vaccinate while the pigs are young and light. Last year many farmers waited until cholera broke out in their own herd or in a neighbor's herd before they did anything. The result was a higher cost of vaccination and in many cases heavy losses.

"Spring pigs which have not yet been vaccinated should be given attention as soon as possible, as delay will mean extra cost. Practically all the Farm Bureaus have reduced the price of serum an average of from five to 15 cents per hundred cubic centimeters since last year. The fact that hogs are selling at a very low price, thus seriously reducing the farm income, is all the more reason why farmers should not jeopardize their income by not vaccinating."

Can Handle All '32 Wool

The National Wool Marketing Corporation is prepared to handle the entire wool production of the United States for 1932, the growers' co-operative with 35,000 members announced recently.

Ample funds, warehousing facilities, and experienced personnel for financing and efficient handling have been provided.

"Acceptances by the growers of offers which ignore entirely present tariff protection will, therefore, not be necessary," L. W. Elliott, executive vice-president, declared. "The wool remaining from 1931 will be marketed to orderly mill demand as in the past, having in mind the protection of values."

Break Ground For New World's Fair Ag. Building

Illinois Men Have Prominent Part In Century of Progress Ceremonies

THE development of agriculture from the period of the ox-drawn wooden plow to the period of the huge power-drawn plow, capable of doing fifty times as much work as the primitive implement, was shown in a pageant May 20 at the ground breaking ceremonies for the Century of Progress agricultural building to be erected in Chicago in the near future. The building will be located on the island south of the new Adler Planetarium, on the south Grant Park lake front.

Earl C. Smith, president of the Illinois Agricultural Association, gave a short address on the hopes and purposes of agriculture, and explained the pageantry illustrating the four periods. Mr. Smith was introduced by Charles S. Peterson, vice-president of the Century of Progress Exposition.

The periods were represented by the old ox-plow, the mule-drawn steel plow, the sulky plow, and the modern gang plow.

The first period—agriculture a century ago—was dramatized by Dr. W. A. Bitting of the Century of Progress driving a team of Connecticut oxen harnessed to an eighteenth century plow loaned for the occasion by A. Watson Armour of Chicago.

News-reel cameras clicked and an amused twitter went up in the audience of several hundred spectators as the crude plow skimmed the crust of the ground scarcely making a scratch.

Mr. Smith explained that the plow was built in 1750 and was first used by James Armour at Quobbin, Mass. It has been handed down from generation to generation, its present owner being the fifth to own it.

Frank I. Mann, pioneer farmer of Gilman, Iroquois county, Illinois, illustrated the second period by plowing a furrow with a span of mules and the original wood beam steel bottom plow, commonly known as the walking plow. It was the first plow manufactured in the plow factory of William Parlin of Canton, Illinois, in 1847.

Mr. Mann, widely known as an authority on practical farming and the use of fertilizers, has lived on the same farm for 71 years.

Earl C. Smith, president of the Illinois Agricultural Association, giving address at ground breaking ceremonies of the Century of Progress Agricultural Building to be erected in Chicago.

The third period was portrayed by Eugene D. Funk of McLean county, Illinois, with the original sulky plow introduced into this country more than sixty years ago, drawn by three champion Clydesdale horses. Mr. Funk is the third generation of his family to operate the same farms, the family having owned these lands for a full century.

The final development was illustrated by Harvey J. Sconce, agricultural director of the Century of Progress. Mr. Sconce drove a tractor drawing a modern gang plow. He is also the third generation of his family to operate the Fairview Farm at Sidell, Vermilion county, Illinois. The farm has been in possession of his family for 101 years.

"I am convinced," said Mr. Smith, "that this Exposition will bring home not only to those who are fortunate enough to attend, but to those who read of its greatness, the gigantic proportions of America and its wonderful development in all fields of agriculture and industry."

Livestock Shippers And Railroad Men At Macomb

WHAT can the railroads do to improve the handling of livestock to hold this business against growing competition from trucking?

This question formed the background of a nine-county meeting with I. A. A. and C. B. & Q. railroad representatives at Macomb May 19.

The livestock shippers asked for a modification of the rule governing charges on mixed shipments, requesting that provision be made for permitting stop-over privileges to complete loadings. Unless substantial improvement is made in handling livestock by rail more business will be diverted to trucks, farmers told the railway men.

The matter of extending transit privileges at concentration points—which means providing one through rate from original shipping point to terminal market where livestock is unloaded and reshipped at a concentration point—also was considered. Organized livestock shippers want transit privileges on all livestock including mixed shipments.

"This matter is just as important to the railroads as to the producers," said L. J. Quasey, director of transportation. "Shippers are no longer in the position of having to beg for better service. If railroads don't meet the situation of growing competition from trucks they must suffer the consequences. It is encouraging to note that the carriers are doing more to accommodate the shipper than ever before."

The adjustment of rates from western Illinois points to points east of Buffalo also came up for discussion. The railroads can bring about such changes and improvements by recommending them to the Interstate Commerce Commission and securing the approval of this body.

Farm advisers and livestock shipping association representatives in McDonough, Adams, Warren, Mercer, Knox, Henry, Fulton, Schuyler, and Hancock counties attended the meeting. L. J. Quasey, and Ray E. Miller represented the I. A. A. Traffic and operating officials from the C. B. & Q. participated.

J. B. McCann is the new head of the Farm Bureau insurance service in Clark county. C. W. Espy is the new general agent in Hancock county. He has recently been with Ruhm Phosphate, but prior to that he was a successful special agent in White county.

Marion Stiles of Winnebago county is one of the most successful women agents of Country Life, according to L. A. Williams, manager. During April she won an electric clock for her high standing in business written.

The leading counties for business during the first four months of 1932 are as follows: Cook $251,000; Livingston $179,500; Henry $160,500; Winnebago $151,000; Bond $148,000; Lake $121,500; McDonough $116,000; Champaign $115,000; DeKalb $106,500; and Effingham $98,500.

Country Life has written an average of $1,000,000 a month in insurance for the first four months of 1932. Its assets have increased more than 25 per cent since the first of the year; its surplus is increasing every month; and its mortality rate is lower than in 1931.

H. O. Henry, president of the General Agents' Club, is on the verge of going over the top for his fourth consecutive quota, according to Larry Williams. He has made several times his yearly quota each year since he started in Effingham county in 1929.

Know A Good Slogan?

Members of the 95 county Farm Bureaus in Illinois are invited to take part in the search being conducted by Bureau Farmer this month for a national Farm Bureau membership slogan.

A cash prize of $10 is offered for the best slogan, $5 for the second, and $1 each for the next five.

Slogans must be original and must not exceed 20 words. They will be judged on originality, cleverness, thought content, wording, legibility, and neatness. They must be mailed by midnight, June 15, to the Farm Bureau Membership Slogan Contest, 58 East Washington street, Chicago.

Hail Insurance Coming In, Several Storms Reported

A number of policies have already been issued by the Farmers Mutual Reinsurance Company insuring growing crops against hail, according to J. H. Kelker, manager.

Several hail storms have been reported in Illinois within the past few weeks, and farmers are being urged to take out hail insurance early.

"There is nothing to be gained by waiting until later in the summer to get this protection," he said. "Crops are getting up to the stage where hail can do serious damage. Now is the best time to insure, for delay only means an unnecessary risk. This insurance costs the same amount in the middle of the summer as it costs now. The farmer might as well get the benefit of the entire season's protection."

These policies are in effect from the time the crop gets two joints out of the ground until September 20 or until the crop is harvested in case this occurs before September 20.

Lawrence Farm Bureau Buys a House and Lot

The Lawrence County Farm Bureau office was moved from the court house at Lawrenceville May 11 to its new home at 1320 W. Dubois street, which was purchased recently. The house has been repaired and remodeled and a small warehouse placed on the lot. One room of the new office will be used by the Rich-Law Service Company and one by the insurance service department of the Farm Bureau.

The house and lot cost $1,000, and the repairs and remodeling about $500 or $600, according to Farm Adviser H. C. Wheeler. "You can see by these figures that it is not very elaborate," he said, "but it will serve until such a time as we can afford further changes."

The Farm Bureau office has been located in the court house since 1920 when the Lawrence County Farm Bureau first began work.

Uncle Ab says ideas are like plants: once planted they must be cultivated and nourished if they are to bear their best fruits.

W. T. Martindale Dies Following Auto Accident

Directed Organization Work For American Farm Bureau Federation

Injuries incurred in an automobile accident while attending to Farm Bureau business proved fatal to W. T. Martindale, A. F. B. F. field service director, Friday, May 20. Funeral services were held at Indianapolis Monday, May 23.

The accident occurred May 2, while Mr. Martindale, in company with Harold Nevins, Indiana Farm Bureau insurance director, was driving to Bloomington, Ill.

One mile west of Brownsburg, Ind., a car coming towards them skidded on a wet pavement as it rounded a curve, directly in front of the car carrying the two Farm Bureau officials.

Mr. Martindale was hurled through the windshield of his car, suffering a broken knee, broken ribs, a broken nose, sprained wrists, severe lacerations and internal injuries. He was removed to his home in Indianapolis and later taken to the Methodist hospital in that city where death occurred.

Mr. Martindale entered the employ of the A. F. B. F. April 1, 1931, after several years of active service as organization director of the Indiana Farm Bureau Federation. Within a month after assuming his new duties, he organized the Arkansas Farm Bureau and gave it the necessary initial inspiration which has developed it into a going concern. Since then he had actively prosecuted a carefully mapped out campaign for organization development in other states in the Middle West, the South, and the East. When death called him he was preparing to participate in a membership drive in Vermont.

Mr. Martindale spoke at a number of County Farm Bureau annual meetings in Illinois during the past year. He also addressed the Organization-Publicity conference during the last I. A. A. convention in Rockford. His energy, and devotion to the cause of farm organization were outstanding. His loss will be felt keenly by many friends and associates.

STATE-WIDE DEMONSTRA

LAUNCH DRIVE AT DECATUR FOR EMERGENCY PRICE-RAISING BILL

3000 Farm Bureau Leaders Demand Congress Stay in Session Until Something Effective Is Done

DECATUR, ILL., June 17.—With the battle cry, "prosperity in America must begin on the farm" more than 3000 Farm Bureau delegates representing every organized Illinois county thundered their unanimous approval and determination to move forward in a mammoth July 4th demonstration throughout Illinois in a meeting held in the Armory here today.

Like the minute men of '76 who left their plow handles on a moment's notice to free their country from the yoke of oppression, came this loyal group of leaders from the cornfields of Illinois rallying to an emergency call to help free their industry and the country from the yoke of depression.

The meeting which was called secretly "to consider matters of vital importance to agriculture" took on the appearance of a great party convention when pasteboard banners bearing the name of each county, were raised aloft by the delegates. The meeting launched a drive for emergency farm price improvement legislation, which President Earl C. Smith explained had been introduced only two days before by Congressman Henry T. Rainey, majority leader in the House, at the request of the Illinois Agricultural Association.

"This meeting and demonstration may well be a 'Boston Tea Party' of American agriculture as well as a July 4th celebration," said Clifford V. Gregory, editor of Prairie Farmer who was cheered to the echo when introduced as a great champion of agriculture and friend of farmers, by President Smith.

"This emergency bill, if enacted, will operate for one year only," explained Mr. Smith. "It will raise farm prices within 15 days after its enactment. Its purpose is to make the tariff effective on farm products, to raise domestic prices to the world price plus the tariff."

A thunderous "Go" was the response from 3000 voices when the I. A. A. president asked if he should go to Washington Monday to fight for the enactment of the emergency legislation. "Then go home, write your Congressmen and tell them to stay in Washington until something effective is done to lift agriculture out of the depression," he replied.

"Let us sidetrack all other meetings and enterprises between now and July 4, make this demonstration a success, get this bill enacted by congress, and maybe we'll have something to celebrate after all," he said.

Reviewing the efforts of Farm Bureau leaders to secure price-improvement legislation, Mr. Smith told of arriving in Washington on May 23 to prevail on congress to do something.

Blame Each Other

"We went to the Republicans and they laid the blame on the Democrats," he said. "When we went to the Democrats they blamed the Republicans, so we got the leaders from both parties into one room and told them what farmers were up against and what had to be done."

In that appeal to Congress the farm leaders set out a program with three salient features:

1—That funds be provided for the disposal of accumulated crop surpluses.

2—Passage of emergency legislation having for its purpose immediate price improvement for basic crops.

3—Establishment of a legitimate and effective control of future crop surpluses.

"The Illinois downstate delegation promised solid suport for these three points," Mr. Smith said.

"After conferring with leaders in both parties in Washington we were asked to draft our own solution of our problems.

"We have done so and Wednesday Congressman Rainey introduced into Congress a bill that, if passed, will give us relief within 15 days. If you men will fight for that bill as I know you are capable of fighting, we will be out of the woods in a hurry."

What It Provides

This bill provides for the emergency, only, as follows:

1—That the Secretary of Agriculture shall proclaim at once what percentage of this year's crop of wheat, hogs and cotton is needed for home consumption.

2—That any farmer selling wheat shall present his weight certificate to an agent of the Secretary of Agriculture in his county and shall receive a negotiable certificate for that percentage of his grain that the secretary's estimate declares will be consumed at home on the basis of the tariff, or 42 cents for wheat.

3—That an excise tax of 42 cents per bushel be levied on the processing of wheat, the tax to go into the government fund to redeem the negotiable grain certificates.

Will Raise Price

That in brief is the plan, Mr. Smith explained. The same system applies to hogs and cotton. It is designed to raise the price of farm products on the domestic market to a point equal to the tariff imposed on them.

"It will raise the price of wheat above the current price level to the amount of the tariff on wheat, which is 42 cents a bushel," he explained. "It will not disturb the present marketing system in any way. The processors of wheat will pay the excise tax. Whatever the price the farmer receives for wheat going into domestic consumption, he will be paid the additional price on his negotiable certificates. Wheat moving into export will not be taxed.

"We could not specify all grains and all crops. But if wheat, hogs and cotton prices are raised other commodity prices will follow. This bill is very simple. All we have to do is put it over."

Purpose Kept Secret

Friday's meeting was one of the most remarkable ever conducted at Decatur. Its purpose kept secret, the call was issued Wednesday to Farm Bureau leaders and directors, and representatives of the various enterprises fostered by the Illinois Agricultural association.

Large placards expressing the needs and wants of farmers brought a tremendous response of approval when paraded up and down the aisles of the armory before the opening of the meeting.

"Give Us a Price and We'll Buy the Nation Back to Prosperity," said one huge sign. "Bring Back the Dollar of 1926," said another, and "Higher Prices the Way to Recovery," advised a third, while a fourth asserted, "Taxes Must Come Down." The theme of the meeting was expressed in "Prosperity for America Begins with The Farmer."

"We are here to do what the national Republican convention failed to do," C. V. Gregory, Prairie Farmer editor, explained to the crowd that had given him a tumultuous greeting as he was introduced by Mr. Smith. "To consider the serious situation in which we find ourselves.

"Only twice before, at Valley Forge and at Gettysburg, has the nation faced the peril it faces in this year of 1932. Here in this meeting may be the turning point."

Gregory Cheered

Mr. Gregory was cheered to the echo by men who had left their homes, some of them, before 4 o'clock Friday morning from far northern and southern reaches of the state. Appearance of groups of men on the streets at an early hour in the day, obviously strangers, and their increasing numbers started questions flying from mouth to mouth in the business district.

No one knew why they were here and they did not know themselves, beyond the fact that something important was portending. By 11:30 o'clock, the hour the meeting was called, the big armory was filled, the main floor with its folding chairs and the bleacher seats against the walls.

In the meantime, the board of directors and officers of the association were in session in the Hotel Orlando.

(Continued on Page 4, Col. 7)

THE SPIRIT OF '76

PROCLAMA

Three thousand County Farm Bureau leaders ignated Monday, July 4, 1932 as a day when farme cities of every community are urged to unite and reded bly toward restoring the economic independence of A prosperity of the nation.

Let us all gather on that day in our respective land, to pledge our best efforts in bringing about an and national welfare.

The nation is now stagnating in the grip of fea and low prices, such as this generation has never befor ture, long out of balance with other industries, has re and falling to its economic level.

It is now generally recognized that prosperity fo Higher farm prices must lead the way to recovery. T ization as through organization alone can we speak lou must stand shoulder to shoulder on a sound basis and forward to the goal. The principles of fairness and fought are in the balance.

Let's have a coalition of the farmers and citizen make July 4 ring with the spirit and courage neces justice, and independence.

4-H Club Boys and Girls To Be In Parade

More than 5,000 4-H Club boys and girls are expected to appear in the July 4th DEDICATION DAY parades scheduled in every Illinois county.

Four-H Club floats and marchers will be given a prominent place. In several counties 4-H Club membership runs up into the hundreds and the various units themselves will make a colorful exhibition. The 4-H colors, green and white, will be much in evidence. An added attraction will be the prizes to be awarded at every county celebration. Thousands of children of Farm Bureau members not enlisted in 4-H Club work, likewise, will take part in the parade.

Ask Charter Members To Take Part In Program

Charter members of their respective County Farm Bureaus will be requested to march as a select group in the 4th of July parades. Among these will be many of the early leaders of the Farm Bureau movement in Illinois. It will include that substantial group who founded the I. A. A. on its present basis in Peoria, 1919 when they signed $100 notes underwriting the expense of an executive secretary, a staff, and a headquarters prior to the organization campaign year.

All of these notes were to their signers uncash many are now treasured possessions. In this group men as Uncle Joe Fulkers Holmes, John Gummershe B. Culp, Henry T. Marsha Hill, G. C. Johnstone, L. E. John P. Stout, and others.

Prairie Farmer and WLS Join in Movement

Prairie Farmer and its radio station WLS along with local newspapers and organizations in downstate counties are joining in commemorating July 4 as Dedication Day when citizens of every community will unite in pledging their best efforts toward accomplishing the objects of the movement.

In its issue of June 25 Prairie Farmer will pay tribute to organized agricultural effort and what farmers have accomplished by working together. News of the July 4 demonstration will be broadcast daily from station WLS, station WJJD, and others in Chicago and downstate. Many counties will have special organization issues of local newspapers appropriate to the occasion in making July 4 a memorable occasion in the history of Illinois agriculture.

Affiliated co-operatives and associated organizations are all co-operating in the July 4 celebration. Representatives of Country Life Ins. Co., the Illinois Agricultural Mutual Ins. Co., Illinois Farm Supply Co., the Farmers Mutual Reinsurance Co., and others will be active in preparations for the demonstration and big parade on the final day.

PLAN PARADE AND CELEBRATION FOR EVERY ORGANIZED COUNTY

Restore Farmer's Buying Power And Prosperity Will Return to America. Re-dedicate Efforts to Agriculture

A state-wide demonstration with a parade on July 4 in every county of Illinois was unanimously voted at a meeting of more than 3000 Farm Bureau leaders representing every county at Decatur, Friday, June 17.

While the big celebration falls on the 20th Anniversary of the Farm Bureau in Illinois it is to be more than an anniversary celebration. It will be a militant demonstration of the farmers of Illinois rededicating their efforts in behalf of their industry, agriculture, on which the prosperity of the nation depends.

As the farmers of 1776 united in that historical fight for independence and freedom from political oppression, so will farmers of 1932 unite for economic independence to restore the farmer's buying power and so lead the nation back to better times.

Organized farmers have pleaded in vain for more than 10 years to arouse the nation to the plight of agriculture. Repeatedly farm representatives have told the president, the Congress, and the industrial East that the nation could not continue prosperous with a declining agriculture.

One Year Only

The Farm Bureau's demand for effective legislation to establish an American price for farm products when industry was enjoying unheralded prosperity went unheeded. Flushed by success and prosperity resulting from a wide foreign outlet for products of American factories, manufacturers forgot their old customer, the American farmer. Much of this foreign demand was created with American capital, through tremendous foreign bond issues purchased by American citizens. Many of these are now in default, and American investors have lost millions of dollars. No longer has American industry its old customer, the farmer, to fall back on, and so the condition of agriculture has dragged down the whole economic structure to its own level.

Restore Buying Power

American prosperity must begin on the farm. Restore the farmer's buying power through an uplift in prices and the unemployed will be put back to work. Make the tariff effective on farm products. Remove the weight of accumulated crop surpluses from the market and agriculture will lead the way out of hard times. Establish an honest dollar and farm mortgages will be paid and confidence in government restored.

To this cause will Illinois farmers and citizens in rural communities assemble and dedicate themselves on Independence Day. The program for Dedication Day will be similar in every county. There will be some variations from county to county made necessary by other local plans for celebrating July 4.

Music by local bands to start the day, registration at a designated place of all new members and Farm Bureau members in good standing, of all children of Farm Bureau members and of 4-H Club members is provided for in the plan submitted to each county. The lineup for the parade will take place after registration. Marchers will carry banners heralding the aims and ideals of the demonstration, announcing the goal of the movement. Floats will be placed in order with plenty of space in the line of march between. Every Farm Bureau member and his family is asked to take part in the demonstration and march or drive the family car in the parade.

Prize Contests

At the given hour the parade will start moving from a designated point with Farm Bureau directors and other local officials in the reviewing stand. Prize contest announcements will be made locally so that all may compete for the awards.

It is contemplated that the parade will last until shortly after the noon hour when the celebration will adjourn for picnic dinner.

The afternoon program in most counties will include introduction of Farm Bureau and local officials to be followed by prayer and by a public address, speaker to be furnished by the I. A. A. Many counties represented at Decatur plan to light a spectacular bonfire where enemies of agriculture such as Low Farm Prices, Unjust Taxes, Poisonous Propaganda, Unfaithful Public Servants, Old Man Indifference and others will be burned in effigy. Awarding of attendance prizes will be left for the last event of the day.

ELABORATE FLOATS IN BIG PARADE

Colorful parades with floats and banners illustrating the aims and objects of organized farmers, will be a high point in the July 4 DEDICATION DAY ceremonies throughout rural Illinois.

Complete plans and illustrations for five major floats have been made up by a professional designer.

One float recommended for the demonstration will illustrate 4-H Club work with four leaf clovers labeled "Heart, Head, Hand, Health." On the side of the float appear the words "For Better Farm Life."

Another illustrating the tax problem displays the statement "Property Carries 90 Per Cent of the Burden." On the side of the float are the words "Organize—Equalize the Burden." A large weight labeled "Taxes" is suspended on a long pole with a farmer in the rear carrying the bulk of the load while two other gentlemen in front illustrating income and intangible wealth carry the light end.

One float shows a man trying to raise a large weight labeled "Farm Problems" with a block and tackle. He is tugging on the rope in vain unable to lift the load alone. Behind him stand six other men. When they all take hold of the rope, the load illustrating tax problems, marketing, representation, etc. is easily lifted. On the side of the float appear the words "Co-operation Will Win—But No *One* Can Raise it *Alone*."

A float recommended for the occasion shows a platform labeled "Organization." On the platform is a table and three chairs labeled "Industry, Labor, Agriculture." The farmer is mounting the platform to take his seat with other organized groups.

Another float carries a large dinner bell and a banner with the slogan "The Farmer's Dinner Bell is the Liberty Bell of 1932. Keep it Ringing."

The plans provide for carrying the floats on trucks. Complete blue prints have been sent out showing just how to build the scaffolding which is very simple, and how to trim and decorate the platform after its erection.

"Dedication Day" Crowd Estimated Half Million

The state-wide demonstration on DEDICATION DAY, it is estimated, will bring out from 300,000 to 500,000 people, based on early reports of counties working on the program for the day. Every effort is being made in some counties to have every farmer and his family as well as citizens of the towns and cities where parades will be held on hand to take part in and witness the program of the day.

The parade itself will be the big drawing card but the prizes, contests, music, speeches, and the opportunity for meeting friends will be attractions for many others. Such prizes as a new farm wagon which can be used with horses, truck, or tractor, a complete set of silverware, and a bicycle for children will be offered by many counties. Complete details about these will be given out by the Farm Bureau later.

The July 4th Dedication program in Illinois will be held simultaneously with Farm Bureau gatherings in other states commemorating the two hundredth anniversary of George Washington.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Alexander Legge

Others Organize, Care For Their Own Interests First

By Alexander Legge, ex-Chr. Federal Farm Board

"Perhaps the soundest advice we can give to agriculture is contained in the one word, 'Organize.'

"Properly organized, I cannot see any reason why agriculture might not go even farther than industry, inasmuch as most farm products are consumed every day and several times a day and the consumption must be fairly continuous if we are to live.

"The greatest difficulty we have to contend with, is that in some mysterious way, through legislative action or otherwise, the handicap under which agriculture is suffering, will be removed, and the position of the farmer made secure without any action on his part. My friends, this is not even a good dream. It is currently believed that dreams sometimes come true, but this one never will.

"You have one of the greatest and most representative organizations of agriculture anywhere. We need more organizations like yours. You can do almost anything when you are properly organized. If farmers don't organize, others will, and they'll take care of their own interests first.

"The agriculture of other nations has gone down largely because it lacked organization. If you are unorganized you must take what you're offered." — Alexander Legge before I. A. A. Annual Meeting, Jan. 29, 1931.

Must Cut Distribution Costs For Future Prosperity —Babson

"The keynote to future prosperity is improvement in distribution methods. Distributors must cut costs and pass along to the consumers the saving already achieved in production. Progress in production has far outstripped progress in distribution. Our distribution system, because of its high cost, is still the bottle neck which prevents the free flow of mass production which gets to the consumer. This business must attract that great potential market along the lower income classes to provide an adequate outlet for its huge producing capacity and to do this it must reduce costs. Authorities estimate that the avoidable waste in distribution is between $8,000,000,000 and $10,000,000,000 a year."—Roger W. Babson, issued June 14.

All Agricultural Groups In Illinois Pledge Co-operation

Co-operation of nearly every farm organization and co-operative in and adjoining Illinois has been secured in carrying out the statewide Dedication Day program on July 4.

The problem of providing a speaker for every county on that day is a tremendous undertaking in itself. To bring about uniformity in expressing the aims and ideals of the demonstration and the Farm Bureau movement, a carefully outlined address is being prepared, a copy of which will be supplied every speaker. Each speaker will be expected to emphasize the principles set forth in this outline, but using his own words in expressing them.

A prayer written for the occasion by one of America's outstanding clergymen is being prepared for delivery in every county on the designated day. The prayer will precede the address of the afternoon.

Among the organizations pledging their co-operation in the July 4th demonstration are the following: Prairie Farmer, State College of Agriculture, National Live Stock Marketing Association, Chicago Producers Commission Ass'n., St. Louis Producers Commission Ass'n., Peoria Producers Commission Ass'n., Illinois Live Stock Marketing Association, Illinois Grain Corporation, Pure Milk Association, Illinois Milk Producers Ass'n., McLean County Milk Producers Ass'n., Sanitary Milk Producers Ass'n., Quality Milk Ass'n., Champaign County Milk Producers Ass'n., Decatur Milk Producers Ass'n., Illinois Produce Marketing Ass'n., Egyptian Seed Growers Exchange, Illinois Fruit Growers Exchange, Soybean Marketing Ass'n., American Farm Bureau Federation, and all associated companies owned and controlled by I. A. A.-Farm Bureau members.

Edw. A. O'Neal

"Job Not Finished"

"On behalf of the American Farm Bureau Federation, it is my great pleasure to extend to the Farm Bureaus and to the membership of the great state of Illinois a message of congratulation, commendation and fellowship on the occasion of this, your 20th anniversary.

"You have well demonstrated what can be accomplished by militant, aggressive, organized effort. Your accomplishments of the past are your promise for the future. Your job is not yet finished. In the stern problems of today you have the greatest opportunity and the greatest responsibility. Go forward in the creation of an institution that is truly representative of the importance of agriculture to the economic and social well-being of your state. You are the hope of the farmers of Illinois."

Signed, Edw. A. O'Neal.

THE FARM BUREAU

"The Patriot believes that the Greene County Farm Bureau is one of the best organizations ever formed in this community. It has done more to put farming on a business basis, to develop better methods of farming, to bring the farmer out of his isolation, and to encourage a coming generation of farmers and farmers' wives than all other factors combined.

"The benefits of the organization are not limited to the members alone. Every farm and every farmer in the county receive indirect benefit in the general uplift of the business. The Farm Bureau could do much more if every farmer in the county were a member. Some farmers thoughtlessly speak disparagingly of the organization and discount its efforts. Those farmers are merely standing in their own light and hindering their own progress.

"In these times it is not a question of 'Can I afford to belong to the Farm Bureau?' but 'Can I afford to stay out of it?' "—CHARLES BRADSHAW, *Editor, Carrollton Patriot.*

Organization Greatest Need —Lowd

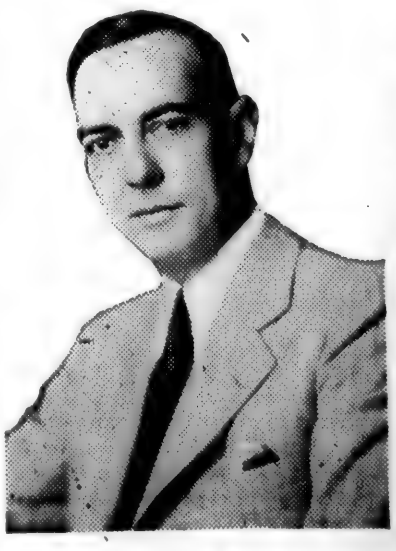
"I am more convinced than ever that organization is the greatest need of the farmers of this country," ex-Gov. Frank O. Lowden said in addressing a group of Illinois bankers some time ago.

He pointed out that the combined efficiency of the Danish farmer plus his inherent ability to organize and co-operate with his brothers, in producing and marketing his crops were responsible for the relatively happy condition of agriculture in Denmark.

"The farmer's interests are your interests and anything you can do to help them will react to your benefit and the good of the country," said Mr. Lowden. "It is more

Arthur M. Hyde

Organization, One Answer To Fa rm Problems



By Arthur M. Hyde, Secretary of Agriculture

"One general answer to farm problems is organization. Organization to control marketing, to standardize output, to eliminate waste and duplication of a marketing and distributing system, which, generally speaking, absorbs two dollars for every one dollar it returns to the farmer. Thus the farmer can approximate the position of industry, or of other groups.

"By the long arm of his own organization, the farmer can make himself felt beyond his line fences

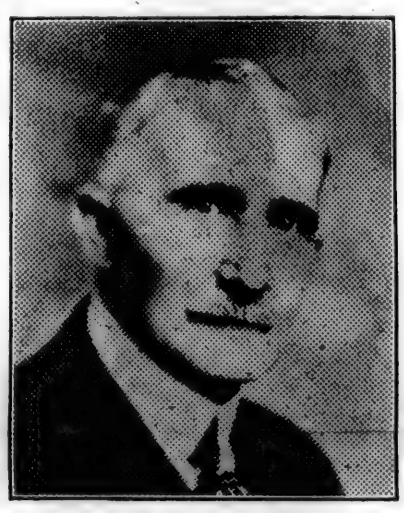
"More Than A Fight For Fair Farm Prices"

Says C. V. Gregory, Editor Prairie Farmer

In staging state wide farm parades July 4th, Illinois farmers are doing more than lead a fight for fair farm prices.



We are in the midst of a struggle in which farmers are furnishing the shock troops, but they are fighting for the rights of all the common people as well as for themselves. They are leading the fight for all people who work for a living, who want a dollar only in return for a dollar's worth of service.

It is a struggle to determine whether the common people shall continue to work for themselves, using and enjoying the things that they produce in such great abundance, or whether the nation shall be turned over to the exploiter and the spoiler.

The common people of America stand in battle array, and the God of Justice is fighting on their side. The farmers of Illinois are in the front line, confident that their organized effort will win the victory.

The great agricultural state of Illinois is fortunate in having in this time of emergency the great Illinois Agricultural Association, strongest and most ably manned state farm organization in the country. Twenty years of Farm Bureau experience in Illinois has developed leaders whose ability is unsurpassed in any field. Their services are dedicated to this fight for equality for agriculture.

When 10,000 new Farm Bureau members march in review July 4th, shoulder to shoulder with the veterans in the movement, that demonstration of loyalty and support will double the effectiveness of the leaders. Under the flag of the Farm Bureau the farmers of Illinois July 4th will start the march to victory.

Sam H. Thompson

"Efficient Production Alone Not Enough"

Sam H. Thompson

Future progress of agriculture depends today more than at any time in the history of our country on strong organization of farmers. Efficient production alone, growing more bushels per acre, breeding more and better livestock will not solve the present day problems. We must put agriculture on a sound basis. Long hours of labor, working every member of the family and practising self-denial and continually drawing out and exhausting the fertility of the soil have in the past made it possible to pay for farms. We cannot longer afford to farm that way. If we want to keep our children on the farm and continue the business, we must put agriculture on a substantial paying basis that will bring satisfactory returns, so that they can make the home and farm attractive and really worth while, for the best of men.

Organization—Only Way Farmers Can Be Effective

By George C. Jewett, Vice-chairman Congress Trust and Savings Bank

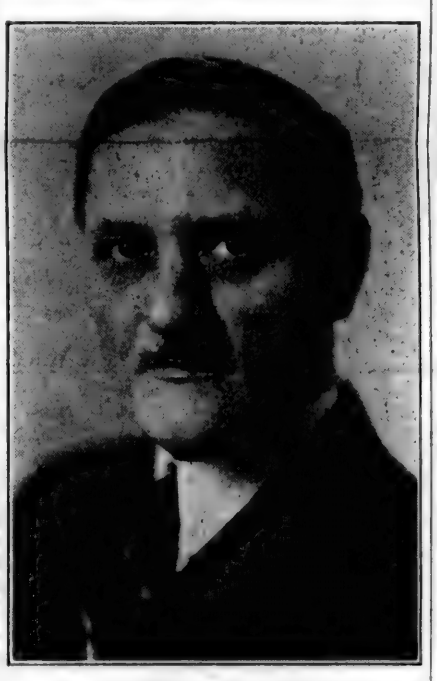
The Nation is in distress. Distress—disaster—soup kitchens—unemployment and suicides prevail through the land. Improvement must start with agriculture. This is realized and frankly admitted by the business interests of the nation. This places on the shoulders of the farmer, the nation's as well as his own welfare. It calls for and demands a militant fighting farmer and a militant fighting farm leadership. The only way the farmer can effectively fight is through organization.

Mr. Jewett

The only way the farm leader can fight is with a powerful organized backing. Without strong organized leadership, the farmer will continue in difficulty and distress, and eventually will be relegated to a peasantry class; the growth of the nation retarded and our social and civic life endangered. It is time to fully organize. It is time, too, to give farm leaders power and strength. Organization is the watchword of the hour and on it depends everything.

Clifford V. Gregory

Two Obstacles To Overcome



By Jas. C. Stone, Chairman Federal Farm Board

"The co-operative movement has two obstacles to overcome and protect itself against. Perhaps the more serious is that within the ranks of agriculture—apathy and indifference on the part of many farmers, who do not understand what the program means to them.

"Then there is the opposition coming from some of those who are engaged in handling farm products. This opposition is directing its fire largely against the Farm Board with such charges as 'government in business', 'price fixing', and 'setting aside the law of supply and demand', all designed to stir up public resentment against what is being done.

"I would like to suggest to you leaders in co-operative marketing and all others engaged in agriculture that you must not let the real purpose be camouflaged by such tactics. That real purpose is against farmers organizing their own marketing system. Its object is to kill co-operative marketing.

"Organized agriculture will have to make itself heard if it wishes to protect what it has gained. A most important work to be done is that of informing unorganized farmers and the public generally about the co-operative program."

Jas. C. Stone

ORGANIZATION CUTS LIMESTONE-PHOSPHATE COST

Co-operative Action Alone Makes Possible Savings To Bureau Members

Since the Limestone-Phosphate Department of the I. A. A. was organized early in 1920, a complete change has been brought about in both the methods of handling limestone and phosphate and the standard quality grades acceptable to Illinois farmers. These changes, in both cases, resulted beneficially to the purchasers.

In the cost of limestone, a continual check has been maintained on the product produced by each company cooperating with the I. A. A. and County Farm Bureaus, with the result that a valuation score card as to competitive quality was prepared, which put all agricultural limestone on the market at its own value and price according to quality, rather than permitting all grades to be sold at same price, which unduly penalized the purchaser of material of low grade where he could have purchased a higher and more satisfactory grade at no greater cost.

A Joint Service

Also, the department has continued at all times, to work in cooperation with and under advice of the authorities of the University of Illinois. The farm advisers are carrying out the latest research findings and advice of research authorities, thereby bringing about a more intelligent use of limestone, measuring the application to each acre's needs. The work of the farm advisers along this line cannot be overestimated. It has played a large part in putting Illinois in its present outstanding position in the use of agricultural limestone.

Since the inception of this department Illinois has used an annual tonnage ranging from 300,000 tons in 1920 to 925,000 tons in 1929—the largest tonnage of agricultural limestone ever used in one year by any one state. This tonnage dropped to 750,000 tons in 1930 and approximately 300,000 tons in 1931, due to the big drop in the farmer's buying power.

During the ten years the I. A. A. has had contract relations with limestone producers, Illinois has used a total tonnage of agricultural limestone amounting to approximately 6,500,000 tons. During eight years previous to the beginning of our contract relations and supervisional service, the total tonnage of agricultural limestone used in Illinois was only 1,714,000.

Lower Prices Gained

The I. A. A., through its Limestone-Phosphate Department, has kept in mind at all times, the question of price per ton on agricultural limestone, as well as the question of freight rates. Much has been accomplished with both, with the result that Illinois is today able to purchase limestone perhaps cheaper per ton than any other state, taking into consideration the question of supervisional service maintained.

It would be hard to estimate the savings in dollars and cents to the Illinois farmer due to this service. A differential in price to Bureau members has been established. During the year 1929, this saving alone amounted to $37,500. The savings represented by basic price of agricultural limestone, as compared with prices prevailing in other states, was estimated at $180,000 in 1929 alone. This differential, or discount, to Farm Bureau members during 1930 amounted to more than $30,000.

Ground Phosphate

Organized buying of ground rock phosphate began in Illinois early in 1920. A branch office of the I. A. A. limestone-phosphate department was opened at Columbia, Tennessee, in the phosphate field, on March 15, 1920. This office reported on shipments, rendered invoices, check tested, and looked after the interests of Farm Bureau members.

At that time rock phosphate was being sold on the basis of 13% phosphorus and 90% through 100-mesh screen (10,000 openings to the square inch) at a price of $10.00 to $10.25 f. o. b. mines in Tennessee. These were the best prices available, and they were based on a guarantee of buying 10,000 tons.

After further negotiations, the I. A. A. was able to contract for a minimum of 20,000 tons at a price of $7.50 per ton f. o. b. mines, in Tennessee, with the understanding and agreement that each and every car was to be sampled and analyzed by the I. A. A.'s own sampler and chemist, and the shipping company agreeing to accept settlement on the results obtained by our own chemist.

During the remaining nine months of this first year, 28,000 tons were handled through the department, a direct saving to the purchasing farmer of $2.50 to $2.75 per ton, or a total of more than $70,000.

New Plan Tried

This same method of contract dealing was maintained during the next four or five years, but it soon became evident that to produce sufficient tonnage to permit the producing companies to remain in business, would require the efforts of well-trained and highly efficient salesmen.

With this in mind, a new plan was worked out whereby the I. A. A. ceased to merchandise, but maintained a supervisional and advisory service under which basis specifications were established and each individual shipment was sampled and analyzed and reported upon to the customers by the I. A. A.'s own employees.

A small fee per ton to the I. A. A. on everything the contract companies shipped into Illinois, was agreed upon. This fee, however, did not reflect itself in a higher cost to the purchaser, as the plan had a very great bearing upon the elimination of sales resistance and the contract companies were able to sell much more phosphate per salesman and per dollar of sales expense than they were able to do otherwise.

Under this plan, which has been maintained since it was first inaugurated, tonnage began to increase, until in 1929 it reached the greatest tonnage ever supervised by the I. A. A. in any one year.

Improves Quality

At all times the I. A. A. has based its policies and activities on the latest scientific and experimental findings, until at the present time the specification for fineness is 95% through a 200 mesh sieve (40,000 openings per square inch) as compared to 90% through a 100-mesh sieve at the start. The fineness on the 100-mesh sieve continued to increase year to year until it finally averaged on all shipments more than 99% and approximately 97% through a 200-mesh. This finer grinding has increased production costs somewhat, but it has very much more increased its value to the farmer. The selling cost today is a very material factor in the price to the consumer. Increased demand for this product would tend to greatly decrease this selling cost.

During the 12 years life of the Limestone-Phosphate Department

(Continued on Page 4, Col. 6)

I. A. A. FIGHTS FOR AGRICULTURE

FARM CO-OPS GIVE PRODUCER BETTER PRICE

Narrows Spread Between Price Paid By Consumer and Received By Grower

Ten years ago when the tenth anniversary of the Farm Bureau in Illinois was observed there began a period of steady progress and development in co-operative marketing.

Farmers who take part in the state-wide celebration July 4 have watched this movement develop from its meagre beginning to a great system of farmer-owned and controlled co-operatives operating on a national basis and handling farm commodities in volume never before handled through a single agency, private or otherwise.

The co-operative movement in Illinois had its beginning in the formation of farmer-owned grain elevators and co-operative livestock shipping associations which operated as independent local organizations. It was not until after the depression of 1921-22 that Illinois farmers began seriously to develop machinery to control their commodities after they left the country point.

This movement led to the organization of the Producers Livestock Commission Association of East St. Louis, followed by similar sales co-operatives the next year at Chicago, Peoria, and Indianapolis. The Illinois Agricultural Association devoted much time and effort to the organization of these co-ops.

Began in 1921

About this time the I. A. A. also began making surveys to find the possibilities in marketing other commodities co-operatively. The year 1921 marks the beginning of the first state fruit and vegetable co-operative, the first co-operative milk association, and the first attempts at handling grain on the terminal markets.

At present Illinois farmers have state-wide agencies for marketing milk, vegetables, livestock, grain, soybeans, butterfat, poultry, red top seed, and other commodities. Several of these are affiliated with national marketing organizations.

More than 23,000 carloads of Illinois livestock were handled through Producers' Commission Associations or sold direct to packers during 1931. Early in the year the Illinois Livestock Marketing Association was organized to co-ordinate the work of county and district marketing associations and direct the movement of livestock to the best markets.

At the present time the state association has six county concentration points in operation and two more almost ready to open. The volume of livestock handled by these points has increased every month since last October when they started operating as units of the association.

In May the volume was nearly 3,000,000 pounds. During the eight months from October 1 to June 1 the association handled 15,309,520 pounds. The new organization is affiliated with the National Livestock Marketing Association and works in co-operation with Producers' Commission agencies.

Over 80 Members

The Illinois Grain Corporation, organized in 1930, now has over eighty member elevators as compared with 32 at the beginning of 1931. These elevators have a combined business of 14,000,000 bushels of grain annually.

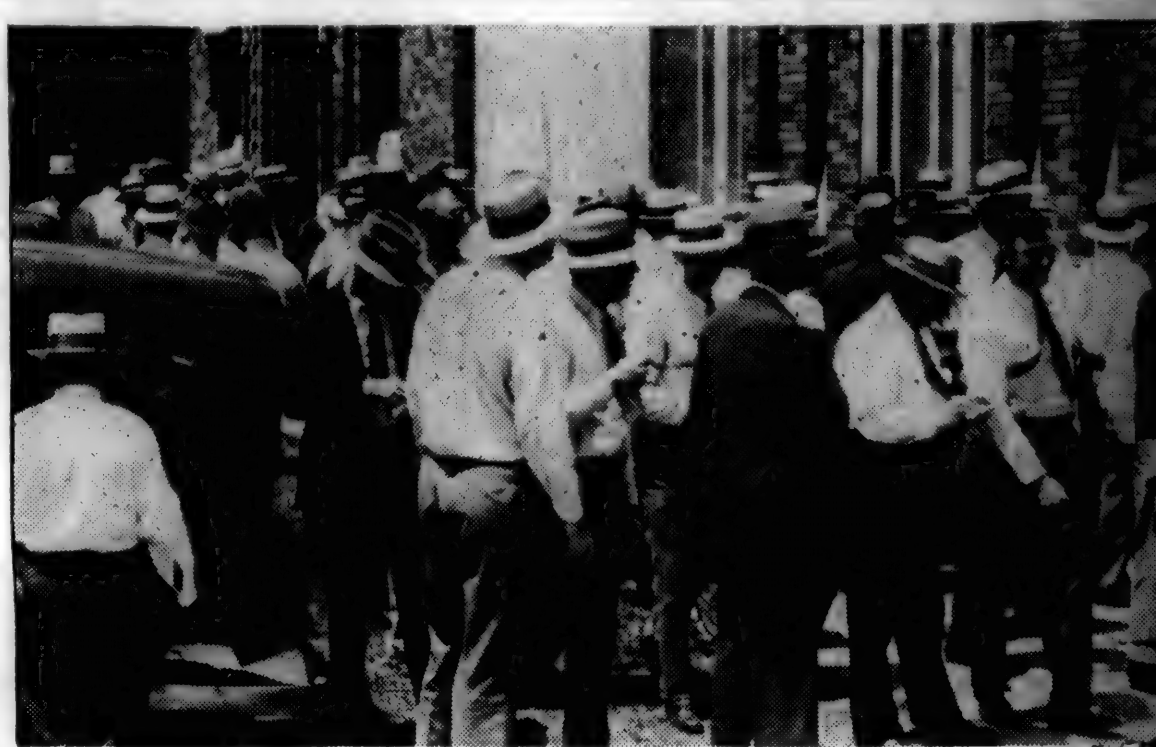
Illinois Grain Corporation stands third among the 25 regional co-operatives in volume of grain handled through Farmers National Grain Corporation during the past year. At least 60 of the 102 counties in the state have used the terminal facilities of the co-operative, sending their grain from more than 200 shipping points. The average volume from Illinois for the past four months is more than 600 cars a month. In March, 666 cars were handled by the state organization.

A seven per cent dividend on preferred stock in Illinois Grain was recently paid out of the earnings of the co-operative. This is an indication that the organization is getting the support of grain growers. Deficits incurred during the organization period also have been paid off. For the first time in history farmers are organized to control their grain until it reaches the processor or consumer.

The Illinois Fruit Growers Exchange last year handled more than 1,200 cars of fruit and vegetables, selling to 200 markets in 23 states and three Canadian provinces. This is one of the oldest co-operatives in the state. It is affiliated with the National Fruit and Vegetable Exchange, recently organized with A. B. Leeper as its president and general manager. In addition to its marketing activities, the state exchange purchases supplies for fruit growers and has only recently organized a credit corporation to aid its members.

Practically every milk market in Illinois is now organized and 85 per cent of the fluid milk in the state is marketed through co-operatives. The value of co-operatives in the fluid milk industry is shown by the fact that milk was the last farm commodity to suffer price declines and even now milk is much above the level of grain, livestock, and other major commodities.

Care For Surplus



An important step is now being undertaken at Rock Island and at Peoria to take care of surplus milk by setting up creameries owned and operated by the milk co-operatives. During the past year surplus milk has created one of the major problems confronting the industry.

The Illinois Produce Marketing Association handled more than 3,000,000 pounds of butterfat during 1931 through its 48 member county associations. It is estimated by F. A. Gougler, director of produce marketing for the I. A. A., that the co-operative actually raised the price of butterfat three cents above what the price would have been without farmer organization. This means a cash return of several hundred thousand dollars, not including patronage refunds to members. Non-members as well as members receive the benefit of the improved price level.

The Soybean Marketing Association, which has just finished its second season, has handled nearly 3,000,000 bushels of soybeans at prices from three to four cents above prices paid across the state line in Indiana where soybean growers are not organized. This year the association handled a considerable volume of beans for export. About 31 counties sent soybeans through the co-operative this year. More than 4,000 growers hold memberships in the organization. Illinois produces about 40 per cent of the soybeans produced in the United States for commercial purposes, and of these the Soybean Association markets about 60 per cent.

Nearly 1,000 new members were signed up by the red-top seed co-operative, the Egyptian Seed Growers Exchange in 1931, increasing the membership to 2,738. This co-operative controls a large part of the red-top grown in this country. About 90 per cent of the country's supply comes from southern Illinois where the Seed Growers Exchange is located.

INVITE YOUR NEIGHBOR TO ATTEND THE DEMONSTRATION YOUR COUNTY JULY 4

Part of the 3,000 Entering Armory at Decatur, where State-Wide Demonstration July 4th was Un Approved.

SAVE CASH CUT FARM COSTS BY VOLUME BUYING

Organized Purchasing of Petroleum Products Pays, Save More Than Dues

Most of the Farm Bureau members who drive to the celebrations to be held in every county in Illinois July 4 will be using oil and gas bought through their own company at an average saving of 15 per cent of what it would have cost them elsewhere.

The Illinois Farm Supply Company is an excellent example of what farmers can do to cut their production costs through organized purchasing of commodities they need. That the state company and its subsidiaries have succeeded in achieving this aim is demonstrated by their rapid growth and their substantial refunds.

April 1 was the fifth birthday of the Farm Supply Company. In 1927 it started business with ten county companies already organized and a few others in process of organization. At the end of seven months the company had 14 member companies and had handled for them 3,500,000 gallons of petroleum products. This was just a beginning.

Ranked Fifth

The state company in 1931 handled for its 47 member companies more than 33,000,000 gallons of fuel oils and lubricants. This farmer-owned company ranked fifth in gasoline sales and second in kerosene sales among the 874 licensed petroleum distributors in the state last year.

But what about the savings which the company made possible for Farm Bureau members? In 1931 more than $500,000 went back to member patrons from the county subsidiaries. This was enough to pay the Farm Bureau membership dues of every member in the counties where these companies operate. If members got no other benefit from the organization but the privilege of sharing in this enterprise they would be amply rewarded.

Three years ago there were only 16 companies associated with the state company, operating 42 bulk storage stations and approximately 100 trucks. Today there are 52 member companies, 125 bulk stations, and some 360 trucks serving the farm trade.

Yet, in spite of the rapid growth during the past few years, 1932 promises to be the greatest year for the project. During February the Farm Supply Company received orders for more than 400 cars of petroleum products, representing an increase of 19.5 per cent for volatile fuels, 22.3 per cent for lubricating oils, and 83.8 per cent for grease over the same month the preceding year.

April Big Month

More than five and one-half million gallons of these products, or something over 700 carloads, were distributed to Illinois farmers through this agency during April. During the five years the company has operated, no month has equalled this in volume. All commodities handled showed substantial increases over the corresponding month in previous years.

Gasoline sales were 3.6 better than any previous April, kerosene sales were 29.1 per cent better, tractor and burner fuel 449.9 per cent better, and lubricating oil 5.5 per cent better.

The gallonage of all petroleum products handled during the first eight months of the present fiscal year exceed the volume for the same period last year by a good margin. The volume handled during the past eight months was more than the entire gallonage handled by the company during the fiscal years of 1929 and 1930.

This increase in volume is not due entirely to the organization of the five new companies. The companies already in opera shown substantial increas ness. This indicates tha are realizing more and economic value of co-oper chasing as a means of production costs.

FARM BUREAU FIGHTS TO CUT TAXES FURTHER

Tax Committees Reveal Local Districts Can Eliminate Levies Next Year

Farm Bureau members who gather in every Illinois county to take part in the state-wide demonstration July 4 will have in their minds the dramatic story of how their organization has led the fight for just taxation during the past ten years and will have at their command figures to show the dollars-and-cents value of such work.

They will also gather in their various counties with a determination to continue the fight and put across the new state-wide campaign of intelligent tax reduction now being conducted by the Farm Bureaus and Illinois Agricultural Association. County Tax Committees are now getting the facts about taxation in their own communities with an eye to reducing if not wiping out levies in the next year or two.

"Information brought to light at district tax reduction conferences held up to date indicate that many school districts have sufficient funds on hand so that substantial cuts can be made in local tax levies," John C. Watson, director of taxation, reported recently.

Can Eliminate Levies

"Members of the County Farm Bureau tax committees, many of whom are local school trustees, showed that there were sufficient funds in local treasuries to entirely eliminate tax levies for the next year or two and still remain on a cash basis," he said.

Watson reported that the local tax reduction program is being accepted enthusiastically over the state and that tax committees are already taking steps to secure full information before proceeding further.

"While the results of this inquiry cannot be measured until late summer or early fall," said Mr. Watson, "the outcome so far looks encouraging. We believe it will result in a substantial reduction in general taxes on property without impairing any necessary or essential public services.

"The state-wide investigation growing out of the appointment of county and township Farm Bureau tax committees has for its goal tax reduction without creating or increasing public debt, but if possible with reductions in existing debts," Mr. Watson said.

"There is no intent in this survey to embarrass any public official, in fact, we expect it to result in acknowledgment and commendation of good administration wherever found."

Township Committees Too

The County Tax Committees will secure all necessary information about the revenues, expenditures and financial condition of their own respective counties. Township Tax Committees will do the same for taxing districts wholly or partially within the township.

Thus far all counties have been represented in the district conferences held with one exception and that county is expected to be represented at a later meeting.

Conferences with attendance held to date are as follows:

May 25, Aledo, 80 present
June 2, Rushville, 105 present
June 6, Murphysboro, 113 present
June 7, Carmi, 150 present
June 8, Olney, 47 present
June 9, Tuscola, 43 present
June 10, Danville, 78 present

$1,500,000 Slash

Reductions in farm valuations in Illinois during 1931 alone, through the efforts of the Farm Bureau, were slashed approximately $1,500,000 from the tax bill of Illinois farmers as compared to what they would have paid under 1930 valuations.

Farm property will pay about $6,500,000 less in all taxes on the 1931 valuations than it would have paid if assessments had remained the same as in 1920.

This means an average saving of nearly $33 in taxes on each of the 214,000 farms of three acres or more in the state. In a number of counties the actual reduction amounts to this much from 1931 to 1932 alone.

On December 14, 1921, farmers were represented along with other taxpayers in a public hearing before the Illinois Tax Commission for the first time in the history of Illinois. Mr. Watson was there to give the commission the results of studies he had been making. The Illinois Agricultural Association protested against the increase in valuations which had raised farm taxes and asked for a new deal.

In 1921-1922

As a result of these efforts in behalf of the farmer, the commission cut valuations of land $181,066,785 in 1921 and 1922. At the state rate then in effect this meant a saving of more than $1,000,000 to farmers. The following year saw practically every Farm Bureau checking land and improvement valuations. The association failed to win its fight for equalization in certain counties, but at the end of the year the recapitulation showed that from 1921 to 1923 land owners had secured the benefit of a total reduction of $3,963,773 in state and county taxes.

In both 1924 and 1925 the continuing effect of the previous efforts saved the farmers of Illinois between $2,000,000 and $2,500,000. Each year reduced valuations have helped cut the farmer's tax burden in spite of some increases in rates.

Assessed valuations of Illinois farm lands and improvements were cut more than $286,000,000 in 1931, it is shown in a survey recently completed by the taxation department of the I. A. A. This means that the total assessed values of farm property, excluding Cook county, are now approximately 15.9 per cent below 1930 values.

All Except Six

Every county in the state except six received reductions in land valuations during the past year ranging from less than one per cent to as much as 37 per cent. In some instances land was assessed as much as $20 to $25 an acre lower. Fourteen counties had reductions of at least 25 per cent. In one county $14,500,000 was cut from the total valuation of farm lands and improvements.

Not only were valuations cut, but drastic reductions were made in the farmer's taxes as a result of the cuts. Taxpayers in Piatt county are paying $107,714 less taxes this year than a year ago because of lower assessments secured through the efforts of the Farm Bureau tax committee.

Thirty-six farms picked at random from various townships in Rock Island county show how the fight waged by the Farm Bureau last December succeeded in lowering farm taxes. All the farms examined except one paid less taxes for 1931 than for 1930. Reductions ranged from $3 to $80 per farm.

Save $2 to $72 Per Farm

In a similar test in McDonough county every one of the 36 farms showed a reduction. The saving varied from $2 to $72 per farm. In ten cases out of the 36 the reduction was more than $50 per farm. This saving is in the most part accounted for by the 25 per cent reduction in assessed valuations secured through the Farm Bureau.

Sangamon county is another example of the influence of the Farm Bureau in securing tax reductions. There the cut in valuations on farm lands and improvements last year was 26.89 per cent, a reduction of $18.88 per acre in the assessed valuations. This means a saving of about $90 per quarter section of land in the tax bill under the present rate.

Even with these drastic reductions in assessed valuations and taxes, they are still out of line with present selling values. Figures just released by the Bureau of the Census show that during the decade 1920 to 1930 farm property values declined 26.5 per cent. Since 1930 there have been more rapid declines.

MILLIONS SAVED AS RESULT OF I. A. A. SERVICE

Illinois Farmer Now Has Expert Representation And Freight Rate Service

Farmers who attend the state-wide celebrations July 4 could count up several million dollars they have saved as a result of advice and representation in public utility matters made available through the Illinois Agricultural Association since the organization was started.

The transportation department works quietly in conferences with utility and railroad executives, before state and interstate commerce bodies, and in its own office at the I. A. A. headquarters. Even the members of the Farm Bureau scarcely realize that matters vitally affecting their interests are being brought up almost daily.

Railroads are constantly attempting to change freight rates, to discontinue local stations, and otherwise alter shipping facilities; construction companies are continuously offering contracts for rights-of-way across farm lands which frequently would work out to the disadvantage of the farmer; telephone complaints come in almost every day; the construction of electric transmission lines frequently starts controversies; and damage claims are made by the hundreds.

Need Expert Service

In this day when every farmer has business sooner or later with railroads or utilities of some sort, he must have expert representation which he can get only through organization. The individual farmer cannot protect his own interests against powerful corporations. He cannot keep informed as to freight rate matters which require expert interpretation.

The I. A. A. transportation department, organized in 1920, at first devoted its attention to settling loss and damage claims for members, but soon initiated the important work in securing lower freight rates and opposing increases.

The first outstanding accomplishment that really showed the possibilities in transportation service was realized when the association secured freight rate reductions on limestone for western Illinois farmers, saving them approximately $30,000 on the basis of 1920 figures. J. R. Bent and L. J. Quasey played an important part in this accomplishment.

In 1923 the Interstate Commerce Commission's decision in the mixed livestock case, for which the association was one of the hardest workers, saved Illinois farmers approximately $270,000 a year. Reduced rates on livestock were gained for shippers along the Wabash railroad to East St. Louis. A grazing-in-transit privilege was secured from the Rock Island which meant a saving of $28 on a double deck car of sheep from the West. A transit privilege on red-top seed was established which made possible a saving of $30 a car.

Fruit Rates Cut

Early in 1924 in a proceeding before the Interstate Commerce Commission a proposed advance in fruit and vegetable rates was opposed resulting in a saving of from $22 to $30 a car on peaches and strawberries, and from $7 to $9.50 a car on other fruits and vegetables.

In a complaint brought by the I. A. A. before the state commerce commission the minimum weight on hogs in carloads was reduced from 17,000 to 16,500 pounds, resulting in an annual saving of approximately $100,000. The Illinois Agricultural Association working with the American Farm Bureau succeeded in defeating a proposed increase in freight rates on farm products asked by the railroads in 1925.

Each year the services of this department have broadened and the savings to farmers have increased. Last year, advice and representation meant a saving of at least $500,000. Eighty-five counties shared in this service which includes adjustment of freight rates, train service, shipping facilities, railroad station closing cases, railroad right-of-way cases, pipe lines, telephone

(Continued on page 4, Col. 3)

Local Papers Called it a "Mystery" Meeting.

Biggest Task Yet Undertaken In State

All officers, directors, and the entire staff of the I. A. A. and associated companies are mobilized to help out in organization work and preparation for Dedication Day. Officers, directors and staff members will appear as afternoon speakers at the celebration meetings to follow the big parade. Allied organizations in Illinois and from adjoining states have been called on for help in providing speakers for the occasion.

This state-wide demonstration to to be held simultaneously in every county on the same day is the biggest task ever undertaken by farmers of Illinois. The problem of scheduling a speaker at every county looked almost impossible when the plan was first outlined, but with the co-operation of all groups a list of speakers was drawn up and a schedule arranged to provide for every county celebration.

IF THE FARMER DOESN'T ORGANIZE OTHERS WILL AND THEY'LL TAKE CARE OF THEIR OWN INTERESTS FIRST

MORE THAN 3000 PACK NEW

I. A. A. PUTS 40 BILLS THROUGH LEGISLATURE

In Every Session Are Many Measures of Interest and Importance to Farmers

Farm interests have constantly been represented by the Illinois Agricultural Association at Springfield since 1916 when the first legislative committee of the organization was appointed and sent to the state capital to speak for agriculture.

Since that time more than 40 bills, initiated and supported by the I. A. A., have been incorporated into the laws of the state. The organization has been equally as active in opposing legislation contrary to agricultural interests.

Among the first bills sponsored by the I. A. A. were the pure seed bill, the farm advisers' bill, and a bill to allow farmers compensation for the slaughter of tubercular cattle. The first of these was actually drafted by the legislative committee of the Illinois Agricultural Association, as were a number of other bills.

In every session of the general assembly since that time, there have been some bills in which the organization was interested either as sponsor or supporter or as an opponent. Perhaps, the three bills with the greatest significance to farmers were the state co-operative marketing act of 1923, the gas tax bill, and the state income tax bill the constitutionality of which is now being tested before the supreme court.

100 Per Cent Co-ops

The marketing act opened the way for the organization of 100 per cent co-operatives. The gas tax has aided in giving the state an excellent system of paved roads, and the income tax when fully in effect will reduce property taxes and lift part of the unjust burden from the farmer and home owner.

The growing cost of distributing farm products early impressed farm leaders with the need for legislation under which farmers might form non-profit co-operatives for the purpose of encouraging orderly marketing and reducing the spread between producer and consumer prices. An insidious attempt, made by enemies of co-operative marketing, to pass a bill which would have killed every co-operative in the state, brought the matter to a head.

In the 1923 session of the general assembly, the co-operative act was introduced and was the center of a bitter fight which continued throughout the session. Representatives of the I. A. A. appeared before both houses several times to explain and defend the bill. Near the end of the session it went through without a single amendment not approved by the association, and is now recognized as one of the best laws of its kind in the country.

Favored Gas Tax

Early in 1924 the executive committee of the I. A. A. approved the following recommendation of the legislative committee:

"Inasmuch as we are convinced that the question of tax on gasoline used for motor-driven vehicles will come up in this term of the general assembly, we believe that our association should take steps in advance looking toward the passage of legislation that will place this revenue in lieu of taxes already levied."

In 1925 several gas tax bills were introduced. The only one that received any favorable consideration, however, was the lieu tax bill drafted by the I. A. A. providing that the revenue be used to replace taxes on property and that it be allocated to the counties in a large part for maintenance and construction of secondary roads. The state apparently was not yet ready for this legislation for it failed to pass.

Two years later when the question again came before the legislature, certain provisions of the I. A. A. bill were not received with favor. Other bills were introduced in both houses providing that all funds from the tax should go toward the completion of bond issue roads.

As soon as the proponents of the other bills saw that they were headed for defeat, they approached the representatives of the association and asked them to prepare whatever amendments they thought advisable. These amendments which gave recognition to secondary roads were prepared, submitted to the proper committee, and voted by an overwhelming majority. From that time on the gas tax bill had the support of the I. A. A. and had no trouble in passing.

State Income Tax

Long before the passage of this bill farm leaders had been studying the possibilities of a state income tax as a means of reducing the heavy property tax burden on farms and homes. The I. A. A. legislative committee appeared before a committee of the Constitutional Convention in 1922 and advocated an amendment to the revenue section to pave the way for such a measure based on ability to pay.

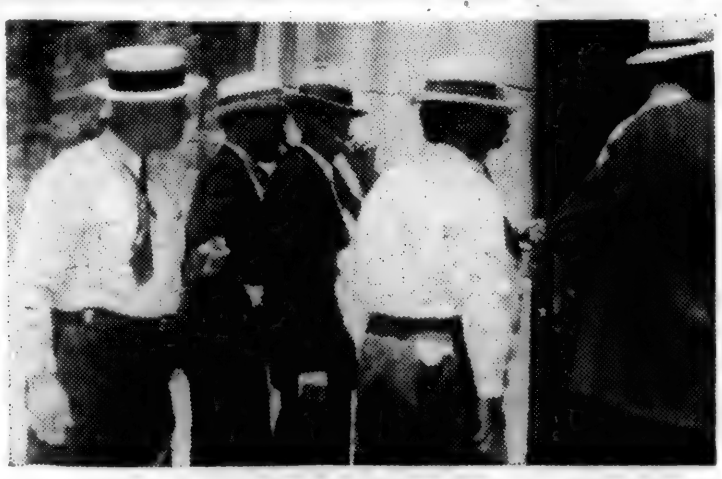
After attempts to amend the constitution had failed both in 1922 and 1926, it was decided to see what could be done under its present provisions. In 1927 an income tax bill, similar in many respects to the bill recently passed, was introduced but failed by 10 votes.

Another income tax bill, practically identical with the 1927 bill, was introduced in 1929. It passed the Senate but was defeated in the House, losing this time by only five votes. In 1931 the bill for the third time failed to pass, lacking only two votes in the House.

In the summer of 1931 Governor Emmerson appointed the "Governor's Tax Conference" Committee to work out a tax relief program. The "Conference" was composed of 40 Chicago and downstate men representing the important groups of Illinois citizens.

I. A. A. Represented

This group chose an executive committee of eleven, of which Earl C. Smith, president of the I. A. A., was a member. Omer N. Custer, chairman of the state tax commission, and Ray Wantz, Rockford manufacturer, were the only other downstate men on the committee of eleven. John C. Watson, director of taxation for the I. A. A. and the "original" proponent of a state income tax, was invited to attend the sessions and assist the committee.



Finally, a bill providing for a state income tax along with other measures was drawn up and presented at Springfield with the approval of the Tax Conference.

The representatives of the association worked untiringly for this measure from the time the special session opened in November until the bill was passed early in February. Since the constitutionality of the bill has been attacked and the case carried to the supreme court, the Illinois Agricultural Association has assisted the staff of the attorney general's office in defending it and will continue to do so until the final decision is handed down.

It is estimated that the state income tax when in effect will reduce farm taxes $7,500,000 annually and cut taxes of other property owners around $22,500,000 in a year like 1931. In years of normal prosperity, the reduction in property taxes will be considerably greater.

MILLIONS SAVED THROUGH I. A. A. REPRESENTATION

(Continued from page 3)

complaints, electric transmission lines, and rural electrification.

Pipe line systems were in process of extension in 35 counties during the year. As a result of the combined efforts of the I. A. A. and county Farm Bureaus, landowners of the state received approximately $350,000 more for pipe line easements and damages in construction than the companies originally offered.

Early in the year through the joint efforts of committees from Stephenson, Ogle and Lee counties and representatives of the I. A. A. an agreement with power officials regarding settlement for an electric transmission line right-of-way between Dixon and Freeport procured for landowners $20,000 more than previously offered by the company.

The I. A. A. also handled 26 cases dealing with shipping facilities, 20 cases resisting the closing of local stations, and 159 cases pertaining to right-of-way problems such as railroad fences, cutting weeds on rights-of-way, repair of farm crossings, and drainage complaints.

In addition to this service, the I. A. A. claims department collected 832 claims against public utility companies totaling $20,159.88, making the total amount of claims collected by the organization nearly $240,000 since this service was started.

Saved $25,000 on Soybeans

Recently the I. A. A. suceeded in getting the Interstate Commerce Commission to remove the 15 per cent emergency freight increase from soybeans, saving Illinois farmers about $25,000 a year. Through negotiations with rail executives, the association was able to get a reduction in rates on peaches into eastern territory ranging from $23 to $99 a car. An agreement was reached with Illinois railroads regarding intra-state rates on fruits, vegetables, dairy products, hay, and limestone, resulting in a saving instead of an increase in the freight bill on these commodities. Largely through the influence of the organization livestock rates were lowered in eastern and southern Illinois, cutting about $100,000 a year off the farmers' freight bill.

The association also recently represented the interests of Illinois farmers in important hearings before the Interstate Commerce Commission on soybean rates into Iowa and on a petition to remove the $2.70 switching charge from livestock arriving at the Chicago yards by rail. The decisions on these cases have not yet been rendered.

NEW ARMORY AT DECATUR

To An Emergency Appeal—President Smith Is Seen Speaking To the Delegates.

LAUNCH DRIVE TO RAISE PRICE

(Continued from page 1)

The executive session lasted until almost noon, and the waiting crowd was kept busy by J. H. Checkly, Logan county farm adviser who led in community singing.

President Smith was greeted with a two-minute ovation when he mounted the platform. He did not waste time in preliminaries. He stated that the condition of the Illinois farmer had been growing worse and worse and that reports of staff members pointed to a critical situation.

Smith Explains Bill

Explaining the operation of the emergency price raising plan, Mr. Smith cited an example of a farmer selling 1,000 bushels of wheat. If the survey of the secretary of agriculture showed that 75 per cent of the wheat crop was needed for home consumption, the farmer would have 250 bushels deducted from his total and receive negotiable paper for 750 bushels.

"We do not intend to wait until the excise tax of 42 cents is collected before paying off," he said. "We expect that unappropriated resources of the treasury be used in payment and that these funds be repaid through excise tax levy.

"On May 23 I went to Washington to see what could be done about it," he said. "With me were other farm leaders, interested in finding some relief for not only Illinois farmers, but the farmers of the nation. We wanted to know what was being done to get rid of accumulated crop surpluses.

Credit Only Temporary

"All we heard was discussion of ways and means to extend more lines of credit to more people. With prices of farm products at the point where we ship our capital away whenever we ship our corn or hogs, what good is credit going to do us? It is merely temporary.

"We asked if America could come back if farm prices were not brought back. We got blank looks.

"We told these party leaders that the way to stop the depression was to hurdle it instead of trailing it.

"We got the job of working it out ourselves. We have drafted the bill and it has been presented by Congressman Rainey. In a conference with the Illinois delegation, at which all downstate members were present who were in Washington, Mr. Rainey, as dean of the delegation pledged the solid support of the group. There were no Cook county men there, but they were invited."

Details of the demonstration and Dedication Day program were explained by Secretary Geo. E. Metzger after Larry Williams briefly sounded the call for an aggressive, fighting spirit in a rousing address.

Copies of the plan together with photostats of floats and blue prints telling how to construct them were handed out or sent to each county Farm Bureau.

In each county a general Dedication Day committee with sub-committees for program, prize contest, floats, publicity, parade, etc. will carry out the July 4th celebration.

Vernon Vaniman called on for brief remarks paid tribute to the great loyalty of the Farm Bureau leaders and members in Illinois, pointing to the fact that hundreds had got up before daylight that morning to be at the meeting.

Decatur's Armory Never Saw Such a Large Assembly

In that e more counties organized the total to 15. By 1919 county Farm Bureaus had ganized, and by 1921 there 5 counties in which there tive Farm Bureau organiza- perating.

Illinois Agricultural Associa- rved first as a medium for Farm Bureau leaders to- to discuss state and national ns. Its early efforts were con- rgely to representing Illinois ture in the state legislature. 1919 the founders of the Bureau visualized the pos- s of a strong, well-financed, t organization to represent s in questions too large for uals and county units to And so the Illinois Agri- Association was reorganized on its present basis with a $4.50 annual membership fee and a staff of men carefully selected to carry out the adopted program.

Given First Attention

Legislation, taxation, representation before rate-making bodies, and organized buying of agricultural limestone and ground rock phosphate were given chief attention. Next co-operative marketing with departments for each commodity were set up so as to help producers retain control of their product until it reached the processor or consumer.

The Producer co-operative livestock marketing associations, the milk and produce co-operatives now operating in almost every market center in and adjoining Illinois, the Illinois Fruit Growers Exchange, the Egyptian Seed Growers Exchange, the wool pool, and now the Illinois Grain Corporation were outgrowths of that early movement to give the farmer a voice in the sale of his products.

Early in 1924 a new service was added when the present Illinois Agricultural Auditing Association was organized then as the Illinois Agricultural Co-operatives Association. The primary object of this service was to provide an adequate and competent audit and accounting service for co-operative associations and agricultural organizations.

Later Services

The Farmers Mutual Reinsurance Co. was launched a year later on November 21, 1925 to provide fire, hail, windstorm insurance, and reinsurance for local farm mutuals.

Next came the Illinois Agricultural Mutual Ins. Co. in 1926, the Illinois Farm Supply Co. in 1927, and the Country Life Insurance Co. in 1929. Throughout this period were organized many co-operatives about market centers and in rural communities throughout the state.

Ten years ago at the 10th Anniversary Celebration in DeKalb, Eugene Davenport, then dean of the State College of Agriculture, wrote of this celebration: "Illinois farm people from every corner of the great commonwealth, from the rolling hills, the fertile bottoms, and sweeping prairies, commemorate the organization of the first Farm Bureaus in Illinois. They are gathered to celebrate the achievement of 10 years, and to look forward to the great promise that lies ahead—a promise of a profitable and permanent agriculture and a successful and satisfactory farm life."

So on July 4 will members of the Farm Bureau gather in every county, mindful of the fear and paralysis that for the present grips the nation; conscious of the greed and exploitation largely responsible for the condition of the country, but steadfast in support of organized effort, and looking ahead to a more successful and satisfactory farm life.

ORGANIZATION CUTS LIME-STONE PHOSPHATE COST

(Continued from Page 2, Col. 7)

of the I. A. A., it has sold directly and otherwise supervised a total of approximately 243,000 tons of phosphate. In a matter of dollars, this represents an expenditure on the part of the Illinois farmer for this one commodity alone, of approximately $1,950,000.00, exclusive of freight which approximated $1,150,000.00, or a total of $3,100,000.

As was true with agricultural limestone, a plan was worked out whereby the Farm Bureau member could purchase phosphate on a differential of 50c per ton under the price paid by non-members. This feature alone has saved the member farmer in this state approximately $100,000. A further saving, impossible to estimate, has been made due to I. A. A. bargaining power and to supervisional service, which guaranteed quality, fineness of grinding, and correct weights.

I. A. A. PUTS 40 BILLS THROUGH LEGISLATURE

In Every Session Are Many Measures of Interest and Importance to Farmers

Farm interests have constantly been represented by the Illinois Agricultural Association at Springfield since 1916 when the first legislative committee of the organization was appointed and sent to the state capital to speak for agriculture.

Since that time more than 40 bills, initiated and supported by the I. A. A., have been incorporated into the laws of the state. The organization has been equally as active in opposing legislation contrary to agricultural interests.

Among the first bills sponsored by the I. A. A. were the pure seed bill, the farm advisers' bill, and a bill to allow farmers compensation for the slaughter of tubercular cattle. The first of these was actually drafted by the legislative committee of the Illinois Agricultural Association, as were a number of other bills.

In every session of the general assembly since that time, there have been some bills in which the organization was interested either as sponsor or supporter or as an opponent. Perhaps, the three bills with the greatest significance to farmers were the state co-operative marketing act of 1923, the gas tax bill, and the state income tax bill the constitutionality of which is now being tested before the supreme court.

100 Per Cent Co-ops

The marketing act opened the way for the organization of 100 per cent co-operatives. The gas tax has aided in giving the state an excellent system of paved roads, and the income tax when fully in effect will reduce property taxes and lift part of the unjust burden from the farmer and home owner.

The growing cost of distributing farm products early impressed farm leaders with the need for legislation under which farmers might form non-profit co-operatives for the purpose of encouraging orderly marketing and reducing the spread between producer and consumer prices. An insidious attempt, made by enemies of co-operative marketing, to pass a bill which would have killed every co-operative in the state, brought the matter to a head.

In the 1923 session of the general assembly, the co-operative act was introduced and was the center of a bitter fight which continued throughout the session. Representatives of the I. A. A. appeared before both houses several times to explain and defend the bill. Near the end of the session it went through without a single amendment not approved by the association, and is now recognized as one of the best laws of its kind in the country.

Favored Gas Tax

Early in 1924 the executive committee of the I. A. A. approved the following recommendation of the legislative committee:

"Inasmuch as we are convinced that the question of tax on gasoline used for motor-driven vehicles will come up in this term of the general assembly, we believe that our association should take steps in advance looking toward the passage of legislation that will place this revenue in lieu of taxes already levied."

In 1925 several gas tax bills were introduced. The only one that received any favorable consideration, however, was the lieu tax bill drafted by the I. A. A. providing that the revenue be used to replace taxes on property and that it be allocated to the counties in a large part for maintenance and construction of secondary roads. The state apparently was not yet ready for this legislation for it failed to pass.

Two years later when the question again came before the legislature, certain provisions of the I. A. A. bill were not received with favor. Other bills were introduced in both houses providing that all funds from the tax should go toward the completion of bond issue roads.

As soon as the proponents of the other bills saw that they were headed for defeat, they approached the representatives of the association and asked them to prepare whatever amendments they thought advisable. These amendments which gave recognition to secondary roads were prepared, submitted to the proper committee, and voted by an overwhelming majority. From that time on the gas tax bill had the support of the I. A. A. and had no trouble in passing.

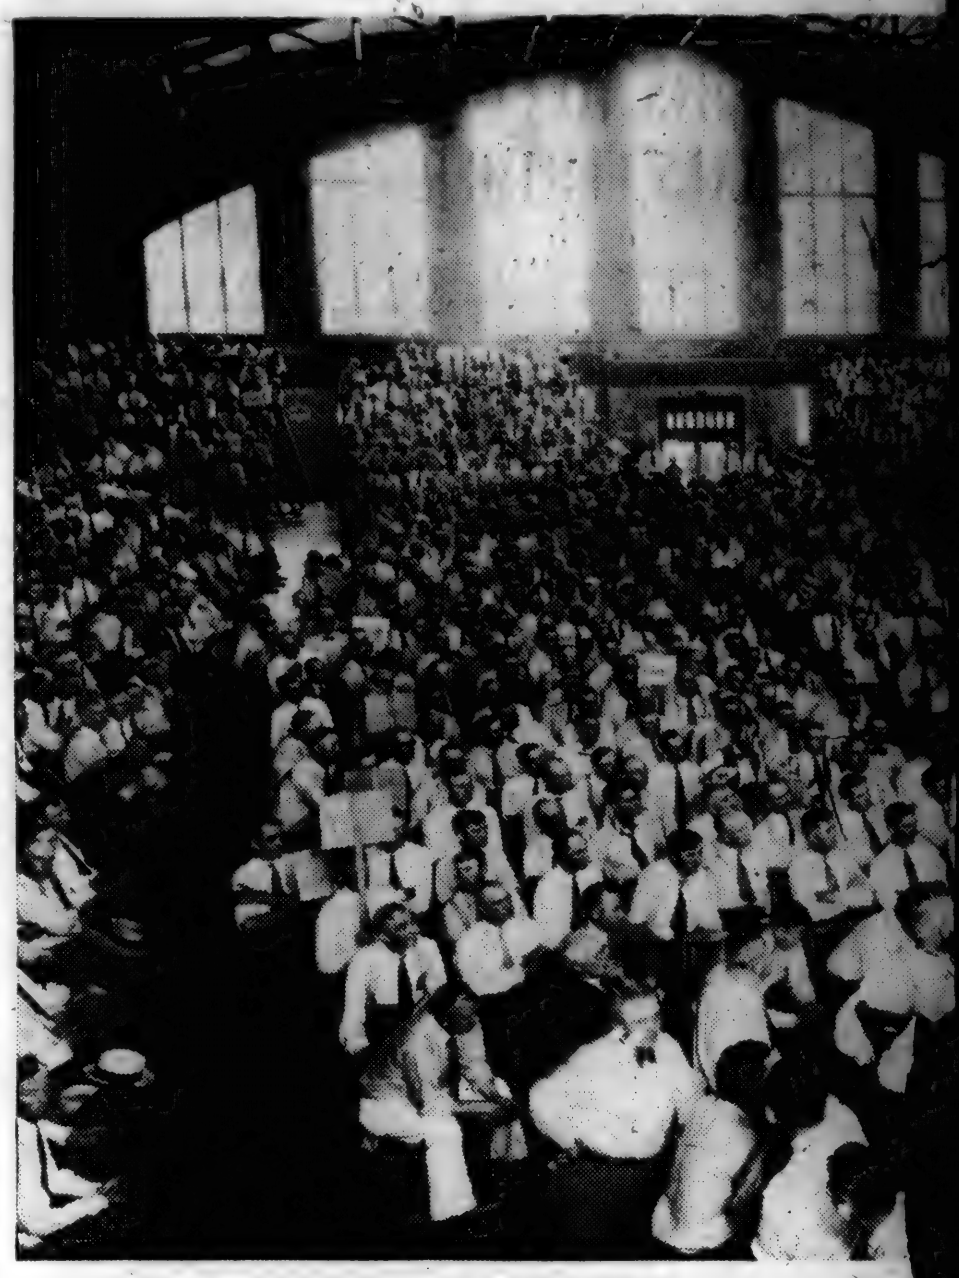
State Income Tax

Long before the passage of this bill farm leaders had been studying the possibilities of a state income tax as a means of reducing the heavy property tax burden on farms and homes. The I. A. A. legislative committee appeared before a committee of the Constitutional Convention in 1922 and advocated an amendment to the revenue section to pave the way for such a measure based on ability to pay.

After attempts to amend the constitution had failed both in 1922 and 1926, it was decided to see what could be done under its present provisions. In 1927 an income tax bill, similar in many respects to the bill recently passed, was introduced but failed by 10 votes.

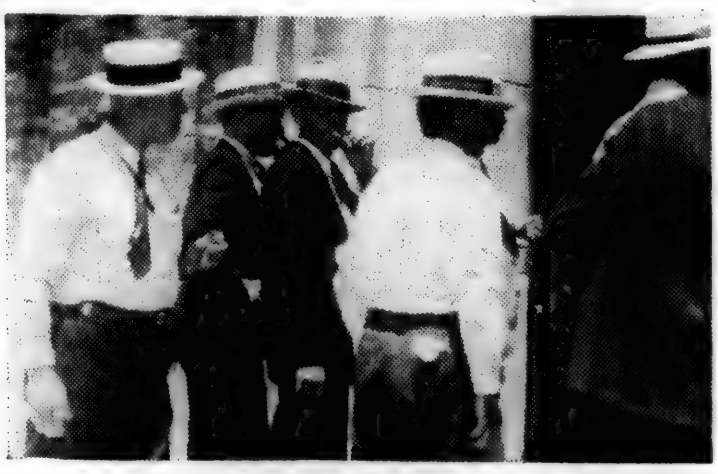
Another income tax bill, practically identical with the 1927 bill, was introduced in 1929. It passed the Senate but was defeated in the House, losing this time by only five votes. In 1931 the bill for the third time failed to pass, lacking only two votes in the House.

In the summer of 1931 Governor Emmerson appointed the "Governor's Tax Conference" Committee to work out a tax relief program. The "Conference" was composed of 40 Chicago and downstate men representing the important groups of Illinois citizens.



I. A. A. Represented

This group chose an executive committee of eleven, of which Earl C. Smith, president of the I. A. A., was a member. Omer N. Custer, chairman of the state tax commission, and Ray Wantz, Rockford manufacturer, were the only other downstate men on the committee of eleven. John C. Watson, director of taxation for the I. A. A. and the "original" proponent of a state income tax, was invited to attend the sessions and assist the committee.



Finally, a bill providing for a state income tax along with other measures was drawn up and presented at Springfield with the approval of the Tax Conference.

The representatives of the association worked untiringly for this measure from the time the special session opened in November until the bill was passed early in February. Since the constitutionality of the bill has been attacked and the case carried to the supreme court, the Illinois Agricultural Association has assisted the staff of the attorney general's office in defending it and will continue to do so until the final decision is handed down.

It is estimated that the state income tax when in effect will reduce farm taxes $7,500,000 annually and cut taxes of other property owners around $22,500,000 in a year like 1931. In years of normal prosperity, the reduction in property taxes will be considerably greater.

From Every Part of Illinois Came Farm Bureau Leaders In Respo... To An Eme...

It Was A 200 Mile Drive For Many

MILLIONS SAVED THROUGH I. A. A. REPRESENTATION

(Continued from page 3)

complaints, electric transmission lines, and rural electrification.

Pipe line systems were in process of extension in 35 counties during the year. As a result of the combined efforts of the I. A. A. and county Farm Bureaus, landowners of the state received approximately $350,000 more for pipe line easements and damages in construction than the companies originally offered.

Early in the year through the joint efforts of committees from Stephenson, Ogle and Lee counties and representatives of the I. A. A. an agreement with power officials regarding settlement for an electric transmission line right-of-way between Dixon and Freeport procured for landowners $20,000 more than previously offered by the company.

The I. A. A. also handled 26 cases dealing with shipping facilities, 20 cases resisting the closing of local stations, and 159 cases pertaining to right-of-way problems such as railroad fences, cutting weeds on rights-of-way, repair of farm crossings, and drainage complaints.

In addition to this service, the I. A. A. claims department collected 832 claims against public utility companies totaling $20,159.88, making the total amount of claims collected by the organization nearly $240,000 since this service was started.

Saved $25,000 on Soybeans

Recently the I. A. A. suceeded in getting the Interstate Commerce Commission to remove the 15 per cent emergency freight increase from soybeans, saving Illinois farmers about $25,000 a year. Through negotiations with rail executives, the association was able to get a reduction in rates on peaches into eastern territory ranging from $23 to $99 a car. An agreement was reached with Illinois railroads regarding intra-state rates on fruits, vegetables, dairy products, hay, and limestone, resulting in a saving instead of an increase in the freight bill on these commodities. Largely through the influence of the organization livestock rates were lowered in eastern and southern Illinois, cutting about $100,000 a year off the farmers' freight bill.

The association also recently represented the interests of Illinois farmers in important hearings before the Interstate Commerce Commission on soybean rates into Iowa and on a petition to remove the $2.70 switching charge from livestock arriving at the Chicago yards by rail. The decisions on these cases have not yet been rendered.

NEW ARMORY AT DECATUR

To An Emergency Appeal—President Smith Is Seen Speaking To the Delegates.

LAUNCH DRIVE TO RAISE PRICE

(Continued from page 1)

The executive session lasted until almost noon, and the waiting crowd was kept busy by J. H. Checkly, Logan county farm adviser who led in community singing.

President Smith was greeted with a two-minute ovation when he mounted the platform. He did not waste time in preliminaries. He stated that the condition of the Illinois farmer had been growing worse and worse and that reports of staff members pointed to a critical situation.

Smith Explains Bill

Explaining the operation of the emergency price raising plan, Mr. Smith cited an example of a farmer selling 1,000 bushels of wheat. If the survey of the secretary of agriculture showed that 75 per cent of the wheat crop was needed for home consumption, the farmer would have 250 bushels deducted from his total and receive negotiable paper for 750 bushels.

"We do not intend to wait until the excise tax of 42 cents is collected before paying off," he said. "We expect that unappropriated resources of the treasury be used in payment and that these funds be repaid through excise tax levy.

"On May 23 I went to Washington to see what could be done about it," he said. "With me were other farm leaders, interested in finding some relief for not only Illinois farmers, but the farmers of the nation. We wanted to know what was being done to get rid of accumulated crop surpluses.

Credit Only Temporary

"All we heard was discussion of ways and means to extend more lines of credit to more people. With prices of farm products at the point where we ship our capital away whenever we ship our corn or hogs, what good is credit going to do us? It is merely temporary.

"We asked if America could come back if farm prices were not brought back. We got blank looks.

"We told these party leaders that the way to stop the depression was to hurdle it instead of trailing it.

"We got the job of working it out ourselves. We have drafted the bill and it has been presented by Congressman Rainey. In a conference with the Illinois delegation, at which all downstate members were present who were in Washington, Mr. Rainey, as dean of the delegation pledged the solid support of the group. There were no Cook county men there, but they were invited."

Details of the demonstration and Dedication Day program were explained by Secretary Geo. E. Metzger after Larry Williams briefly sounded the call for an aggressive, fighting spirit in a rousing address.

Copies of the plan together with photostats of floats and blue prints telling how to construct them were handed out or sent to each county Farm Bureau.

In each county a general Dedication Day committee with sub-committees for program, prize contest, floats, publicity, parade, etc. will carry out the July 4th celebration.

Vernon Vaniman called on for brief remarks paid tribute to the great loyalty of the Farm Bureau leaders and members in Illinois, pointing to the fact that hundreds had got up before daylight that morning to be at the meeting.

Tazewell in '13

he 1, 1913 Tazewell county ed and adopted the name ell County Farm Bureau." said to be the first time e was used in the United In 1913 eight new counties Farm Bureau work bringing al of organized counties to year later the Smith-Lever as passed appropriating for county agents. In that e more counties organized the total to 15. By 1919 county Farm Bureaus had ganized, and by 1921 there counties in which there tive Farm Bureau organiza- perating.

Illinois Agricultural Associa- rved first as a medium for Farm Bureau leaders to- to discuss state and national ns. Its early efforts were con- rgely to representing Illinois ture in the state legislature. 1919 the founders of the Bureau visualized the pos- s of a strong, well-financed, t organization to represent s in questions too large for uals and county units to . And so the Illinois Agri- l Association was reorganized on its present basis with a $4.50 annual membership fee and a staff of men carefully selected to carry out the adopted program.

Given First Attention

Legislation, taxation, representation before rate-making bodies, and organized buying of agricultural limestone and ground rock phosphate were given chief attention. Next co-operative marketing with departments for each commodity were set up so as to help producers retain control of their product until it reached the processor or consumer.

The Producer co-operative livestock marketing associations, the milk and produce co-operatives now operating in almost every market center in and adjoining Illinois, the Illinois Fruit Growers Exchange, the Egyptian Seed Growers Exchange, the wool pool, and now the Illinois Grain Corporation were outgrowths of that early movement to give the farmer a voice in the sale of his products.

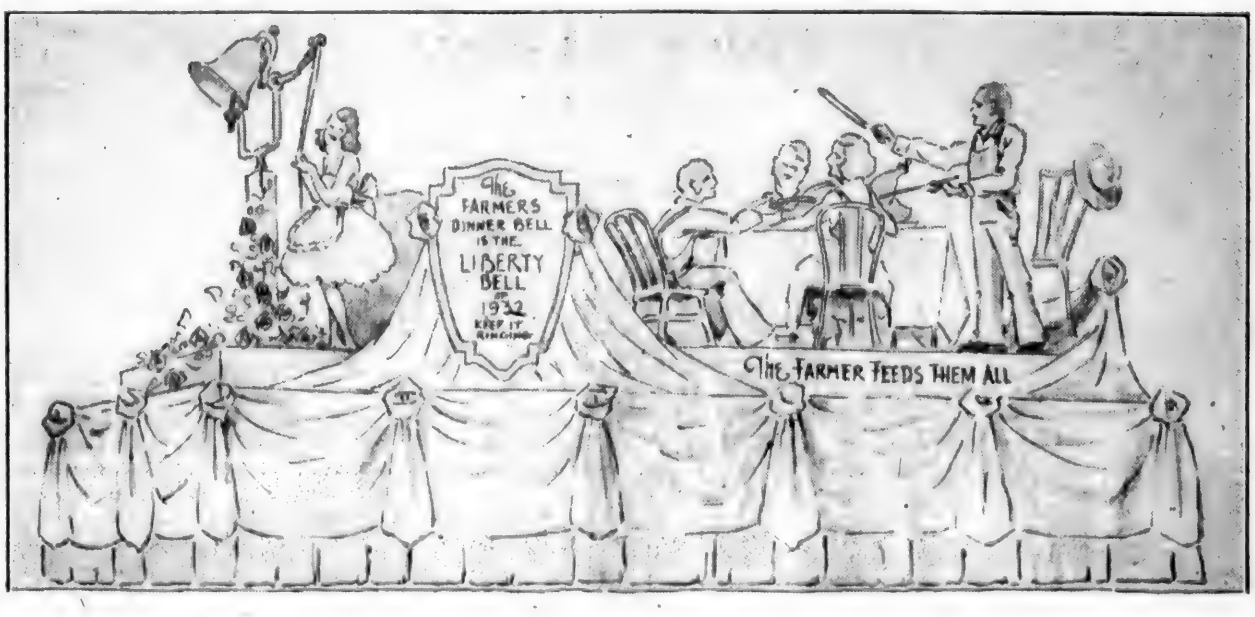
Early in 1924 a new service was added when the present Illinois Agricultural Auditing Association was organized then as the Illinois Agricultural Co-operatives Association. The primary object of this service was to provide an adequate and competent audit and accounting service for co-operative associations and agricultural organizations.

Later Services

The Farmers Mutual Reinsurance Co. was launched a year later on November 21, 1925 to provide fire, hail, windstorm insurance, and reinsurance for local farm mutuals.

Next came the Illinois Agricultural Mutual Ins. Co. in 1926, the Illinois Farm Supply Co. in 1927, and the Country Life Insurance Co. in 1929. Throughout this period were organized many co-operatives about market centers and in rural communities throughout the state.

Ten years ago at the 10th Anniversary Celebration in DeKalb, Eugene Davenport, then dean of the State College of Agriculture, wrote of this celebration: "Illinois farm people from every corner of the great commonwealth, from the rolling hills, the fertile bottoms, and sweeping prairies, commemorate the organization of the first Farm Bureaus in Illinois. They are gathered to celebrate the achievement of 10 years, and to look forward to the great promise that lies ahead—a promise of a profitable and permanent agriculture and a successful and satisfactory farm life."



So on July 4 will members of the Farm Bureau gather in every county, mindful of the fear and paralysis that for the present grips the nation; conscious of the greed and exploitation largely responsible for the condition of the country, but steadfast in support of organized effort, and looking ahead to a more successful and satisfactory farm life.

FARM DINNER BELLS RING OVER ILLINOIS ON INDEPENDENCE DAY

Counties Report Record Crowds As Banners and Floats Proclaim Need For Action In Ending Depression

Toulon, July 4: Approximately 6,000 people attended the Stark county celebration here today, reported Wayne Gilbert, farm adviser. Wm. G. Jackson of Toulon won the wagon, Mrs. Donald Leadey of Wyoming, the chest of silver, Mrs. Ray Putman, Yyoming, the community plate goblets, and Margaret Adeline Rogers, the bicycle. Thirteen floats in all including those entered by towns of Toulon, Wyoming, Bradford. Parade escorted by Uncle Sam and Goddess of Liberty, Boy Scout drum and bugle corps.

Floyd Keepers' address was well received by everyone. Incomplete returns show that at least 20 new members joined the Farm Bureau. American Legion and Farm Bureau put on water fight with fire department hose, streams playing on empty barrel.

Judge Leads Parade

Harrisburg, July 4: The Saline county Fair Grounds were crowded today at the big Farm Bureau celebration. The parade led by Judge H. N. Finney on a fine saddle horse, began soon after 11:00 A. M. and proceeded through the business district and out to the Fair Grounds. The executive committee of the Farm Bureau was at the front of the parade followed by the grand prize wagon drawn by a team of horses.

Dinner Bell, Honest Dollar, 4-H Club, and other floats attracted much attention. Wabash Valley Service Co. also had a float.

A. O. Eckert of Belleville, former vice-president of the I. A. A., made a splendid address in which he explained the principles of the Rainey Emergency Relief Bill.

The Wabash Valley Service Co. distributed patronage refund checks for the second 10 per cent refund on last business.

Alice Lewis, the 12-year-old daughter of Ralph H. Lewis of Stonefort won the bicycle. Mrs. Harmon Bramlet of Wasson was the winner of the 34-piece set of silverware and a set of eight beautiful goblets. The grand prize, a McCormick - Deering - Weber, All - purpose, roller bearing wagon, complete with box, tongue and doubletree was won by J. O. Thaxton of Eldorado. The picnic will be long remembered by this county.

25 to 30 Dinner Bells

Danville, July 4: "Our program went off in fine shape here today," reported Otis Kercher, farm adviser. Traffic officers estimated the parade to be from two to four miles in length. The streets were crowded with people who witnessed it. Fifteen floats and 25 to 30 dinner bells were in the parade. The Danville American Legion, city band, Chamber of Commerce, and other local business groups co-operated.

Estimated attendance at the picnic grounds was 10,000 of which 5,000 heard the program through the loud speaking system which was certainly worth the money. Mr. Needler of the Indiana Farm Bureau gave a very good address.

L. H. Duke of Fithian won the wagon; Mrs. Thos. Allison of Danville, the chest of silver; Mrs. Wayne Pruitt of Rossville the set of goblets; and Helen Strubinger of Ridgefarm won the bicycle.

Nashville, July 4: Approximately 8,000 people including the American Legion, and local business groups as well as farmers, gathered here today for Washington county's Dedication Day program. The parade was two miles long. It was the largest attendance of any 4th of July celebration ever held in the county. Floats included a dinner bell, organization, insurance, 4-H Club, Farm Supply trucks, and many others. The afternoon address, contests, burning in effigy held a large audience throughout the afternoon.

Fire Crackers and Effigies

Montgomery County: We had a great day yesterday and we believe it accomplished its purpose, wrote Alden Snyder, farm adviser. The members took hold of the affair and worked with wonderful cooperation. Every city organization came across 100 per cent. The farmers feel closer together and more sure of their strength today, and we know the townspeople were surprised at the size of our organization.

The parade consisted of more than 250 cars and floats, and about 1,500 people. We had two drum corps, a rube band, and about eight floats.

We burned effigies all of which were filled with fire crackers. They made quite a fuss as they burned.

The 4-H Clubs had charge of all

LEADERS FAIL SAYS GREGORY

Real Danger to Country Not Red Menace but Black Flag of Financial Piracy

Note: Following is the outstanding address delivered by Clifford V. Gregory, Editor of Prairie Farmer at the Boone County Celebration July 4, also at the Mercer County Celebration July 7.

THIS is the farmers' day in Illinois. The dinner bells are ringing all over the state, as the Liberty Bell rang 153 years ago in Philadelphia. They are ringing out the same message—a declaration of independence from special privilege and greed.

The divine right of kings is dead. Today we are fighting against the divine right of the few to exploit the many.

Farmers fought at Lexington and Concord for the right to establish their own government. Farmers are fighting today to make that government truly a government of the people and for the people.

As we gather here today on the Fourth of July, 1932, our nation is facing a crisis as desperate as Valley Forge or Gettysburg.

America has grown great because it has been the land of opportunity. We are fighting today to make it the land of opportunity for the people who work as well as for the people who speculate. We are fighting for the right of the little man to live.

A Fool's Paradise

For ten years after the farm deflation of 1920 the cities lived in a fool's paradise. Our financial and political leaders talked glibly about a "new era," in which the cities were no longer dependent on farm prosperity and buying power. Billions in income that should have gone to the farmer went to the cities, where it was diverted into speculation. City people watched paper fortunes grow over night. It became unpopular to work for a living. It was so much easier to take it away from someone else by speculation.

Even that process became too slow for the financial overlords. They floated billions of dollars worth of domestic and foreign securities, backed by little real value, and sold them to a gullible public. Credit was expanded twice as fast as the needs of business demanded. Even the banks became infected with get-rich-quick germ, and unsound banking practices helped to pave the way for the deluge.

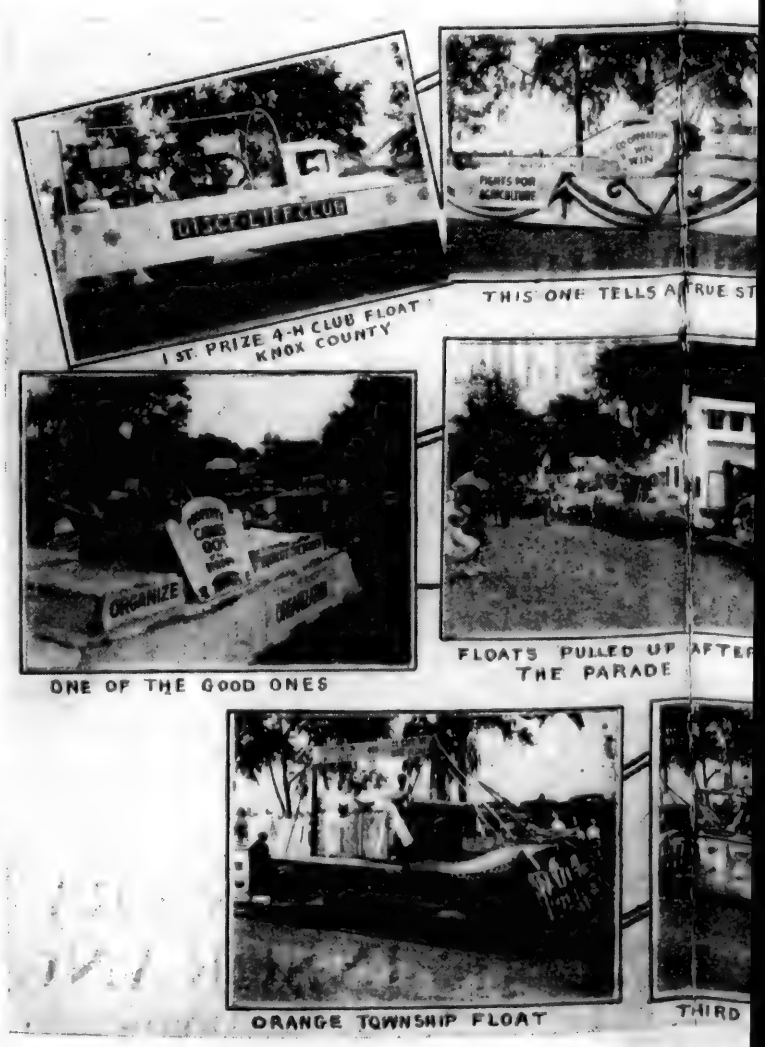
During all this period speculative fortunes obscured the fact that the solid foundation of farm buying power was lacking. The inevitable end came in 1929, with results that are too fresh in mind to need reviewing.

Courageous leadership even then could have brought about a readjustment to sanity without seriously hurting anyone but the speculators. But we had little courageous or intelligent leadership.

At first the official policy of the country was to ignore the depression. Then we tried to whistle our way out. We were told that prosperity was just around the corner. Beginning last winter Washington adopted the theory that we could borrow our way out, and provided billions in federal credit for that purpose. More recently we are trying to save our way out and tax our way out, ignoring the fact that there is little left to save or tax.

(*Continued on page* 2, *Col.* 4)

DISTURBING THEIR L



SEEK EARLY VOTE ON PR

Washington, D. C., July 12—SPECIAL:—The fight for emergency price-raising legislation is being vigorously pushed here by Earl C. Smith, president of the I. A. A., and Edward A. O'Neal, president of the A. F. B. F. who are driving for an early vote on the Norbeck bill in the Senate. Both men have been in the national capital since July 5th.

The Norbeck bill is identical to the Rainey bill introduced in the House several weeks ago. The Senate Agricultural Committee approved the Norbeck bill and voted it out last week. An effort is being made to get a vote on the measure in the Senate within the next day or two. A promise has been s to bring it up immediately the vote on the Home Loan

Down-state Illinoi congre are aggressively fighting to action on the Rainey bill House. This emergency m explained elsewhere in this would boost the price of h per cwt., add 42 cents a bu the price of wheat, and p cents a pound on the price ton for that portion of th consumed in this country.

County's Mammoth Parade.

BIGGEST CELEBRATION IN HISTORY OF FARM BUREAU IN ILLINOIS

Dedication Day Ceremonies and Floats Exceed All Expectations, Business Groups Join In Movement

Tazewell County—Parade 1½ miles long was led by local American Legion and Pekin Municipal band, reports Ralph Arnett, farm adviser. Association of Commerce co-operated with 25 to 30 floats and decorated cars. Farm Bureau floats included dinner bell, co-operative marketing, taxation, and six 4-H floats. Close to 10,000 people witnessed or took part.

Iroquois County—All local organizations co-operated in big parade and demonstration at Fowlers Park, Watseka. More than 5,000 present.

Boone County—Upwards of 5,000 people representing all local organizations and Farm Bureau took part in parade and demonstration held at Boone County Fair Grounds. Grandstand was filled with many standing on side-lines. C. V. Gregory delivered excellent address. Boone County Farm Bureau band furnished music throughout the day. Milking contest for women sponsored by Pure Milk Association, won by Louise Erbentraut of Poplar Grove. Many other contests.

Logan County—More than 5,000 assembled at Lincoln Chautauqua Grounds for the biggest parade in the history of Lincoln and Logan county. Local business groups and labor organizations co-operated with Farm Bureau in floats and parade. It was a great demonstration and dedication of farmers to bring about economic independence, writes Clem Garton. It was an inspiration for everyone to know that in 90 other counties farmers were holding similar Dedication Day programs. O. D. Brissenden made good speech.

Gallatin County—Big parade at Shawneetown brought out tremendous crowd, 12 floats and many decorated cars. Farm Bureau membership increased 50 per cent.

Menard County—Great celebration at Petersburg, 8,000 people present, 12 floats in parade three miles long, excellent program with Hon. Homer J. Tice and G. R. Williams speakers. Effigies burned, prizes drawn, wonderful success. Many new members joined organization today.

Macon County — Approximately 5,000 people took part in the big demonstration. Parade required 33 minutes to pass a given point. Fifteen floats included an outstanding one on taxation showing six men labeled "Members" pulling giant tax load with block and tackle, while 20 men labeled "Non-Members" were asleep on the side-lines. This float drew much interest and applause, Geo. E. Metzger, speaker.

Kane County—G. E. Dickson and H. E. McDonough of Hampshire report that a crowd estimated at 8,000 to 10,000 witnessed the big celebration and parade at Hampshire July 4. The Commercial Club of Hampshire and civic groups had a prominent part in the parade which had 20 to 25 excellent floats. Had two elephants and camel from local circus in the procession. Circus reported biggest gate in two years.

Will County—Celebration held in Dellwood Park followed parade through Joliet and Lockport. Witnessed by thousands with 5,000 to 6,000 out for afternoon program. Largest gathering held in Will county. Dave Thompson big drawing card. Our baseball teams win district championship again with six straight victories.

Livingston County—Twelve thousand people filled Chautauqua Park, Pontiac following big parade with 51 floats in which many local organizations participated, says Steve Turner. Fifty-three organizations took part. Horseback brigade followed by 75 pieces in various sections of bands. Big dinner bell in front of Farm Bureau office started ringing when Art Page of WLS began broadcasting at 5:00 A. M. V. Vaniman, speaker.

Richland County — Excellent co-operation from business houses. Consensus opinion business men that depression will not end until farmer's buying power restored. Special edition Olney Daily Mail featuring 4th of July demonstration. Floats decorated by Chamber of Commerce and other organizations, city furnishing band. Parade 3 miles long, 12 floats, burned 4 effigies.

Bureau County — Demonstration big success, parade two miles long, seven floats, 150 club members, Dave Swanson talked to enthusiastic audience, 4,000 present reports Paul Dean, farm adviser. A. E. Stetson, chr. publicity committee, says: "Farmers from all 26 townships in county whether affiliated with Farm Bureau or not joined in celebration held at Princeton. Local business men co-operating. Dinner bells resounded this morning throughout county proclaiming that agriculture must be restored to economic freedom."

Henry County—H. K. Danforth reports 5,000-7,000 at big celebration in Cambridge. Thirteen floats, 10 banners, American Legion color guard, band, burning in effigy, parade 1½ miles long. First three townships in attendance Andover, Osco and Western. Seventy new members joined, Walter Putman, D. P. Robinson, W. S. Johnston signing 10 or more each.

Christian County—Had a large celebration, parade included four floats which were exceptionally fine. Forty new members.

Woodford County—"Had 45 floats and around 500 other cars in our parade at Eureka. Pronounced biggest and best ever in Woodford County. All local organizations co-operated. Between 4,000 and 5,000 people attended. Howard Leonard had parade organized in great shape with mounted police, 60 piece band, fire department truck with a huge dinner bell and shrieking siren, and combined bands of five high schools with around 200 pieces. Put up radio and amplifiers for WLS dinner bell program. Folks heard radio announcement at their own parade within 15 minutes after last car passed reviewing stand. Newton Jenkins' talk much appreciated."—H. E. de Werff.

Stephenson County—Crowd estimated around 6,000 to 7,000, 42 floats in the parade besides many decorated cars. Donald Kirkpatrick made excellent address. Many new members signed.

Kendall County—Parade with 25 floats 250 cars, toured county going 55 miles. Afternoon program 5,500 present at Houses' Grove. Sixty new members. R. H. Hamilton of I. A. A. speaker.

Scott County — Biggest 4th of July celebration ever held in Winchester, American Legion co-operating. Afternoon program in Monument Park. More than 5,000 present. Dinner bell float and many others including 4-H Clubs. Many new members joined. Wilbur Coultas gave good talk.

DeKalb County — More than 40 floats in parade that toured from Sycamore to DeKalb over to Cortland and back. Estimated 15,000 saw parade. Afternoon program in Municipal Park, Sycamore. More than 5,000 people turned out for Dedication Day program and 20th Anniversary of DeKalb County Farm Bureau. Biggest ever held in county.

Piatt County — Celebration exceeded expectations. Over 5,000 present. Many colorful floats in the parade. Business men co-operated.

Bond County—Had a wonderful celebration with many floats and decorated cars in parade mile long. Everyone co-operated. Had Greenville Band. More than 50 new members. Talmage DeFrees, our president, signed 18 new members himself. Greenville Advocate, Pocahontas News-Patriot, and Sorento News gave wonderful publicity. Our Publicity Committee did fine job.

Knox County—Twenty thousand people witnessed or took part in the huge celebration at Lincoln Park, Galesburg, reports A. R. Kemp. Parade biggest ever held in county with 40 floats and many decorated cars toured county. American Legion, the Mayor of Galesburg and other city officials as well as farmers and 4-H Club members took part. Chamber of Commerce and business men had many floats. People here learned more about Farm Bureau than they ever knew before.

Cook County—Approximately 100 new members signed. Our presi-

The Farmer's Voice Is Heard

By their participation in numbers of thousands in the state-wide celebration July fourth, farmers of the tri-counties indicated in no uncertain manner their desire to arouse the nation to the plight of agriculture. In impressive floats and the unique call of the "liberty bell" and by spell-binding speeches from authorities, they vigorously sounded the slogan of the hour "prosperity in America must begin on the farm."

Those were great demonstrations staged by the farm folks in Cambridge, Toulon and Princeton as well as many other communities throughout the state and they should have their effect upon hastening the recognition to which the farmer is entitled. The Illinois Agricultural Association and Farm Bureaus are to be congratulated upon the energy with which they put their message across. As the farmers of 1776 united and fought for independence, so did the Illinois farmers of 1932 unite to tell the world of their economic independence to restore buying power and lead the nation back to better times.—*Kewanee Star-Courier.*

A Glorious Fourth

The 4th of July celebration promoted by the Stephenson County Farm Bureau and allied organizations yesterday was one of the most spirited and beautiful that Freeport has ever witnessed. It was an astonishing and encouraging spectacle in the midst of an uncomfortable and distressing year. The agricultural organizations deserve the greatest credit and congratulation for having exerted themselves to observe the 20th anniversary of their birth in this manner, and Freeport and its citizens were pleased and proud to be their hosts. . . . The success of yesterday's undertaking promises well for the energy, the determination and the coalescence we must expect of our agricultural industry if it is to become and remain a stable and self-sustaining portion of our whole economic picture.—*Freeport Journal-Standard.*

Agriculture Rings Bell!

If Quincy and Adams county needed to be impressed with the strength and dignity of Agriculture, it learned its lesson in Quincy's celebration of the Fourth of July. The farmers of Illinois, with a sense of the dramatic as well as the patriotic, selected the nation's birthday as Agriculture's Rededication Day. If all of Illinois received as impressive a reminder of Agriculture's vigor and its determination to find its rightful place in the nation's economic and social system, a valuable state-wide effect is certain. . . .

The Adams County Farm Bureau, in the size, quality and dignity of its "Rededication Day" celebration, made the observance of the nation's birthday truly, as The Herald-Whig predicted Sunday morning, a "Timely Fourth."—*Quincy Herald-Whig.*

The farming industry is the backbone of the nation and it is generally admitted that prosperity will continue to be a recollection of the past until this basic industry is placed on a more sound footing. Congress should give serious consideration to any remedial measures suggested that will help the farmer—and effect an increase in the prices of farm products.—*Springfield Register.*

Plea of the Farmers

The bill the farmers of this state are supporting will have the effect, they believe, of restoring buying power to farmers. It must be conceded that if such buying power was restored to them it would help mightily in the work of bringing back prosperity. Without having considered as yet all that would be involved in the passage of this measure, we do not hesitate to express our conviction that it is high time that congress give an attentive ear to the plea for economic independence made by the farmers of America. If the leaders of both parties asked the farmers to draw their own bill, and if this bill embodies what the farmers want, members of congress should give it careful consideration on its merits, with the plight of agriculture as well as the interests of all the people in mind and also should inform themselves on the history of all previous attempts at price fixing. The Farm Bureau of Rock Island county is arranging for a demonstration on July 4 to take place in Prospect park, Moline. The bureau is doubtless prepared to tell all enquirers just what the passage of the bill would mean for agriculture, and most certainly the farm organization would welcome citizens in general to the celebration and would appreciate their cooperation.—*Rock Island Argus.*

the concessions. The men who drew the wagon and silverware had both signed new members.

We had a special edition of the Hillsboro Journal. It was a great day for everyone.

Clinton County: "Our celebration at Carlyle was a great success," reports W. A. Cope, farm adviser. "The people of Carlyle insisted that I lead the parade on horseback. Next came the firing squad of the American Legion, the Carlyle band, and some 150 4-H Club members carrying banners and placards. There were 278 cars in the parade—the best ever held in Clinton county.

"Fifty-three new Farm Bureau members joined. Two of our men won the gold watches. Hy Renschen, our Farm Bureau president, signed 11 new Farm Bureau members. Fred Korte signed 13 new members. Fred's brother, Frank, signed seven. To show you the honesty of our people, both Fred and Frank were working hard for new members, and if Fred had turned over three to Frank both would have won a watch, but he did not do this."

The crowd was estimated at 4,000 to 5,000.

Burn Five Effigies

Greene County: "Our July 4 celebration was held at Whitehall," writes R. H. Clannahan. "The parade was over a mile long and included nine floats and approximately 150 members from the 12 clubs in the county. We burned five effigies starting with 'old-man indifference' and following up with the rest. Ray Miller's talk was much appreciated." L. R. Lee signed 10 members.

Schuyler County: "There were approximately 20 dinner bells in our parade through Rushville, July 4," says L. E. McKinzie, farm adviser. "The parade was about a mile long and included 15 good floats with four bands and 'old-man depression' chained in a cage. Sheriff Bartlow, on horseback, led procession.

"L. L. Day of Ray wrote 10 new members, 27 in all. Wilfred Shaw, our speaker, did a fine job working under difficulties. The afternoon program was held in the public square and it was almost impossible to stop the fire crackers and the noise."

Peoria County: "Our parade was very much better than any of us had even dreamed it would be," stated J. W. Whisenand, farm adviser. "In fact it is one of the finest we have ever seen. The afternoon program was held at Elmwood. The floats were excellent, as you will note by the pictures. Fifty new members joined the Farm Bureau."

Hancock County: "Four thousand participated in the program here July 4," wired O. L. Welsh. "It was a grand success, exceeding all our expectations."

Clay County: "Celebration very successful. Twenty-one new members reported. Membership work will continue."

Prof. Rush Speaks

White County: Our celebration went over with a bang from the start of the parade to the drawings. Prof. H. P. Rusk delivered the speech in great style. There were more than 2,000 people on the grounds when the program opened at 1:30 P. M., and with the aid of an amplifying system the speaker was heard all over. The parade, including many floats and decorated cars, was nearly one-half mile long.

Our "Minute Men" reported 28 new members, Chelsea Williams and J. E. Stine bringing

Sherrill Lamont, a member, won the bicycl Stine, the set of silver and Herbert Austin, wagon.

the plans that have been ave been adopted too late. e been running along be- e depression. The only way it is to head it off.

depression has been ac- ied by the most severe drop s that this country has ever othing destroys public con- and dries up buying power ing prices. Nothing restores y as rising prices.

erity can exist only when exchange goods and serv- ly. When prices are falling ecline much more rapidly hers, making fair trading le and drying up business. prices fall money becomes nd harder to get. Since our ust be paid in money and goods, the burden of debt heavier and heavier as down.

are only the relation be- tween money and goods. When money is scarce prices go down. When it is plentiful prices go up.

The best way to fight declining prices is to increase the supply of money. It is the duty of government to provide its people with sufficient money with which to do business. In normal times the banks perform most of that duty for the government by means of bank credit, which takes the place of money.

When the banks fail to do it, it is the duty of government to step in and provide more money to make good the shortage of credit.

That the government has largely failed to do. Its monetary policy has been vacillating and fearful.

Suffering and Misery

So we have come to a situation in which the richest nation in the world in natural resources and producing ability has 10 million men out of work, and six million farm families working for nothing. Our standards of living have been shot to pieces. A land of plenty is filled with suffering and misery.

This is a depression without reason. There is no reason why it should not end tomorrow.

It does not end because our financial overlords will not permit its end except on their own terms.

They fought credit inflation bitterly, and prevented it during the earlier stages of the depression when it might have been effective. Now that it is becoming apparent that it is too late for credit inflation to become effective, they are opposing currency inflation just as bitterly. Rather than permit the people to control their own money system, they will pull down the house about their heads.

It has become apparent that the credit being pumped into business by the Reconstruction Finance Corporation and the Federal Reserve will not be sufficient. If it could be supplemented quickly by the Rainey emergency bill to raise farm prices, by the home loan mortgage bank bill, by the Steagall bank guarantee bill, and by an enlarged program of public works to put idle men to work, the combined force might prove strong enough to push back the forces of deflation.

But the selfish influence of big money has blocked these measures in congress. The American Bankers Association has prevented the home loan mortgage bank bill from becoming a law. It is afraid of financial competition not under its control.

If any one thing is obvious, it is that money and business is based on confidence. We cannot talk confidence back into people after bank failures have robbed them of the savings of a generation. We can restore it by placing the guarantee of the government through the federal reserve system back of bank deposits. Such a plan is just as sound as any other kind of insurance. It must be adopted if we are to save the financial system of the country from the penalty of its own folly.

Business cannot recover without customers, and customers are of no avail without money in their pockets. Our lost customers are in two classes—the unemployed and the farmers. We can put large numbers of unemployed to work quickly only through an enlarged program of public works.

High Prices and Work

We can restore buying power to farmers quickly only through higher prices. The Rainey bill, prepared by the Illinois Agricultural Association, is designed to do that by giving farmers a higher price in the home market. The exchange value of farm products is only 50 per cent of what it was before the war. That disparity must be removed so that farmers can buy, and so that their buying will open the factories and put man back to work.

Along with everything else that may be done, and more important than anything else, is a sufficient supply of money. With credit frozen so completely, currency will have to be used much more extensively to take its place. Sooner or later the government will supply that currency, for we are not going to let people starve nor our big banks and life insurance companies go to the wall. We will go far to carry out the will of our financial overlords, but we will not starve for them.

A new supply of money, adequate to the needs of business, will revive confidence and business as if by magic. The sooner we supply it the sooner will we be on the road to recovery, and the greater the amount of unnecessary suffering we shall avoid.

We need have no fear of such excessive inflation as occurred in Germany and Russia after the war. We have efficient machinery for stopping inflation when it has gone far enough.

There are still people who hold up their hands in horror at such remedies as these I have suggested. They are the same people who told us in 1929 that prosperity would last forever.

They tell us now that any remedy powerful enough to be effective is economically unsound. To this I reply that nothing can be more unsound than our present condition.

It is unsound to rob a hard working generation of its savings. It is unsound to confiscate the farmer's capital to pay his taxes and interest. It is unsound to compel ten million people to tramp the streets looking for jobs that do not exist; dependent on charity for their daily bread.

We have worshipped our leaders of industry and finance. They told us to save our money, and we saved it. They told us where to invest it, and we invested it there. They told us to vote for high tariffs and special privileges for others, and we marked the cross in the circle.

Leadership All Wrong

Everything they told us was wrong. Now, with our savings gone, our jobs gone, our products begging for a market, the future dark with unknown dangers, why in the name of God should we follow their leadership any longer?

Rather let us follow our farm leadership which says, "Give work to the idle, give the farmer a fair price for his products, give the nation a money system that is honest. Open the markets and the factory doors and let us work our way back to prosperity."

We hear much talk in these days about the red menace and the danger of communism. There is no red menace in this country. The great, sound heart of the nation, the millions who work for a living and who want a dollar only in return for an honest dollar's worth

ANNOUNCING A NEW

Country Life Policy

TERM INSURANCE TO AGE 65, CONVERTIBLE ANY TIME

TO MEET the emergency of farmers who need protection but cannot make the outlay immediately needed for an Ordinary Life policy, Country Life offers this contract which pays the full face of the policy at death, should death occur before age 65.

Upon attaining age 65, or any time before, while this policy is in full force, it may be converted to a regular form policy, the insured receiving full credit for back premiums paid on the form chosen. In other words, to convert as of original age he must pay the back difference between the term policy premium and the Ordinary, 20 Pay or Endowment policy to which he converts, with interest at six per cent. However, the insured may carry this term policy to age 65 and then drop it. Conversion is not necessary.

Here are the low dividend paying rates for applicants from ages 20 to 50 inclusive, sold in any amounts and at any time of year to any individual of above mentioned ages in good health.

KEYNOTE ADDRESS TELLS P

RESTORED FARM PRICE LEVEL IS KEY TO RETURN OF PROSPERITY

Dedication Day Speakers Emphasize Need For Militant Organization of Farmers To Insure Square Deal

A restored farm price level is the one thing that will turn the tide of constant and continuous deflation and unemployment back to industrial employment and prosperity. With agriculture out of the market for the products of American factories, with nearly 50 per cent of the American people directly dependent upon farm income for a livelihood, there is little hope for better times in this nation until that basic industry gets a reasonable return for its labor and investment.

This was the thought driven home by scores of speakers in nearly every Illinois county on the farmers Dedication Day programs July 4th.

Comparing the farmers battle of 1932 for freedom from economic oppression with the battle of the farmers of 1776 for freedom from political oppression, the address set forth the issues at stake, and the solution offered by organized farmers to present economic problems.

The text of the speech carefully prepared for the occasion and read by many of the Dedication Day speakers follows:

The first Fourth of July was a day of Decision—one of Declaration—and likewise one of Dedication. On yonder side of this historical guide-post of freedom the altars of sacrifice had been builded, at Lexington, at Concord, at Bunker Hill. Of such, history has produced no parallel. It was at Concord Bridge—

"The embattled farmers stood,
and
Fired the shot heard 'round
the world."

For days the spokesmen for the colonists had debated the proposition — "RESOLVED, that these United Colonies are, and of right ought to be free and independent states." Finally the day of decision arrived. It is this day we celebrate.

After the decision to act, came its declaration, a notice to all the world—The Declaration of Independence.

At the head of the army in New York, upon orders of Washington, the Immortal Document was read. The wildest enthusiasm was created. One gilded statue of the tyrant king alone, yielded in the melting pot forty thousand bullets. Upon that day through that decision and through the declaration of that decision, the moral fibre of the colonists was revivified and the heart of that people was tempered against the Valley Forges that were yet to come. Yes, my friends, that first day was one of Determination.

Day of Dedication

We also celebrate this day as a DAY OF DEDICATION. Seven long and weary years record the sacrifices inspired by that Day of Dedication. Few, if any, at the beginning of that period, save by faith, could envision the final triumph at Yorktown. By citizen and soldier alike there on that day, commitment to the great cause was made.

This day, therefore, my friends, is and will always be our outstanding national holiday.

At Runnymede the charter of Anglo-Saxon liberties was wrested from an unwilling King. That hour was momentous. Bastile Day marked the passing of the fallacy of the doctrine of the divine right of kings, a doctrine used to shackle brave hearts and to restrain the impulses of free hearts.

On the first Fourth of July, there was published the grandest, the bravest, and most profound document ever signed by the representatives of a free people. It was a Declaration of War against the most powerful Nation in the world —a Declaration of War by a few patriots, without organization, without military forces, without apparent strength, without wealth,— a Declaration against the greatest power of the Seven Seas—and at a time when her yessels of war were hovering along the Atlantic coast ready to pounce upon defenseless towns, to ravage and destroy. The principal cities were in substantial possession of the enemy. Thousands of British soldiers were upon our soil; and yet, notwithstanding these fearful odds, the stout-hearted fathers of the American Revolution made Declaration that they were a free and independent people.

Declaration Was Beginning

The glory of the nation begins with that declaration. Yet, inseparable from that Declaration of Independence are the outlines of the honest face and features of that determined leader, well called the Father of his Country. Washington and Independence became synonymous. But, to measure the meaning of either the word Independence or the man, George Washington, in this remote day is well nigh impossible. We are too far from the need of that day to know aught but its cooled pages of history.

Two hundred years later, as we celebrate the bicentennial of George Washington's birth, we find it difficult to relive the days that contributed that great heart to a giant cause, and difficult to know his real greatness.

New causes and new despairs confront us. Our dire need today tends to hide with its immediate oppression the history of far greater oppressions and the manner in which they were lifted by staunch men of great heart.

Simple would be America's problems today, could we command the organized belief in the need for united action that made the endurance of a Valley Forge possible. Today's cause calls not for sword and gun, but stern moving in organized unison of the millions of agricultural people dedicated to the solution of their problems through the following of leadership born of that cause.

Agriculture Denied Seat

Since the deflation of 1921—for over ten years organized agriculture has been making a fight for economic equality. All other lines of industry and labor have had the support and kindly consideration of Government. Agriculture has not been given a seat at the family table.

Since the collapse in 1929, the situation has become exceedingly more aggravated, until at the present time it is acute. A year ago the farm price index was 91—today it is 56. On the first of last December, it had fallen to 71. By the first of this last February, it dropped to 60. On the first of April, 59, and it is still receding.

Organized agriculture has consistently insisted that action on the part of the Federal Government was necessary along three or four lines to start a restoration by giving the basic industry a fair and equal chance. After the most careful consideration by outstanding and eminent students of the question, your national organization proposed what we call "The Honest Dollar Bill,"—a bill, which if adopted by Congress, would establish a fundamentally sound monetary policy for the Nation. This measure, in part, proposes that all the powers now possessed by the Federal Reserve System be directed to two ends: first, to restore the purchasing power of the dollar to the average for the period 1921 to 1929; and second, to stabilize the purchasing power of the dollar as nearly as practical at that level.

Our big banks are bulging with money. We have more gold than any other nation on the face of the globe. Our natural resources are enormous. Our factories are the most efficient in the world. Yet, the farmers are faced with ruin and ten million unemployed walk the streets in search of work.

What May Happen

Eminent economists warn us that the worst has not yet been reached, unless something is done to check the deflation. As the Right Honorable Winston Churchill said in an address on the world economic crisis: "The hideous processes of deflation have but to go on to isolate the nations and reduce them to the barbarian and to the bartering of the dark ages." Unless something is done to check the forces of deflation, they tell us that labor, city real estate, and all property values must inevitably come down to the level of commodity prices. This means that the wages of union labor will have to be cut in half; doctors and nurses, 25 to 50 per cent less than they now receive; salaries of school teachers and professors from 25 to 40 per cent, dollar capitalization of industrial companies from 60 to 65 per cent less, and so on all along the lines, from the least to greatest. That is the dismal picture of what will happen if the rest of this country is brought down to a level with agriculture.

This also means further wholesale bankruptcies and liquidation on an unparalleled scale because of our high debt level. In 1929, our total debts, both public and private, in the United States totalled 203 billion dollars, or 56 per cent of our national wealth of 386 billion dollars, according to estimates of Warren and Pearson of Cornell University. Today they tell us, the national wealth has shrunk until it is worth scarcely half that amount. Thus our debts now are equal to the value of our property.

Furthermore, our dollar has become so dear in exchange for the currencies of other countries, and we have acquired so much of the world's store of gold at the expense of the stocks of other countries, that other nations cannot buy our products. How can we trade with other countries of the world when they have no gold. Our export trade has fallen off 54 per cent in value and 35 per cent in volume since 1929. Unless our dollar is restored to a fair value, we will have to enact higher tariffs to protect us against the imports of commodities from countries with depreciated currencies. Already numerous industries are clamoring for such protection and various bills are pending in Congress to bring this about.

Need An Honest Dollar

To avoid this terrifying prospect, we must have an honest dollar. A dollar which purchases 64 cents worth one year and $1.52 worth another year is dishonest. A dollar which makes the debtor today pay back $202 for each $100 borrowed in 1929 is dishonest. The price level must be restored until the dollar is worth the same amount as it was when our debts were contracted.

All the relief measures thus far passed by the Congress have been drawn in the interest of the creditor class. Millions of debtors are sacrificed on the altar of the benefit of those contr financial structure of the The debtor and creditor mutual relationship. If yo one you destroy both, ultim

Its provisions are briefly
:

Emergency Agricultural Bill

RARY EMERGENCY BILL—
ill is a temporary relief
for a one year period,
such time as Congress can
enact, and place in full
, a permanent plan for
al relief.

NTS TO FARMERS—The
des for immediate direct
to the farmer on that
his production of wheat
n and hogs for the pres-
ent year that will be used for domestic consumption. These adjustment payments will be equal to tariff rates,—5c a pound for cotton, 42c a bushel for wheat, and 2c a pound for hogs. The Bill imposes a tariff rate of 5c a pound on short staple cotton for which at present no tariff exists.

ECONOMIC RESULTS—The Bill being a temporary one-year measure and acreage for the present year having been planted, the Bill cannot result in stimulation of production. Neither does the Bill fix prices nor alter the existing marketing machinery. It will, however, give the farmer an additional return for the period of a year upon the three basic commodities whose prices have controlling effect on all agricultural commodities. In thus improving the condition of agriculture, it is believed that the measure will have a marked effect in relieving the present national economic emergency in industry, transportation, employment, and finance, as well as agriculture.

MACHINERY OF BILL—The Secretary of Agriculture will estimate and proclaim, on the basis of existing statistics, the percentage of the present year's production of cotton, wheat, and hogs that will be used for domestic consumption. If, using wheat as an example, the Secretary proclaims that 75% of the wheat will be so used, then the farmer, under the terms of the Bill, will receive upon satisfactory proof of government agents, designated by the Secretary of Agriculture, a certificate covering 3 out of every 4 bushels of each lot of wheat marketed by him. All the farmer will need to do is to prove to the representative of the Department of Agriculture that he has marketed a particular lot of, say, 100 bushels of wheat produced by him. Thereupon there is issued a certificate covering 75 bushels. The certificate is redeemable at any fiscal agency designated by the Secretary of the Treasury, for 42c for each of the 75 bushels, less certain small administrative costs hereinafter referred to. Redemption may occur at any time after 30 days, and not more than one year, from the date of issuance of the certificate. The certificate would obviously be the highest type of collateral for loans. These adjustment certificates would be issued to the farmer with regard to all wheat, cotton, and hogs marketed by him (commencing 15 days after the passage of the Bill,) whether of this year's production or from hold-over production.

NO ADDED BURDEN ON TREASURY—The moneys for the redemption of the certificates are obtainable from a tax, called an adjustment charge, levied upon all processing of wheat, cotton, and hogs in a like amount to the adjustment payments, that is, 42c a bushel for wheat, 5c a pound for cotton, and 2c a pound for hogs. Compensatory charges are placed on silk and rayon. If the processed product is exported, the adjustment charge is refunded; if the commodity is processed in bond for export, no adjustment charge is collected on its processing. The charge in effect is thus applied only to processing for domestic consumption. The receipts from the adjustment charges will be placed in separate commodity funds whose proceeds will be used to redeem the certificates. Any temporary advances necessary to redeem the certificates, pending the receipt of sufficient processing charges, will be made by the Treasury. There will, however, be no deficits or unbalanced budget resulting, for the reason that the charges on processing will continue to be imposed until their aggregate amout will equal the total amounts payable upon the adjustment certificates issued to the farmer.

ADMINISTRATIVE COSTS— An amount, not to exceed 2½% of the processing charges, may be used for administrative expenses. This amount will be estimated in advance by the Secretary of the Treasury and payments to the farmer reduced pro rata. Such pro rata reductions at their maximum would approximate, in the case of wheat 1c a bushel, in the case of cotton 1/10 of a cent per pound, and in the case of hogs 5/100 of a cent per pound. The Bill creates no new administrative machinery but merely makes use of existing governmental agencies.

The Marketing Act

Up to the time the Marketing Act was passed by the Congress, practically all the legislation enacted for the benefit of agriculture was either of an educational or a credit nature. The Marketing Act while not entirely satisfactory opened the way for the development of cooperative marketing organizations, so as to give agriculture some chance to more ably compete in the markets of the world. Agriculture makes liberal use of credit and must continue to have credit, but with periods of low prices, such as we have experienced lately, credit is of little use when the farmer or business man cannot make enough out of the money borrowed to pay the interest. The Marketing Act and the measure above referred to strike more directly at the agricultural problem than any legislation enacted up to this time.

We are told that what the country needs is CONFIDENCE, that a restoration of CONFIDENCE is all that is needed to stop the forces of depression and restore prosperity. My friends, confidence cannot be restored by talking about it. We must give the people something in which to have confidence.

How Have Confidence

How can the farmers have confidence when farm prices are going down, down, down, farther and farther below the cost of production? How can they have confidence when they are unable to pay their taxes and interest, and when they are losing their homes? How can they have confidence when a dishonest dollar forces them to pay back from three to five times as much as they borrowed in terms of commodities? How can they have confidence when the responsible leaders in government who are clothed with the power to act to bring relief, ignore their desperate condition and do nothing fundamental to bring them real relief?

When the political and financial leadership of this country does something to really inspire confidence, when it goes to the root of this problem, and takes some fundamental steps to remove the causes of the depression, then, and then only, will confidence return to the people. We must get down to the grass roots and restore the prices of agricultural products. Nothing else will avail.

Agriculture's patience is well-nigh exhausted. She has been long-suffering but she cannot longer tolerate delay and inaction. You folks out on the farms know why. It is because the present condition of agriculture is intolerable.

Others Helped, Not Farmer

Congress and the President came to the rescue of foreign governments and granted them a moratorium on their war debts to us, involving billions of dollars of obligations. They came to the rescue of the railroads, the banks, and the industrial corporations by loans out of the Federal Treasury to the tune of three billion eight hundred million dollars. They came to the rescue of the banks by passing the Glass-Steagall bill to help them meet the demands upon them for gold and thaw out some of their frozen assets. But what benefits have trickled down through these so-called relief measures to the farmers in the country and to working people in the cities and towns? Have they kept farm prices from going down? Have they checked the increasing number of forced sales of farms? Have they relieved unemployment or given people more work? What good is this great pile of gold—78 per cent back of our currency—if it is not put to work for humanity? What good is it? For humanity to worship as children of Israel worshipped the golden calf? If this condition is not relieved, it will destroy our form of Government.

The answers are obvious—farm surpluses pile up; farm prices and purchasing power still decline; unemployment increases; wages decline; property values shrink; despair and dismay seize upon the people, and discontent rises with an ominous tide.

Agriculture and labor cannot be made prosperous by relieving the banks, the railroads, and the great corporations alone. These two great economic groups are not content with picking up the crumbs from Industry's table. The way to make the nation prosperous is to restore the purchasing power of the farmers and the workers. All new wealth comes from the soil, the mines, or the sea. Agriculture is our basic industry. When you destroy it you destroy the nation. The first steps toward a new day is to restore the buying power of agriculture, our basic industry, upon which the economic welfare of one-half of our population depends.

My friends, we have come to a critical point in the history of our great nation. The future welfare of our country trembles in the balance. The very future of domestic government may be at stake.

A Great Conflict

We are in the midst of a great conflict—a conflict that is more bitter, more sinister, more far-reaching in many respects than an armed conflict. It is a struggle for the domination of this nation, between the forces of entrenched greed and special privilege on the one hand, and the masses of the people on the other hand. Powerful banking and industrial interests who have dominated our financial and economic policies for many years, are determined to maintain their strangle-hold upon the economic life of this country and maintain their privileged position, and are unwilling to give agriculture and labor their fair share of the national income.

They are the Bourbons of today that the masses should sweat and toil for their benefit. They are the ones who, if they continue in control, will destroy democracy and bring on revolution.

A great responsibility rests upon us all in these critical days. Our forefathers were true to the test—they braved the hardships and made the necessary sacrifices to win political freedom. We celebrate this year the bicentennial of the birth of George Washington, who led a brave and intrepid people in a successful battle against tyranny and oppression.

Against Economic Oppression

Today we also are in a battle for freedom, a battle for economic freedom. That was a battle of principle fought by bullets; this is a battle of principle fought by ballots. That was a battle against political oppression; this is a battle against economic oppression. God has blessed us with the richest nation of the world, with the greatest people.

Patient Too Long

Too long organized agriculture had faith, hope and charity. Too long organized agriculture displayed these great virtues. At last organized agriculture finds that it must fight for its own and for our nation to secure the adoption of the golden rule as the first principle of our economic life.

During the morning hours of that first Fourth of July, the bell ringer impatiently waited in the old State House tower. For days he had hoped for a signal that action had been had by the Continental Congress. He had grown weary as he waited for the signal. On previous days he had stayed at his post and no one had come. Would the Continental Congress declare freedom and independence? He had repeated over and over again—"They will never do it; they will never do it." At last from below, he heard the voice of his grandson, crying out—"Ring Grandpa—Ring." See that old bell ringer—swing the iron tongue—hear the tramping on the crowded streets—hear every church steeple re-echo the peals of freedom. Possibly it is not a mere coincidence that on the shoulder band of that old bell was cast that classical text of scripture — "Proclaim Liberty throughout the land and to all inhabitants thereof."

Today in this city and county, and throughout the other counties of the commonwealth, the spirit of

(*Continued on page 4, Col. 7*)

BUSINESS AND CIVIC GROUP

FARMERS PROVE ABILITY TO JOIN LIBERTY FIGHT

Parades and Floats Surpass Expectations, Members Show Most Enthusiasm

By Larry Williams

Never in the history of farm organization has a better atmosphere for cooperation been developed than in Illinois as a result of the Dedication Day celebration. From Rockford to Cairo, and from Danville to Quincy there is a spirit of determination apparent, and enemies who oppose the farmer in his organization for co-operative marketing and betterment are inclined to keep mum.

The Liberty Bell of 1932 is established through the entire state, and the lowly farmers' dinner bell has been glorified. Nothing but praise for the demonstration has reached our ears, and that praise is most enthusiastic. The cooperation of leadership and membership was wonderful. In several counties doubting leaders were swept off their feet by enthusiastic members who carried forward Dedication Day plans.

Chambers of Commerce and civic organizations almost everywhere in Illinois gave moral as well as practical support to the campaign, realizing as they did that prosperity must begin with the farmer. The newspapers of the State were most liberal in their support, and numerous papers had special issues for the occasion.

Salesmen Good Workers

Country Life agents, auto insurance agents, truck drivers, and managers of farm supply companies did noble duty on the firing line. Scores of them won watches for signing more than ten new members. They put up advertising placards and gave unstinted support in putting over the celebration.

On June 30 before Demonstration Day 1200 Minute Men met in Centralia for a rally. Twenty counties were represented by generous delegations. Twenty Farm Bureau presidents were on the rostrum. They had met to hear President Earl C. Smith address them. Unfortunately he was called to Washington. The good news of a favorable chance for the Rainey Bill that took him to Washington helped me satisfy the audience as a substitute speaker.

Parades Exceed Expectations

If you thought the Demonstration Day Parade was to be a mere dog and pony show affair you must have been amazed at the sight that greeted your eyes on the morning of the fourth. Floats that did credit to genius moved before you, telling the demands of agriculture, telling its plight and need of remedial action. There were banners and more floats showing the accomplishment of organization and visualizing greater accomplishment if all farmers would join. Dinner bells, dinner bells, and more dinner bells rang out the demand of farmers for fairness in prices and an equal chance with the other industries that have enjoyed the support of governmental agencies.

About two o'clock in the county seats of the State approximately 90 speakers told of organized farmers' battle for lower taxes, for higher prices and favorable legislation. All paid tribute to the Father of his Country, and the spirit that brought about the Declaration of Independence. They pleaded for a revival of that spirit to win with men standing in organized power as their forefathers won their decisive victories always celebrated on every Fourth of July.

Great as was the day, great as was the demonstration, still all unanimously felt it was just the beginning of a fight to recruit every farmer in the line-up of organization. They determine wherever you hear talk of the Demonstration Day, that they will drive on to complete the job of organization. They now know it can be done, and that our leaders shall be backed by the great majority of farmers when they present legislative demands and economic measures to rehabilitate and maintain agriculture.

Opposition Bitter But Weak

Where now is the poison fang of the opposition which threatened dire result to farmers who attempted to get their just dues by resorting to organization and cooperation.

Do a half million parading farmers impress them? They strike, but vainly, at the rocks where they hide. They hiss their bitter attacks, but harmlessly they echo back to them. Their rattles fall on ears that hear, but heed not. Indeed, the laugh of knowing farmers who have found their strength greets each hiss of the recoiling enemy. Gone is the day when speculators and middlemen shall wax fat on farmers' just share of the consumer's dollar. Done is their game of posing as friend only to bleed to weakened life ebb those who would toil to feed the world.

"Together we Stand" is the Farm Bureau war cry. "Fair prices for our sake and for America's sake." "Our own markets clear through to our own terminals." "Fair legislation and a fair chance for America's basic industry." All through the atmosphere of Illinois these cries are wafted and the fight goes on until the end shall see victory for organization complete and a happier America.

BIGGEST CELEBRATION IN HISTORY OF FARM BUREAU IN ILLINOIS

(*Continued from page* 1, *Col.* 7)

dent, Dick Nietfeldt, one of our directors, J. C. Precht, and Mr. and Mrs. Henry Schilf each signed 10 or more members. We claim a state record for the Schilf family. Joint celebration with Blue Island, parade two to three miles long, six bands, escort of 60 motorcycles.

Lake County—Parade four miles long, toured county over 70 mile route, witnessed by 70,000 people. Splendid afternoon program.

Madison County reports big parade and program at Edwardsville. Parade headed by Edwardsville post American Legion. Troy drum and bugle corps of 30 pieces near head of parade. Music by Carpenter, Ill. band. 4-H club members in march. Farm Bureau officers on receiving stand. Seven floats made up for parade. Uncle Joe Fulkerson afternoon speaker. Program followed by baseball game between Farm Bureau and American Legion. Fifty new members, more coming.

Morgan County—Parade required an hour to pass in review. All business men in county co-operating 100 percent. Charley Black, I. A. A. director, marshal of day. Burning in effigy of Old Man Indifference, Unjust Taxes, Low Prices, Enemies of Co-operative Effort, and Insidious Propaganda featured 3:15 program. All purpose farm wagon, chest of silver, and bicycle for boy or girl given away in afternoon. L. R. Marchant gave principal address.

Adams County—L. A. Williams, speaker, reports 20,000 people witnessed parade—4 to 5 miles long. Parade contained 5,000 people who attended afternoon program. Mayor of town welcomed group. Fine cooperation from city, 52 dinner bells in parade, floats excellent. Wonderful co-operation from newspapers in playing up celebration and report of it afterward. Daily Times had special edition. Quincy Herald-Whig had editorial and considerable space given to it. Sam H. Thompson spoke for 6 minutes to his neighbors. Hung in effigy "old-man indifference," "high taxes," "low prices," etc.

McLean County—Huge success, parade four miles long, greatest in Bloomington history reports "Rusty" Laible, farm adviser. Weather excellent. Mrs. Sewell speaker rang the bell. One hundred forty-five new members, total now 2,076.

Sangamon County—Earl Smith, president of the I. A. A., speaker, reports crowd estimated at 11,000 to 15,000 people, held at Caldwell's Grove. Legion and business groups co-operated in splendid parade through Springfield.

Crawford-Jasper — 18 floats 350 cars parade over one mile long crowd estimated at five to seven thousand.

Pulaski-Alexander—16 new members signed today more will be reported later.

Coles County—Big parade 10,000 attendance at Mattoon, wires Melvin Thomas.

Lawrence County—Parade 5 miles long business men co-operating hundred per cent. The Lord has joined our Farm Bureau. Rained Sunday to stop farming. Weather fine today. Hundred floats and decorated cars. Parade through Lawrenceville, Bridgeport to picnic Summer Park.

Cumberland County—Fourth of July celebration big success, record attendance large floats good drum corps perpetuated since Lincoln's time lead parade all details of celebration carried out in detail in spite of fact that the Farm Adviser was absent due to the death of his mother favorable comments everywhere among crowd.

Champaign County — Twelve thousand people at Crystal Lake Park, Urbana. Largest and most attentive gathering ever held in Champaign Co. exceeded all our expectations. Not a single mishap or traffic accident.

Parade started with police escort, Farm Bureau president, Marshal of Day, Flag Bearer and escort all on horseback followed by band, Farm Bureau dinner bell float done with white background, blue shields, and trimmed with masses of red hollyhocks and 350 pound dinner bell. Parade lasted over hour. Four miles of cars, 53 floats. Twenty-four unit organizations represented Farm Bureau and 7 subsidiary organizations in parade. Two Associations of Commerce and city and county officials co-operated. Will agriculture come out OK? One man said Jonah did. Thirty new members to date.

Warren County: Ten thousand people crowded into Monmouth Park for big celebration. Registration and parade held at public square. Many floats and decorated cars. J. V. Stevenson, Streator, proved an able, eloquent speaker.

Effingham County: Parade three miles long with 1,000 cars. Lazy Farmer, John Turnipseed, and Slim and Spud marched with George Washington in parade.

Moultrie County: More than 5,000 joined in parade and celebration at Wyman Park. Burned enemies of agriculture in effigy. Frank Barton speaker.

DeWitt County: Five men signed 10 or more members each. Celebration a great success. Business men and local groups co-operating.

Jackson County: The celebration July 4 went off nicely. Had four special floats and many decorated trucks and cars. Parade about a mile long. About 4,000 people.

Jefferson County: Local groups co-operated in great celebration. Biggest crowd in Farm Bureau history. Ten thousand people. Special issue Mt. Vernon Register-News.

LaSalle: Many dinner bells and floats in our big two-mile parade through Ottawa. Four thousand people took part. More than 100 new members joined.

Wayne County: Fine celebration and two mile parade—3,000 people present.

Union County: Great parade and wonderful spirit. More than 2,500 present.

Henderson County: More than 3,000 people out for our big parade with 15 floats, two bands, and over 100 cars.

The three horsemen leading Whiteside County's Parade are A. L. Goodenough, president, T. H. Adams and R. A. Norrish, former Farm Bureau presidents. Left to right on top are Will, Dupage and Champaign county floats respectively. In the corners below are pictures of "John Barleycorn's Resurrection" from Monroe county.

of service, are not following the communistic road. They believe in private property and private initiative. But if the rest of their property is to be taken away from them by the cruel process of deflation, if their debtors exact the impossible price of payment in dollars of doubled size, if every door is locked against them when they ask only for a chance to work—then what?

Property rights mean more than the property rights of Wall Street. Private opportunity does not mean the opportunity to cheat and rob and confiscate the earnings of our weaker fellows.

Where Danger Lies

The red flag will never wave over the farmers and the working men of America. Their flag is the Stars and Stripes that they have so often fought for. Their symbol is the Liberty Bell that has been ringing out a new allegiance to the faith of our fathers all over Illinois on this Fourth of July.

No, there is no red menace in this country. The menace that threatens us is of another color. It is the golden calf that stands enshrined in the councils of the money kings. It is the god of speculation that rules over the New York stock exchange. Its flag is the black pirate flag of the exploiters of the common people.

It is in that direction that our danger lies.

We stand at Valley Forge, with ragged clothes and bleeding feet. But our hearts beat with high courage; our souls flame with the fire of a righteous cause.

The farmers are marching, under the flag of George Washington and Abraham Lincoln, and the spirit of the fathers marches with them. They are leading a fight for the honest working people of a great nation—a nation that they love because they made it great. And with them marches the lord of Hosts, leading his people to a brighter day when the Golden Rule shall replace the law of the jungle, when the bright stars and stripes shall banish the black flag of financial piracy, when honest toil shall enshrine the American home in place of the golden calf as the symbol of the nation's glory.

RESTORED FARM PRICE LEVEL IS KEY TO RETURN OF PROSPERITY

(*Continued from page* 3, *Col.* 7)

this text is dominant, and the old Liberty Bell is ringing again for AGRICULTURE.

None can expect the needs of organized millions to be recognized if they cannot and will not in common agree and voice their demands.

The path of every farmer is outlined clearly. His part in the war for justice is definitely set forth. His place is in line with his millions of fellow workers in one great army under one banner, fighting for one cause.

Diffusion of power means defeat. United effort means victory.

The farmers in Illinois have been laboring for twenty years to get this need of organization over to the thousands of indifferent farmers.

Today all over Illinois in gigantic demonstration we are turning the tide toward a long delayed victory.

The needs of agriculture can only be met in this organized age through the masses of farmers uniting in a militant and aggressive organization dedicated to their cause.

Pres. Smith Injures Eye

A few minutes before starting his address President Earl C. Smith suffered a painful injury to his right eye caused by the explosion of a torpedo at the Sangamon County Farm Bureau Dedication Day program in Caldwell's Grove south of Springfield.

Mr. Smith was given first aid by a doctor on the grounds and refused to leave until after he had delivered his address. The eye is responding to treatment and it is hoped no permanent injury will result.

Mr. Smith also spoke briefly in the evening at a meeting of Central Illinois Odd Fellows Lodges on the State Fair grounds.

HAIL AND RAIN DO BIG DAMAGE

Central Illinois Was Visited by Heavy Rain and Hail Storm Tuesday Afternoon.

This city and section of Central Illinois were visited by a heavy electrical and rain storm and some sections to the west of Pana by a heavy hail storm Tuesday afternoon, causing serious damage to gardens, the growing corn and young ripening fruit.

Pana's streets were turned into rivers in some sections by the downpour, the sewers being inadequate to carry off the water, so heavy was the fall. Lightning flashed and many trees were reported struck, but no great damage was reported.

In the section to the northwest

Hail, Wind Damages Crops and Homes

WORST STORM OF KIND FOR MANY YEARS BREAKS WINDOWS AND CUTS CROPS SATURDAY AFTERNOON

Hail Storm In Vienna Township Destroys Crops

Territory Three Miles Long, Mile Wide Is Damaged

A heavy hail storm that struck a portion of Vienna township yesterday shortly after 1 o'clock destroyed the crops of farmers in a territory about 3 miles wide and over a mile long.

Hail Finishes Up the Strawberries; More Rain Today

Many cases of strawberries were destroyed here Saturday by the early morning hail which accompanied the thunder storm. Strawberry growers were expecting to make their final picking of the season Saturday but when they went to the berry beds after the storm they found the ripened berries mashed flat by the hail.

About one inch of rain fell during the Saturday morning storm and another electric storm which visited us between 2 and 3 o'clock this morning added another inch

When HAIL *Comes, Who Will* STAND THE LOSS?

EVERY hail storm destroys. If it is on your farm, the loss is **all yours**—unless you are insured. You can prevent loss by buying insurance against crop damage. Your Farm Bureau makes possible exceptionally low rates.

Only $4 Cash Required

A Cash payment of only $4 per $1,000 of insurance is paid with application. A postdated check for the balance of $16, payable October 1 (less 5% for payment when due), gives full security on your crop up to $1,000 hailstorm damage. This rate applies to corn and small grains—soybeans slightly higher. This represents a 30 per cent saving to you.

Farm Buildings and Property

For your protection against fire, windstorm, tornado and hail damage to Farm Buildings and Property, a separate policy is available in this Company. Ask about it. We also reinsure Township and County Mutual Companies, underwriting all or part of the risks which they consider too large for safety.

Write for our special folder. It tells you how hail losses are computed and paid. Save money by insuring in your own Company, backed by 60,000 Farm Bureau members and the Illinois Agricultural Association.

Still Hope for Higher Prices

A Review of the Fight for Emergency Legislation Made by the Illinois Agricultural Association in the Last Congress

HOPE and belief that the insistent demand of organized Illinois farmers that something be done to restore farm price levels to a reasonable basis may yet be answered were expressed by President Earl C. Smith on his return from Washington as Congress adjourned.

While the Rainey-Norbeck bill was defeated, Mr. Smith pointed to the little understood provision in the general relief bill now enacted into law which has "far-reaching possibilities, through loans for the sale of accumulated and recurring farm crop surpluses, in bringing about an early upturn in farm prices."

Before leaving Chicago to spend a week at his home in Pike county to give attention to personal affairs, Mr. Smith addressed a letter to Hon. Arthur M. Hyde, Secretary of Agriculture, urging that efforts to make effective the provisions of the act be immediately inaugurated.

This letter is of such importance that it is reproduced in full on this page.

Began in May

The determined fight made by the Illinois Agricultural Association under the leadership of Mr. Smith to compel Congress to give some attention to the immediate plight of agriculture began early in May. It was recognized at the outset that the chief obstacle to an early rise in farm prices was the accumulation of farm crop surpluses in the United States.

"When we arrived at Washington the first of May we recognized that the end of the present Congress was fast approaching," said Mr. Smith. "Up to that time very little serious consideration had been given by the Congress to the condition of agriculture. Its deliberations had been confined almost entirely to the relief of banks, railroads, insurance companies and other large corporations. There had been almost a total failure to give the farmer any consideration although half the population of the country is directly dependent upon agriculture," continued Mr. Smith.

The relief bill amending Reconstruction Finance Corporation Act then pending disclosed practically nothing for the relief of the agricultural industry. Therefore an effort was made immediately to place in this measure some provision for the disposal of farm crop surpluses.
